C. Pachetul de servicii medicale de bază

C1. Consultaţia medicală de specialitate

Consultaţia medicală de specialitate se acordă pe baza biletului de trimitere de la medicul de familie sau de la alt medic de specialitate numai pentru cazurile în care asiguratul a avut biletul de trimitere iniţial eliberat de medicul de familie şi numai în condiţiile în care medicul trimiţător se află în relaţie contractuală (contract sau convenţie) cu casa de asigurări de sănătate. Fac excepţie de la prevederile anterioare cazurile de urgenţă medico-chirurgicală şi consultaţiile pentru afecţiunile confirmate prevăzute în anexa nr. 9 la ordin, respectiv cele din anexa nr. 39 A, serviciile de medicină dentară, precum şi serviciile de acupunctura, homeopatie, fitoterapie şi planificare familială care permit prezentarea direct la medicul de specialitate din ambulatoriu. Pentru pacienţii din statele membre ale Uniunii Europene/din Spaţiul Economic European, titulari ai cardului

european de asigurări de sănătate, în perioada de valabilitate a acestuia, respectiv beneficiari ai formularelor europene emise în baza Regulamentului CE nr. 883 al Parlamentului European şi al Consiliului din 29 aprilie 2004 privind coordonarea sistemelor de securitate socială respectiv în baza Regulamentului CEE nr. 1408/1971 referitor la aplicarea regimurilor de securitate socială salariaţilor, lucrătorilor independenţi şi membrilor familiilor acestora care se deplasează în interiorul comunităţii, după caz precum şi din alte state cu care România a încheiat acorduri, înţelegeri, convenţii sau protocoale internaţionale cu prevederi în domeniul sănătăţii nu se solicită bilet de trimitere decât pentru consultaţiile şi serviciile medicale de recuperare-reabilitare a sănătăţii. Prezentarea pacientului la medicul de specialitate la solicitarea acestuia, pentru a doua şi a treia consultaţie în vederea stabilirii diagnosticului şi/sau tratamentului, se face direct, fără alt bilet de trimitere.

Biletul de trimitere este formular cu regim special, unic pe ţară, care se întocmeşte în trei exemplare. Un exemplar rămâne la medicul care a făcut trimiterea şi două exemplare sunt înmânate asiguratului, care le depune la furnizorul de servicii medicale clinice. Furnizorul de servicii medicale clinice păstrează un exemplar şi depune la casa de asigurări de sănătate celălalt exemplar cu ocazia raportării lunare a activităţii.

Consultaţia medicală de specialitate cuprinde:

- anamneza, examenul clinic general, examenul clinic specific specialităţii respective, stabilirea protocolului de explorări şi/sau interpretarea integrativă a explorărilor şi a analizelor de laborator disponibile efectuate la solicitarea medicului de familie şi/sau a medicului de specialitate, în vederea stabilirii diagnosticului;
- unele manevre specifice pe care medicul le consideră necesare;
- stabilirea conduitei terapeutice şi/sau prescrierea tratamentului medical şi igieno-dietetic, precum şi instruirea în legătură cu măsurile terapeutice şi profilactice.
- evaluare clinică şi paraclinică, prescrierea tratamentului şi urmărirea evoluţiei bolnavilor cu afecţiuni cronice, în limita competenţelor, trimestrial sau, după caz, lunar, conform prevederilor legale în vigoare;

Nota I: pentru cazurile acute/subacute

1. Pentru acelaşi episod de boală acută/subacută, casa de asigurări de sănătate decontează maximum 3 consultaţii pe asigurat, şi necesare pentru stabilirea diagnosticului, a tratamentului şi a evoluţiei cazului. Numărul maxim de 3 consultaţii se poate acorda cumulat atât la nivelul medicului de familie, cât şi la nivelul medicului/medicilor de specialitate din ambulatoriul de specialitate pentru specialităţile clinice, astfel:

- dacă medicul de familie a acordat o consultaţie, medicul de specialitate poate acorda maximum două consultaţii sau poate acorda o singură consultaţie şi poate elibera bilet de trimitere, dacă este necesar, numai către un singur medic de o altă specialitate din ambulatoriul de specialitate pentru specialităţile clinice;
- dacă medicul de familie a acordat două consultaţii, medicul de specialitate mai poate acorda o singură consultaţie şi nu poate elibera bilet de trimitere către o altă specialitate.

Circuitul privind modalităţile în care pot fi acordate cele 3 consultaţii se referă numai la un singur episod de boală acută /subacută.

În situaţiile în care la o consultaţie se diagnostichează două sau mai multe afecţiuni acute/ subacute, numărul consultaţiilor decontate de casa de asigurări de sănătate este maximum 3.

În situaţia în care în derularea unui episod de boală acută/subacută după prima sau a doua consultaţie apare o altă afecţiune acută/ subacută, numărul consultaţiilor este maximum 4, respectiv 5.

În situaţia în care există prezumţia privind existenţa unei alte afecţiuni asociate, medicul care suspicionează va consemna distinct pe biletul de trimitere numărul de consultaţii pentru afecţiunile acute/ subacute pentru care pacientul s-a prezentat iniţial.

2. Casele de asigurări de sănătate suportă contravaloarea a maximum două consultaţii pentru cazurile cu diagnostic deja confirmat, la externare, sau pentru cazurile care necesită urmărirea evoluţiei sub tratament a pacientului în ambulatoriu.

Consultaţia pentru cazurile care necesită urmărirea evoluţiei sub tratament a pacientului în ambulatoriu se acordă:

- pentru efectuarea unor manevre terapeutice sau administrarea unor tratamente stabilite de medic cu ocazia consultaţiilor acordate pacientului pentru stabilirea diagnosticului, atunci când este necesară prezentarea repetată a pacientului la cabinet;
- la externare, inclusiv după o intervenţie chirurgicală sau ortopedică, pentru examenul plăgii, manevre chirurgicale minore şi scoaterea firelor, scoaterea ghipsului."

Medicul de specialitate are obligaţia de a informa medicul de familie, prin scrisoare medicală, despre planul terapeutic stabilit, la un interval de 3 - 6 luni, după caz.

Pentru situaţiile de mai sus nu este necesar bilet de trimitere.

Nota II: pentru asiguraţii cu afecţiuni cronice

1. Pentru evaluare clinică şi paraclinică, prescrierea tratamentului şi urmărirea evoluţiei bolnavilor cu afecţiuni cronice, casele de asigurări de sănătate decontează pentru un bolnav cu una sau mai multe afecţiuni cronice, o consultaţie şi prescripţia/prescripţiile medicale aferente, trimestrial sau lunar;

2. Pentru evaluarea clinică şi paraclinică a bolnavilor cu afecţiuni cronice, casele de asigurări de sănătate decontează o consultaţie / trimestru pentru un bolnav cu una sau mai multe afecţiuni cronice şi prescripţia/prescripţiile medicale aferente consultaţiei, dacă acesta, în trimestrul respectiv, nu a beneficiat de nicio consultaţie în condiţiile prevăzute la pct. 1.

3. Pentru asigurarea serviciilor medicale necesare pentru bolnavii cu afecţiuni cronice monitorizabile la nivelul caselor de asigurări de sănătate prin cabinetul medicului de specialitate, prevăzute în anexa nr. 39 A la ordin, acesta va organiza evidenţa specifică, utilizând formularele de raportare aprobate prin ordin al preşedintelui Casei Naţionale de Asigurări de Sănătate. Evidenţa acestor bolnavi cuprinde:

- întocmirea listei şi depunerea acesteia la contractare;
- raportarea lunară a modificărilor intervenite/mişcarea lunară/intrări/ieşiri

4. Casele de asigurări de sănătate suportă contravaloarea a maximum două consultaţii pentru cazurile cu diagnostic deja confirmat, la externare, sau pentru cazurile care necesită urmărirea evoluţiei sub tratament a pacientului în ambulatoriu.

Pentru situaţiile de mai sus nu este necesar bilet de trimitere.

Nota III: Asistenţă medicală de urgenţă (anamneză, examen clinic şi tratament), în limita competenţei şi a dotării tehnice a cabinetului medical în cadrul căruia îşi desfăşoară activitatea medicul de specialitate. În situaţia în care cazurile nu pot fi rezolvate la nivelul cabinetului sau depăşesc competenţa medicului de specialitate, acesta asigură trimiterea pacientului către structurile de urgenţă specializate.

Medicaţia pentru cazurile de urgenţă se asigură din trusa medicală de urgenţă, organizată conform legii.

Cazurile de urgenţă medico-chirurgicală care se trimit către structurile de urgenţă specializate, inclusiv cele pentru care se solicită serviciile de ambulanţă, sunt consemnate ca „urgenţă” de către medicul de specialitate în documentele de evidenţă de la nivelul cabinetului, inclusiv medicaţia şi procedurile medicale administrate la nivelul cabinetului, după caz.

Se raportează şi se decontează o singură consultaţie per persoană pentru fiecare situaţie de urgenţă constatată şi rezolvată la nivelul cabinetului.

Numărul de puncte pe consultaţie, valabil pentru pachetele de servicii:

În situaţia în care adresabilitatea asiguraţilor la cabinetul medical depăşeşte nivelul prevederilor menţionate mai sus se vor întocmi liste de prioritate pentru serviciile medicale programabile sau la cererea asiguratului, se pot acorda consultaţii şi servicii medicale contra cost.

(2) Serviciile conexe actului medical pot fi raportate de medicii de specialitate care le-au solicitat, în vederea decontării de casele de asigurări de sănătate cu care aceştia sunt în relaţie contractuală.

Punctajul aferent serviciilor conexe actului medical care pot fi raportate de medicul de specialitate care le-a solicitat nu poate depăşi 40 de puncte în medie pe zi, cuvenite celui care le prestează, reprezentând consultaţii şi/sau servicii, după caz.

Pentru desfăşurarea activităţii, un furnizor de servicii medicale clinice poate avea relaţii contractuale cu unul sau mai mulţi furnizori de servicii conexe.

Pentru desfăşurarea activităţii, furnizorul de servicii conexe poate avea relaţii contractuale cu unul sau mai mulţi medici din specialităţile clinice care pot solicita servicii conexe.

Pentru asigurarea calităţii în furnizarea serviciilor medicale, la contractele furnizorilor de servicii medicale clinice, încheiate cu casele de asigurări de sănătate, se vor anexa: acte doveditoare privind relaţia contractuală dintre furnizorul de servicii medicale clinice şi furnizorul de servicii conexe actului medical, din care să reiasă că îşi desfăşoară activitatea într-o formă legală la cabinetul medicului specialist, sau ca prestator de servicii în cabinetul de practică organizat conform Ordonanţei de urgenţă a Guvernului nr. 83/2000 privind organizarea şi funcţionarea cabinetelor de liberă practică pentru servicii

ART. 4 (1) Suma cuvenită lunar medicilor de specialitate din specialităţile clinice se calculează prin înmulţirea numărului total de puncte realizat, cu respectarea prevederilor art. 3, în luna respectivă, ca urmare a serviciilor medicale acordate cu valoarea minimă garantată pentru un punct pe serviciu medical.

(2) Numărul total de puncte realizat în fiecare lună se majorează în raport cu:

a) condiţiile în care se desfăşoară activitatea - majorarea este cu până la 100%, pe baza criteriilor aprobate prin Ordin al ministrului sănătăţii publice şi al preşedintelui Casei Naţionale de Asigurări de Sănătate în vigoare.

Lista cuprinzând cabinetele medicale din asistenţa medicală ambulatorie de specialitate la care se aplică majorările de mai sus şi procentul de majorare corespunzător se stabilesc anual conform prevederilor Ordinului ministrului sănătăţii şi al preşedintelui Casei Naţionale de Asigurări de Sănătate mai sus menţionat;

b) gradul profesional, pentru care valoarea de referinţă a prestaţiei medicale este cea a medicului specialist. Pentru prestaţia medicului primar, numărul total de puncte se majorează cu 20%. Această majorare nu se aplică medicilor care lucrează exclusiv în: fitoterapie şi homeopatie, planificare familială, precum şi furnizorilor de servicii conexe actului medical. Recalcularea numărului total de puncte se face din luna următoare lunii în care s-a depus la casa de asigurări de sănătate dovada confirmării gradului profesional.

(3) Valoarea minimă garantată pentru un punct pe serviciu medical este unică pe ţară şi este în valoare de 1,2 lei.

(4) Valoarea unui punct pe serviciu medical se regularizează trimestrial, până la data de 25 a lunii următoare încheierii fiecărui trimestru, în funcţie de fondul aferent trimestrului respectiv destinat pentru plata medicilor de specialitate din specialităţile clinice pentru care plata se face prin tarif pe serviciu medical exprimat în puncte şi de numărul de puncte realizat în trimestrul respectiv, şi reprezintă valoarea definitivă a unui punct pe serviciu medical, unică pe ţară pentru trimestrul respectiv. Valoarea definitivă a unui punct pe serviciu medical nu poate fi mai mică decât valoarea minimă garantată a unui punct pe serviciu.

(5) Fondul aferent asistenţei medicale ambulatorii de specialitate pentru specialităţile clinice se defalchează pe trimestre.

ART. 5 (1) Erorile de calcul constatate în cadrul unui trimestru se corectează la sfârşitul trimestrului, odată cu recalcularea drepturilor băneşti cuvenite medicilor de specialitate din specialităţile clinice.

(2) Erorile de calcul constatate după expirarea unui trimestru, în cazul specialităţilor clinice, se corectează până la sfârşitul anului, astfel: suma corespunzătoare numărului de puncte plătit eronat în plus sau în minus faţă de cel efectiv realizat, într-un trimestru anterior, se calculează în trimestrul în care s-a constatat eroarea, la valoarea definitivă a punctului, stabilită pentru trimestrul în care s-a produs eroarea, sumele respective afectând fondul pentru calculul valorii definitive a punctului pentru trimestrul în care s-a constatat eroarea şi implicit valoarea definitivă a punctului pentru trimestrul respectiv.

(3) În situaţia în care după încheierea anului financiar precedent se constată erori de calcul aferente acestuia, sumele plătite în plus sau în minus se regularizează conform legii.

(4) Pentru asigurarea calităţii furnizării serviciilor medicale, pentru asiguraţii care prezintă unul sau mai multe diagnostice confirmate, prevăzute în anexa nr. 9 la ordin, controalele periodice vor fi decontate de casele de asigurări de sănătate, în condiţiile în care acestea vor fi efectuate, raportate şi validate conform reglementărilor legale în vigoare. Excepţie fac situaţiile în care asiguratul solicită în nume propriu şi în scris, efectuarea controalelor periodice la un alt furnizor.

ART. 6 (1) La stabilirea sumei contractate de către :

- un furnizor de servicii medicale paraclinice (de analize medicale de laborator, de investigaţii medicale paraclinice de radiologie-imagistică medicală, de investigaţii medicale paraclinice - explorări funcţionale),
- un furnizor de servicii medicale clinice (prin act adiţional la contractul de furnizare de servicii medicale clinice sau prin act adiţional la contractul de furnizare de servicii medicale spitaliceşti),
- medicii de familie (prin act adiţional la contractul de furnizare de servicii medicale în asistenţa medicală primară)
- un furnizor de servicii de medicină dentară (prin act adiţional la contractul de furnizare de servicii medicale de medicină dentară) cu casa de asigurări de sănătate,

se au în vedere:

a) numărul de investigaţii paraclinice;

b) tarifele negociate;

Numărul de investigaţii paraclinice negociat între furnizorii de investigaţii medicale paraclinice, furnizorii de servicii medicale clinice (numai pentru ecografii şi monitorizarea şi managementul hemodinamic prin metoda bioimpedanţei toracice), medicii de familie (numai pentru ecografie generală - abdomen şi pelvis), furnizorii de servicii de medicină dentară (numai pentru radiografia dentară retroalveolară şi panoramică) şi casele de asigurări de sănătate se stabileşte în limita numărului de investigaţii paraclinice necesar pe total judeţ, determinat de comisia constituită conform art. 44 alin. (5) din Contractul-cadru pentru anii 2011 – 2012 aprobat prin H.G. nr. 1389/2010, cu modificările şi completările ulterioare, cu încadrarea în 90% din suma prevăzută cu această destinaţie.

La stabilirea sumelor contractate cu furnizorii de analize medicale de laborator, respectiv cu furnizorii de investigaţii medicale paraclinice de radiologie-imagistică medicală, casele de asigurări de sănătate vor avea în vedere criteriile prevăzute în anexa nr. 10, respectiv în anexa nr. 11 la ordin.

La stabilirea sumelor contractate cu furnizorii de servicii medicale paraclinice - explorări funcţionale, casele de asigurări de sănătate vor avea în vedere diversitatea serviciilor medicale paraclinice propuse pentru contractare reflectată în tipul de aparate aflate în dotare.

Sumele contractate de casele de asigurări de sănătate cu furnizorii de servicii medicale paraclinice se defalchează pe trimestre şi pe luni.

(2) Numărul investigaţiilor paraclinice negociat este orientativ, existând obligaţia încadrării în valoarea lunară a contractului/actului adiţional. Pentru situaţiile justificate ce pot apărea în derularea contractelor încheiate cu furnizorii de servicii medicale paraclinice, casele de asigurări de sănătate analizează aceste situaţii şi cu avizul Casei Naţionale de Asigurări de Sănătate, la solicitarea acestora, vor încheia cu furnizorii de servicii medicale paraclinice un act adiţional de suplimentare a valorii contractate, utilizând diferenţa de 10% din suma prevăzută pentru serviciile medicale paraclinice care nu a fost contractată, în limita fondului aprobat cu această destinaţie.

(3) Lunar, casele de asigurări de sănătate decontează furnizorilor de servicii medicale paraclinice serviciile furnizate cu obligaţia încadrării în limita valorii lunare de contract.

În situaţia în care la unii furnizori de servicii medicale paraclinice se înregistrează la sfârşitul unei luni sume neconsumate faţă de suma lunară prevăzută în contract/act

adiţional, casele de asigurări de sănătate vor diminua printr-un act adiţional la contract/act adiţional valoarea lunară contractată iniţial aferentă lunii respective cu sumele neconsumate.

Sumele rezultate din economii vor fi contractate printr-un act adiţional cu furnizorii de servicii medicale paraclinice care în aceeaşi lună şi-au epuizat valoarea de contract.

Suma din actul adiţional se utilizează pentru decontarea serviciilor medicale paraclinice acordate asiguraţilor de la data semnării actului adiţional şi se repartizează proporţional în funcţie de consumul mediu lunar stabilit pentru fiecare furnizor de la începutul anului până la sfârşitul lunii pentru care se face regularizarea şi în raport cu valoarea de contract aferentă lunii în care se face regularizarea.

Sumele rezultate din economii de la investigaţiile medicale paraclinice - analize medicale de laborator, de la investigaţiile medicale paraclinice de radiologie şi imagistică medicală într-o lună şi de la investigaţiile medicale paraclinice - explorări funcţionale într-o lună - se redistribuie furnizorilor care în aceeaşi lună şi-au epuizat valoarea de contract.

(4) Furnizorii de servicii medicale paraclinice vor efectua direct toate tipurile de investigaţii paraclinice contractate cu casele de asigurări de sănătate şi nu vor încheia subcontracte cu alţi furnizori de servicii medicale paraclinice pentru efectuarea unor anumite tipuri de investigaţii paraclinice.

(5) Fondurile suplimentare aprobate pentru anul 2011 cu destinaţia servicii medicale paraclinice se contractează de casele de asigurări de sănătate prin încheiere de contracte, respectiv acte adiţionale la contractele/actele adiţionale iniţiale şi vor fi utilizate pentru decontarea serviciilor medicale paraclinice acordate asiguraţilor de la data semnării acestora. Valoarea contractului, respectiv a actului adiţional la contractul/actul adiţional iniţial se stabileşte avându-se în vedere criteriile de selecţie şi contractare prevăzute în norme, precum şi reevaluarea punctajului furnizorilor, în situaţia în care unul sau mai multe elemente care au stat la baza stabilirii punctajului iniţial al acestora s-a/s-au modificat.

(6) În situaţii justificate furnizorii de servicii medicale paraclinice - analize medicale de laborator, investigaţii medicale paraclinice de radiologie şi imagistică medicală, precum şi servicii medicale paraclinice - explorări funcţionale - pot efectua servicii medicale paraclinice peste valoarea lunară de contract/act adiţional în limita a maxim 5%, cu condiţia ca această depăşire să influenţeze corespunzător, în sensul diminuării valorii de contract/act adiţional a lunii următoare, cu încadrarea în valoarea contractată pentru trimestrul respectiv.

(7) În situaţia în care unul sau mai multe elemente care au stat la baza stabilirii punctajului pentru fiecare furnizor de servicii medicale paraclinice, conform prevederilor din anexele nr. 10 şi 11 la ordin se modifică în sensul diminuării faţă de condiţiile iniţiale şi furnizorii aduc la cunoştinţa caselor de asigurări de sănătate aceste situaţii, în termen de maxim 15 zile lucrătoare de la data de la care survine modificarea, suma stabilită iniţial se diminuează corespunzător, prin încheierea unui act adiţional la contract. Sumele obţinute ca disponibil din aceste diminuări la nivelul caselor de asigurări de sănătate se vor folosi la reîntregirea sumelor alocate cu destinaţie iniţială.

Neanunţarea acestor situaţii şi constatarea ulterior producerii lor duc la aplicarea prevederilor privind nerespectarea obligaţiilor contractuale din contractul de furnizare de investigaţii paraclinice şi conduce la rezilierea contractului.

(8) În situaţia în care, în structura unui furnizor de servicii medicale paraclinice, există laborator/punct de lucru organizat ca urmare a procedurii de externalizare, casa de asigurări de sănătate încheie pentru acestea un act adiţional la contractul de furnizare de servicii paraclinice încheiat cu furnizorul respectiv. Actul adiţional se adaptează după modelul contractului de furnizare de servicii medicale paraclinice.

ART. 7 (1) Casele de asigurări de sănătate decontează furnizorilor de servicii medicale paraclinice cu care sunt în relaţii contractuale contravaloarea serviciilor medicale paraclinice prezentate în anexa nr. 7 la ordin. Tarifele decontate de casele de asigurări de sănătate sunt cele rezultate din reducerea tarifelor maximale cu procentul de diminuare cel mai mare ofertat de către furnizori şi nu pot fi mai mari decât tarifele maximale prevăzute în anexa nr. 7 la ordin.

Prezentarea, susţinerea şi negocierea ofertelor privind procentul de diminuare a tarifelor pentru investigaţii paraclinice se face în şedinţă deschisă, în prezenţa reprezentanţilor casei de asigurări de sănătate şi a tuturor reprezentanţilor legali ai furnizorilor care doresc să încheie contract de furnizare de servicii medicale paraclinice.

(2) Casele de asigurări de sănătate decontează ecografii furnizorilor de servicii medicale clinice inclusiv recuperare, medicină fizică şi balneologie, respectiv furnizorilor de servicii medicale clinice de cardiologie şi de medicină internă serviciul "monitorizarea şi managementul hemodinamic prin metoda bioimpedanţei toracice" cuprinse în anexa nr. 7 la ordin, în condiţiile prevăzute la Nota 1 şi Nota 3 de la finalul lit. C a capitolului I din anexa nr. 7 la ordin, la tarife negociate care nu pot fi mai mari decât tarifele maximale decontate de casele de asigurări de sănătate prevăzute în aceeaşi anexă.

Pentru ecografiile, respectiv monitorizările şi managementul hemodinamic prin metoda bioimpedanţei toracice, pentru care medicii cu specialităţi medicale clinice, respectiv medicii de specialitate cardiologie şi medicină internă încheie acte adiţionale la contractele de furnizare de servicii medicale clinice şi care sunt efectuate ca urmare a trimiterii de către alţi medici de specialitate, respectiv de către alţi medici de specialitate cardiologie şi medicină internă, programul de lucru se prelungeşte corespunzător.

ART. 8 (1) Biletul de trimitere pentru investigaţiile paraclinice este formular cu regim special, unic pe ţară, care se întocmeşte în trei exemplare şi are o valabilitate de maximum 30 de zile calendaristice de la data emiterii. Prin excepţie biletele de trimitere pentru efectuarea de investigaţii paraclinice specifice pentru afecţiunile cuprinse în unele programe naţionale de sănătate: diabetul şi bolile de nutriţie precum şi cele pentru afecţiunile oncologice, au valabilitate de până la 90 de zile calendaristice, în condiţiile în care pentru afecţiunea respectivă şi medicaţia a fost prescrisă pentru acelaşi interval de timp. Pentru celelalte boli cronice, valabilitatea biletului de trimitere pentru investigatii paraclinice specifice este de pina la 60 zile.

Un exemplar al biletului de trimitere rămâne la medicul care a făcut trimiterea şi două exemplare sunt înmânate asiguratului. La momentul prezentării asiguratului în vederea efectuării investigaţiilor, furnizorul de servicii medicale paraclinice are obligaţia de a consemna pe versoul exemplarului de bilet de trimitere care se depune la casa de asigurari de sanatate :data prezentării, data programarii, precum si de a semna şi ştampila acest exemplar indiferent dacă investigaţiile recomandate sunt sau nu efectuate la momentul prezentării. În situaţia în care, din motive obiective, investigaţiile nu au putut fi efectuate la momentul prezentării, furnizorul de servicii medicale paraclinice are obligaţia de a-l programa iar daca asiguratul refuza programarea va restitui asiguratului ambele exemplare ale biletului de trimitere pentru ca acesta să se poată prezenta la alt furnizor de investigaţii medicale paraclinice. In primele 10 zile calendaristice de la emiterea biletului de trimitere pentru investigatii medicale paraclinice asiguratul are obligatia de a se programa si de a accepta programarea la unul dintre furnizori, în caz contrar biletul de trimitere isi pierde valabilitatea.

Furnizorul de servicii medicale paraclinice care efectuează investigaţiile paraclinice recomandate prin biletul de trimitere păstrează un exemplar al biletului şi depune la casa de asigurări de sănătate celălalt exemplar cu ocazia raportării lunare a activităţii.

Furnizorii de servicii medicale paraclinice au obligaţia să verifice biletele de trimitere în ceea ce priveşte datele obligatorii pe care acestea trebuie să le cuprindă potrivit prevederilor legale în vigoare.

(2) Daca in perioada de valabilitate a biletului de trimitere pentru investigatii medicale paraclinice un asigurat se interneaza in spital fara ca investigatiile recomandate sa fie efectuate in ambulatoriu anterior internarii, biletul de trimitere isi pierde valabilitatea, cu excepţia biletelor de trimitere pentru investigaţii medicale paraclinice de înaltă performanţă dacă acestea nu au fost efectuate în timpul spitalizării, cu reconfirmarea pe biletul de trimitere a necesităţii efectuării acestor investigaţii de către medicul care a făcut trimiterea. Investigatiile medicale paraclinice efectuate unui asigurat in ambulatoriu pe perioada in care acesta a fost internat precum si in perioada de la data externarii pana la data expirarii termenului de valabilitate a biletului de trimitere , nu se deconteaza de casa de asigurari de sanatate sau daca acestea au fost decontate se recupereaza de la furnizorul de investigatii medicale paraclinice, cu excepţia investigaţiilor medicale paraclinice de înaltă performanţă dacă acestea nu au fost efectuate în timpul spitalizării, cu reconfirmarea pe biletul de trimitere a necesităţii efectuării acestor investigaţii de către medicul care a făcut trimiterea.

(3) Este interzisă înlocuirea sau adăugarea altor investigaţii paraclinice pe biletul de trimitere prin completarea acestuia la nivelul laboratorului/punctului de lucru.

(4) Casele de asigurări de sănătate decontează furnizorilor de servicii medicale paraclinice cu care au încheiat contracte contravaloarea serviciilor medicale paraclinice acordate asiguraţilor, indiferent de casa de asigurări de sănătate la care este luat în evidenţă asiguratul, cu condiţia ca medicul care a eliberat biletul de trimitere să se afle în relaţie contractuală cu aceeaşi casă de asigurări de sănătate cu care se află în relaţie contractuală furnizorul de servicii medicale paraclinice.

(5) Fiecare casă de asigurări de sănătate îşi organizează modul de verificare a biletelor de trimitere pentru investigaţiile paraclinice, în acest sens stabilindu-şi evidenţe proprii.

În relaţiile cu furnizorii de servicii medicale în asistenţa medicală ambulatorie de specialitate, casele de asigurări de sănătate decontează contravaloarea investigaţiilor medicale paraclinice acordate numai în baza biletelor de trimitere utilizate în sistemul asigurărilor sociale de sănătate.

(6) Pentru pacienţii din statele membre ale Uniunii Europene/din Spaţiul Economic European, titulari ai cardului european de asigurări sociale de sănătate, în perioada de valabilitate a cardului, respectiv beneficiari ai formularelor europene emise în baza Regulamentului CE nr. 883 al Parlamentului European şi al Consiliului din 29 aprilie 2004 privind coordonarea sistemelor de securitate socială, respectiv în baza Regulamentului CEE nr. 1408/1971 referitor la aplicarea regimurilor de securitate socială salariaţilor, lucrătorilor independenţi şi membrilor familiilor acestora care se deplasează în interiorul comunităţii, după caz precum şi pacienţilor din alte state cu care România a încheiat acorduri, înţelegeri, convenţii sau protocoale internaţionale cu prevederi în domeniul sănătăţii, investigaţiile medicale paraclinice se acordă pe baza biletului de trimitere.

ART. 9 Serviciile de înaltă performanţă (RMN, CT, scintigrafie şi angiografie) se acordă în baza biletului de trimitere pentru investigaţii medicale paraclinice care cuprinde şi datele din fişele de solicitare prevăzute în anexa nr. 18 la ordin şi se întocmeşte în 3 exemplare, din care unul rămâne la medicul care a făcut trimiterea, unul la furnizorul care a efectuat serviciul/serviciile de înaltă performanţă, iar celălalt exemplar se transmite lunar de către acesta la casa de asigurări de sănătate cu care a încheiat contract cu ocazia raportării lunare a activităţii. Biletul de trimitere pentru investigaţii medicale paraclinice este formular cu regim special, unic pe ţară.

ART. 10 Lista serviciilor medicale de medicină dentară preventive şi a tratamentelor de medicină dentară, tarifele pentru fiecare serviciu medical de medicină dentară, serviciile

medicale de medicină dentară pentru care se încasează contribuţie personală din partea asiguratului şi condiţiile acordării acestora sunt prevăzute în anexa nr. 7 la ordin.

ART. 11 (1) La stabilirea valorii de contract pentru furnizorii de servicii medicale de medicină dentară se au în vedere:

a) suma alocată fiecărei case de asigurări de sănătate pentru servicii de medicină dentară;

b) numărul de medici de medicină dentară şi dentişti care intră în relaţii contractuale cu casa de asigurări de sănătate;

c) gradul profesional. Pentru medicul primar, suma stabilită ca raport între lit. a) şi lit. b) se majorează cu 20%, iar pentru medicul care nu a obţinut un grad profesional această sumă se diminuează cu 20%;

d) suma stabilită conform lit. c), se ajustează în funcţie de programul de activitate, având în vedere volumul serviciilor de medicină dentară contractate;

e) pentru medicii din mediul rural suma stabilită conform lit. c), respectiv lit. d), după caz, se majorează cu 50%.

Suma contractată se defalchează pe trimestre şi luni.

(2) Suma orientativă/ medic specialist/ lună la nivel naţional este de 1.050 lei, corespunzătoare unui program de 7 ore în medie/zi.

(3) Lunar casele de asigurări de sănătate decontează furnizorilor de servicii medicale de medicină dentară serviciile medicale de medicină dentară furnizate în limita valorii trimestriale de contract.

În situaţii justificate, furnizorii de servicii medicale de medicină dentară pot efectua servicii medicale peste valoarea trimestrială de contract în limita a maxim 5%, cu condiţia ca această depăşire să influenţeze corespunzător, în sensul diminuării valorii de contract a trimestrului următor, cu încadrarea în valoarea contractată pentru anul respectiv.

(4) În situaţia în care la unii furnizori de servicii medicale de medicină dentară se înregistrează la sfârşitul unui trimestru sume neconsumate, faţă de suma trimestrială prevăzută în contract, casele de asigurări de sănătate vor diminua, printr-un act adiţional la contract, valoarea trimestrială contractată iniţial aferentă trimestrului respectiv cu sumele neconsumate.

Sumele rezultate din economii vor fi contractate printr-un act adiţional la furnizorii de servicii medicale de medicină dentară care în trimestrul respectiv şi-au epuizat valoarea de contract.

Suma din actul adiţional se utilizează pentru decontarea serviciilor medicale de medicină dentară acordate de la data semnării actului adiţional.

(5) Pentru încadrarea în suma defalcată trimestrial cabinetele de medicină dentară pot întocmi liste de prioritate pentru furnizarea serviciilor de medicină dentară, dacă este cazul.

(6) Fondurile suplimentare aprobate pentru anul 2011 cu destinaţia servicii medicale dentare se contractează de casele de asigurări de sănătate prin încheiere de contracte, respectiv acte adiţionale la contractele iniţiale şi vor fi utilizate pentru decontarea serviciilor medicale dentare acordate asiguraţilor de la data semnării acestora. Valoarea contractului, respectiv a actului adiţional la contractul iniţial se stabileşte avându-se în vedere criteriile de contractare.

ART. 12 În tarifele tratamentelor protetice sunt incluse şi cheltuielile aferente activităţilor de tehnică dentară. Plata acestora se face de către reprezentantul legal al cabinetului de medicină dentară direct către laboratorul de tehnică dentară autorizat conform legii.

ART. 13 Casele de asigurări de sănătate ţin evidenţa serviciilor de medicină dentară pe fiecare asigurat şi pe fiecare cod din formula dentară prevăzută în anexa nr. 7 la ordin.

ART. 14 (1) Unităţile ambulatorii de recuperare, medicină fizică şi balneologie din structura unor unităţi sanitare sau unităţile ambulatorii în care îşi desfăşoară activitatea

medici angajaţi într-o unitate sanitară, cabinetele medicale de specialitate organizate conform Ordonanţei Guvernului nr. 124/1998 privind organizarea şi funcţionarea cabinetelor medicale, aprobată cu modificări şi completări prin Legea nr. 629/2001, republicată, cabinetele medicale de specialitate din structura unor unităţi sanitare aparţinând ministerelor şi instituţiilor publice centrale din sistemul de apărare, ordine publică, siguranţă naţională şi autoritate judecătorească încheie contracte de furnizare de servicii medicale de recuperare, medicină fizică şi balneologie în ambulatoriu cu casele de asigurări de sănătate, a căror plată se face prin tarif în lei pe servicii medicale-consultaţii/cazuri pentru serviciile medicale de recuperare, medicină fizică şi balneologie din pachetul de servicii medicale de bază prevăzut în anexa nr. 7 la ordin.

(2) La stabilirea sumei contractate de un furnizor de servicii medicale de recuperare, medicină fizică şi balneologie cu casa de asigurări de sănătate se au în vedere numărul de servicii medicale-consultaţii, respectiv tariful pe consultaţie de 14 lei şi numărul de servicii medicale-cazuri, respectiv tariful pe caz de 140 lei. Pentru prestaţia medicului primar, tariful consultatiei se majorează cu 20%. La stabilirea numarului de cazuri se are in vedere o durata medie de 10 zile de tratament pe caz si un numar mediu de 4 proceduri pe zi.

Suma contractată se stabileşte conform Anexei nr. 8 F şi se defalchează pe trimestre şi pe luni, ţinându-se cont şi de activitatea specifică sezonieră.

În situaţia în care unul sau mai multe elemente care au stat la baza stabilirii punctajului pentru fiecare furnizor de servicii medicale de recuperare, medicină fizică şi balneologie, conform prevederilor din Anexa nr. 8 F la ordin se modifică în sensul diminuării faţă de condiţiile iniţiale şi furnizorii aduc la cunoştinţa caselor de asigurări de sănătate aceste situaţii, în termen de maxim 15 zile lucrătoare de la data de la care survine modificarea, suma stabilită iniţial se diminuează corespunzător, prin încheierea unui act adiţional la contract. Sumele obţinute ca disponibil din aceste diminuări la nivelul caselor de asigurări de sănătate se vor folosi la reîntregirea sumelor alocate cu destinaţie iniţială.

Neanunţarea acestor situaţii şi constatarea ulterior producerii lor duc la aplicarea prevederilor privind nerespectarea obligaţiilor contractuale din contractul de furnizare de servicii medicale de recuperare, medicină fizică şi balneologie.

În situaţia în care la unii furnizori de servicii medicale de recuperare, medicină fizică şi balneologie se înregistrează la sfârşitul unui trimestru sume neconsumate, faţă de suma trimestrială prevăzută în contract, casele de asigurări de sănătate vor diminua, printr-un act adiţional la contract, valoarea trimestrială contractată iniţial aferentă trimestrului respectiv cu sumele neconsumate.

Sumele rezultate din economii vor fi contractate printr-un act adiţional la furnizorii de servicii medicale de recuperare, medicină fizică şi balneologie care în trimestrul respectiv şi-au epuizat valoarea de contract.

Suma din actul adiţional se utilizează pentru decontarea serviciilor medicale de recuperare, medicină fizică şi balneologie acordate de la data semnării actului adiţional.

Pentru încadrarea în suma defalcată trimestrial cabinetele de specialitate recuperare, medicină fizică şi balneologie a sănătăţii pot întocmi liste de prioritate pentru furnizarea serviciilor de recuperare-reabilitare a sănătăţii, dacă este cazul.

(3) În vederea contractării numărului de servicii medicale-consultaţii şi a numărului de cazuri de recuperare, medicină fizică şi balneologie se au în vedere următoarele:

a) numărul de servicii medicale-consultaţii de recuperare, medicină fizică şi balneologie acordate în cabinetul medical nu poate depăşi numărul de servicii medicale-consultaţii rezultat potrivit programului de lucru, luându-se în considerare că pentru o consultaţie medicală este necesară o durată de 15 minute în medie. Dacă programul de lucru este mai mic sau mai mare de 7 ore pe zi, numărul de consultaţii, poate scade sau creşte corespunzător;

b) serviciile medicale-cazuri care se acordă în bazele de tratament, se contractează şi raportează în vederea decontării pentru un numar mediu de 10 zile de tratament şi o medie de 4 proceduri/zi, dar nu mai mult de 2 cure pe an, după care bolnavul plăteşte integral serviciile medicale

(4) Tarifele au avut în vedere toate cheltuielile aferente serviciilor medicale-consultaţii şi numărului de cazuri de recuperare, medicină fizică şi balneologie; în situaţia în care baza de tratament nu se află în structura reţelei sanitare din subordinea Ministerului Sănătăţii sau aparţine unor ministere cu reţele sanitare proprii, casele de asigurări de sănătate contractează şi decontează contravaloarea serviciilor medicale-consultaţii şi numărului de cazuri de recuperare, medicină fizică şi balneologie la nivelul tarifelor diminuate cu contravaloarea cheltuielilor materiale necesare funcţionării şi administrării unităţilor, respectiv se acordă sumele reprezentând manopera, medicamentele şi materialele sanitare.

(5) Fondurile suplimentare aprobate pentru anul 2011 cu destinaţia de servicii medicale de recuperare, medicină fizică şi balneologie vor fi contractate de casele de asigurări de sănătate prin încheiere de contracte, respectiv de acte adiţionale la contractele iniţiale şi vor fi utilizate pentru decontarea serviciilor medicale-consultaţii şi numărului de cazuri de recuperare, medicină fizică şi balneologie, acordate asiguraţilor de la data semnării acestora.

(6) Decontarea serviciilor medicale de recuperare, medicină fizică şi balneologie în ambulatoriu se suportă din fondul aferent asistenţei medicale de recuperare-reabilitare a sănătăţii.

(7) Casele de asigurări de sănătate decontează serviciile medicale-consultaţii şi numărul de cazuri de recuperare, medicină fizică şi balneologie numai pe baza biletelor de trimitere eliberate de medicii de familie, medicii de specialitate din ambulatoriul de specialitate sau de medicii de specialitate din spital, aflaţi în relaţie contractuală cu casele de asigurări de sănătate.

(8) Biletele de trimitere pentru tratament în staţiunile balneoclimaterice se fac de către medicii de familie, de către medicii de specialitate din ambulatoriul de specialitate şi medicii din spital, aflaţi în relaţie contractuală cu casele de asigurări de sănătate, pentru perioade şi potrivit unui ritm stabilit de medicul de specialitate recuperare, medicină fizică şi balneologie.

(9) Decontarea lunară de către casele de asigurări de sănătate se face în funcţie de numărul de servicii medicale-consultaţii şi numărul de cazuri finalizate de recuperare, medicină fizică şi balneologie realizat atât în cabinetele medicale, cât şi în bazele de tratament, înmulţit cu tarifele din anexa nr. 7 la ordin, după caz, diminuate conform alin. (4), în limita sumelor contractate. Decontarea lunara a cazurilor finalizate se realizeaza la tariful contractat daca numarul mediu al zilelor de tratament este mai mare sau egal cu 8.5. Pentru un numar mediu al zilelor de tratament realizat intr-o luna mai mic de 8.5 decontarea se face conform formulei:Tarif contractat (140 lei) x numar total zile realizate / 10 (numar mediu zile de tratament contractat)

(10) În situaţia în care o cură de tratament se întrerupe, furnizorul are obligaţia de a anunţa casa de asigurări de sănătate despre întreruperea curei, motivul întreruperii şi numărul de zile efectuat faţă de cel recomandat. O cură de tratament întreruptă se consideră o cură finalizată.

ART. 15 (1) La stabilirea sumei contractate de un furnizor de servicii de acupunctură cu casa de asigurări de sănătate se au în vedere numărul de consultaţii de acupunctură, respectiv tariful pe consultaţie de 13 lei şi numărul de servicii medicale-caz, respectiv tariful pe caz de 140 lei. Suma contractată se defalchează pe trimestre şi pe luni.

(2) În vederea contractării numărului de consultaţii de acupunctură şi a numărului de servicii medicale-caz se au în vedere următoarele:

a) numărul de consultaţii de acupunctură acordate în cabinetul medical nu poate depăşi numărul de consultaţii de acupunctură rezultat potrivit programului de lucru, luându-se în considerare că pentru o consultaţie de acupunctură este necesară o durată de 15 minute în medie. Pentru fiecare caz casa de asigurări de sănătate decontează o singură consultaţie pentru o cură de tratament. Asiguraţii, au dreptul la maximum 2 cure pe an, după care asiguratul plăteşte integral serviciile medicale.

b) serviciile de acupunctură-caz, se contractează şi raportează în vederea decontării maximum 2 cure/an, o cură reprezentând în medie 10 zile de tratament, după care bolnavul plăteşte integral serviciile medicale;

(3) Contravaloarea servicii de acupunctură-consultaţii şi cure de tratament se suportă din fondul aferent asistenţei medicale de recuperare.

(4) Decontarea lunară a serviciilor medicale de acupunctură se face pe baza numărului de servicii medicale-caz finalizate şi a numărului de consultaţii de acupunctură şi a tarifelor pe cură respectiv pe consultaţie, în limita sumelor contractate, pe baza facturii şi a documentelor justificative depuse de furnizor la casa de asigurări de sănătate până la data prevăzută în contractul încheiat de furnizor cu casa de asigurări de sănătate.

Decontarea lunara a cazurilor finalizate se realizeaza la tariful contractat daca numarul mediu al zilelor de tratament este mai mare sau egal cu 8.5. Pentru un numar mediu al zilelor de tratament realizat intr-o luna mai mic de 8.5 decontarea se face conform formulei:Tarif contractat (140 lei) x numar total zile realizate / 10 (numar mediu zile de tratament contractat).

În situaţia în care o cură de tratament în acupunctură se întrerupe, furnizorul are obligaţia să anunţe casa de asigurări de sănătate despre întreruperea curei, motivul întreruperii şi numărul de zile efectuat faţă de cel recomandat. O cură de tratament în acupunctură întreruptă se consideră o cură finalizată.

(5) Tarifele au avut în vedere toate cheltuielile aferente serviciilor medicale-consultaţii de acupunctură şi cazurilor-cure de acupunctură.

(6) Reprezentantul legal al furnizorilor de servicii medicale clinice, de medicină dentară, de recuperare, medicină fizică şi balneologie şi paraclinice facturează caselor de asigurări de sănătate, lunar, şi depune la casa de asigurări de sănătate până la termenul prevăzut în contractul de furnizare de servicii medicale activitatea realizată în luna anterioară, conform contractului încheiat cu casa de asigurări de sănătate, care se verifică de către casele de asigurări de sănătate în vederea decontării şi se validează conform prezentelor norme.

Nerespectarea termenului de raportare atrage nedecontarea la termenele stabilite a serviciilor medicale prestate pentru perioada respectivă.

ART. 16 Contravaloarea serviciilor medicale de specialitate în specialităţile clinice inclusiv recuperare, medicină fizică şi balneologie, paraclinice, de medicină dentară care nu se regăsesc în anexa nr. 7 la ordin, precum şi a serviciilor medicale acordate la cererea asiguratului (fără recomandare medicală sau fără a îndeplini condiţiile care îi permit adresare directă) sau în situaţia în care asiguratul nu acceptă programare pe listele de prioritate se suportă de către asiguraţi la tarifele stabilite de furnizori şi afişate la cabinetul/laboratorul medical, pentru care se eliberează chitanţă fiscală, cu indicarea serviciului prestat. În aceste situaţii furnizorii de servicii medicale nu eliberează bilete de trimitere sau prescripţii medicale utilizate în sistemul de asigurări sociale de sănătate si decontate de casele de asigurări de sănătate.

ART. 17 (1) În cabinetele medicale/laboratoarele din ambulatoriul de specialitate, organizate conform Ordonanţei Guvernului nr. 124/1998, aprobată cu modificări şi completări prin Legea nr. 629/2001, republicată, pot fi angajaţi numai medici şi/sau dentişti, precum şi alte categorii de personal în conformitate cu dispoziţiile legale în vigoare, cu excepţia persoanelor care îşi desfăşoară activitatea în cabinete organizate

conform Ordonanţei de urgenţă a Guvernului nr. 83/2000 privind organizarea şi funcţionarea cabinetelor de liberă practică pentru servicii publice conexe actului medical, aprobată şi modificată prin Legea nr. 598/2001. Medicii sau dentiştii angajaţi nu raportează activitate medicală proprie, activitatea acestora fiind raportată de către reprezentantul legal; medicii de specialitate din specialităţile clinice inclusiv recuperare, medicină fizică şi balneologie şi de medicină dentară pot prescrie medicamente cu sau fără contribuţie personală şi unele materiale sanitare în tratamentul ambulatoriu, folosind formularul de prescripţie medicală, care este formular cu regim special unic pe ţară, cu ştampila cabinetului şi parafa medicului angajat. Întreaga activitate a cabinetului se desfăşoară respectându-se contractul încheiat de reprezentantul legal al cabinetului medical cu casa de asigurări de sănătate.

(2) Pentru specialităţile clinice inclusiv recuperare, medicină fizică şi balneologie, cabinetele medicale individuale organizate conform reglementărilor în vigoare pot raporta în vederea decontării numai serviciile medicale din specialitatea medicului titular al cabinetului medical respectiv, precum şi servicii conexe actului medical, conform prevederilor art. 3 alin. (2).

ART. 18 Pentru unităţile sanitare care nu sunt organizate conform Ordonanţei Guvernului nr. 124/1998, aprobată cu modificări şi completări prin Legea nr. 629/2001, republicată, contractele/actele adiţionale de furnizare de servicii medicale se încheie de către reprezentantul legal al unităţii sanitare în structura căreia se află aceste unităţi şi casa de asigurări de sănătate.

ART. 19 (1) Casele de asigurări de sănătate decontează serviciile medicale clinice inclusiv de recuperare, medicină fizică şi balneologie numai pe baza biletului de trimitere pentru alte specialităţi, care este formular cu regim special, unic pe ţară, care se întocmeşte în trei exemplare. Un exemplar rămâne la medicul care a făcut trimiterea şi două exemplare sunt înmânate asiguratului, care le depune la furnizorul de servicii medicale clinice inclusiv de recuperare, medicină fizică şi balneologie. Furnizorul de servicii medicale clinice, inclusiv de recuperare, medicină fizică şi balneologie păstrează un exemplar şi depune la casa de asigurări de sănătate celălalt exemplar cu ocazia raportării lunare a activităţii.

(2) Furnizorii de servicii medicale clinice, inclusiv de recuperare, medicină fizică şi balneologie au obligaţia să verifice biletele de trimitere în ceea ce priveşte datele obligatorii pe care acestea trebuie să le cuprindă potrivit prevederilor legale în vigoare.

(3) În relaţiile cu furnizorii de servicii medicale în asistenţa medicală ambulatorie de specialitate, casele de asigurări de sănătate decontează contravaloarea serviciilor medicale clinice, inclusiv a celor de recuperare, medicină fizică şi balneologie acordate numai în baza biletelor de trimitere utilizate în sistemul asigurărilor sociale de sănătate.

ART. 20 Casele de asigurări de sănătate şi direcţiile de sănătate publică au obligaţia de a organiza trimestrial sau ori de câte ori este nevoie întâlniri cu medicii de specialitate din ambulatoriul de specialitate pentru a analiza aspecte privind calitatea serviciilor medicale din asistenţa medicală ambulatorie de specialitate, precum şi respectarea prevederilor actelor normative în vigoare. Acestea vor informa asupra modificărilor apărute în actele normative şi vor stabili împreună cu medicii de specialitate din ambulatoriul de specialitate măsurile ce se impun pentru îmbunătăţirea activităţii. Neparticiparea medicilor la aceste întâlniri nu îi exonerează de răspunderea nerespectării hotărârilor luate cu acest prilej.

CRITERII
privind selecţia furnizorilor de servicii medicale de recuperare, medicină fizică şi balneologie şi repartizarea sumelor pentru furnizarea de servicii medicale de recuperare, medicină fizică şi balneologie în ambulatoriu

Cap. I. Criterii de selecţie a furnizorilor de servicii medicale de recuperare, medicină fizică şi balneologie în ambulatoriu

Pentru a intra în relaţii contractuale cu casele de asigurări de sănătate furnizorii trebuie să îndeplinească cumulativ următoarele criterii de selecţie:

1. Să fie autorizaţi şi evaluaţi potrivit dispoziţiilor legale în vigoare;
2. Să facă dovada capacităţii tehnice de a efectua serviciile medicale de recuperare, medicină fizică şi balneologie pentru a căror furnizare încheie contract cu casa de asigurări de sănătate.
3. Să facă dovada că toată durata programului de lucru declarat al cabinetului şi al bazei de tratament este acoperită prin prezenţa unui medic de specialitate de recuperare, medicină fizică şi balneologie

Cap. II. La stabilirea valorii contractelor de furnizare de servicii medicale de recuperare, medicină fizică şi balneologie se au în vedere următoarele criterii:

A. Evaluarea capacităţii resurselor tehnice

B.. Evaluarea salii de kinetoterapie

C. Evaluarea resurselor umane

A. Evaluarea capacităţii resurselor tehnice

a) Furnizorii de servicii medicale de recuperare, medicină fizică şi balneologie sunt obligaţi să facă dovada deţinerii legale a aparaturii prin documente conforme şi în termen de valabilitate.

b) Casele de asigurări de sănătate sunt obligate să verifice dacă seria şi numărul aparatului existent în cadrul cabinetului sunt aceleaşi cu seria şi numărul aparatului înscrise în cuprinsul documentelor care atestă existenţa şi deţinerea legală a acestora.

c) Furnizorii sunt obligaţi să prezinte documentele pentru aparatul/ aparatele deţinute din care să reiasă numărul de canale şi numărul de bolnavi care pot face terapie simultan cu aparatul/aparatele respective ~~şi~~ pentru care încheie contract de furnizare de servicii cu casa de asigurări de sănătate.
d) Nu sunt luate in calcul aparatele care nu au înscrise pe ele seria si numarul şi nici aparatele pentru care furnizorii nu pot prezenta fişele tehnice conforme şi în termen de valabilitate ale acestora.
e) Dacă doi sau mai mulţi furnizori prezintă aparate înregistrate cu aceeaşi serie şi număr înainte sau în perioada de contractare, acestea sunt excluse definitiv şi nu se mai iau în calcul la nici unul dintre furnizori.

Fac excepţie furnizorii de servicii medicale de recuperare, medicină fizică şi balneologie care îşi desfăşoară activitatea utilizând acelaşi spaţiu şi aceleaşi echipamente specifice deţinute şi/sau utilizate în comun în condiţiile legii, cu prezentarea documentelor justificative prevăzute de actele normative în vigoare şi numai în condiţiile în care personalul medical de specialitate al fiecărui furnizor îşi desfăşoară activitatea cu respectarea dispoziţiilor Contractului-cadru privind condiţiile acordării asistenţei medicale în cadrul sistemului de asigurări sociale de sănătate pentru anii 2011 – 2012 şi într-un program de lucru distinct.
f) Pentru a putea fi luate în considerare aparatele trebuie să fie în perfectă stare de funcţionare certificată cu documentele care atestă verificarea parametrilor funcţionali în termenul prevăzut de lege pentru fiecare tip de aparat.

Se acorda punctaj pentru fiecare aparat detinut, după cum urmează
- Aparate cu 1 canal si vechime 1-5 ani = 16 puncte/aparat
- Aparate cu 2 canale si vechime 1-5 ani = 24 puncte/aparat
- Aparate cu 3 canale si vechime 1-5 ani = 28 puncte/aparat
- Aparate cu 4 canale si vechime 1-5 ani = 32 puncte/aparat
- Combină de terapie fizicală şi vechime 1 – 5 ani = 20 puncte/combină
- Cada de hidroterapie– vechime 1-5 ani = 10 puncte/1 cada

Se scad din punctajul acordat pentru fiecare aparat, cate 2 puncte pentru fiecare an de vechime in plus al aparatului.

Nr.crt	Denumire aparat	Numar canale	An fabricatie	Total puncte/aparat
1	2	3	4	5

TOTAL PUNCTE: .....

NOTĂ:
Numărul de 2, 3 sau 4 canale ale unui aparat reprezintă posibilitatea pentru efectuarea terapiei la 2, 3, respectiv 4 pacienţi în acelaşi timp.

B. Evaluarea salii de kinetoterapie:
- Suprafaţa utilă a sălii este între 8 – 15 mp şi dotare corespunzătoare Ordinului MSP 153/2003 pentru aprobarea Normelor metodologice privind înfiinţarea, organizarea şi funcţionarea cabinetelor medicale = 20 puncte

- Suprafaţa utilă a sălii este între 16 – 30 mp şi dotare corespunzătoare Ordinului MSP 153/2003 pentru aprobarea Normelor metodologice privind înfiinţarea, organizarea şi funcţionarea cabinetelor medicale = 30 puncte
- Suprafaţa utilă a sălii este de peste 30 mp, folosită exclusiv pentru furnizarea de servicii de kinetoterapie şi dotare superioară faţă de prevederile Ordinului MSP 153/2003 = 33 puncte

C. Evaluarea resurselor umane:

Personalul este punctat proportional cu timpul lucrat.

Punctajul se acorda pentru fiecare angajat medico-sanitar cu norma intreaga, iar pentru cei cu norma partiala se acorda unitati proportionale cu fractiunea de norma lucrata.

Se considera o norma intreaga astfel:
- pentru un medic - 35 ore/saptamana (7 ore x 5 zile/saptamana)

- pentru un asistent, fiziokinetoterapeut, kinetoterapeut sau masseur – 40 ore/saptamana (ore/zi x 5zile/saptamana)

- Sub 5 zile/săptămână = 1 punct
- Pentru 2 x 8 ore 5 zile pe săptămână =5 puncte
- TOTAL puncte ……

Se stabileşte numărul total de puncte obţinut prin însumarea numărului de puncte obţinut de fiecare furnizor pentru toate criteriile.

Se calculează valoarea unui punct prin împărţirea sumei alocate cu destinaţia asistenţă medicală de recuperare, medicină fizică şi balneologie în ambulatoriu, din care se scade suma aferentă serviciilor de acupunctură la numărul total de puncte.

Valoarea unui punct obţinută mai sus se înmulţeşte cu numărul de puncte obţinut de un furnizor, rezultând sumele aferente fiecărui furnizor.

ANEXA 10

CRITERII

privind selecţia furnizorilor de servicii medicale paraclinice - laboratoare de analize medicale, repartizarea sumelor şi defalcarea numărului de investigaţii paraclinice - analize medicale de laborator pe furnizori de servicii medicale paraclinice - laboratoare de analize medicale

CAPITOLUL I Criterii de selecţie a furnizorilor de servicii medicale paraclinice - laboratoare de analize medicale

Pentru a intra în relaţii contractuale cu casele de asigurări de sănătate, furnizorii trebuie să îndeplinească cumulativ următoarele criterii de selecţie:

1. Să fie autorizaţi şi evaluaţi potrivit dispoziţiilor legale în vigoare;
2. a) Să facă dovada capacităţii tehnice a fiecărui laborator/punct de lucru de a efectua toate investigaţiile medicale paraclinice - analize medicale de laborator prevăzute la cap. II din anexa nr. 7 la ordin, cu excepţia examinărilor de anatomie patologică (histopatologice şi de citologie, inclusiv examenul Babeş Papanicolau).

b) Pentru examinările de anatomie patologică(histopatologice şi de citologie inclusiv examenul Babeş Papanicolau), furnizorul are obligaţia de a face dovada capacităţii tehnice numai în situaţia în care solicită contractarea acestora.

3. Furnizorul va prezenta un înscris cu menţiunea seriei, a anului de fabricaţie, a capacităţii de lucru şi a meniului de teste efectuate de fiecare aparat, vizat de producător/distribuitor/furnizor de service.

Pentru testele compuse din mai mulţi parametri nu se iau în calcul toţi parametrii – se consideră un singur test, cu excepţia categoriei microbiologie, unde diversele etape de lucru (examen microscopic, cultură cu identificare microbiană inclusiv antibiograma /fungigrama) constituie teste separate şi se iau în calcul separat.

4. Să facă dovada că toată durata programului de lucru declarat pentru fiecare laborator de analize medicale / laborator de analize medicale organizat ca punct de lucru din structura sa, este acoperită prin prezenţa unui medic de specialitate medicină de laborator sau biolog, chimist, biochimist – cu grad de specialist.

Să facă dovada , pentru fiecare laborator de analize medicale / laborator de analize medicale organizat ca punct de lucru din structura sa că în cadrul acestuia/acestora îşi

desfăşoară activitatea medic / medici de laborator într-o formă legală de exercitare a profesiei care să acopere cel putin o norma/zi.

5. Să facă dovada îndeplinirii criteriului de calitate, atât pentru subcriteriul a) „Implementarea sistemului de management al calităţii" cât şi pentru subcriteriul b) „Participare la schemele de testare a competenţei pentru laboratoare de analize medicale pentru laboratoare de analize medicale notificate de Ministerul Sănătăţii" prevăzut de reglementările în vigoare pentru cel puţin 50% reprezentand minim 40 analize din numărul de analize cuprinse in lista investigaţiilor contractate, pentru fiecare dintre laboratoarele / laboratoare organizate ca puncte de lucru ce urmează a fi cuprinse în contractul de furnizare de servicii medicale paraclinice - analize medicale de laborator pe toată perioada de derulare a contractului încheiat cu casa de asigurări de sănătate. Numărul total de analize cuprinse în lista investigaţiilor medicale paraclinice este de 79.

6. Sa faca dovada capacitatii tehnice pentru posibilitatea efectuării a cel putin 5% din numarul total de servicii medicale paraclinice necesare la nivelul fiecarei case de asigurari de sanatate, stabilit de comisia constituită conform art. 44 alin.(5) din Contractul-cadru, cu încadrarea în 90% din suma prevăzută cu această destinaţie.

NOTĂ: Pentru laboratoarele de anatomie patologică nu se aplică punctul 2.a) şi punctul 5.

CAPITOLUL II Criterii privind repartizarea sumelor şi defalcarea numărului de investigaţii paraclinice - analize medicale de laborator - stabilit pe total judeţ

1. Numărul de investigaţii paraclinice - analize de laborator se stabileşte la nivelul fiecărui judeţ de către comisia înfiinţată conform art. 44 alin. (5) din Contractul-cadru pentru anii 2011 – 2012 aprobat prin H.G. nr. 1389/2010, cu modificările şi completările ulterioare.

2. La stabilirea sumelor ce se contractează cu furnizorii de analize medicale de laborator se au în vedere următoarele criterii:

1. criteriul de evaluare a resurselor	45%
2. criteriul de calitate	50%
3. criteriul financiar	5%

1. Criteriul de evaluare a resurselor

Ponderea acestui criteriu este de 45%

Ca urmare a aplicării metodologiei de stabilire a punctajului, fiecare furnizor de servicii medicale paraclinice - analize medicale de laborator - obţine un punctaj corespunzător acestui criteriu.

Metodologia de stabilire a punctajului:

A. Evaluarea capacităţii resurselor tehnice

a) Furnizorii de servicii medicale paraclinice - analize medicale de laborator sunt obligaţi să facă dovada deţinerii legale a aparaturii prin documente conforme şi în termen de valabilitate.

b) Casele de asigurări de sănătate sunt obligate să verifice dacă seria şi numărul aparatului existent în cadrul laboratorului sunt conforme cu seria şi numărul aparatului înscrise în cuprinsul documentelor care atestă existenţa şi deţinerea legală a acestora.

c) Furnizorii sunt obligaţi să prezinte toate fişele tehnice corespunzătoare aparatelor deţinute şi pentru care încheie contract de furnizare de servicii cu casa de asigurări de sănătate.

d) Nu sunt luate în calcul aparatele care nu au înscrise pe ele seria şi numărul, şi nici aparatele pentru care furnizorii nu pot prezenta fişele tehnice conforme şi în termen de valabilitate ale acestora, având menţionate seriile echipamentelor.

e) Dacă doi sau mai mulţi furnizori prezintă aparate înregistrate cu aceeaşi serie şi număr înainte sau în perioada de contractare, acestea sunt excluse definitiv şi nu se mai iau în calcul la nici unul dintre furnizori.

În acest sens, casele de asigurări de sănătate verifică capacitatea tehnică a fiecărui furnizor şi transmit Casei Naţionale de Asigurări de Sănătate în termen de 10 zile calendaristice de la data încheierii perioadei de depunere a dosarelor de contractare situaţia centralizatoare cu privire la:

- tipul şi denumirea fiecărui aparat
- seria şi numărul fiecărui aparat
- tipul, numărul şi data documentului care dovedeşte deţinerea legală a fiecărui aparat.

Constatarea ulterior încheierii contractului, a existenţei unor aparate de acelaşi tip şi cu aceeaşi serie şi număr la doi furnizori sau în două laboratoare/puncte de lucru ale aceluiaşi furnizor, conduce la aplicarea măsurii de reziliere a contractului pentru furnizorii/furnizorul respectiv.

f) Pentru a putea fi luate în considerare, aparatele trebuie să fie în perfectă stare de funcţionare, certificată cu documentele care atestă verificarea parametrilor funcţionali în termenul prevăzut de lege pentru fiecare tip de aparat. Această prevedere reprezintă condiţie de eligibilitate pentru aparatul/aparatele respective, în vederea atribuirii punctajului conform metodologiei de mai jos, respectiv a menţinerii sumelor rezultate din aplicarea acestuia.

Furnizorii vor prezenta contract de service încheiat cu un furnizor avizat de Ministerul Sanatatii conform prevederilor legale in vigoare, pentru aparatele iesite din perioada de garantie si valabil pe perioada de derulare a contractului de furnizare de servicii medicale. Pentru aparatele care ies din garantie pe parcursul derularii contractului de furnizare de servicii medicale furnizorii sunt obligati sa prezinte contractul de service anterior expirarii perioadei de garantie.

g) Furnizorii au obligaţia să prezinte la contractare, respectiv pe parcursul derulării contractului de furnizare de servicii medicale: avizul de utilizare sau buletinul de verificare periodică, emise conform prevederilor legale în vigoare, pentru aparatura din dotare. Această prevedere reprezintă condiţie de eligibilitate pentru aparatul/aparatele respective, în vederea atribuirii punctajului conform metodologiei de mai jos, respectiv a menţinerii sumelor rezultate din aplicarea acestuia.

Se acordă punctaj pentru fiecare aparat deţinut care efectuează servicii medicale paraclinice ce fac obiectul contractului de furnizare de servicii încheiat cu casa de asigurări de sănătate, după cum urmează:

Pentru furnizorii de servicii de laborator care participă cu mai multe puncte de lucru la contractare cu o casă de asigurări de sănătate, punctajul corespunzător pct. 1 şi 3 se acordă o singură dată pentru punctul de lucru pentru care optează furnizorul de servicii medicale de laborator.

Punctajul obţinut de fiecare furnizor prin aplicarea acestui criteriu se afişează pe pagina web a casei de asigurări de sănătate.

2. Criteriul de calitate

Ponderea acestui criteriu este de 50%

a) 70% din suma corespunzătoare acestui criteriu se alocă pentru subcriteriul "implementarea sistemului de management al calităţii", în conformitate cu SR EN ISO/CEI 17025 sau SR EN ISO 15189:2007 şi care este dovedit de furnizor prin certificatul de acreditare însoţit de anexa care cuprinde lista de analize medicale pentru care este acreditat fiecare laborator/sau laborator organizat ca punct de lucru pentru care s-a încheiat contract, în termen de valabilitate.

Punctajul obţinut de fiecare furnizor se stabileşte astfel:

a1) - se acordă câte un punct pentru fiecare analiză medicală de Biochimie, Hematologie şi analize de urină (cu excepţia uroculturii) prevăzută în Anexa nr. 7 la ordin şi cuprinsă în anexa la certificatul de acreditare numai pentru punctul de lucru pentru care s-a făcut acreditarea;

a2) - se acordă câte 2 puncte pentru fiecare analiză medicală prevăzută în celelalte grupe de analize prevăzute în anexa nr. 7 la ordin, altele decât cele menţionate la lit. a1) şi cuprinsă în anexa la certificatul de acreditare numai pentru punctul de lucru pentru care s-a făcut acreditarea;

_____

Notă:

Pentru testele compuse din mai mulţi parametri nu se iau în calcul toţi parametrii – se consideră un singur test, cu excepţia categoriei microbiologie, unde diversele etape de lucru (examen microscopic, cultură cu identificare microbiană inclusiv antibiograma /fungigrama) constituie teste separate şi se iau în calcul separat.

b) 30% din suma corespunzătoare acestui criteriu se alocă pentru subcriteriul "participare la schemele de testare a competenţei pentru laboratoare de analize medicale

pentru laboratoare de analize medicale notificate de Ministerul Sănătăţii" şi care este dovedit de furnizor prin documentul de atestare care cuprinde şi lista analizelor medicale pentru care este atestat fiecare laborator/punct de lucru pentru care s-a încheiat contract, în termen de valabilitate.

Punctajul obţinut de fiecare furnizor se stabileşte astfel:

b1) - se acordă câte un punct pentru fiecare analiză medicală de biochimie, hematologie şi analize de urină (cu excepţia uroculturii) prevăzută în Anexa nr.7 la ordin şi;

b2) - se acordă câte 2 puncte pentru fiecare analiză medicală prevăzută în celelalte grupe de analize prevăzute în anexa nr. 7, altele decât cele menţionate la lit. b1);

pentru care se face dovada de participare la schemele de testare a competenţei pentru laboratoare de analize medicale, cu condiţia ca aceasta să se fi efectuat de cel puţin 4 ori/an în ultimele 12 luni. Pe parcursul derulării contractului obligaţia participării la schemele de testare a competenţei de cel puţin 4 ori pe an rămâne valabilă în aceleaşi condiţii.

Pentru participarea la un numar mai mare de 4 ori pe an la schemele de testare a competentei punctajul se va multiplica astfel:

- pentru participarea la un numar de 6 ori pe an se acorda o crestere a punctajului de 10%
- pentru participarea la un numar de 12 ori pe an se acorda o creştere a punctajului de 15%.

Punctajul obţinut de fiecare furnizor prin aplicarea acestui criteriu se afişează pe pagina web a casei de asigurări de sănătate.

_____

Notă:

Pentru testele compuse din mai mulţi parametri nu se iau în calcul toţi parametrii – se consideră un singur test, cu excepţia categoriei microbiologie, unde diversele etape de lucru (examen microscopic, cultură cu identificare microbiană inclusiv antibiograma /fungigrama) constituie teste separate şi se iau în calcul separat.

3. Criteriul financiar

Ponderea acestui criteriu este de 5%

Criteriul financiar se referă la tarifele propuse de furnizorii de analize medicale de laborator, cu încadrarea obligatorie în tarifele maximale prevăzute în anexa nr. 7 la ordin.

Furnizorii de servicii medicale de laborator care prezintă tarife ce depăşesc tarifele maximale decontate de casele de asigurări de sănătate cuprinse în anexa nr. 7 la ordin sunt respinşi de la contractare.

a. Pentru încheierea contractului cu casa de asigurări de sănătate, furnizorii de analize medicale de laborator prezintă în ofertă procentul cu care propun diminuarea tarifelor maximale prevăzute în anexa nr. 7 la ordin; procentul de diminuare se propune distinct pentru fiecare categorie de analize (hematologie, biochimie, imunologie, microbiologie, anatomie patologică).

b. Procentul de diminuare propus pentru fiecare categorie de analize se aplică pentru toate analizele cuprinse în categoria respectivă şi nu poate depăşi 5% din tariful maximal.

c. Tarifele rezultate ca urmare a aplicării procentului de diminuare cel mai mare propus pentru fiecare categorie de analize medicale reprezintă tarifele care se contractează cu toţi furnizorii de analize medicale de laborator.

d. Acest criteriu este apreciat cu un punctaj de maximum 100. Punctajul 100 se acordă furnizorului care a ofertat procentul de diminuare cel mai mare pentru fiecare categorie de analize medicale. Pentru furnizorii care au propus procente de diminuare mai mici faţă de procentul de diminuare cel mai mare se acordă un punctaj proporţional în funcţie de primul clasat.

Pentru furnizorii de servicii medicale de laborator care participă cu mai multe laboratoare/puncte de lucru la contractare, punctajul se acordă o singură dată pentru toate analizele medicale, indiferent de numărul laboratoarelor/punctelor de lucru cu care furnizorul intră în contract.

Punctajul obţinut de fiecare furnizor prin aplicarea acestui criteriu se afişează pe pagina web a casei de asigurări de sănătate.

Sumele se stabilesc pentru fiecare furnizor astfel:

A. Fondul cu destinaţia de analize medicale de laborator se repartizează pentru fiecare criteriu în parte, astfel:

a) 45% pentru criteriul de evaluare resurse;

b) 50% pentru criteriul de calitate, din care 70% pentru subcriteriul "implementarea sistemului de management al calităţii" şi 30% pentru subcriteriul "participare la schemele de testare a competenţei pentru laboratoare de analize medicale";

c) 5% pentru criteriul financiar.

B. Pentru fiecare criteriu/subcriteriu se stabileşte numărul total de puncte obţinut prin însumarea numărului de puncte obţinut de fiecare furnizor, cu excepţia numărului total de puncte obţinut de furnizorii de servicii medicale spitaliceşti care efectuează investigaţii medicale paraclinice - analize medicale de laborator în regim ambulatoriu şi de laboratoarele de analize medicale / punctele de lucru ale acestora organizate ca urmare a procedurii de externalizare.

C. Se calculează valoarea unui punct pentru fiecare criteriu/subcriteriu prin împărţirea sumei rezultate ca urmare a aplicării procentelor prevăzute la lit. A la numărul de puncte corespunzător fiecărui criteriu/subcriteriu, număr stabilit conform lit. B.

D. Valoarea unui punct obţinută pentru fiecare dintre criteriile/subcriteriile prevăzute la lit. A se înmulţeşte cu numărul de puncte obţinut de un furnizor corespunzător fiecărui criteriu/subcriteriu, rezultând sumele aferente fiecărui criteriu/subcriteriu pentru fiecare furnizor.

E. Valoarea totală contractată de un furnizor cu casa de asigurări de sănătate se obţine prin însumarea sumelor stabilite conform lit. D.

F. Criteriile şi modalitatea de calcul se aplică în acelaşi mod şi pentru furnizorii de servicii medicale paraclinice pentru laboratoarele/punctele de lucru ale acestora organizate ca urmare a procedurii de externalizare şi care efectuează investigaţii medicale paraclinice - analize medicale de laborator în regim ambulatoriu, precum şi pentru furnizorii de servicii medicale spitaliceşti care efectuează investigaţii medicale paraclinice - analize medicale de laborator în regim ambulatoriu.

Valoarea unui punct obţinută pentru fiecare dintre criteriile/subcriteriile prevăzute la lit. A se înmulţeşte cu numărul de puncte obţinut de un furnizor corespunzător fiecărui criteriu/subcriteriu, rezultând sumele aferente fiecărui criteriu/subcriteriu pentru fiecare furnizor.

Sumele care rezultă pentru aceşti furnizori se contractează şi se decontează din fondul alocat pentru asistenţa medicală spitalicească.

NOTA 1: În funcţie de necesarul de investigaţii medicale paraclinice - analize medicale de laborator, pe tipuri, suma aferentă investigaţiilor medicale paraclinice - analize medicale de laborator - poate fi repartizată de casele de asigurări de sănătate pe tipuri de servicii medicale paraclinice de laborator, astfel:

- analize medicale de laborator;
- analize de anatomie patologică (histopatologice şi de citologie, inclusiv examenul Babeş Papanicolau)

G. Casele de asigurări de sănătate, ca urmare a stabilirii numărului necesar de investigaţii medicale paraclinice - analize medicale de laborator pe total judeţ - de către comisia constituită conform art. 44 alin. (5) din Contractul-cadru vor stabili suma ce se va

contracta cu furnizorii de investigaţii medicale paraclinice de anatomie patologică din totalul fondului cu destinaţia de servicii medicale paraclinice - analize medicale de laborator.

Pentru furnizorii de investigaţii medicale paraclinice - laboratoare de anatomie patologică - criteriile specifice de selecţie se aplică în mod corespunzător (numai analizele, aparatele şi personalul specific).

1. Criteriul de evaluare a resurselor

Ponderea acestui criteriu este de 85%

Ca urmare a aplicării metodologiei de stabilire a punctajului, fiecare furnizor de investigaţii medicale paraclinice de radiologie-imagistică medicală obţine un punctaj corespunzător acestui criteriu.

A. Evaluarea capacităţii resurselor tehnice

a) Furnizorii de servicii medicale paraclinice - radiologie şi imagistică medicală sunt obligaţi să facă dovada deţinerii legale a aparaturii prin documente conforme şi în termen de valabilitate.

b) Casele de asigurări de sănătate sunt obligate să verifice dacă seria şi numărul aparatului existent în cadrul laboratorului sunt conforme cu seria şi numărul aparatului înscrise în cuprinsul documentelor care atestă existenţa şi deţinerea legală a acestora.

c) Furnizorii sunt obligaţi să prezinte toate fişele tehnice corespunzătoare aparatelor deţinute şi pentru care încheie contract de furnizare de servicii cu casa de asigurări de sănătate.

d) Nu sunt luate în calcul aparatele care nu au înscrise pe ele seria şi numărul, şi nici aparatele pentru care furnizorii nu pot prezenta fişele tehnice conforme şi în termen de valabilitate ale acestora.

e) Dacă doi sau mai mulţi furnizori prezintă aparate înregistrate cu aceeaşi serie şi număr înainte sau în perioada de contractare, acestea sunt excluse definitiv şi nu se mai iau în calcul la nici unul dintre furnizori.

Fac excepţie furnizorii de servicii medicale paraclinice - radiologie şi imagistică care îşi desfăşoară activitatea utilizând acelaşi spaţiu şi aceleaşi echipamente specifice deţinute şi/sau utilizate în comun în condiţiile legii, cu prezentarea documentelor justificative prevăzute de actele normative în vigoare şi numai în condiţiile în care personalul medical de specialitate al fiecărui furnizor îşi desfăşoară activitatea cu respectarea dispoziţiilor Contractului-cadru pentru anii 2011 – 2012 aprobat prin H.G. nr.1389/2010, cu modificările şi completările ulterioare şi ale prezentului ordin şi într-un program de lucru distinct.

g) Pentru a putea fi luate în considerare, aparatele trebuie să fie în perfectă stare de funcţionare, certificată cu documentele care atestă verificarea parametrilor funcţionali în termenul prevăzut de lege pentru fiecare tip de aparat.

h) Furnizorii au obligaţia să prezinte la contractare, respectiv pe parcursul derulării contractului de furnizare de servicii medicale: avizul de utilizare sau buletinul de verificare periodică, emise conform prevederilor legale în vigoare, pentru aparatura din dotare. Această prevedere reprezintă condiţie de eligibilitate pentru aparatul/aparatele respective, în vederea atribuirii punctajului conform metodologiei de mai jos, respectiv a menţinerii sumelor rezultate din aplicarea acestuia.

c) 10% criteriul de disponibilitate.

B. Pentru fiecare criteriu se stabileşte numărul total de puncte obţinut prin însumarea numărului de puncte obţinut de fiecare furnizor la cele trei criterii, cu excepţia numărului total de puncte obţinut de furnizorii de servicii medicale spitaliceşti care efectuează investigaţii de radiologie şi imagistică medicală în regim ambulatoriu şi de laboratoarele de radiologie şi imagistică medicală / punctele de lucru ale acestora organizate ca urmare a procedurii de externalizare.

C. Se calculează valoarea unui punct pentru fiecare criteriu prin împărţirea sumei rezultate ca urmare a aplicării procentelor prevăzute la lit. A la numărul total de puncte corespunzător fiecărui criteriu, număr stabilit conform lit. B.

D. Valoarea unui punct obţinută pentru fiecare dintre cele 3 criterii se înmulţeşte cu numărul de puncte obţinut de un furnizor pentru fiecare criteriu, rezultând sume aferente fiecărui criteriu pentru fiecare furnizor.

E. Valoarea totală contractată de un furnizor cu casa de asigurări de sănătate se obţine prin însumarea celor trei sume stabilite conform lit. D.

F. Criteriile şi modalitatea de calcul se aplică în acelaşi mod şi pentru furnizorii de servicii paraclinice de radiologie-imagistică pentru laboratoarele/punctele de lucru ale acestora organizate ca urmare a procedurii de externalizare şi care efectuează investigaţii paraclinice de radiologie-imagistică în regim ambulatoriu, precum şi pentru furnizorii de servicii medicale spitaliceşti care efectuează investigaţii paraclinice de radiologie-imagistică în regim ambulatoriu.

Sumele care rezultă pentru aceşti furnizori se contractează şi se decontează din fondul alocat pentru asistenţa medicală spitalicească.

G. Casele de asigurări de sănătate, ca urmare a stabilirii numărului necesar de investigaţii paraclinice de radiologie-imagistică medicală pe total judeţ - de către comisia constituită conform art. 44 alin. (5) din Contractul-cadru pentru anii 2011 – 2012 aprobat prin H.G. nr. 1389/2010, cu modificările şi completările ulterioare, vor stabili suma ce se va contracta cu furnizorii de explorări funcţionale din totalul fondului cu destinaţia de servicii paraclinice de radiologie-imagistică medicală.

Pentru furnizorii de explorări funcţionale - criteriile specifice de selecţie se aplică în mod corespunzător (numai investigaţiile, aparatele şi personalul specific).

H. În situaţia în care niciunul dintre furnizori nu îndeplineşte criteriul de disponibilitate, suma corespunzătoare aplicării prevederilor lit. A lit. c) se repartizează proporţional la celelalte criterii prevăzute la lit. A lit. a) - b).

CAPITOLUL II Pachet minimal de servicii medicale în asistenţa medicală spitalicească

În situaţia în care pacientul nu poate dovedi achitarea la zi a contribuţiei datorate la fond, spitalul acordă serviciile medicale pentru situaţiile de urgenţă având obligaţia să evalueze situaţia medicală a pacientului şi să îl externeze dacă serviciile medicale de urgenţă nu se mai justifică. La solicitarea pacientului se poate continua internarea cu suportarea cheltuielilor aferente serviciilor medicale spitaliceşti de către acesta.

Criteriile pe baza cărora se efectuează internarea pacienţilor beneficiari ai pachetului minimal de servicii medicale sunt:

- situaţiile de urgenţă medico-chirurgicală în care este pusă în pericol viaţa pacientului sau care au acest potenţial până la rezolvarea situaţiei de urgenţă;

- boli cu potenţial endemo-epidemic până la rezolvarea completă a cazului.

CAPITOLUL III Pachet de servicii medicale spitaliceşti pentru persoanele care se asigură facultativ pentru sănătate

- urgenţe medico-chirurgicale în care este pusă în pericol viaţa pacientului sau care au acest potenţial, până la rezolvarea situaţiei de urgenţă;

- boli cu potenţial endemo-epidemic până la rezolvarea completă a cazului.

- tratamentul bolnavilor psihic prevăzuţi la art. 105, 113 şi 114 din Codul penal şi în cazurile dispuse prin ordonanţă a procurorului pe timpul judecării sau urmăririi penale, care necesită izolare sau internare obligatorie;

- naşterea;

- diagnosticul şi tratamentul nu pot fi monitorizate în ambulatoriu.

SPITALE

ART. 1 Serviciile medicale spitaliceşti de care beneficiază asiguraţii sunt: servicii medicale spitaliceşti pentru patologie care necesită internare prin spitalizare continuă şi spitalizare de zi.

ART. 2 Serviciile medicale spitaliceşti se acordă sub formă de:

1. servicii medicale spitaliceşti acordate în regim de spitalizare continuă - forma de internare prin care se acordă asistenţă medicală preventivă, curativă, de recuperare şi paliativă pe toată durata necesară rezolvării complete a cazului respectiv;

2. servicii medicale spitaliceşti acordate în regim de spitalizare de zi - reprezintă o alternativă la spitalizarea continuă pentru pacienţii care nu necesită supraveghere medicală mai mare de 12 ore şi pot fi servicii medicale programabile sau neprogramabile.

ART. 3 Serviciile medicale spitaliceşti ce se pot acorda în regim de spitalizare de zi în unităţile sanitare care nu încheie contract de furnizare de servicii medicale spitaliceşti în spitalizare continuă, autorizate de Ministerul Sănătăţii, fac obiectul unui contract pentru furnizare de servicii medicale spitaliceşti acordate în regim de spitalizare de zi, Contractul

se adaptează după modelul de contract de furnizare de servicii medicale spitaliceşti prevăzut în anexa nr. 20 la ordin.

Tarifele/servicii medicale se negociază pe baza propunerilor de oferte ale furnizorilor de servicii medicale, având în vedere documentele pentru fundamentarea tarifului, şi nu pot fi mai mari decât tarifele maximale decontate de casele de asigurări de sănătate, prevăzute în anexa nr. 16 la ordin.

Tariful/caz rezolvat se negociază de unităţile sanitare cu casele de asigurări de sănătate, având în vedere documentele pentru fundamentarea tarifului, şi nu poate fi mai mare de:

- 1/3 din tariful cel mai mic dintre: tariful pe caz rezolvat din sistemul DRG şi tariful mediu pe caz rezolvat, pentru serviciile medicale acordate în regim de spitalizare continuă, aferent spitalelor aflate în relaţie contractuală cu casa de asigurări de sănătate.

ART. 4 (1) Furnizarea de servicii medicale spitaliceşti se acordă în baza contractelor şi a actelor adiţionale încheiate de spitale cu casele de asigurări de sănătate, având în vedere următorii indicatori specifici spitalelor, după caz:

a) indicatori cantitativi - în funcţie de care se stabileşte capacitatea maximă de funcţionare:

1. număr de personal medical de specialitate existent conform structurii spitalelor, având în vedere şi numărul de posturi aprobate, potrivit legii;

2. număr de paturi stabilit potrivit structurii organizatorice a spitalelor aprobată sau avizată, după caz, de Ministerul Sănătăţii, în condiţiile legii;

3. indicele mediu de utilizare a paturilor la nivel naţional şi în conformitate cu planul de paturi aprobat la nivel judeţean stabilit prin ordin al ministrului sănătăţii; indicele mediu de utilizare a paturilor la nivel naţional luată în calcul la stabilirea capacităţii maxime a spitalelor, în funcţie de clasificarea acestora este de 294,7 zile.

4. număr de zile de spitalizare, total şi pe secţii, stabilit pe baza ratei medii de utilizare a paturilor la nivel naţional pe tipuri de solicitare;

5. durată optimă de spitalizare / durata de spitalizare efectiv realizată / durată medie de spitalizare la nivel naţional în secţiile pentru afecţiuni acute, după caz;

6. număr de cazuri externate - spitalizare continuă, calculat la capacitatea maximă de funcţionare a spitalului, potrivit structurii organizatorice a spitalului aprobată sau avizată, după caz, de Ministerul Sănătăţii şi normativelor în vigoare, pe secţii şi compartimente;

7. indice de complexitate a cazurilor;

8. număr de servicii medicale spitaliceşti acordate în regim de spitalizare de zi şi număr cazuri rezolvate pentru serviciile medicale acordate în regim de spitalizare de zi;

9. numărul şi tipul investigaţiilor paraclinice estimate a se realiza de către spitale, în regim ambulatoriu;

10. tarif pe caz rezolvat (DRG);

11. tarif mediu pe caz rezolvat;

12. tarif pe serviciu medical, respectiv tarif pe caz rezolvat.

13. tarif pe zi de spitalizare.

b) indicatori calitativi:

1. gradul de complexitate a serviciilor medicale spitaliceşti acordate în funcţie de morbiditatea spitalizată, de dotarea spitalului cu aparatură şi de încadrarea cu personalul de specialitate;

2. infecţii nosocomiale raportate la numărul total de externări, conform indicatorilor asumaţi prin contractul de management;

3. gradul de operabilitate înregistrat pe secţiile/compartimentele de specialitate chirurgicală, conform indicatorilor asumaţi prin contractul de management;

4. mortalitatea raportată la numărul total de externări, conform indicatorilor asumaţi prin contractul de management;

5. numărul de cazuri de urgenţă medico/chirurgicală prezentate în structurile de urgenţă (camere de gardă), din care numărul cazurilor internate;

6. gradul de realizare a indicatorilor de management contractaţi pentru anul 2010 , sau pentru perioada corespunzătoare, după caz.

(2) Spitalele vor prezenta caselor de asigurări de sănătate, în vederea contractării, nivelul indicatorilor de performanţă ai managementului spitalului public asumaţi prin contractul de management, cu excepţia spitalelor care au manager interimar.

(3) Spitalele vor prezenta, în vederea contractării, defalcarea cazurilor de spitalizare estimate pe fiecare secţie şi pe tip de bolnavi: urgenţa, acut, cronic. În vederea contractării serviciilor spitaliceşti efectuate prin spitalizare de zi spitalele prezintă distinct numărul serviciilor medicale (cazurilor) estimate a se efectua în camera de gardă şi în structurile de urgenţă din cadrul spitalelor, altele decât spitalele de urgenţă, pentru cazurile neinternate.

(4) Casele de asigurări de sănătate încheie cu spitalele contracte de furnizare de servicii medicale spitaliceşti luând în calcul numărul maxim de paturi, în condiţiile prevederilor Hotărârii de Guvern privind aprobarea Planului naţional de paturi pentru perioada 2011 – 2013

(5) Cazurile internate prin spitalizare continuă ca şi cazuri de urgenţă vor fi codificate la externare conform reperelor prevăzute la literele A şi B ale cap.I din anexa nr. 21 la ordin.

ART. 5 (1) Valoarea totală contractată de spitale cu casele de asigurări de sănătate se constituie din următoarele sume, după caz:

a) suma aferentă serviciilor medicale spitaliceşti ,pentru afecţiunile acute, a căror plată se face pe bază de tarif pe caz rezolvat (DRG) pentru spitalele finanţate în sistem DRG, respectiv tarif mediu pe caz rezolvat pentru spitalele non-DRG, se stabileşte astfel:

- număr de cazuri externate x indice case-mix Rovi DRG 2011 x tarif pe caz ponderat pentru anul 2011,

respectiv

- număr de cazuri externate x tarif mediu pe caz rezolvat pe specialităţi

La calculul acestei sume se vor avea în vedere:

a1) Suma maxima posibil de contractat (Sp) în funcţie de capacitatea maximă de funcţionare a fiecărui spital calculată în conformitate cu prevederile Ordinului comun al ministrului sănătăţii şi preşedintelui Casei Naţionale de Asigurări de Sănătate nr. 862/547/2011 privind stabilirea sumelor minime contractate de spitale cu casele de asigurări de sănătate pentru serviciile de spitalizare continuă pentru pacienţi acuţi, pe baza clasificării spitalelor în funcţie de competenţă .

La calcularea formulei prevăzute în alin.(1) al art. 3 din anexa la Ordinul 862/547/2011, numărul de paturi aprobate şi contractabile după aplicarea prevederilor Planului Naţional de Paturi se stabileşte, de către o comisie formată din reprezentanţi ai casei de asigurări de sănătate şi ai direcţiei de sănătate publică / direcţiile medicale sau de structurile similare din ministerele şi instituţiile centrale cu reţea sanitară proprie.

Pentru anul 2011, numărul de cazuri externate calculat conform formulei prevăzute în alin.(1) al art. 3 din anexa la Ordinul 862/547/2011 nu poate fi mai mare decât numărul mediu lunar de cazuri externate şi validate în anul precedent x 7 luni.

a2) Suma minimă contractată (Sm) de fiecare spital cu casa de asigurări de sănătate, pentru servicii de spitalizare continuă pentru afecţiuni acute, în funcţie de categoria în care este clasificat spitalul, calculată în conformitate cu prevederile Ordinului comun al ministrului sănătăţii şi preşedintelui Casei Naţionale de Asigurări de Sănătate nr. 862/547/2011 privind stabilirea sumelor minime contractate de spitale cu casele de

asigurări de sănătate pentru serviciile de spitalizare continuă pentru pacienţi acuţi, pe baza clasificării spitalelor în funcţie de competenţă

Pentru spitalele non-DRG sau nou intrate in contractare în formulele de mai sus ICM-ul şi TCP-ul se înlocuiesc cu media ponderată calculată la tariful mediu pe caz rezolvat negociat pe specialităţi şi la numarul de cazuri externate pe fiecare specialitate ţinând cont de valoarea procentului de referinţă pentru categoria în care se clasifică spitalul, în conformitate cu prevederile Ordinului comun al ministrului sănătăţii şi preşedintelui Casei Naţionale de Asigurări de Sănătate nr. 862/547/2011 privind stabilirea sumelor minime contractate de spitale cu casele de asigurări de sănătate pentru serviciile de spitalizare continuă pentru pacienţi acuţi, pe baza clasificării spitalelor în funcţie de competenţă.

a3) Suma suplimentară (Ss) ce poate fi contractată peste cea minimă, la nivelul fiecărui spital, în limita fondurilor disponibile la nivelul casei de asigurări de sănătate, cu respectarea prevederilor art. 4 alin. (4) se stabileşte luând în calcul:

număr cazuri externate în anul 2010 (calculat ca număr mediu lunar de cazuri externate şi validate în anul 2010 x 7 luni) x (ICM x TCP, în anul 2011) pentru fiecare spital. Nu se reduc cazurile de urgenta estimate a se interna luând in calcul datele ultimilor 3 ani.

Pentru spitalele non-DRG în formula de mai sus ICM-ul şi TCP-ul se înlocuiesc cu media ponderată calculată la tariful mediu pe caz rezolvat negociat pe specialităţi şi la numarul de cazuri externate pe fiecare specialitate.

a4) Număr de cazuri externate ce poate fi contractat:

La negocierea numărului de cazuri externate pe spital şi pe secţie se vor avea în vedere:

a4.1- numărul de cazuri externate calculat la suma minimă = Sm / (ICMxTCP aferente fiecărui spital); rezultatul se rotunjeşte la număr întreg (în plus).

Pentru spitalele non-DRG în formula de mai sus ICM-ul şi TCP-ul se înlocuiesc cu media ponderată calculată la tariful mediu pe caz rezolvat negociat pe specialităţi şi la numarul de cazuri externate pe fiecare specialitate.

a4.2. Număr de cazuri externate suplimentar contractat / spital = (Suma suplimentară contractată / (ICM x TCP aferente spitalului şi prevăzute în Anexa 17A)); rezultatul se rotunjeşte la număr întreg (în plus).

Pentru spitalele non-DRG sau nou intrate în contracatare în formula de mai sus ICM-ul şi TCP-ul se înlocuiesc cu media ponderată calculată la tariful mediu pe caz rezolvat negociat pe specialităţi şi la numarul de cazuri externate pe fiecare specialitate ţinând cont de valoarea procentului de referinţă pentru categoria în care se clasifică spitalul, în conformitate cu prevederile Ordinului comun al ministrului sănătăţii şi preşedintelui Casei Naţionale de Asigurări de Sănătate nr. 862/547/2011 privind stabilirea sumelor minime contractate de spitale cu casele de asigurări de sănătate pentru serviciile de spitalizare continuă pentru pacienţi acuţi, pe baza clasificării spitalelor în funcţie de competenţă.

a4.3. Numărul anual de cazuri externate negociat şi contractat se defalcă pe trimestre. La stabilirea numărului de cazuri externate contractate pe spital se ţine seama şi de modul de realizare a indicatorilor calitativi din anul precedent; în acest scop, spitalele organizează şi raportează trimestrial evidenţa acestor indicatori, caselor de asigurări de sănătate şi direcţiilor de sănătate publică.

a5) Indicele de case-mix RoVi DRG 2011 se calculează pentru fiecare spital pe baza numărului şi a tipurilor de cazuri raportate în perioada 1 ianuarie 2011 - 30 aprilie 2011. Numărul de cazuri ponderate se obţine prin înmulţirea numărului negociat de cazuri externate cu indicele de case-mix.

Indicele de case-mix este prezentat în anexa nr. 17 A la ordin.

a6) Tariful pe caz ponderat pentru anul 2011 este prezentat în anexa nr. 17 A la ordin şi se stabileşte pentru fiecare spital.

Lista cuprinzând categoriile majore de diagnostice, tipurile de cazuri ce sunt decontate (grupele de diagnostice, valorile relative, durata medie de spitalizare la nivel naţional, limitele superioare şi inferioare ale intervalului de normalitate al duratei de spitalizare pentru fiecare grupă de diagnostic, mediana duratei de spitalizare in sectiile ATI - naţional, precum şi definirea termenilor utilizaţi) sunt prevăzute în anexa nr. 17 B la ordin.

În situaţia în care unul din spitalele prevăzute în anexa nr. 17 A la ordin are în structură secţii/compartimente de cronici, recuperare şi neonatologie - prematuri sau îngrijiri paliative, contractarea acestor servicii se efectuează conform prevederilor de la lit. b);

a7) Tarif mediu pe caz rezolvat pe specialităţi

Tariful mediu pe caz rezolvat se stabileşte prin negociere între furnizori şi casele de asigurări de sănătate având în vedere documentele pentru fundamentarea tarifului şi indicatorul cost mediu cu medicamentele pe caz externat pe anul 2010 şi sumele aprobate la nivelul casei de asigurări de sănătate cu destinaţia servicii medicale spitaliceşti. Tariful mediu pe caz rezolvat pe specialităţi negociat nu poate fi mai mare decât tariful maximal prevăzut în anexa nr. 17 C la ordin.

În situaţia în care unul din spitale are în structură secţii/compartimente de cronici, recuperare şi neonatologie - prematuri şi îngrijiri paliative, contractarea acestor servicii se efectuează conform prevederilor lit. b).

b) suma pentru spitalele de cronici şi de recuperare, precum şi pentru secţiile şi compartimentele de cronici, recuperare şi neonatologie - prematuri (prevăzute ca structuri distincte în structura spitalului aprobată/avizată de Ministerul Sănătăţii) din alte spitale, care se stabileşte astfel:

- număr de cazuri externate x durata optimă de spitalizare sau, după caz, durata efectiv realizată x tariful pe zi de spitalizare

1. Numărul de cazuri externate

Numărul de cazuri externate pe spitale/secţii/compartimente se negociază în funcţie de:

- media cazurilor externate în ultimii 5 ani la nivelul spitalului (ţinându-se cont de modificările de structură aprobate/avizate de Ministerul Sănătăţii, după caz) şi al judeţului;

- cazurile estimate a fi externate pe spital şi pe secţie în anul 2011, în funcţie de numărul de paturi aprobat, de rata medie de utilizare a paturilor la spitalul/secţia/compartimentul respectiv şi de durata optimă de spitalizare sau, după caz, durata de spitalizare efectiv realizată, pentru secţiile/compartimentele unde aceasta a fost mai mică decât cea optimă, dar nu mai mică de 75% faţă de aceasta, cu respectarea prevederilor art. 4 alin. (1) lit. a), după caz.

Numărul anual de cazuri externate negociat se defalcă pe trimestre. La stabilirea numărului de cazuri externate contractate pe spital/secţie/compartiment se ţine seama de modul de realizare a indicatorilor calitativi din anul precedent; în acest scop, spitalele vor ţine evidenţa acestor indicatori.

2. Durata optimă de spitalizare stabilită de către comisiile de specialitate ale Ministerului Sănătăţii pe secţii este valabilă pentru toate categoriile de spitale şi este prevăzută în anexa nr. 19 la ordin. Pentru secţiile/spitalele de psihiatrie cronici cu internări obligatorii pentru bolnavii psihici prevăzuţi la art. 105, 113 şi 114 din Codul penal şi cele dispuse prin ordonanţa procurorului pe timpul judecării sau urmăririi penale, precum şi pentru bolnavii care necesită asistenţă medicală spitalicească de lungă durată (ani) se ia în considerare durata medie de spitalizare efectiv realizată în anul precedent.

3. Tariful pe zi de spitalizare pe secţie/compartiment se negociază pe baza tarifului pe zi de spitalizare propus de fiecare spital pentru secţiile şi compartimentele din structura proprie, având în vedere documentele pentru fundamentarea tarifului, în funcţie de particularităţile aferente fiecărui tip de spital, cu încadrarea în sumele aprobate la nivelul

casei de asigurări de sănătate cu destinaţie servicii medicale spitaliceşti. Tarifele pe zi de spitalizare negociate nu pot fi mai mari decât tarifele maximale prevăzute în anexa nr. 17 C la ordin.

4. Pentru secţiile medicale, numărul de cazuri externate, obţinut în condiţiile prevăzute mai sus, se poate diminua prin negociere între furnizori şi casele de asigurări de sănătate, cu numărul de internări corespunzătoare anului 2010 pentru care nu se justifică internarea.

Pentru situaţiile în care se constată reinternarea cazului externat, pentru patologie de acelaşi tip, în termen de 48 de ore de la externare, numărul de cazuri externate care pot fi contractate se diminuează corespunzător.

5. Casele de asigurări de sănătate contractează servicii medicale paliative în regim de spitalizare continuă dacă acestea nu pot fi efectuate în condiţiile asistenţei medicale la domiciliu.

Suma aferentă serviciilor medicale paliative se stabileşte astfel:

Număr de paturi x număr de zile calendaristice dintr-un an estimat a fi ocupat un pat x tariful pe zi de spitalizare negociat. Tariful pe zi de spitalizare negociat nu poate fi mai mare decât tariful maximal prevăzute în anexa nr. 17 C la ordin.

c) suma aferentă Programului naţional cu scop curativ pentru medicamente şi materiale sanitare specifice, finanţată din fondul alocat pentru programul naţional cu scop curativ, care face obiectul unui contract distinct, al cărui model este prevăzut în normele tehnice de realizare a programelor naţionale de sănătate, aprobate prin ordin al ministrului sănătăţii şi al preşedintelui Casei Naţionale de Asigurări de Sănătate;

d) suma pentru serviciile de supleere renală, inclusiv medicamente şi materiale sanitare specifice, transportul nemedicalizat al pacienţilor hemodializaţi de la şi la domiciliul pacienţilor, transportul lunar al medicamentelor şi al materialelor sanitare specifice dializei peritoneale la domiciliul pacienţilor, acordate în cadrul programului naţional de supleere a funcţiei renale la bolnavii cu insuficienţă renală cronică din cadrul Programului naţional cu scop curativ, care face obiectul unui contract distinct, al cărui model este prevăzut în normele tehnice de realizare a programelor naţionale de sănătate, aprobate prin ordin al ministrului sănătăţii şi al preşedintelui Casei Naţionale de Asigurări de Sănătate;

e) suma pentru serviciile medicale efectuate în cabinete medicale de specialitate în: oncologie medicală, diabet zaharat, nutriţie şi boli metabolice în cabinete de planificare familială în care îşi desfăşoară activitatea medici cu specialitatea obstetrică-ginecologie şi în cabinete de boli infecţioase, care se află în structura spitalului ca unităţi fără personalitate juridică, precum şi în cabinete medicale de specialitate din ambulatoriul integrat al spitalului, finanţate din fondul alocat asistenţei medicale ambulatorii de specialitate pentru specialităţile clinice, conform anexei nr. 8 la ordin, respectiv din fondul alocat asistenţei medicale spitaliceşti pentru cabinetele prevăzute la art. 48 alin. (4) lit. b) din Contractul-cadru;

f) suma pentru investigaţii paraclinice efectuate în regim ambulatoriu, finanţată din fondul alocat asistenţei medicale spitaliceşti, stabilită conform prevederilor din anexa nr. 8 la ordin;

g) suma pentru serviciile medicale spitaliceşti efectuate în regim de spitalizare de zi pentru care plata se face prin tarif pe serviciu medical/caz rezolvat şi care se determină prin înmulţirea numărului negociat şi contractat de servicii medicale spitaliceşti pe tipuri/cazuri rezolvate cu tariful aferent acestora. Tariful pe serviciu medical se negociază între spitale şi casele de asigurări de sănătate şi nu poate fi mai mare decât tarifele maximale decontate de casele de asigurări de sănătate, prevăzute în anexa nr. 16 la ordin.

Pentru unităţile sanitare cu paturi care încheie contract de furnizare de servicii medicale spitaliceşti cu casa de asigurări de sănătate atât pentru spitalizare continuă cât şi pentru

spitalizare de zi, tariful pe caz rezolvat se negociază între spitale şi casele de asigurări de sănătate şi nu poate fi mai mare de:

- 1/3 din tariful pe caz rezolvat pentru serviciile medicale acordate în regim de spitalizare continuă aferent spitalului respectiv - pentru spitalele finanţate în sistem DRG;

- 1/3 din tariful mediu pe caz rezolvat cel mai mic pentru serviciile medicale acordate în regim de spitalizare continuă aferent spitalului aflat în relaţie contractuală cu casa de asigurări de sănătate - pentru spitalele finanţate prin tarif mediu pe caz rezolvat pe specialităţi.

- 1/3 din tariful cel mai mic pe caz rezolvat dintre: tariful pe caz rezolvat din sistemul DRG şi tariful mediu pe caz rezolvat, pentru serviciile medicale acordate în regim de spitalizare continuă, de la nivelul fiecărei case de asigurări de sănătate - pentru spitalele de cronici şi de recuperare, precum şi pentru secţiile şi compartimentele de cronici, recuperare şi neonatologie - prematuri (prevăzute ca structuri distincte în structura spitalului aprobată/avizată de Ministerul Sănătăţii, după caz) din alte spitale.

Suma contractată de către spital pentru servicii de spitalizare de zi, nu poate depăşi 25% din suma contractată pentru servicii de spitalizare continuă, astfel:

- pentru spitalele care în anul 2010 au realizat valori ale indicatorilor contractaţi în regim de spitalizare de zi şi care au fost decontate de către casele de asigurări de sănătate, mai mari de 25% faţă de valoarea decontată pentru indicatorii realizaţi în regim de spitalizare continuă, casele de asigurări contractează indicatori pentru activitatea de spitalizare de zi pentru anul 2011, în limita a maxim 25%, cu excepţia unităţilor sanitare de monospecialitate, care derulează programe naţionale de sănătate.

- pentru spitalele care în anul 2010 au realizat valori ale indicatorilor contractaţi în regim de spitalizare de zi şi care au fost decontate de către casele de asigurări de sănătate, mai mici de 25% faţă de valoarea decontată pentru indicatorii realizaţi în regim de spitalizare continuă, casele de asigurări contractează indicatori pentru activitatea de spitalizare de zi pentru anul 2011, cu creştere de maxim 5% peste valoarea anului 2010, dar fără a depăşi 25% din valoarea totală contractată pentru spitalizare continuă.

(2) Sumele de la lit. c) şi d) ale alin. (1) sunt prevăzute în contracte distincte. Sumele de la lit. e) şi f) ale alin. (1) sunt prevăzute distinct în actele adiţionale la contractul de furnizare de servicii medicale spitaliceşti.

(3) Cheltuielile ocazionate de activităţile desfăşurate în camera de gardă şi în structurile de urgenţă din cadrul spitalelor, altele decât spitalele de urgenţă, pentru cazurile care sunt internate prin spitalizare continuă, sunt cuprinse în structura tarifului pe caz rezolvat.

Cazurile pentru care se acordă servicii medicale în aceste structuri din cadrul spitalelor, sunt considerate cazuri rezolvate în regim de spitalizare de zi numai pentru cazurile neinternate prin spitalizare continuă, şi sunt decontate prin tarif pe caz rezolvat. Numărul de cazuri şi tariful aferent acestora se negociază cu casele de asigurări de sănătate, fiind suportate din fondul aferent asistenţei medicale spitaliceşti. Sumele contractate pentru cazurile rezolvate în regim de spitalizare de zi în cadrul acestor structuri se evidenţiază distinct în contractul de furnizare de servicii medicale spitaliceşti încheiat cu casa de asigurări de sănătate.

ART. 6 (1) La contractarea serviciilor medicale spitaliceşti casele de asigurări de sănătate vor avea în vedere 94% din fondurile aprobate cu această destinaţie la nivelul casei de asigurări de sănătate după ce s-a dedus suma aferentă serviciilor medicale paraclinice ce se pot efectua în ambulatoriu de către unităţile sanitare cu paturi şi de către furnizorii de servicii medicale - investigaţii paraclinice în laboratoarele/punctele de lucru din structura acestora organizate ca urmare a procedurii de externalizare.

(2) Diferenţa de 6% din fondul cu destinaţie servicii medicale spitaliceşti ce nu a fost contractată iniţial se utilizează astfel:

a) 5% pentru:

- decontarea serviciilor prevăzute la art. 48 alin. (4) lit. b) din Contractul-cadru,
- decontarea cazurilor externate prevăzute la art. 75 din Contractul-cadru,
- decontarea sumelor reprezentând depăşirea valorii trimestriale de contract cu maximum 5% din valoarea acesteia pentru spitalele de urgenţă
- alte situaţii justificate ce pot apărea în derularea contractelor încheiate cu furnizorii de servicii medicale spitaliceşti, după caz.

b) 1% pentru complexitate suplimentară a cazurilor în ceea ce priveşte comorbiditatea şi numărul de zile de îngrijiri acordate în cadrul secţiilor / compartimentelor de terapie intensivă. Suma se alocă numai spitalelor care îndeplinesc cumulativ următoarele criterii:

- prezenţa permanentă a cel puţin unui medic în cadrul secţiei/compartimentului de terapie intensivă
- prezenţa permanentă a unui număr corespunzător de personal mediu sanitar, conform prevederilor legale în vigoare, în cadrul secţiei/compartimentului de terapie intensivă
- consum de medicamente de minimum 5% din totalul bugetului stabilit pentru secţia/compartimentul de terapie intensivă
- consum de materiale sanitare cu cel puţin 50% peste media consumului de materiale sanitare la nivelul spitalului

Suma alocată trimestrial fiecărui spital care îndeplineşte criteriile de mai sus, se stabileşte conform următoarei formule:

Total zile de spitalizare peste mediana fiecărei grupe DRG în sectia /compartimentul de terapie intensiva a spitalui / Total zile de spitalizare peste mediana fiecărei grupe DRG la nivel tuturor spitalelor aflate in contract cu o casa de asigurari de sanatate pentru sectiile/compartimentele de terapie intensiva x Suma reprezentând 1% pentru complexitatea suplimentară a cazurilor.

Zilele de spitalizare peste mediana fiecărei grupe DRG din sectiile/compartimentele de terapie intensiva pentru fiecare spital se pun la dispozitia caselor de asigurari de sanatate trimestrial de catre de Şcoala Naţională de Sănătate Publică, Management şi Perfecţionare în Domeniul Sanitar Bucureşti.

Spitalele evaluează pacienţii atât la intrarea cât şi la ieşirea din compartimentele/secţiile TI, în conformitate cu sistemul de punctaj APACHE 2, astfel:

ART. 7 Fondurile suplimentare aprobate pentru anul 2011 cu destinaţia servicii medicale spitaliceşti, inclusiv sumele care nu au fost contractate iniţial, se contractează de către casele de asigurări de sănătate prin acte adiţionale la contractele iniţiale pentru anul 2011. Casele de asigurări de sănătate vor avea în vedere la repartizarea fondurilor suplimentare atât prevederile Ordinului comun al ministrului sănătăţii şi preşedintelui Casei Naţionale de Asigurări de Sănătate nr. 862/547/2011, cât şi indicatorii specifici fiecărei unităţi sanitare cu paturi, care au stat la baza stabilirii valorii iniţiale de contract/actelor adiţionale, precum şi nivelul de realizare a indicatorilor specifici în limita celor contractaţi în perioada de la începutul anului şi până la sfârşitul lunii anterioare celei în care se semnează actul adiţional, dar fără a se depăşi suma ce poate fi contractată în funcţie de capacitatea maximă de funcţionare a fiecărui spital.

ART. 8 Sumele pentru serviciile medicale spitaliceşti acordate în regim de spitalizare de zi de unităţile sanitare autorizate de Ministerul Sănătăţii să efectueze aceste servicii şi care nu încheie contract de furnizare de servicii medicale spitaliceşti în spitalizare continuă, se determină prin înmulţirea numărului de servicii medicale spitaliceşti/cazuri rezolvate cu tarifele negociate aferente acestora. Tarifele sunt stabilite conform prevederilor art. 3.

ART. 9 (1) Decontarea de către casele de asigurări de sănătate a serviciilor medicale contractate cu spitalele se face după cum urmează:

a) pentru serviciile medicale spitaliceşti acordate în spitale a căror plată se face pe baza indicatorului tarif pe caz rezolvat (DRG), decontarea lunară şi regularizarea trimestrială se realizează astfel:

1. Decontarea lunară în limita sumei contractate se face în funcţie de:

- numărul de cazuri externate şi raportate de către spital, din care se scad cazurile nevalidate în luna anterioară (validarea şi invalidarea cazurilor externate raportate se fac de către Şcoala Naţională de Sănătate Publică, Management şi Perfecţionare în Domeniul Sanitar Bucureşti, conform regulilor de validare stabilite prin ordin al preşedintelui Casei Naţionale de Asigurări de Sănătate);
- indicele de case-mix prevăzut în anexa nr. 17 A la ordin;

- tariful pe caz ponderat stabilit pentru anul 2011.

2. Regularizarea trimestrială în limita sumei contractate se face în funcţie de:

- numărul total de cazuri externate, raportate şi validate pentru perioada de la începutul anului până la sfârşitul trimestrului respectiv. (Validarea şi invalidarea cazurilor externate raportate se fac de către Şcoala Naţională de Sănătate Publică, Management şi Perfecţionare în Domeniul Sanitar Bucureşti, conform regulilor de validare stabilite prin ordin al preşedintelui Casei Naţionale de Asigurări de Sănătate); numărul de cazuri astfel nu poate depăşi un număr maxim de cazuri calculat la capacitatea maximă de funcţionare a spitalului, raportată la prevederile art. 4 alin. (1) lit. a).

- indicele de case-mix realizat pentru perioada de la începutul anului până la sfârşitul trimestrului respectiv, dar nu mai mare decât cel stabilit pentru anul 2011, prin anexa nr.17 A la ordin.

- tariful pe caz ponderat stabilit pentru anul 2011;

- coeficientul k al cazurilor extreme (ca durată de spitalizare). Acest coeficient se calculează trimestrial de Şcoala Naţională de Sănătate Publică, Management şi Perfecţionare în Domeniul Sanitar Bucureşti, pe baza cazurilor externate raportate şi validate pentru perioada de la începutul anului până la sfârşitul trimestrului respectiv. Modalitatea de calcul al coeficientului k este prevăzută în anexa nr. 17 B la ordin.

În situaţia în care numărul de cazuri ponderate realizat, corespunzător patologiei care necesită internare în regim de spitalizare continuă, este mai mic decât cel contractat, iar numărul de cazuri rezolvate/servicii medicale efectuate în regim de spitalizare de zi a crescut, dar fără a depăşi 25% din valoarea contractată pentru servicii în regim de spitalizare continuă, numărul de cazuri rezolvate/servicii medicale efectuate în regim de spitalizare de zi ce depăşeşte numărul de cazuri ponderate contractat se decontează la tariful pe caz rezolvat/serviciu medical negociat, majorat cu 5%, cu încadrarea în valoarea de contract.

În situaţia în care atât numărul de cazuri ponderate realizat, corespunzător patologiei care necesită internare în regim de spitalizare continuă, cât şi cel corespunzător cazurilor rezolvate/serviciilor medicale efectuate în regim de spitalizare de zi sunt mai mici decât numărul de cazuri ponderate, respectiv cazuri rezolvate/servicii medicale efectuate în regim de spitalizare de zi contractate, decontarea se face la nivelul realizat.

În situaţia în care atât numărul de cazuri ponderate realizat, corespunzător patologiei care necesită internare în regim de spitalizare continuă, cât şi cel corespunzător cazurilor rezolvate/serviciilor medicale efectuate în regim de spitalizare de zi sunt mai mari decât numărul de cazuri ponderate, respectiv cazuri rezolvate/servicii medicale efectuate în regim de spitalizare de zi contractat, se poate accepta la decontare o depăşire de maximum 5% atât a numărului de cazuri ponderate ce se vor deconta la un tarif care reprezintă 50% din tariful pe caz ponderat, cât şi a cazurilor rezolvate/serviciilor medicale efectuate în regim de spitalizare de zi. Casele de asigurări de sănătate pot accepta la decontare aceste depăşiri dacă spitalul/secţiile a/au luat decizia de creştere a numărului de internări, după epuizarea posibilităţii de înscriere pe listele de aşteptare a cazurilor programabile, şi dacă această creştere se regăseşte ca economii înregistrate la sumele care se decontează din fondul alocat asistenţei medicale spitaliceşti la alte spitale/secţii din judeţul respectiv, cu încadrarea în fondurile alocate asistenţei medicale spitaliceşti la nivelul caselor de asigurări de sănătate respective şi în condiţiile art. 5 alin. (1) lit. ~~h)~~ g);

b) serviciile medicale pentru care plata se face pe bază de tarif pe zi de spitalizare se decontează în limita sumei contractate în funcţie de:

- numărul de cazuri externate realizate şi validate (validarea şi invalidarea se fac de către Şcoala Naţională de Sănătate Publică, Management şi Perfecţionare în Domeniul Sanitar Bucureşti, conform regulilor de validare specifice stabilite prin ordin al preşedintelui Casei Naţionale de Asigurări de Sănătate);

- durata optimă de spitalizare pentru situaţiile la care este prevăzută durată optimă, astfel: durata optimă dacă durata efectiv realizată este mai mare decât durata optimă şi durata efectiv realizată dacă aceasta este mai mică decât durata optimă;

- durata efectiv realizată pentru situaţiile la care nu este prevăzută durată optimă;

- tariful pe zi de spitalizare negociat.

În cazul spitalelor/secţiilor de psihiatrie cronici, de psihiatrie cronici cu internări obligatorii pentru bolnavii psihici încadraţi la art. 105, 113 şi 114 din Codul penal şi internările dispuse prin ordonanţa procurorului pe timpul judecării sau urmăririi penale, precum şi pentru bolnavii care necesită asistenţă medicală spitalicească de lungă durată (ani), recuperare pediatrică - distrofici, neonatologie - prematuri mici şi foarte mici şi TBC, serviciile medicale spitaliceşti se decontează lunar de către casele de asigurări de sănătate în funcţie de numărul de zile de spitalizare efectiv realizat în luna pentru care se face decontarea, fără a se depăşi durata optimă pentru situaţiile la care este prevăzută durată optimă, şi de tarifele pe zi de spitalizare negociate.

Trimestrial se fac regularizări şi decontări în limita sumei contractate în funcţie de:

- numărul de cazuri externate realizate şi validate pentru perioada de la începutul anului până la sfârşitul trimestrului respectiv (validarea şi invalidarea cazurilor externate raportate se fac de către Şcoala Naţională de Sănătate Publică, Management şi Perfecţionare în Domeniul Sanitar Bucureşti, conform regulilor de validare stabilite prin ordin al preşedintelui Casei Naţionale de Asigurări de Sănătate);

- durata optimă de spitalizare pentru situaţiile la care este prevăzută durată optimă astfel: durata optimă dacă durata efectiv realizată este mai mare decât durata optimă şi durata efectiv realizată dacă aceasta este mai mică decât durata optimă;

- durata efectiv realizată pentru situaţiile la care nu este prevăzută durată optimă;

- tariful pe zi de spitalizare negociat.

În situaţia în care numărul de cazuri externate este mai mare decât numărul cazurilor contractate, casele de asigurări de sănătate pot accepta la decontare această depăşire dacă spitalul/secţiile a/au luat decizia de creştere a numărului de internări, după epuizarea posibilităţii de înscriere pe listele de aşteptare a cazurilor programabile, şi dacă creşterea numărului de cazuri realizate se regăseşte în reducerea numărului de cazuri contractate din alte spitale/secţii din judeţul respectiv, iar această depăşire se încadrează în fondurile alocate asistenţei medicale spitaliceşti la nivelul caselor de asigurări de sănătate respective.

Serviciile medicale pentru care plata se face pe bază de tarif pe zi de spitalizare se decontează ţinându-se seama de durata optimă de spitalizare/durata efectiv realizată, după caz; în situaţia în care asiguratul este transferat în aceeaşi unitate sanitară, de la o secţie la alta de acelaşi profil, spitalul va raporta în vederea decontării un singur caz rezolvat, luându-se în calcul durata optimă de spitalizare pentru specialitatea respectivă. În cazul spitalelor/secţiilor de psihiatrie cronici pentru internările obligatorii pentru bolnavii psihici prevăzuţi la art. 105, 113 şi 114 din Codul penal şi cele dispuse prin ordonanţa procurorului pe timpul judecării sau urmăririi penale, precum şi pentru bolnavii care necesită asistenţă medicală spitalicească de lungă durată (ani), decontarea se face în funcţie de durata de spitalizare efectiv realizată.

Pentru monitorizarea eficienţei managementului de spital, a utilizării judicioase a fondurilor alocate, în cadrul regularizării trimestriale, casele de asigurări de sănătate au în vedere corelarea corespunzătoare a indicatorilor contractaţi şi realizaţi pentru perioada de la începutul anului până la sfârşitul trimestrului respectiv, cu rezultatele analizei trimestriale efectuată de către ordonatorul de credite ierarhic superior şi transmisă în acest scop caselor de asigurări.

Casele de asigurări de sănătate decontează serviciile medicale paliative în regim de spitalizare, în funcţie de numărul de zile de spitalizare realizat în limita numărului de zile

de spitalizare contractat şi de tariful pe zi de spitalizare negociat între casele de asigurări de sănătate şi unităţile sanitare cu paturi;

c) serviciile medicale spitaliceşti, pentru care plata se face prin tarif mediu pe caz rezolvat, acordate pentru afecţiuni acute în spitale, altele decât cele prevăzute în anexa nr. 17 A la ordin, precum şi pentru servicii medicale spitaliceşti acordate în secţiile şi compartimentele de acuţi (aprobate/avizate de Ministerul Sănătăţii, după caz ca structuri distincte în structura spitalelor) din spitalele de cronici şi de recuperare, decontarea lunară şi regularizarea trimestrială se realizează astfel:

1. Decontarea lunară, în limita sumei contractate, se face în funcţie de:

- numărul de cazuri externate realizate şi validate (validarea şi invalidarea se fac de către Şcoala Naţională de Sănătate Publică, Management şi Perfecţionare în Domeniul Sanitar Bucureşti, conform regulilor de validare specifice stabilite prin ordin al preşedintelui Casei Naţionale de Asigurări de Sănătate);

- tariful mediu pe caz rezolvat pe specialităţi negociat, aferent serviciilor medicale spitaliceşti pentru patologie care necesită internare prin spitalizare continuă.

2. Regularizarea trimestrială, în limita sumei contractate, se face în funcţie de:

- numărul de externări realizate şi validate pentru perioada de la începutul anului până la sfârşitul trimestrului respectiv (validarea şi invalidarea cazurilor externate raportate se fac de către Şcoala Naţională de Sănătate Publică, Management şi Perfecţionare în Domeniul Sanitar Bucureşti, conform regulilor de validare stabilite prin ordin al preşedintelui Casei Naţionale de Asigurări de Sănătate);

- tariful mediu pe caz rezolvat pe specialităţi negociat,

În situaţia în care numărul de externări realizat, corespunzător patologiei care necesită internare în regim de spitalizare continuă, este mai mic decât cel contractat, iar numărul de cazuri rezolvate/servicii medicale efectuate în regim de spitalizare de zi a crescut, dar fără a depăşi 25% din valoarea contractată pentru servicii în regim de spitalizare continuă numărul de cazuri rezolvate/servicii medicale efectuate în regim de spitalizare de zi ce depăşeşte numărul de cazuri externate contractate se decontează la tariful pe caz rezolvat/serviciu medical negociat, majorat cu 5%, cu încadrarea în valoarea de contract.

În situaţia în care atât numărul de externări realizat, corespunzător patologiei care necesită internare în regim de spitalizare continuă, cât şi cel corespunzător cazurilor rezolvate/serviciilor medicale efectuate în regim de spitalizare de zi sunt mai mici decât numărul de externări, respectiv cazuri rezolvate/servicii medicale efectuate în regim de spitalizare de zi, decontarea se face la nivelul realizat.

În situaţia în care atât numărul de externări realizat, corespunzător patologiei care necesită internare în regim de spitalizare continuă, cât şi cel corespunzător cazurilor rezolvate/serviciilor medicale efectuate în regim de spitalizare de zi sunt mai mari decât numărul de externări, respectiv cazuri rezolvate/servicii medicale efectuate în regim de spitalizare de zi contractat, se acceptă la decontare o depăşire de maximum 5% atât a numărului de externări ce se vor deconta la un tarif care reprezintă 50% din tariful negociat, cât şi a cazurilor rezolvate/serviciilor medicale efectuate în regim de spitalizare de zi. Casele de asigurări de sănătate pot accepta la decontare aceste depăşiri dacă spitalul/secţiile a/au luat decizia de creştere a numărului de internări, după epuizarea posibilităţii de înscriere pe listele de aşteptare a cazurilor programabile, şi dacă această creştere se regăseşte ca economii înregistrate la sumele care se decontează din fondul alocat asistenţei medicale spitaliceşti la alte spitale/secţii din judeţul respectiv, cu încadrarea în fondurile alocate asistenţei medicale spitaliceşti la nivelul caselor de asigurări de sănătate respective şi în condiţiile art. 5 alin. (1) lit. g);

d) suma aferentă Programului naţional cu scop curativ pentru medicamente şi materiale sanitare specifice se decontează la nivelul realizărilor în limita sumei prevăzute în program pentru medicamente şi materiale sanitare specifice;

e) suma pentru serviciile de supleere renală, inclusiv medicamente şi materiale sanitare specifice, transportul nemedicalizat al pacienţilor hemodializaţi de la şi la domiciliul pacienţilor, transportul lunar al medicamentelor şi al materialelor sanitare specifice dializei peritoneale la domiciliul pacienţilor, acordate în cadrul Programului naţional de supleere a funcţiei renale la bolnavii cu insuficienţă renală cronică din cadrul Programului naţional cu scop curativ, se decontează la nivelul realizărilor în limita sumelor contractate cu această destinaţie;

f) suma pentru serviciile medicale efectuate în cabinete medicale de specialitate în: oncologie medicală, diabet zaharat, nutriţie şi boli metabolice, cabinete de boli infecţioase şi în cabinete de planificare familială în care îşi desfăşoară activitatea medici cu specialitatea obstetrică-ginecologie, care se află în structura spitalului ca unităţi fără personalitate juridică, precum şi în cabinete medicale de specialitate din ambulatoriul integrat ale spitalului, decontată din fondul alocat asistenţei medicale ambulatorii de specialitate pentru specialităţile clinice, în condiţiile prevăzute în anexa nr. 8 la ordin, respectiv din fondul alocat asistenţei medicale spitaliceşti pentru cabinetele prevăzute la art. 48 alin. (4) lit. b) din Contractul-cadru;

g) suma pentru investigaţii paraclinice efectuate în regim ambulatoriu, decontată din fondul alocat asistenţei medicale spitaliceşti, stabilită conform prevederilor din anexa nr. 8 la ordin, în limita sumei contractate;

h) suma pentru serviciile medicale spitaliceşti efectuate în regim de spitalizare de zi pentru care plata se face prin tarif pe serviciu medical/caz rezolvat, în limita sumei contractate ~~şi~~ care se determină prin înmulţirea numărului negociat şi contractat de servicii medicale spitaliceşti pe tipuri/cazuri rezolvate cu tariful aferent acestora. Tariful pe serviciu medical se negociază între spitale şi casele de asigurări de sănătate şi nu poate fi mai mare decât tarifele maximale decontate de casele de asigurări de sănătate, prevăzute în anexa nr. 16 la ordin.

Pentru unităţile sanitare cu paturi care încheie contract de furnizare de servicii medicale spitaliceşti cu casa de asigurări de sănătate atât pentru spitalizare continuă cât şi pentru spitalizare de zi, tariful pe caz rezolvat se negociază între spitale şi casele de asigurări de sănătate şi nu poate fi mai mare de:

- 1/3 din tariful pe caz rezolvat pentru serviciile medicale acordate în regim de spitalizare continuă aferent spitalului respectiv (pentru spitalele finanţate în sistem DRG);
- 1/3 din tariful mediu pe caz rezolvat cel mai mic pentru serviciile medicale acordate în regim de spitalizare continuă aferent spitalului aflat în relaţie contractuală cu casa de asigurări de sănătate (pentru spitalele finanţate prin tarif mediu pe caz rezolvat pe specialităţi).
- 1/3 din tariful cel mai mic pe caz rezolvat dintre: tariful pe caz rezolvat din sistemul DRG şi tariful mediu pe caz rezolvat, pentru serviciile medicale acordate în regim de spitalizare continuă de la nivelul fiecărei case de asigurări de sănătate - pentru spitalele de cronici şi de recuperare, precum şi pentru secţiile şi compartimentele de cronici, recuperare şi neonatologie - prematuri (prevăzute ca structuri distincte în structura spitalului aprobată/avizată de Ministerul Sănătăţii, după caz) din alte spitale."

NOTĂ:

Numărul de cazuri rezolvate în camera de gardă şi în structurile de urgenţă din cadrul spitalelor, altele decât spitalele de urgenţă, si neinternate, pe care le decontează casele de asigurări de sănătate nu poate depăşi numărul de cazuri internate prin spitalizare continuă ca şi cazuri de urgenţă pentru care se face dovada unor intervenţii diagnostice şi terapeutice, necesare rezolvării cazurilor respective.

(2) Cazurile internate în regim de spitalizare continuă care nu au îndeplinit criteriile de internare nu se decontează de casele de asigurări de sănătate. Cazurile care fac obiectul internării prin spitalizare de zi şi au fost rezolvate prin spitalizare continuă la solicitarea

asiguratului se decontează de casele de asigurări de sănătate la tariful pe serviciu medical/caz rezolvat aferent spitalizării de zi, diferenţa fiind suportată de asigurat.

(3) Decontarea cazurilor externate care se reinternează în aceeaşi unitate sanitară sau într-o altă unitate sanitară, pentru patologie de acelaşi tip, într-un interval de 48 de ore de la externare, se realizează în procent de 50% din tariful pe caz rezolvat (DRG), din tariful mediu pe caz rezolvat, cu excepţia situaţiilor în care comisia de analiză a cazurilor constituită la nivelul caselor de asigurări de sănătate constată că sunt acoperite peste 80% din îngrijirile corespunzătoare tipului de caz conform codificării.

(4) Decontarea cazurilor transferate într-o altă unitate sanitară, pentru patologie de acelaşi tip într-un interval de 48 de ore de la internare, se realizează în procent de 50% din tariful pe caz rezolvat (DRG), din tariful mediu pe caz rezolvat cu excepţia situaţiilor în care comisia de revalidare a cazurilor constituită la nivelul caselor de asigurări de sănătate constată că sunt acoperite peste 80% din îngrijirile corespunzătoare tipului de caz conform codificării.

(5) Casele de asigurări de sănătate decontează cazurile externate din unităţile sanitare cu personalitate juridică de medicina muncii - boli profesionale şi din secţiile de boli profesionale aflate în structura spitalelor, pentru care nu s-a confirmat caracterul de boală profesională în condiţiile respectării criteriilor de internare prevăzute la art. 61 alin. (4) din Contractul-cadru privind condiţiile acordării asistenţei medicale în cadrul sistemului de asigurări sociale de sănătate pentru anii 2011-2012, aprobat prin Hotărârea Guvernului nr. 1389/2010, cu modificările şi completările ulterioare şi în condiţiile în care cazurile externate sunt persoane asigurate în sistemul asigurărilor sociale de sănătate.

Casele de asigurări de sănătate nu decontează mai mult de 40% din cazurile externate din unităţile sanitare cu personalitate juridică de medicina muncii - boli profesionale şi din secţiile de boli profesionale aflate în structura spitalelor.

Art. 10 (1) Spitalele sunt obligate să suporte din sumele contractate cu casele de asigurări de sănătate:

a) cheltuielile privind investigaţiile paraclinice pentru bolnavii internaţi efectuate în alte unităţi spitaliceşti sau în unităţi ambulatorii de specialitate, în situaţiile în care spitalul respectiv nu deţine dotarea necesară sau aparatura existentă în dotarea acestuia nu este funcţională, cu încadrarea în bugetul de venituri şi cheltuieli aprobat, pe baza relaţiilor contractuale stabilite între unităţile sanitare respective; sumele astfel suportate de către spitale pentru investigaţii paraclinice pentru pacienţii internaţi, efectuate în alte unităţi spitaliceşti sau în unităţi ambulatorii de specialitate, se evidenţiază distinct şi se raportează lunar caselor de asigurări de sănătate, conform machetei din anexa nr. 16 B la ordin.

b) suma aferentă transportului interspitalicesc pentru asiguraţii internaţi care necesită condiţii suplimentare de stabilire a diagnosticului din punctul de vedere al consultaţiilor şi investigaţiilor paraclinice, cu excepţia transportului efectuat de serviciile publice de ambulanţă pentru pacienţii care nu se află în stare critică şi care se află în unităţile sau compartimentele de primiri urgenţe şi care necesită transport la o altă unitate sanitară sau la o altă clădire aparţinând unităţii sanitare respective, în vederea internării, investigării sau efectuării unui consult de specialitate, decontat de casa de asigurări de sănătate din fondul alocat asistenţei medicale de urgenţă şi transport sanitar; sumele plătite de către spitale pentru transportul interspitalicesc pentru asiguraţii internaţi care necesită condiţii suplimentare de stabilire a diagnosticului din punctul de vedere al consultaţiilor şi investigaţiilor paraclinice, se evidenţiază distinct şi se raportează lunar caselor de asigurări de sănătate, conform machetei din anexa nr. 16 B la ordin.

c) suma aferentă consultaţiilor interdisciplinare pentru pacienţii internaţi, efectuate în ambulatoriul/ambulatoriul integrat al spitalului respectiv sau al altei unităţi sanitare cu paturi, pe baza relaţiilor contractuale stabilite între unităţile sanitare respective; sumele

astfel suportate de către spitale pentru consultaţiile interdisciplinare pentru pacienţii internaţi, efectuate în ambulatoriul/ambulatoriul integrat al spitalului respectiv sau al altei unităţi sanitare cu paturi, se evidenţiază distinct şi se raportează lunar caselor de asigurări de sănătate, conform machetei din anexa nr. 16 B la ordin.

ART 11 Spitalele, din sumele contractate cu casele de asigurări de sănătate, suportă suma aferentă serviciilor hoteliere standard (cazare standard şi masă la nivelul alocaţiei de hrană) pentru însoţitorii copiilor bolnavi în vârstă de până la 3 ani, precum şi pentru însoţitorii persoanelor cu handicap grav.

Asiguraţii suportă contravaloarea serviciilor hoteliere (cazare şi/sau masă) cu un grad ridicat de confort, peste confortul standard, acordate la cererea acestora. Prin confort standard, în ceea ce priveşte cazarea, se înţelege salon cu minimum 3 paturi, grup sanitar propriu, cu respectarea normelor igienico-sanitare şi fără dotări suplimentare (televizor, radio, telefon, frigider şi altele asemenea), iar în ceea ce priveşte masa, cea acordată la nivelul alocaţiei de hrană stabilite prin acte normative. Contribuţia personală a asiguraţilor reprezintă diferenţa dintre tarifele pentru serviciile hoteliere cu grad ridicat de confort stabilite de fiecare unitate furnizoare şi cele corespunzătoare confortului standard.

ART. 12 (1) Spitalele sunt obligate să suporte pentru asiguraţii internaţi în regim de spitalizare continuă şi în regim de spitalizare de zi toate cheltuielile necesare pentru rezolvarea cazurilor respective, inclusiv pentru medicamente, materiale sanitare şi investigaţii paraclinice.

(2) În situaţia în care asiguraţii, pe perioada internării în spital, în baza unor documente medicale întocmite de medicul curant din secţia în care aceştia sunt internaţi şi avizate de şeful de secţie şi managerul spitalului, suportă cheltuieli cu medicamente, materiale sanitare şi investigaţii paraclinice la care ar fi fost îndreptăţiţi fără contribuţie personală, în condiţiile contractului-cadru şi prezentelor norme, spitalele rambursează contravaloarea acestor cheltuieli la cererea asiguraţilor.

(3) Rambursarea cheltuielilor prevăzute la alin. (2) reprezintă o obligaţie exclusivă a spitalelor şi se realizează numai din veniturile proprii ale acestora, pe baza unei metodologii proprii.

ART. 13 (1) Serviciile medicale de înaltă performanţă (CT, RMN, scintigrafie, angiografie) se acordă numai pe bază de recomandare medicală asiguraţilor conform fişelor de solicitare prevăzute în anexa nr.18 la ordin, numai în următoarele condiţii:

- urgenţe medico-chirurgicale majore nominalizate în anexa nr. 16 la ordin;
- afecţiuni în care au fost epuizate toate celelalte posibilităţi de explorare.

(2) Prevederile alin. (1) se aplică pacienţilor internaţi. Fişele de solicitare se întocmesc într-un singur exemplar dacă serviciile medicale de înaltă performanţă se efectuează de către spitalul în care este internat pacientul, fără a se întocmi bilet de trimitere pentru servicii medicale paraclinice.

(3) În situaţia în care spitalele nu deţin dotarea necesară sau aparatura existentă în dotarea acestora nu este funcţională, pentru pacienţii internaţi cărora li se recomandă servicii medicale de înaltă performanţă prevăzute la alin. (1) ce vor fi efectuate în alte unităţi spitaliceşti sau în unităţi ambulatorii de specialitate, spitalele întocmesc fişele de solicitare prevăzute în anexa nr. 18 la ordin care se completeaza în 2 exemplare, din care unul rămâne la furnizorul care a facut recomandarea si, un exemplar la furnizorul care a efectuat serviciul/serviciile de înaltă performanţă, La fisa de solicitare se ataşează, acolo unde este cazul, rezultatele celorlalte investigaţii efectuate anterior pentru stabilirea diagnosticului.

ART. 14 (1) Medicii care îşi desfăşoară activitatea în spital au obligaţia ca la externarea asiguratului să transmită medicului de familie sau medicului de specialitate din ambulatoriu, după caz, prin scrisoare medicală sau bilet de ieşire din spital cu obligaţia ca acesta să conţină explicit toate elementele prevăzute în scrisoarea medicală, evaluarea

stării de sănătate a asiguratului la momentul externării şi indicaţiile de tratament şi supraveghere terapeutică pentru următoarea perioadă (determinată conform diagnosticului).

(2) Spitalele, odată cu raportarea lunară, vor transmise casei de asigurări de sănătate pentru nou-născuţii prematur, greutatea la naştere şi greutatea la externare; la o greutate a nou-născutului de peste 2.000 – 2.200 grame, nu se mai justifică menţinerea acestuia în secţia de neonatologie prematuri.

ART. 15 (1) Suma anuală prevăzută în bugetul de venituri şi cheltuieli şi, respectiv, suma prevăzută în contractul de furnizare de servicii medicale încheiat cu casele de asigurări de sănătate se defalcă de către spitale pe trimestre şi luni, cu acordul, ordonatorului de credite ierarhic superior în funcţie de subordonare, şi al caselor de asigurări de sănătate.

(2) Casa de asigurări de sănătate decontează, în primele 10 zile ale lunii următoare celei pentru care se face plata, contravaloarea serviciilor medicale acordate asiguraţilor în luna precedentă, pe baza facturii şi a documentelor justificative depuse până la data prevăzută în contractul de furnizare de servicii medicale spitaliceşti, cu încadrarea în sumele contractate. Pentru fiecare lună, casele de asigurări de sănătate pot efectua până la data de 20 decontarea lunii curente pentru perioada 1 - 15 a lunii, în baza indicatorilor specifici realizaţi şi în limita sumelor contractate, pe baza facturii şi a documentelor justificative depuse până la data prevăzută în contractul de furnizare de servicii medicale spitaliceşti.

Decontarea serviciilor medicale aferente lunii decembrie a anului în curs se poate efectua în luna decembrie pentru serviciile medicale efectuate şi facturate până la data prevăzută în documentele justificative depuse în vederea decontării, urmând ca diferenţa reprezentând servicii medicale realizate să se deconteze în luna ianuarie a anului următor.

(3) Pentru încadrarea în sumele contractate cu casele de asigurări de sănătate, spitalele vor întocmi liste de prioritate pentru cazurile programabile, dacă este cazul, cu excepţia cazurilor de urgenţă medico-chirurgicală, a cazurilor care necesită internare în secţiile de obstetrică şi neonatologie şi a bolilor cu potenţial endemo-epidemic. În acest sens, odată cu raportarea ultimei luni a fiecărui trimestru, spitalele depun la casa de asigurări de sănătate pe fiecare secţie numărul cazurilor programate aferente trimestrului respectiv, după cum urmează: număr cazuri programate aflate în lista de prioritate la începutul trimestrului, număr cazuri programate intrate în lista de prioritate în cursul trimestrului, număr cazuri programate ieşite din lista de prioritate în cursul trimestrului şi număr cazuri programate aflate la sfârşitul trimestrului în lista de prioritate.

(4) Trimestrial, până la data de 5 a lunii următoare expirării unui trimestru, spitalele vor raporta realizarea indicatorilor trimestriali comparativ cu cei contractaţi şi, până pe data de 10 a lunii curente pentru luna precedentă, ordonatorului de credite ierarhic superior, în funcţie de subordonare, şi caselor de asigurări de sănătate execuţia bugetului de venituri şi cheltuieli. Regularizarea şi decontarea trimestrială se fac în primele 25 de zile ale lunii următoare trimestrului încheiat, cu excepţia trimestrului IV pentru care regularizarea se face până la data de 20 decembrie a anului în curs pentru serviciile medicale realizate şi raportate conform contractului de furnizare de servicii medicale până la aceasta dată, conform facturilor însoţite de documentele justificative, urmând ca regularizarea finală a trimestrului IV să se efectueze în luna ianuarie a anului următor.

ART. 16 Casele de asigurări de sănătate încheie convenţii cu unităţile medico-sociale, cu spitalele pentru medicii care îşi desfăşoară activitatea în dispensare TBC, laboratoare de sănătate mintală, respectiv centre de sănătate mintală şi staţionar de zi psihiatrie, cabinete de medicină dentară care nu se află în relaţie contractuală cu casa de asigurări de sănătate, care se află în structura spitalului ca unităţi fără personalitate juridică, precum şi cu cabinetele de medicina muncii organizate conform prevederilor legale în

vigoare, în vederea recunoaşterii biletelor de internare eliberate de către medicii ce-şi desfăşoară activitatea în aceste unităţi.

Modelul de convenţie este cel prevăzut în anexa nr. 37 la ordin.

Serviciile medicale spitaliceşti pot fi acordate asiguraţilor şi pe baza biletelor de internare eliberate de medicii din centrele de dializă private aflate în relaţie contractuală cu Casa Naţională de Asigurări de Sănătate.

ART. 17 Contractele pentru furnizarea serviciilor medicale acordate în spitale se semnează din partea spitalelor de către membrii Comitetului director, care răspund, în condiţiile legii, de realitatea şi exactitatea datelor prezentate atât cu ocazia negocierii contractelor, cât şi cu ocazia raportării datelor în cursul execuţiei.

ART. 18 Refuzul semnării contractului de către unitatea publică furnizoare de servicii medicale spitaliceşti sau de către casa de asigurări de sănătate va fi adus la cunoştinţă Ministerului Sănătăţii sau celorlalte ministere, respectiv autorităţilor administraţiei publice locale, în funcţie de subordonare, şi Casei Naţionale de Asigurări de Sănătate. Pentru această situaţie, se constituie o comisie de mediere formată din reprezentanţi ai Ministerului Sănătăţii, ai ministerului de resort, ai autorităţilor administraţiei publice locale, după caz, precum şi ai Casei Naţionale de Asigurări de Sănătate, care, în termen de maximum 10 zile, soluţionează divergenţele.

ART. 19 Casele de asigurări de sănătate şi direcţiile de sănătate publică au obligaţia de a organiza trimestrial sau ori de câte ori este nevoie întâlniri cu medicii de specialitate din unităţile sanitare cu paturi pentru a analiza aspecte privind calitatea serviciilor medicale din asistenţa medicală spitalicească, precum şi respectarea prevederilor actelor normative în vigoare. Acestea vor informa asupra modificărilor apărute în actele normative şi vor stabili, împreună cu medicii de specialitate din unităţile sanitare cu paturi, măsurile ce se impun pentru îmbunătăţirea activităţii. Neparticiparea medicilor la aceste întâlniri nu îi exonerează de răspunderea nerespectării hotărârilor luate cu acest prilej.

ART. 20 Furnizorii de servicii medicale spitaliceşti vor prezenta la contractare documentele necesare pentru fundamentarea tarifului mediu pe caz rezolvat, a tarifului pe zi de spitalizare şi a tarifului pe caz pentru serviciile acordate în regim de spitalizare de zi, documentele prevăzute în anexa nr. 16 A la ordin.

* ICM ROviDRG 2011 = ICM realizat obţinut prin clasificarea cazurilor raportate în perioada 01.01-30.04.2011 si validate, conform clasificării ROviDRG actualizate în decembrie 2010

Principii utilizate la calcularea TCP propuse pentru anul 2011

- Pentru spitalele a caror plata a fost in anul 2010 si primele 4 luni 2011 prin tarif pe caz rezolvat (DRG), s-a pornit de la tarifele publicate in Normele metodologice ale contractului cadru pentru anul 2010
- Pentru spitalele a caror plata in anul 2010 si primele 4 luni 2011 nu a fost prin tarif pe caz rezolvat (DRG), s-a considerat tarif "vechi" TCP mediu national din 2010, 1390 lei
- Numarul cazurilor ponderate a fost estimat la 12 luni plecând de la numărul de cazuri validate şi a ICM realizat de spitale în primele 4 luni ale anului 2011.
- S-a estimat bugetul global realizat de spitale la nivel national pe baza numarului de cazuri ponderate estimate la 12 luni si a TCP 2010 si s-a calculat TCP mediu national 2011=1433 lei
- Pentru spitalele al căror TCP 2010 a fost mai mare de 1433 s-a aplicat o reducere de 5%, acesta fiind noul tarif propus pentru 2011; pentru spitalele al căror TCP 2010 se situa sub 1433, acesta a fost crescut până la nivelul mediu naţional de 1433 propus pentru 2011.

NOTA:

"-" semnifica un numar insuficient de cazuri pentru calcularea indicatorului, sau, după caz, grupa de spitalizare de zi, pentru care nu se aplică limite ale duratelor de spitalizare

DMS si limitele duratei de spitalizare pentru fiecare grupa de diagnostice au fost calculate pe baza datelor raportate de spitale in perioada 01.01-30.04.2011.

Mediana duratei de spitalizare in sectiile ATI la nivel national, a fost calculata luand in considerare toate cazurile raportate si validate in perioada 01.01-30.04.2011 pentru o anumita grupa de diagnostice, pentru care s-a inregistrat minim un transfer intraspitalicesc in sectia Anestezie si terapie Intensiva – ATI.

M - categorie Medicala, C - categorie chirurgicala, A - Alte categorii

Definirea termenilor utilizaţi în sistemul DRG

Grupe de Diagnostice (Diagnostic Related Groups - DRG): o schemă de clasificare a pacienţilor externaţi (în funcţie de diagnostic), care asigură o modalitate de a asocia tipurile de pacienţi cu cheltuielile spitaliceşti efectuate

Categorii majore de diagnostice (CMD): o clasificare mai largă a pacienţilor doar pe baza diagnosticelor.

Valoare relativă (VR): Număr fără unitate care exprimă raportul dintre tariful unui DRG şi tariful mediu al tuturor DRG-urilor.

Coeficient atribuit în funcţie de cantitatea relativă de muncă, consumabile şi resursele de capital necesare pentru tratamentul complet al bolnavului cu afecţiunea/afecţiunile respective.

Grouper: aplicaţie computerizată (software) care permite alocarea automată a unui pacient într-un anumit DRG (pe baza datelor ce caracterizează fiecare caz externat)

Cazuri rezolvate (cazuri externate - CR): totalitatea cazurilor externate dintr-un spital, indiferent de tipul externării (externat, externat la cerere, transfer inter-spitalicesc, decedat)

Durata de spitalizare (DS): numărul de zile de spitalizare ale unui caz rezolvat, între momentul internării şi cel al externării din spital

Cazuri normale (CN): cazuri externate clasificate în acelaşi DRG cu durata de spitalizare asemănătoare din punct de vedere statistic

Cazuri extreme (ca durată de spitalizare) - "outliers": cazuri externate clasificate în acelaşi DRG cu durate de spitalizare foarte diferite faţă de cea a cazurilor normale

Cazuri extreme mici (ca durată de spitalizare) CEMC - "low outliers": cazuri externate clasificate în acelaşi DRG cu durate de spitalizare foarte mici faţă de cea a cazurilor normale

Cazuri extreme mari (ca durată de spitalizare) CEMR - "high outliers": cazuri externate clasificate în acelaşi DRG cu durate de spitalizare foarte mari faţă de cea a cazurilor normale

Interval de normalitate: un interval definit statistic care conţine un procent semnificativ de observaţii (de exemplu 95% din observaţii)

Intervalul de normalitate pentru durata de spitalizare: intervalul definit statistic care conţine un procent semnificativ (de exemplu 90%) de cazuri cu durate de spitalizare asemănătoare ale cazurilor externate

Limitele intervalului de normalitate pentru durata de spitalizare: valorile extreme (ale duratei de spitalizare) ce delimitează intervalul de normalitate, adică limita inferioară şi limita superioară a duratei de spitalizare

Limitele intervalului de normalitate se calculează pentru durata de spitalizare a fiecărei grupe de diagnostice, astfel încât se obţine o limită inferioară (LINF) şi o limită superioară (LSUP) pentru fiecare grupă de diagnostice (DRGi). Aceste valori ale limitelor sunt prezentate în anexa 17 a).

Indice de echivalenţă - e: o pondere asociată fiecărui caz rezolvat, în funcţie de durata de spitalizare a cazului şi limitele de normalitate ale duratei de spitalizare pentru respectivul tip de caz (DRG).

e = 1 pentru LINF <= DS <= LSUP

e = DS/LINF pentru DS < LINF

e = DS/LSUP pentru DS > LSUP, e maxim = 3

Exemplu pentru un pacient externat, clasificat în DRGi, cu DS de 2 zile:

LINF pentru DRGi este 3 zile

LSUP pentru DRGi este 18 zile

Se observă că acest caz este un caz extrem mic (DS < LINF), deci e = DS/LINF = 2/3

Cazuri echivalente (CE): cazurile externate într-o anumită perioadă, ajustate pe baza indicelui de echivalenţă

CE = Σ (CRi x ei)

Coeficientul K al cazurilor extreme (K) - un indicator ce reflectă impactul financiar al cazurilor extreme la nivelul unui spital

K = Σ (CEi x VRi) / Σ (CRi x VRi)

Cazuri ponderate (CP): pacienţi "virtuali" generaţi prin ajustarea cazurilor externate, în funcţie de resursele asociate cu fiecare tip de caz. Se pot calcula pentru cazurile externate şi pentru cazurile echivalente

Nr. CP = Σ (VRDRGi x CRDRGi)

Case-mix (Complexitatea cazurilor): Tipurile de pacienţi trataţi într-un spital, în funcţie de diagnostic şi gravitate

Indicele de case mix (Indicele de complexitate a cazurilor): Număr (fără unitate) care exprimă resursele necesare spitalului în concordanţă cu pacienţii trataţi

ICM pentru spitalul A = Total nr. cazuri ponderate (CP) / Total nr. cazuri rezolvate (CR) spital A

Costul pe caz ponderat (Rata de bază) - CCP(RB): Valoare de referinţă, ce reflectă costul unui caz ponderat. Poate fi calculat la nivel de spital, regional, naţional.

- pentru un spital:

CCPs = bugetul aferent cazurilor acute / nr. total cazuri ponderate

- la nivel naţional:

CCPN = bugetele aferente cazurilor acute la nivel naţional / nr. total cazuri ponderate

Tariful pe caz ponderat (TCP) - valoarea de rambursare a unui caz ponderat la nivel de spital

Tariful pe caz rezolvat (TCR) - valoarea de rambursare a unui caz rezolvat la nivel de spital

TCR = TCP x ICM

Tariful pe tip de caz (TC): valoarea de rambursare pentru fiecare tip de caz (DRG). Poate fi calculat la nivel de spital, regional, naţional.

TCDRGi = TCP x VRDRGi
Abrevieri:
CMD = Categorii majore de diagnostice
DRG = Grupe de diagnostice
VR = Valoare Relativă
DS = Durată de spitalizare
CR = Cazuri rezolvate (externate)
CN = Cazuri normale
CEMC = Cazuri extreme mici
CEMR = Cazuri extreme mari
LINF = Limita inferioară a intervalului de normalitate
LSUP = Limita superioară a intervalului de normalitate
e = Indicele de echivalenţă
CE = Cazuri echivalente
K = Coeficientul cazurilor extreme
CP = Cazuri ponderate
ICM = Indice de case mix (indice de complexitate a cazurilor)
CCP = Costul pe caz ponderat
RB = Rata de bază
TCP = Tariful pe caz ponderat
TC = Tariful pe tip de caz

ANEXA 22

MODALITATEA DE PLATĂ
a serviciilor medicale de urgenţă şi transport sanitar

ART. 1 Serviciile medicale de urgenţă şi transport sanitar prevăzute în pachetul de servicii de bază, în pachetul minimal de servicii medicale şi în pachetul de servicii pentru persoanele care se asigură facultativ pentru sănătate cuprinse în anexa nr. 21 la ordin se asigură pe baza contractelor de furnizare de servicii medicale.

ART. 2 (1) Suma contractată de către casele de asigurări de sănătate cu unităţile medicale specializate publice autorizate şi evaluate reprezintă bugetul global şi se stabileşte prin înmulţirea numărului populaţiei deservite existent la data de 1 iulie 2010 conform datelor furnizate de Institutul Naţional de Statistică cu tarifele pe cap de locuitor aprobate prin ordin al ministrului sănătăţii şi cu coeficienţii de ajustare pentru acoperirea cheltuielilor aferente timpului de aşteptare, cu încadrarea în fondurile aprobate cu aceasta destinaţie. Coeficientul de ajustare luat în calcul la contractare este 1, iar pentru suma contractată de furnizorii care încheie contracte cu Casa de Asigurări de Sănătate

Constanţa, coeficientul de ajustare este 1,017, cu Casa de Asigurări de Sănătate Prahova, coeficientul de ajustare este 1,011 şi cu Casa de Asigurări de Sănătate Tulcea, coeficientul de ajustare este 1,050.

(2) Suma contractată de casele de asigurări de sănătate cu unităţile specializate autorizate şi evaluate private pentru efectuarea activităţii de consultaţii de urgenţă la domiciliu şi a unor servicii de transport va avea în vedere 95% din fondurile alocate cu această destinaţie la nivelul casei de asigurări de sănătate şi se stabileşte astfel:

1. pentru solicitări pentru consultaţii de urgenţă la domiciliu, suma contractată este egală cu numărul de solicitări estimate înmulţit cu tariful pe solicitare negociat.

Tariful pe solicitare pentru consultaţiile de urgenţă la domiciliu se negociază între casele de asigurări de sănătate şi furnizori, avându-se în vedere toate cheltuielile necesare acordării serviciilor medicale, cu excepţia celor aferente mijlocului de transport (cheltuieli de personal pentru conducătorul mijlocului de transport, combustibil, cheltuieli pentru întreţinerea şi repararea mijlocului de transport) şi a cheltuielilor de personal aferente medicului, în situaţia în care consultaţia de urgenţă la domiciliu se acordă de către medicul din centrul de permanenţă şi nu poate fi mai mare decât tariful maximal prevăzut la art. 8 (1). Tariful minim negociat de către fiecare casă de asigurări de sănătate devine tariful la care se contractează consultaţiile de urgenţă la domiciliu cu toţi furnizorii privaţi.

Tariful pe solicitare pentru consultaţii de urgenţă la domiciliu se poate renegocia trimestrial în raport cu evaluarea trimestrială a indicatorilor efectiv realizaţi, în limita sumelor aprobate cu această destinaţie, în aceleaşi condiţii ca mai sus;

2. pentru serviciile de transport cu autovehicule suma contractată este egală cu numărul de kilometri echivalenţi (dus-întors) pentru mediul urban şi numărul de kilometri efectiv realizaţi pentru mediul rural, estimaţi a fi parcurşi, înmulţit cu tariful pe kilometru parcurs negociat între furnizori şi casele de asigurări de sănătate. Acest tarif nu poate fi mai mare decât tariful maximal decontat de casele de asigurări de sănătate prevăzut la art. 8 (2), astfel încât la unităţile la care se înregistrează timpi de aşteptare mai ridicaţi, respectiv distanţe parcurse mai mici, să se acorde tarife pe kilometru spre limita maximă, pentru acoperirea cheltuielilor aferente timpului de aşteptare. Tariful minim negociat de către fiecare casă de asigurări de sănătate devine tariful la care se contractează serviciile de transport cu toţi furnizorii privaţi.

Tariful pe kilometru se poate renegocia trimestrial în raport cu evaluarea trimestrială a indicatorilor efectiv realizaţi, în limita sumelor aprobate cu această destinaţie, în aceleaşi condiţii ca mai sus;

3. pentru serviciile de transport pe apă, suma contractată se calculează pe baza numărului de mile marine estimat, înmulţit cu tariful negociat pe milă marină şi nu poate fi mai mare decât tariful maximal prevăzut la art. 8 (3). Tariful minim negociat de către fiecare casă de asigurări de sănătate devine tariful la care se contractează serviciile de transport cu toţi furnizorii privaţi.

Tariful pe milă marină se poate renegocia trimestrial în raport cu evaluarea trimestrială a indicatorilor efectiv realizaţi, în limita sumelor aprobate cu această destinaţie, în aceleaşi condiţii ca mai sus;

Diferenţa de 5% se utilizează pentru contractarea serviciilor medicale realizate în condiţiile prevăzute la art. 5 alin. (3) lit. b) şi/sau pentru contractarea serviciilor de urgenţă şi transport sanitar conform condiţiilor iniţiale de contractare.

ART. 3 Pentru zilele de vineri, sâmbătă, duminică şi în zilele de sărbători legale medicul care acordă servicii medicale de urgenţă poate elibera certificate constatatoare de deces în condiţiile prevăzute de lege, cu excepţia situaţiilor de suspiciune ce necesită expertiză medico-legală.

ART. 4 Suma contractată anual de către unităţile medicale specializate publice şi unităţile specializate autorizate şi evaluate private cu casele de asigurări de sănătate se defalchează pe trimestre şi pe luni.

ART. 5 (1) Decontarea serviciilor medicale de urgenţă şi transport sanitar se face lunar. Pentru unităţile specializate private, trimestrial, se face regularizare pentru perioada de la începutul anului până la sfârşitul trimestrului respectiv, având în vedere încadrarea în sumele contractate.

(2) Decontarea serviciilor medicale de urgenţă şi transport sanitar efectuate de unităţile medicale specializate publice se face lunar la nivelul bugetului global lunar contractat. Lunar, până la data prevăzută în contract, furnizorii vor raporta, la casa de asigurări de sănătate, pentru luna anterioară, activitatea realizată, astfel: număr solicitări urgenţă, număr solicitări pentru consultaţii de urgenţă la domiciliu, număr solicitări de transport, număr kilometri realizaţi pentru mediul urban / rural distinct pentru solicitări de urgenţă, consultaţii de urgenţă la domiciliu şi pentru solicitări de transport, număr mile marine, timpul mediu de răspuns al primei ambulanţe publice pentru urgenţele cod roşu – cod galben, timpul mediu de răspuns la solicitările pentru cod verde.

(3) Decontarea activităţii de consultaţii de urgenţă la domiciliu şi a unor servicii de transport sanitar efectuate de unităţile specializate autorizate şi evaluate private:

a) lunar în raport cu numărul de kilometri echivalenţi parcurşi pentru mediul urban şi cu numărul de kilometri efectiv realizaţi pentru mediul rural, respectiv mile marine efectiv parcurse, şi tariful minim negociat, precum şi cu numărul de solicitări pentru consultaţii de urgenţă la domiciliu realizate şi tariful minim negociat pe solicitare, în limita sumelor contractate.

b) trimestrial se face regularizarea pentru perioada de la începutul anului până la sfârşitul trimestrului respectiv, având în vedere încadrarea în sumele contractate.

În situaţia în care, la regularizarea trimestrială, numărul total al kilometrilor echivalenţi parcurşi pentru mediul urban, numărul de kilometri efectiv realizaţi pentru mediul rural, respectiv numărul total al milelor marine parcurse de la începutul anului până la sfârşitul trimestrului respectiv este mai mare decât numărul contractat, casele de asigurări de sănătate decontează nivelul realizat al acestora (dar nu mai mult de 21% faţă de cel contractat) numai dacă depăşirea este justificată, cu încadrarea în suma aferentă serviciilor medicale de urgenţă şi transport sanitar aprobată pentru această destinaţie la nivelul casei de asigurări de sănătate.

ART. 7 (1) Suma contractată de către casele de asigurări de sănătate cu unităţile medicale specializate publice autorizate şi evaluate reprezintă bugetul global şi se stabileşte prin înmulţirea numărului populaţiei deservite existent la data de 1 iulie 2010 conform datelor furnizate de Institutul Naţional de Statistică cu tarifele pe cap de locuitor aprobate prin ordin al ministrului sănătăţii şi cu coeficienţii de ajustare prevăzuţi la art. 2 alin. (1) din anexa nr.22 la ordinul ministrului sănătăţii şi al preşedintelui Casei Naţionale de Asigurări de Sănătate nr. ……. pentru aprobarea normelor metodologice de aplicare în anul 2011 a Contractului-cadru privind condiţiile acordării asistenţei medicale în cadrul sistemului de asigurări de sănătate pentru anii 2011 – 2012, aprobat prin H.G. nr.1389/2010, cu modificările şi completările ulterioare, pentru acoperirea cheltuielilor aferente timpului de aşteptare, cu încadrarea în fondurile aprobate cu aceasta destinaţie.

(2) Decontarea serviciilor medicale de urgenţă şi transport sanitar efectuate de unităţile medicale specializate publice se face lunar la nivelul bugetului global lunar contractat.

Lunar, până la data prevăzută în contract, furnizorii vor raporta, la casa de asigurări de sănătate, pentru luna anterioară, activitatea realizată, astfel: număr solicitări urgenţă, număr solicitări pentru consultaţii de urgenţă la domiciliu, număr solicitări de transport, număr kilometri realizaţi pentru mediul urban / rural distinct pentru solicitări de urgenţă, consultaţii de urgenţă la domiciliu şi pentru solicitări de transport, număr mile marine, timpul mediu de răspuns al primei ambulanţe publice pentru urgenţele cod roşu – cod galben, timpul mediu de răspuns la solicitările pentru cod verde.

(3) Suma contractată de casele de asigurări de sănătate cu unităţile specializate autorizate şi evaluate private pentru efectuarea activităţii de consultaţii de urgenţă la domiciliu şi a unor servicii de transport va avea în vedere 95% din fondurile alocate cu această destinaţie la nivelul casei de asigurări de sănătate şi se stabileşte astfel:

a) pentru solicitări pentru consultaţii de urgenţă la domiciliu, suma contractată este egală cu numărul de solicitări estimate înmulţit cu tariful pe solicitare negociat.

Tariful pe solicitare pentru consultaţiile de urgenţă la domiciliu se negociază între casele de asigurări de sănătate şi furnizori, avându-se în vedere toate cheltuielile necesare acordării serviciilor medicale, cu excepţia celor aferente mijlocului de transport (cheltuieli de personal pentru conducătorul mijlocului de transport, combustibil, cheltuieli pentru întreţinerea şi repararea mijlocului de transport) şi a cheltuielilor de personal aferente medicului, în situaţia în care consultaţia de urgenţă la domiciliu se acordă de către medicul din centrul de permanenţă şi nu poate fi mai mare decât tariful maximal prevăzut la art. 8 (1) din anexa 22 la ordin. Tariful minim negociat devine tariful la care se contractează consultaţiile de urgenţă la domiciliu cu toţi furnizorii privaţi.

Tariful pe solicitare pentru consultaţii de urgenţă la domiciliu se poate renegocia trimestrial în raport cu evaluarea trimestrială a indicatorilor efectiv realizaţi, în limita sumelor aprobate cu această destinaţie, în aceleaşi condiţii ca mai sus;

b) pentru serviciile de transport cu autovehicule suma contractată este egală cu numărul de kilometri echivalenţi (dus-întors) pentru mediul urban şi numărul de kilometri efectiv realizaţi pentru mediul rural, estimaţi a fi parcurşi, înmulţit cu tariful pe kilometru parcurs negociat între furnizori şi casele de asigurări de sănătate. Acest tarif nu poate fi mai mare decât tariful maximal decontat de casele de asigurări de sănătate prevăzut la art. 8 (2) din anexa 22 la ordin, astfel încât la unităţile la care se înregistrează timpi de aşteptare mai ridicaţi, respectiv distanţe parcurse mai mici, să se acorde tarife pe kilometru spre limita maximă, pentru acoperirea cheltuielilor aferente timpului de aşteptare. Tariful minim negociat devine tariful la care se contractează serviciile de transport cu toţi furnizorii privaţi. Tariful pe kilometru se poate renegocia trimestrial în raport cu evaluarea trimestrială a indicatorilor efectiv realizaţi, în limita sumelor aprobate cu această destinaţie, în aceleaşi condiţii ca mai sus;

c) pentru serviciile de transport pe apă, suma contractată se calculează pe baza numărului de mile marine estimat, înmulţit cu tariful negociat pe milă marină şi nu poate fi mai mare decât tariful maximal prevăzut la art. 8 (3) din anexa 22 la ordin. Tariful minim negociat devine tariful la care se contractează serviciile de transport cu toţi furnizorii privaţi. Tariful pe milă marină se poate renegocia trimestrial în raport cu evaluarea trimestrială a indicatorilor efectiv realizaţi, în limita sumelor aprobate cu această destinaţie, în aceleaşi condiţii ca mai sus;

Diferenţa de 5% se utilizează pentru contractarea serviciilor medicale realizate în condiţiile prevăzute la alin. (4) lit,b).

(4) Decontarea activităţii de consultaţii de urgenţă la domiciliu şi a unor servicii de transport sanitar efectuate de unităţile specializate autorizate şi evaluate private:

urgenţă la domiciliu realizate şi tariful minim negociat pe solicitare, în limita sumelor contractate.

b) trimestrial se face regularizarea pentru perioada de la începutul anului până la sfârşitul trimestrului respectiv, având în vedere încadrarea în sumele contractate.

În situaţia în care, la regularizarea trimestrială, numărul total al kilometrilor echivalenţi parcurşi pentru mediul urban, numărul de kilometri efectiv realizaţi pentru mediul rural, respectiv numărul total al milelor marine parcurse de la începutul anului până la sfârşitul trimestrului respectiv este mai mare decât numărul contractat, casele de asigurări de sănătate decontează nivelul realizat al acestora (dar nu mai mult de 21% faţă de cel contractat) numai dacă depăşirea este justificată, cu încadrarea în suma aferentă serviciilor medicale de urgenţă şi transport sanitar aprobată pentru această destinaţie la nivelul casei de asigurări de sănătate.

În situaţia în care la regularizarea trimestrială, numărul total al kilometrilor echivalenţi parcurşi pentru mediul urban, numărul de kilometri efectiv realizaţi pentru mediul rural, respectiv numărul total al milelor marine parcurse de la începutul anului până la sfârşitul trimestrului respectiv este mai mic decât numărul contractat, casele de asigurări de sănătate decontează nivelul realizat al acestora.

În situaţia în care la regularizarea trimestrială, numărul solicitări pentru consultaţii de urgenţă la domiciliu rezolvate de la începutul anului până la sfârşitul trimestrului respectiv este mai mare decât numărul solicitărilor contractate, casele de asigurări de sănătate pot deconta numărul solicitărilor rezolvate numai dacă depăşirea este justificată (dar nu mai mult de 21% faţă de solicitările contractate) cu încadrarea în suma aferentă serviciilor medicale de urgenţă şi de transport sanitar aprobată pentru această destinaţie la nivelul casei de asigurări de sănătate.

În situaţia în care la regularizarea trimestrială, numărul solicitărilor pentru consultaţii de urgenţă la domiciliu rezolvate de la începutul anului până la sfârşitul trimestrului respectiv este mai mic decât numărul solicitărilor contractate, casele de asigurări de sănătate decontează la nivelul numărului de solicitări rezolvate şi la tariful negociat.

c) Casele de asigurări de sănătate decontează unităţilor specializate autorizate şi evaluate private solicitările pentru consultaţii de urgenţă la domiciliu şi numărul de kilometri efectuaţi pentru tipul de transport prevăzut la litera D pct. II poziţia 16 şi pct. ANEXA 25

CONDIŢIILE
acordării serviciilor de îngrijiri medicale la domiciliu şi îngrijiri paliative la domiciliu şi modalităţile de plată ale acestora

ART. 1 (1) Serviciile de îngrijiri medicale la domiciliu se acordă de către furnizorii de îngrijiri medicale la domiciliu, persoane fizice sau juridice autorizate şi evaluate în condiţiile legii pentru acordarea acestor tipuri de servicii, alţii decât medicii de familie, furnizori care încheie contracte cu casele de asigurări de sănătate pentru servicii de îngrijiri medicale la domiciliu. Serviciile de îngrijiri medicale la domiciliu se acordă pe bază de recomandare pentru îngrijiri medicale la domiciliu, ţinând seama de starea de sănătate a asiguratului şi de statusul de performanţă ECOG al acestuia.

(2) Recomandarea pentru efectuarea serviciilor de îngrijiri medicale la domiciliu se face de către medicii de specialitate din ambulatoriu, inclusiv medicii de familie şi de către medicii de specialitate din spitale la externarea asiguraţilor, medici aflaţi în relaţii contractuale cu casele de asigurări de sănătate, conform modelului prezentat în anexa nr. 27 C la ordin, în concordanţă cu diagnosticul stabilit şi în funcţie de patologia bolnavului şi statusul de performanţă ECOG al acestuia cu precizarea activităţilor zilnice pe care asiguratul nu le poate îndeplini. Medicii de specialitate din ambulatoriul de specialitate recomandă îngrijiri medicale la domiciliu pentru asiguraţii cu afecţiuni oncologice sau AVC, numai ca o consecinţă a consultaţiei medicale raportate şi validate de casa de asigurări de sănătate. În funcţie de statusul de performanţă ECOG, bolnavul poate fi:

a) incapabil să desfăşoare activităţi casnice, este imobilizat în fotoliu sau pat peste 50% din timpul zilei, necesită sprijin pentru îngrijirea de bază (igienă şi/sau alimentaţie şi/sau mobilizare) - statusul de performanţă ECOG 3.

b) complet imobilizat la pat, dependent total de altă persoană pentru îngrijirea de bază (igienă, alimentaţie, mobilizare) - statusul de performanţă ECOG 4

(3) Recomandarea pentru îngrijiri medicale la domiciliu se consemnează de catre medicul curant al pacientului in biletul de externare, la externarea acestuia, sau în registrul de consultaţii şi fişa de observaţie a pacientului, în ambulatoriu, asupra necesitatii efectuarii ingrijirilor medicale.

ART. 2 (1) Lista serviciilor de îngrijiri medicale la domiciliu este prevăzută în anexa nr. 24 la ordin.

(2) Tariful pe caz pentru un episod de îngrijire la domiciliu se obţine înmulţind numărul de zile de îngrijire corespunzător unui episod de îngrijire la domiciliu cu tariful pe o zi de îngrijire la domiciliu. Tariful pe o zi de îngrijire la domiciliu este 75 lei. În tariful pe o zi de îngrijire sunt incluse costurile materialelor sanitare pentru realizarea serviciului de îngrijire la domiciliu. Prin o zi de îngrijire se înţelege efectuarea de către furnizor a minimum 1 vizită la domiciliu cu monitorizarea parametrilor fiziologici, toaleta totală sau parţială a pacientului la pat, manevre terapeutice conform recomandării, după caz.

Tariful de 75 de lei/zi de îngrijire la domiciliu , este valabil pentru episoadele de îngrijire pentru care deciziile sunt emise începând cu 1 iunie 2011. Pentru zilele ce depăşesc 42 de zile tariful este de 50 de lei.

Aceste tarife se aplică dacă pentru fiecare caz sunt recomandate şi efectuate minim 8 servicii din lista prevăzută în anexa nr. 24 la ordin. În caz contrar, tarifele se reduc proporţional, în funcţie de numărul serviciilor recomandate, conform formulei:

Nr. servicii recomandate şi efectuate / nr. minim de servicii (8) x tariful pe zi de îngrijire corespunzător perioadei recomandate.

(3) Durata pentru care un asigurat poate beneficia de servicii de îngrijiri medicale la domiciliu se stabileşte de medicul care a făcut recomandarea, cu obligativitatea precizării ritmicităţii/periodicităţii serviciilor, consemnate în formularul "Recomandare pentru îngrijiri medicale la domiciliu", dar nu mai mult de 90 zile de îngrijiri/în ultimele 11 luni în una sau mai multe etape (episoade de îngrijire). Fiecare episod nou de îngrijire se recomandă utilizând un nou formular de recomandare. În situaţia în care, conform recomandării pentru îngrijiri medicale la domiciliu, îngrijirile nu sunt acordate în zile consecutive, la calcularea celor 90 de zile/în ultimele 11 luni se iau în calcul numai zilele în care s-au acordat îngrijirile.

(4) Numărul maxim de servicii care pot fi raportate de către furnizorul de servicii de îngrijiri medicale la domiciliu are în vedere următoarele:

- timpul mediu/vizita la domiciliu pentru un pacient este de 1 oră;
- un program de lucru în medie de 8 ore/zi pentru personalul care acordă servicii de îngrijiri medicale la domiciliu;

(5) În situaţia în care furnizorul de îngrijiri medicale la domiciliu întrerupe furnizarea de îngrijiri medicale la domiciliu unui asigurat din următoarele motive: decesul, internarea, asiguratul doreşte să renunţe la serviciile de îngrijire medicală la domiciliu din motive personale; furnizorul anunţă în scris - cu precizarea motivului, casa de asigurări de sănătate cu care este în relaţie contractuală, în termen de 2 zile lucrătoare de la data întreruperii îngrijirilor medicale la domiciliu.

Pentru a beneficia din nou de îngrijiri medicale la domiciliu asiguratul reia procedura de aprobare de către casa de asigurări de sănătate a îngrijirilor medicale la domiciliu în limita numărului de zile prevăzut la alin. (3).

ART. 3 Furnizorii de servicii de îngrijiri medicale la domiciliu acordă servicii conform unui plan de îngrijiri în conformitate cu recomandările făcute de către medicii de specialitate din ambulatoriul de specialitate şi medicii de specialitate din spital, zilnic, inclusiv sâmbăta, duminica şi în timpul sărbătorilor legale.

ART. 4 (1) Serviciile de îngrijiri paliative la domiciliu se acordă de către furnizorii de îngrijiri paliative la domiciliu, persoane fizice sau juridice autorizate şi evaluate în condiţiile legii pentru acordarea acestor tipuri de îngrijiri, alţii decât medicii de familie, care încheie contracte cu casele de asigurări de sănătate pentru acordarea de servicii de îngrijiri paliative la domiciliu.

(2) Furnizorii de îngrijiri paliative la domiciliu încheie contracte de îngrijiri paliative cu casele de asigurări de sănătate dacă fac dovada funcţionării cu personal de specialitate. Prin personal de specialitate se înţelege: medici cu atestat în îngrijiri paliative şi asistenţi medicali absolvenţi ai unui curs de îngrijiri paliative.

Pentru asigurarea calităţii serviciilor de îngrijiri paliative este necesară prezenţa unui medic cu atestat în îngrijiri paliative şi a unui asistent medical, cu un program de lucru care să asigure o normă întreagă pe zi atât pentru medic cât şi pentru asistentul medical. Pe lângă personalul de specialitate, la nivelul furnizorului poate funcţiona şi alt personal: psihologi, kinetoterapeuţi, logopezi, îngrijitori.

(3) Serviciile de îngrijiri paliative la domiciliu se acordă pe bază de recomandare pentru îngrijiri paliative la domiciliu, asiguraţilor eligibili. Sunt consideraţi eligibili, pacienţii cu afecţiuni oncologice şi cei cu HIV/SIDA, cu speranţă limitată de viaţă şi cu status de performanţă ECOG 3 sau 4.

(4) Statusul de performanţă ECOG pentru care se acordă îngrijiri paliative la domiciliu este definit la art. 1 alin. (2).

(5) Recomandarea pentru efectuarea serviciilor de îngrijiri paliative la domiciliu se face de către medicii de specialitate cu specialităţi oncologie şi boli infecţioase, aflaţi în relaţie contractuală cu casele de asigurări de sănătate, conform modelului prevăzut în anexa nr. 27 D la ordin.

Medicul cu atestat în îngrijiri paliative al furnizorului de îngrijiri paliative la domiciliu întocmeşte după prima vizită planul de îngrijire pe care îl comunică în maximum 3 zile lucrătoare la casa de asigurări de sănătate. În situaţia în care planul de îngrijire se modifică în funcţie de necesităţile pacientului, variaţiile planului de îngrijire sunt transmise casei de asigurări de sănătate odată cu raportarea lunară.

ART. 5 (1) Lista serviciilor de îngrijiri paliative la domiciliu este prevăzută în anexa nr. 24 la ordin.

(2) Tariful pe caz pentru un episod de îngrijire paliativă la domiciliu se obţine înmulţind numărul de zile de îngrijire corespunzător unui episod de îngrijire cu tariful pe o zi de îngrijire. Tariful pe o zi de îngrijire este 80 lei. În tariful pe o zi de îngrijire sunt incluse costurile materialelor sanitare pentru realizarea serviciului de îngrijire paliativă la domiciliu. Prin o zi de îngrijire paliativă la domiciliu se înţelege efectuarea de către furnizor a minimum 1 vizită la domiciliu cu monitorizarea parametrilor fiziologici, toaleta totală sau parţială a pacientului la pat, manevre terapeutice specifice, conform recomandării, după caz.

Tariful de 80 lei/zi pentru îngrijiri paliative, este valabil pentru episoadele de îngrijire pentru care deciziile sunt emise începând cu 1 iunie 2011. Pentru zilele ce depăşesc 42 de zile tariful este de 55 de lei. Aceste tarife se aplică dacă pentru fiecare caz sunt cuprinse în cadrul planului de îngrijire şi efectuate minim 10 servicii din lista prevăzută în anexa nr. 24 la ordin. În caz contrar, tarifele se reduc proporţional, funcţie de numărul serviciilor recomandate, conform formulei:

Număr servicii cuprinse în cadrul planului de îngrijire şi efectuate / număr minim de servicii (10) x tariful /zi de îngrijire corespunzător perioadei recomandate.

(3) Durata pentru care un asigurat poate beneficia de servicii de îngrijiri paliative la domiciliu se stabileşte de către medicul care a făcut recomandarea, dar nu mai mult de 90 de zile de îngrijiri paliative o singură dată în viaţă. În situaţia în care îngrijirile nu sunt acordate în zile consecutive, la calcularea celor 90 de zile se iau în calcul numai zilele în care s-au acordat îngrijirile paliative.

ART. 6 (1) Furnizorii de servicii de îngrijiri paliative la domiciliu acordă servicii de îngrijiri paliative conform unui plan de îngrijiri stabilit de către medicul cu atestat în îngrijiri paliative şi asistentul medical care funcţionează la furnizorul respectiv, zilnic, inclusiv sâmbăta, duminica şi în timpul sărbătorilor legale.

Planul de îngrijire se stabileşte pe baza evaluării iniţiale a pacientului şi este revizuit în funcţie de necesităţile pacientului sau cel puţin o dată la 30 de zile. Modelul planului de îngrijire este cel prevăzut în anexa nr. 27 B.

Medicul cu atestat în îngrijiri paliative al furnizorului de îngrijiri paliative la domiciliu ajustează pachetul de servicii în funcţie de necesităţile pacientului; acestea se vor reflecta în Planul de îngrijire pentru servicii de îngrijiri paliative la domiciliu.

(2) Numărul maxim de servicii care pot fi raportate de către furnizorul de servicii de îngrijiri paliative are în vedere următoarele:

- timpul mediu/episod zilnic de îngrijiri pentru un pacient este 1 oră;
- un program de lucru în medie de 8 ore/zi pentru servicii de îngrijiri paliative, stabilit în conformitate cu prevederile art. 4 alin. (2);

(2) Tariful pe caz pentru un episod de îngrijire la domiciliu decontat de casa de asigurări de sănătate se stabileşte prin înmulţirea tarifului pe zi cu numărul de zile de îngrijire corespunzător unui episod de îngrijire la domiciliu.

Tariful pe o zi de îngrijire la domiciliu este 75 lei. În tariful pe o zi de îngrijire sunt incluse costurile materialelor sanitare pentru realizarea serviciului de îngrijire la domiciliu. Prin o zi de îngrijire se înţelege efectuarea de către furnizor a minimum 1 vizită la domiciliu cu monitorizarea parametrilor fiziologici, toaleta totală sau parţială a pacientului la pat, manevre terapeutice conform recomandării, după caz.

Tariful de 75 de lei/zi de îngrijire la domiciliu, este valabil pentru episoadele de îngrijire pentru care deciziile sunt emise începând cu 1 iunie 2011. Pentru zilele ce depăşesc 42 de zile tariful este de 50 de lei.

Tarifele nu sunt elemente de negociere între părţi.

Durata pentru care un asigurat poate beneficia de servicii de îngrijiri medicale la domiciliu este de cel mult de 90 zile de îngrijiri/în ultimele 11 luni în una sau mai multe etape (episoade de îngrijire). În situaţia în care, conform recomandării pentru îngrijiri

medicale la domiciliu, îngrijirile nu sunt acordate în zile consecutive, la calcularea celor 90 de zile/în ultimele 11 luni se iau în calcul numai zilele în care s-au acordat îngrijirile.

(3) Tariful pe caz pentru un episod de îngrijire paliativă la domiciliu decontat de casa de asigurări de sănătate se stabileşte prin înmulţirea tarifului pe zi cu numărul de zile de îngrijire corespunzător unui episod de îngrijire paliativă la domiciliu.

Tariful pe caz pentru un episod de îngrijire paliativă la domiciliu se obţine înmulţind numărul de zile de îngrijire corespunzător unui episod de îngrijire cu tariful pe o zi de îngrijire. Tariful pe o zi de îngrijire este 80 lei. În tariful pe o zi de îngrijire sunt incluse costurile materialelor sanitare pentru realizarea serviciului de îngrijire paliativă la domiciliu. Prin o zi de îngrijire paliativă la domiciliu se înţelege efectuarea de către furnizor a minimum 1 vizită la domiciliu cu monitorizarea parametrilor fiziologici, toaleta totală sau parţială a pacientului la pat, manevre terapeutice specifice, conform recomandării, după caz.

Tariful de 80 de lei/zi de îngrijiri paliative, este valabil pentru episoadele de îngrijire pentru care deciziile sunt emise începând cu 1 iunie 2011. Pentru zilele ce depăşesc 42 de zile tariful este de 55 de lei. Aceste tarife se aplică dacă pentru fiecare caz sunt recomandate şi efectuate minim 10 servicii din lista prevăzută în anexa nr. 24 la Ordinul ministrului sănătăţii şi al preşedintelui Casei naţionale de Asigurări de Sănătate nr..... pentru aprobarea normelor metodologice de aplicare a Contractului-cadru privind condiţiile acordării asistenţei medicale în cadrul sistemului de asigurări sociale de sănătate pentru anii 2011 - 2012, aprobat prin Hotărârea Guvernului nr. 1389/2010, cu modificările şi completările ulterioare. În caz contrar, tarifele se reduc proporţional, funcţie de numărul serviciilor recomandate, conform formulei:

Nr. servicii recomandate şi efectuate / nr. minim de servicii (10) x tariful /zi de îngrijire corespunzător perioadei recomandate.

Tarifele nu sunt elemente de negociere între părţi.

Durata pentru care un asigurat poate beneficia de servicii de îngrijiri paliative la domiciliu este de cel mult de 90 de zile de îngrijiri paliative o singură dată în viaţă. În situaţia în care îngrijirile nu sunt acordate în zile consecutive, la calcularea celor 90 de zile se iau în calcul numai zilele în care s-au acordat îngrijirile paliative.

(4) Numărul maxim de servicii care pot fi raportate de către furnizorul de servicii de îngrijiri medicale la domiciliu are în vedere următoarele:

- timpul mediu/vizita la domiciliu pentru un pacient este de 1 oră;
- un program de lucru în medie de 8 ore/zi pentru personalul care acordă servicii de îngrijiri medicale la domiciliu;

În situaţia în care furnizorul de îngrijiri medicale la domiciliu întrerupe furnizarea de îngrijiri medicale la domiciliu unui asigurat din următoarele motive: decesul, internarea, asiguratul doreşte să renunţe la serviciile de îngrijire medicală la domiciliu din motive personale; furnizorul anunţă în scris - cu precizarea motivului, casa de asigurări de sănătate cu care este în relaţie contractuală, în termen de 2 zile lucrătoare de la data întreruperii îngrijirilor medicale la domiciliu.

(5) Numărul maxim de servicii care pot fi raportate de către furnizorul de servicii de îngrijiri paliative are în vedere următoarele:

- timpul mediu/episod zilnic de îngrijiri pentru un pacient este 1 oră;
- un program de lucru în medie de 8 ore/zi pentru servicii de îngrijiri paliative, stabilit în conformitate cu prevederile art. 4 alin. (2) din anexa nr. 25 la Ordinul ministrului sanatatii si al preşedintelui Casei Naţionale de Asigurări de sănătate nr. ..... pentru aprobarea Normelor metodologice de aplicare a Contractului-cadru privind condiţiile acordării asistenţei medicale în cadrul sistemului de asigurări sociale de sănătate pentru anii 2011 – 2012 aprobat prin H.G. nr.1389/2010, cu modificările şi completările ulterioare;

În situaţia în care furnizorul de îngrijiri paliative întrerupe furnizarea de îngrijiri paliative unui asigurat din următoarele motive: decesul, internarea, în urma evaluării asiguratului se decide că acesta nu mai este eligibil, asiguratul doreşte să renunţe la serviciile de îngrijire paliative la domiciliu din motive personale; furnizorul anunţă în scris - cu precizarea motivului, casa de asigurări de sănătate cu care este în relaţie contractuală, în termen de 2 zile lucrătoare de la data întreruperii îngrijirilor paliative.

(6) Decontarea serviciilor de îngrijiri medicale la domiciliu/îngrijiri paliative la domiciliu se face lunar în funcţie de numărul de zile îngrijiri medicale la domiciliu/îngrijiri paliative la domiciliu realizat, raportat şi validat conform Normelor metodologice de aplicare a Contractului-cadru privind condiţiile acordării asistenţei medicale în cadrul sistemului de asigurări sociale de sănătate pentru anii 2011 – 2012 aprobat prin H.G. nr.1389/2010, cu modificările şi completările ulterioare, în limita numărului de zile aprobat de casa de asigurări de sănătate pentru fiecare caz aprobat şi de tariful pe zi de îngrijiri medicale la domiciliu/îngrijiri paliative la domiciliu,

(7) În situaţia în care asiguraţii nu au beneficiat în ultimele 11 luni de îngrijiri medicale la domiciliu / îngrijiri paliative la domiciliu şi pentru care se emit decizii începând cu data intrării în vigoare a prezentelor norme, tarifele sunt cele corespunzătoare tipului şi perioadelor de îngrijire cumulate, conform reglementărilor art. 2 alin (2) şi art. 5 alin. (2) din anexa nr. 25 la Ordinul ministrului sănătăţii şi al preşedintelui Casei Naţionale de Asigurări de Sănătate pentru aprobarea Normelor metodologice de aplicare a Contractului-cadru privind condiţiile acordării asistenţei medicale în cadrul sistemului de asigurări sociale de sănătate pentru anii 2011 – 2012 aprobat prin H.G. nr.1389/2010, cu modificările şi completările ulterioare.

(8) Pentru episoadele de îngrijire la domiciliu sau îngrijiri paliative aflate în derulare la data intrării în vigoare a prezentelor norme, tarifele aferente acestora până la finalizarea episodului de îngrijire, sunt cele valabile la data emiterii deciziei.

(9) În situaţia în care, la data intrării în vigoare a prezentelor norme, asiguraţii au mai beneficiat în ultimele 11 luni de episoade de îngrijiri încheiate, fără a cumula 90 de zile de îngrijire în ultimele 11 luni, pentru deciziile nou emise se vor lua în calcul prevederile de la art. 2 alin (2) şi art. 5 alin.(2) din anexa nr. 25 la Ordinul ministrului sănătăţii şi al preşedintelui Casei Naţionale de Asigurări de Sănătate pentru aprobarea Normelor metodologice de aplicare a Contractului-cadru privind condiţiile acordării asistenţei medicale în cadrul sistemului de asigurări sociale de sănătate pentru anii 2011 – 2012 aprobat prin H.G. nr.1389/2010, cu modificările şi completările ulterioare, ţinându-se cont de numărul de zile aferent episoadelor anterioare de îngrijiri medicale /paliative la domiciliu.

(10) În situaţia în care un asigurat beneficiază atât de îngrijiri medicale la domiciliu cât şi de îngrijiri paliative la domiciliu, numărul total de zile de îngrijire nu poate fi mai mare de 90 de zile în ultimele 11 luni.

ANEXA 28

CONDIŢIILE
acordării asistenţei medicale de recuperare, medicină fizică şi balneologie şi modalitatea de plată a acesteia

ART. 1 (1) Suma negociată şi contractată de sanatoriile/secţiile sanatoriale din spitale, pentru adulţi şi copii, inclusiv cele balneare, de furnizori constituiţi conform Legii nr. 31/1990, republicată, cu modificările şi completările ulterioare, care sunt avizaţi de Ministerul Sănătăţii ca sanatorii balneare sau au în structura avizată / aprobată de Ministerul Sănătăţii secţii sanatoriale balneare şi de preventoriile cu sau fără personalitate juridică, cu casele de asigurări de sănătate, se stabileşte pe baza următorilor indicatori specifici în funcţie de care se stabileşte capacitatea maximă de funcţionare:

a) număr de personal existent conform structurii sanatoriilor, inclusiv cele balneare, şi preventoriilor, având în vedere numărul de posturi aprobate potrivit legii;

b) număr de paturi stabilit conform structurii organizatorice aprobată sau avizată, după caz, de Ministerul Sănătăţii, în condiţiile legii;

c) rata medie de utilizare a paturilor la nivel naţional şi în conformitate cu planul de paturi la nivel judeţean, stabilite prin ordin al ministrului sănătăţii; rata medie de utilizare a paturilor la nivel naţional luată în calcul la stabilirea capacităţii maxime este de 250 de zile;

d) număr de zile de spitalizare, total şi pe secţii, stabilit pe baza ratei medii de utilizare a paturilor la nivel naţional;

e) durata optimă de spitalizare sau, după caz, durata de spitalizare efectiv realizată; pentru situaţiile la care este prevăzută durată optimă de spitalizare se va lua în calcul durata optimă dacă durata de spitalizare efectiv realizată este mai mare decât aceasta,

respectiv durata de spitalizare efectiv realizată dacă aceasta este mai mică decât durata optimă de spitalizare.

f) tariful pe zi de spitalizare negociat ;

g) cost mediu cu medicamentele/bolnav externat pe anul 2010.

h) structura organizatorică aprobată sau avizată, după caz, de Ministerul Sănătăţii, în condiţiile legii, în vigoare la data încheierii contractului

(2) Suma prevăzută în contractul de furnizare de servicii medicale de recuperare, medicină fizică şi balneologie încheiat de casele de asigurări de sănătate cu sanatoriile, inclusiv cele balneare, şi preventoriile, precum şi suma contractată cu spitalele în baza contractului de furnizare servicii medicale spitaliceşti pentru secţiile sanatoriale se stabileşte prin negociere astfel:

Număr de zile de spitalizare x tarif pe zi de spitalizare negociat

a) numărul de zile de spitalizare, total şi pe secţii, stabilit pe baza ratei medii de utilizare a paturilor la nivel naţional.

b) tariful pe zi de spitalizare/sanatoriu/preventoriu se negociază şi nu poate fi mai mare decât tariful maximal.

		Tarif maximal pe zi de spitalizare (lei)
1.	Sanatorii balneare	135
2.	Sanatorii	116
3.	Preventorii	65

NOTĂ: Tariful contractat nu poate fi mai mare decât tariful contractat pentru anul 2010 + 15%. Pentru furnizorii care nu au fost în relaţie contractuală cu casele de asigurări de sănătate în anul 2010, tariful maximal se diminuează cu 20%.

Pentru sanatoriile balneare, suma contractată şi decontată de casele de asigurări de sănătate este suma negociată diminuată corespunzător cu contribuţia personală a asiguraţilor.

Contribuţia personală a asiguraţilor reprezintă 30 - 35% din tariful/zi de spitalizare negociat , în funcţie de tipul de asistenţă balneară şi de durata tratamentului:

Tipul de asistenţă balneară	Durata*)	Contribuţia asiguratului
1. Asistenţă balneară terapeutică (cu trimitere medicală)	18 - 21 de zile	35% din tariful/zi de spitalizare
2. Asistenţă balneară de recuperare medicală (cu trimitere medicală)	21 - 30 de zile	30% din tariful/zi de spitalizare

*) Serviciile medicale acordate pentru duratele de spitalizare mai mari de 21, respectiv 30 de zile, se suportă în întregime de către asiguraţi. Casele de asigurări de sănătate decontează serviciile medicale şi pentru durate mai mici de 18, respectiv 21 de zile, conform aceloraşi procente. Contribuţia asiguratului se încasează de către sanatorii, care eliberează bon fiscal sau, la cererea asiguratului, factură, pentru această contribuţie, şi reprezintă venit propriu al unităţii sanitare.

În sanatoriile balneare, pentru categoriile de persoane prevăzute în legi speciale, partea de contribuţie personală a asiguratului se suportă din fond.

Pentru serviciile medicale de recuperare, medicină fizică şi balneologie ~~de~~ acordate în alte sanatorii decât cele balneare şi în preventorii nu se percepe contribuţie din partea asiguraţilor.

ART. 2 (1) Decontarea serviciilor medicale de recuperare, medicină fizică şi balneologie efectuate în sanatorii/secţiile sanatoriale din spitale pentru adulţi şi copii, inclusiv cele balneare, precum şi în preventorii cu sau fără personalitate juridică se face de către casele de asigurări de sănătate în raport cu numărul de zile de spitalizare efectiv realizat

şi cu tariful pe zi de spitalizare, cu încadrarea în valoarea contractului, diminuat în cazul sanatoriilor balneare cu contribuţia asiguratului conform prevederilor art. 1.

(2) Decontarea serviciilor medicale de recuperare, medicină fizică şi balneologie ~~de~~ efectuate în sanatorii/secţii sanatoriale din spitale pentru adulţi şi copii, inclusiv cele balneare, precum şi în preventorii cu sau fără personalitate juridică se face din fondul cu destinaţia servicii medicale de recuperare, medicină fizică şi balneologie ~~de~~ în unităţi sanitare cu paturi.

ART. 3 Asiguraţii suportă contravaloarea serviciilor hoteliere (cazare şi/sau masă) cu un grad ridicat de confort, peste confortul standard, acordate la cererea acestora. Prin confort standard, în ceea ce priveşte cazarea, se înţelege salon cu minimum 3 paturi, grup sanitar propriu, cu respectarea normelor igienico-sanitare şi fără dotări suplimentare (televizor, radio, telefon, frigider, aer condiţionat şi altele asemenea), iar în ceea ce priveşte masa, cea acordată la nivelul alocaţiei de hrană stabilită prin acte normative. Contribuţia personală a asiguraţilor reprezintă diferenţa dintre tarifele stabilite pentru serviciile hoteliere cu grad ridicat de confort, stabilite de fiecare unitate furnizoare, şi cele corespunzătoare confortului standard.

ART. 4 Sanatoriile şi preventoriile din sumele contractate cu casele de asigurări de sănătate suportă contravaloarea serviciilor hoteliere standard (cazare standard şi masă la nivelul alocaţiei de hrană) pentru însoţitorii copiilor bolnavi în vârstă de până la 3 ani, precum şi pentru însoţitorii persoanelor cu handicap grav, în condiţiile prevederilor legale în vigoare.

ART. 5 (1) Sanatoriile, inclusiv cele balneare şi preventoriile sunt obligate să suporte pentru asiguraţii internaţi toate cheltuielile necesare pentru rezolvarea cazurilor respective, inclusiv pentru medicamente, materiale sanitare şi investigaţii paraclinice.

(2) În situaţia în care asiguraţii, pe perioada internării, în baza unor documente medicale întocmite de medicul curant din secţia în care aceştia sunt internaţi şi avizate de şeful de secţie şi manager, suportă cheltuieli cu medicamente, materiale sanitare şi investigaţii paraclinice la care ar fi fost îndreptăţiţi fără contribuţie personală, în condiţiile contractului-cadru şi prezentelor norme, sanatoriile, inclusiv cele balneare şi preventoriile rambursează contravaloarea acestor cheltuieli la cererea asiguraţilor.

(3) Rambursarea cheltuielilor prevăzute la alin. (2) reprezintă o obligaţie exclusivă a sanatoriilor, inclusiv cele balneare şi a preventoriilor şi se realizează numai din veniturile acestora, pe baza unei metodologii proprii.

ART. 6 (1) Suma anuală prevăzută în bugetul de venituri şi cheltuieli şi, respectiv, suma prevăzută în contractul de furnizare de servicii medicale încheiat cu casele de asigurări de sănătate se defalchează de către sanatorii şi preventorii pe trimestre şi luni, cu acordul ordonatorului de credite ierarhic superior, în funcţie de subordonare, şi al caselor de asigurări de sănătate.

Lunar, casele de asigurări de sănătate vor deconta în primele 10 zile ale lunii următoare celei pentru care se face plata sumele corespunzătoare serviciilor medicale realizate conform indicatorilor specifici, în limita sumelor contractate, în baza facturii şi a documentelor justificative ce se depun la casa de asigurări de sănătate până la data prevăzută în contractul de furnizare de servicii medicale. Pentru fiecare lună, casele de asigurări de sănătate pot efectua până la data de 20 decontarea lunii curente pentru perioada 1 - 15 a lunii, în baza indicatorilor specifici realizaţi şi în limita sumelor contractate, pe baza facturii şi a documentelor justificative ce se depun la casa de asigurări de sănătate până la data prevăzută în contractul de furnizare de servicii medicale.

Decontarea serviciilor medicale aferente lunii decembrie a anului în curs se poate efectua în luna decembrie pentru serviciile medicale efectuate şi facturate până la data prevăzută în documentele justificative depuse în vederea decontării, urmând ca diferenţa

reprezentând servicii medicale realizate să se deconteze în luna ianuarie a anului următor.

Pentru încadrarea în sumele contractate cu casele de asigurări de sănătate, sanatoriile şi preventoriile vor întocmi liste de prioritate pentru cazurile programabile, dacă este cazul. În acest sens, odată cu raportarea ultimei luni a fiecărui trimestru, acestea depun la casa de asigurări de sănătate pe fiecare secţie numărul cazurilor programate aferente trimestrului respectiv, după cum urmează: număr cazuri programate aflate în lista de prioritate la începutul trimestrului, număr cazuri programate intrate în lista de prioritate în cursul trimestrului, număr cazuri programate ieşite din lista de prioritate în cursul trimestrului şi număr cazuri programate aflate la sfârşitul trimestrului în lista de prioritate.

(2) Activitatea realizată se verifică de către casele de asigurări de sănătate în vederea decontării şi se validează conform prezentelor norme.

Decontarea lunară şi regularizarea trimestrială se realizează astfel:

1. Decontarea lunară în limita sumei contractate se face în funcţie de:

- numărul de zile de spitalizare efectiv realizate
- tariful pe zi de spitalizare negociat, diminuat în cazul sanatoriilor balneare cu contribuţia asiguratului conform prevederilor art. 1.

2. Trimestrial, se fac regularizări şi decontări, în limita sumei contractate, în funcţie de:

- numărul de zile de spitalizare efectiv realizate de la începutul anului până la sfârşitul trimestrului respectiv,
- tariful pe zi de spitalizare negociat, diminuat în cazul sanatoriilor balneare cu contribuţia asiguratului conform prevederilor art. 1.

În situaţia în care numărul de zile efectiv realizate este mai mic decât numărul de zile contractate, decontarea se face la numărul realizat.

În situaţia în care numărul de zile efectiv realizate este mai mare decât numărul de zile contractate decontarea se va face la nivelul contractat.

(3) Regularizarea şi decontarea trimestrială se fac în primele 25 de zile ale lunii următoare trimestrului încheiat, cu excepţia trimestrului IV pentru care regularizarea se face până la data de 20 decembrie a anului în curs pentru serviciile medicale realizate şi raportate conform contractului de furnizare de servicii medicale până la aceasta dată, conform facturilor însoţite de documentele justificative, urmând ca regularizarea finală a trimestrului IV să se efectueze în luna ianuarie a anului următor.

ART. 7 Pentru spitalele de recuperare şi secţiile/compartimentele de recuperare din cadrul unor spitale, contractarea şi decontarea serviciilor medicale de recuperare, medicină fizică şi balneologie se fac în condiţiile stabilite în anexa nr. 17 la ordin, din fondul aferent asistenţei medicale spitaliceşti.

ART. 8 Medicii care îşi desfăşoară activitatea în sanatorii/preventorii au obligaţia ca la externarea asiguratului să transmită medicului de familie sau medicului de specialitate din ambulatoriu, după caz, prin scrisoare medicală sau bilet de ieşire din spital - cu obligaţia ca acesta să conţină explicit toate elementele prevăzute în scrisoarea medicală, evaluarea stării de sănătate a asiguratului la momentul externării şi indicaţiile de tratament şi supraveghere terapeutică pentru următoarea perioadă (determinată conform diagnosticului).

ART. 9 Casele de asigurări de sănătate şi direcţiile de sănătate publică au obligaţia de a organiza trimestrial (sau ori de câte ori este nevoie) întâlniri cu medicii de specialitate din unităţile sanitare de recuperare, medicină fizică şi balneologie pentru a analiza aspecte privind calitatea serviciilor medicale din asistenţa medicală de recuperare, medicină fizică şi balneologie a sănătăţii, precum şi respectarea prevederilor actelor normative în vigoare. Acestea vor informa asupra modificărilor apărute în actele normative şi vor stabili, împreună cu medicii de specialitate din unităţile sanitare de recuperare, medicină fizică şi balneologie, măsurile ce se impun pentru îmbunătăţirea activităţii.

Neparticiparea medicilor la aceste întâlniri nu îi exonerează de răspunderea nerespectării hotărârilor luate cu acest prilej.

ART. 10 Furnizorii de servicii medicale de recuperare, medicină fizică şi balneologie (sanatorii, preventorii) vor prezenta la contractare documentele necesare pentru fundamentarea tarifului pe zi de spitalizare.

ANEXA 33

MODALITATEA
de prescriere, procurare şi decontare a dispozitivelor medicale destinate recuperării unor deficienţe organice sau funcţionale în ambulatoriu

ART. 1 (1) Dispozitivele medicale destinate recuperării unor deficienţe organice sau funcţionale în ambulatoriu, se acordă pentru o perioadă determinată ori nedeterminată, în baza prescripţiei medicale eliberate de medicul de specialitate aflat în relaţie contractuală cu casa de asigurări de sănătate, direct sau prin reprezentantul legal, şi numai ca o consecinţă a actului medical raportat de medicul de specialitate care a făcut recomandarea şi validat de către casa de asigurări de sănătate în condiţiile prezentelor norme.

(2) Prescripţia medicală se eliberează în 3 exemplare, dintre care un exemplar rămâne la medic, un exemplar însoţeşte cererea şi se depune la casa de asigurări de sănătate şi un exemplar rămâne la asigurat, pe care îl predă furnizorului de dispozitive medicale împreună cu decizia de aprobare a dispozitivului medical eliberată de casa de asigurări de sănătate. Prescripţia medicală trebuie să conţină denumirea şi tipul dispozitivului medical din Lista dispozitivelor medicale din anexa nr.32 la ordin. Prescripţia medicală va conţine în mod obligatoriu numele casei de asigurări de sănătate cu care medicul care eliberează prescripţia medicală se află în relaţie contractuală şi numărul contractului.

Prescripţia medicală va fi întocmită în limita competenţei medicului prescriptor.

(3) Prescripţia medicală pentru protezarea auditivă trebuie să fie însoţită de audiograma tonală liminară şi audiograma vocală, eliberate de un furnizor autorizat şi evaluat care se află în relaţie contractuală cu casa de asigurări de sănătate. Pentru copii, la recomandarea medicului de specialitate, audiograma vocală se poate excepta. Audiogramele conţin numele şi prenumele asiguratului, CNP-ul acestuia, data şi locul efectuării, dovada calibrării / etalonării anuale a audiometrelor utilizate.

(4) Prescripţia medicală pentru protezarea vizuală - implant cu lentile intraoculare - trebuie să fie însoţită de biometria eliberată de un furnizor de servicii medicale autorizat şi evaluat, aflat în relaţie contractuală cu casa de asigurări de sănătate.

(5) În cazul protezării membrului inferior, după o intervenţie chirurgicală, un asigurat poate beneficia înaintea protezării definitive, de o proteză provizorie. În această situaţie medicul care face recomandarea va menţiona pe prescripţia medicală modul de protezare şi tipul protezei definitive. În situaţii speciale, pentru acelaşi segment anatomic medicul specialist poate prescrie o altă protezare care să cuprindă atât proteză provizorie cât şi proteză definitivă sau direct proteză definitivă.

(6) Pentru dispozitivele de protezare stomii, în cazul pacienţilor cu stome permanente, medicul va menţiona pe prescripţia medicală "stomă permanentă".

(7) Pentru dispozitivele de protezare stomii şi incontinenţă urinară recomandarea se poate face şi de către medicul de familie pe lista căruia se află înscris asiguratul, aflat în relaţie contractuală cu aceeaşi casă de asigurări de sănătate unde este în evidenţă şi asiguratul, în baza scrisorii medicale/bilet de ieşire din spital transmisă de către medicul de specialitate aflat în relaţie contractuală cu casele de asigurări de sănătate. Prescripţia medicală va conţine în mod obligatoriu în acest caz şi numele casei de asigurări de sănătate cu care medicul de specialitate, care a transmis scrisoarea medicală/ biletul de ieşire din spital, se află în relaţie contractuală şi numărul contractului încheiat de către acesta sau reprezentantul legal; biletul de ieşire din spital va conţine obligatoriu şi explicit toate elementele prevăzute în modelul de scrisoare medicală.

(8) În prescripţia medicală se va menţiona obligatoriu că deficienţa organică sau funcţională nu este ca urmare a unei boli profesionale sau a unui accident de muncă ori sportiv.

ART. 2 (1) Pentru obţinerea dispozitivului medical, asiguratul, unul din membrii de familie (părinte, soţ/soţie, fiu/fiică), o persoană împuternicită legal în acest sens de acesta sau reprezentantul legal al asiguratului depune o cerere la casa de asigurări de sănătate în evidenţele căreia se află asiguratul beneficiar al dispozitivului, însoţită de un document justificativ care atestă calitatea de asigurat, actul de identitate (în copie), codul numeric personal - CNP, prescripţia medicală pentru dispozitivul medical şi declaraţia pe propria răspundere din care să rezulte că deficienţa organică sau funcţională nu a apărut în urma unei boli profesionale, a unui accident de muncă sau sportiv. Pentru copiii în vârstă de până la 14 ani se ataşează prescripţia medicală pentru dispozitivul medical recomandat, cu specificarea domiciliului copilului, şi certificatul de naştere (în copie), cu codul numeric personal - CNP. Copiile se vizează de casa de asigurări de sănătate pe baza originalelor.

(2) Prescripţiile medicale îşi pierd valabilitatea dacă nu sunt depuse la casa de asigurări de sănătate în termen de 30 de zile de la data emiterii. Nu sunt acceptate prescripţiile medicale în care este nominalizat furnizorul de dispozitive medicale sau cele care sunt eliberate de medicii de specialitate aflaţi în relaţie contractuală cu casa de asigurări de sănătate şi care reprezintă interesele unui furnizor de dispozitive medicale evaluat (reprezentant legal, angajat, asociat, administrator).

(3) În situaţia pacienţilor cu stome permanente pentru obţinerea dispozitivelor de protezare stomii, prescripţia medicală pe care este completată menţiunea "stomă permanentă" se depune împreună cu prima cerere la casa de asigurări de sănătate o singură dată într-un an calendaristic.

ART. 3 (1) Casa de asigurări de sănătate, în termen de cel mult 3 zile lucrătoare de la data înregistrării cererii, este obligată să ia o hotărâre privind acceptarea sau respingerea cererii. Respingerea cererii de către casa de asigurări de sănătate se face în scris şi motivat, cu indicarea temeiului legal.

(2) În cazul acceptării, cererile sunt supuse aprobării şi, respectiv, emiterii unei decizii de aprobare pentru procurarea/închirierea dispozitivului medical în limita fondului aprobat cu această destinaţie. Decizia se ridica de la casa de asigurari de sanatate de catre beneficiar, apartinator sau imputernicit legal in acest sens sau se expediaza prin posta in maximum 2 zile de la emitere in cazul in care asiguratul solicita prin cerere. În situaţia în

care cererile pentru dispozitive medicale conduc la depăşirea fondului lunar aprobat se întocmesc liste de prioritate pentru asiguraţi, pe categorii de dispozitive medicale. În acest caz decizia se emite în momentul în care fondul aprobat cu această destinaţie permite decontarea dispozitivului medical, în ordinea listei de prioritate, casa de asigurări de sănătate fiind obligată să transmită asiguratului prin adresă scrisă, expediată prin poştă, decizia în termen de 2 zile lucrătoare de la data emiterii acesteia sau necesitatea revizuirii prescripţiei medicale, dacă este cazul. Modelul unic de decizie pentru aprobarea acordării unui dispozitiv medical este prevăzut în anexa nr. 35 la ordinul ministrului sănătăţii şi al preşedintelui Casei Naţionale de Asigurări de Sănătate nr …….. pentru aprobarea normelor metodologice de aplicare a contractului-cadru privind condiţiile acordării asistenţei medicale în cadrul sistemului de asigurări de sănătate pentru anii 2011 – 2012, aprobat prin H.G. nr.1389/2010, cu modificările şi completările ulterioare.

(3) Criteriile de prioritate precum şi cele pentru soluţionarea listelor de prioritate ţin cont de data înregistrării cererilor la casa de asigurări de sănătate şi de nivelul de urgenţă stabilite de serviciul medical al casei de asigurări de sănătate, cu avizul Consiliului de administraţie şi se aprobă prin decizie de către preşedintele-director general şi se publică pe pagina web a acesteia, precum şi de ponderea fiecărei categorii de dispozitive medicale din totalul dispozitivelor medicale acordate asiguraţilor, în condiţiile art. 117 alin. (2) din Contractul-cadru privind condiţiile acordării asistenţei medicale în cadrul sistemului de asigurări sociale de sănătate pentru anii 2011-2012, aprobat prin H.G. nr. 1389/2010, cu modificările şi completările ulterioare.

(4) Fiecare decizie se emite pentru un singur dispozitiv medical şi se eliberează în două exemplare, dintre care un exemplar pentru asigurat, transmis de casa de asigurări de sănătate prin poştă, şi un exemplar rămâne la casa de asigurări de sănătate.

(5) Decizia de aprobare pentru procurarea dispozitivelor de protezare stomii şi incontinenţă urinară este valabilă pentru perioada prevăzută în prescripţia medicală, care nu poate fi mai mare de 90 de zile calendaristice. Decizia de aprobare pentru procurarea dispozitivelor de protezare stomii şi incontinenţă urinară este însoţită de o anexă cu 3 taloane lunare, corespunzător lunilor aferente perioadei prevăzute în prescripţia medicală, conform modelului prezentat în anexa nr. 35 A la ordin.

(6) În cazul protezelor pentru membrul inferior, casele de asigurări de sănătate pentru un singur dispozitiv medical emit decizii distincte pentru acelaşi tip de proteză pentru ambele etape de protezare (proteza provizorie şi proteza definitivă). Decizia pentru proteza definitivă, se emite, la solicitarea asiguratului, după minimum 3 luni de la data la care acesta a beneficiat de proteza provizorie.

(7) În cazul fotoliilor rulante, acestea se vor acorda asiguraţilor pe o perioadă nedeterminată sau determinată - prin închiriere iar aparatele pentru administrare continuă cu oxigen se vor acorda pe o perioadă determinată prin închiriere, pe baza deciziilor de aprobare pentru procurarea/închirierea dispozitivelor medicale. Perioada de închiriere nu poate depăşi data la care încetează valabilitatea contractelor de furnizare de dispozitive medicale încheiate între casa de asigurări de sănătate şi furnizori. La încheierea contractelor, pentru dispozitivele medicale ce se acordă pentru o perioadă determinată, furnizorii prezintă lista cuprinzând tipurile de dispozitive şi numărul acestora pe fiecare tip.

(8) Decizia de aprobare pentru închirierea fotoliilor rulante şi aparatelor pentru administrarea continuă cu oxigen este valabilă pentru perioada prevăzută în prescripţia medicală care nu poate fi mai mare de 90 de zile calendaristice. Decizia de aprobare pentru închirierea fotoliilor rulante şi aparatelor pentru administrarea continuă cu oxigen este însoţită de o anexă cu 3 taloane lunare, corespunzător lunilor aferente perioadei prevăzute în prescripţia medicală, conform modelului prezentat în anexa nr. 35 B la ordin.

(9) Termenul de valabilitate al deciziei de aprobare pentru procurarea dispozitivului medical este de 30 de zile calendaristice de la data emiterii acesteia de către casa de

asigurări de sănătate, cu excepţia situaţiilor prevăzute la alin. (5) şi (8). În cazul dispozitivului efectuat la comandă, furnizorul de dispozitive medicale înştiinţează casa de asigurări de sănătate despre primirea deciziilor de aprobare a acestor dispozitive medicale, în termen de maximum 10 zile lucrătoare de la data primirii acestora.

ART. 4 (1) Pentru procurarea dispozitivului medical, asiguratul, în cazul dispozitivelor la comandă (inclusiv pentru protezele auditive), sau, în cazul dispozitivelor medicale care nu sunt la comandă, asiguratul sau unul dintre membrii familiei (părinte, soţ/soţie, fiu/fiică), o persoană împuternicită legal în acest sens de către asigurat sau reprezentantul legal al asiguratului se adresează, în perioada de valabilitate a deciziei, unuia dintre furnizorii din lista furnizorilor de dispozitive medicale evaluaţi, cu care casa de asigurări de sănătate a încheiat contract, cu următoarele documente: decizia emisă de casa de asigurări de sănătate şi prescripţia medicală.

Împuternicitul legal al asiguratului nu poate fi reprezentant legal, asociat, administrator, angajat sau persoană care îşi desfăşoară activitatea într-o formă legală de exercitare a profesiei la furnizorul de dispozitive medicale ori la furnizorul de servicii medicale la care îşi desfăşoară activitatea medicul prescriptor.

(2) Pentru pacienţii cu stome permanente care în cursul anului calendaristic, după expirarea termenului de valabilitate a unei decizii, doresc să se adreseze altui furnizor de dispozitive pentru protezare stomii decât cel la care au depus prescripţia medicală cu menţiunea "stomă permanentă", este necesară obţinerea unei alte prescripţii medicale cu menţiunea "stomă permanentă" care să însoţească decizia emisă de casa de asigurări de sănătate.

(3) În cazul dispozitivelor de protezare stomii, incontinenţă urinară, fotolii rulante şi aparate pentru administrare continuă cu oxigen, decizia va fi însoţită de talonul aferent lunii respective, urmând ca lunar să predea aceluiaşi furnizor şi celelalte taloane.

ART. 5 Lista dispozitivelor medicale destinate recuperării deficienţelor organice sau funcţionale în ambulatoriu, prevăzută în anexa nr. 32 la ordin, conform pachetului de servicii de bază, cuprinde termenele de înlocuire ale dispozitivelor medicale. Termenul de înlocuire începe să curgă din momentul în care asiguratul a beneficiat de dispozitivul medical.

ART. 6 (1) Decontarea dispozitivelor medicale care se acordă pe o perioadă nedeterminată se face de către casele de asigurări de sănătate, la nivelul preţului de referinţă valabil în momentul emiterii deciziei de aprobare pentru procurarea dispozitivului medical, pe baza facturilor emise de furnizorii cu care au încheiat contracte de furnizare de dispozitive medicale.

(2) Decontarea dispozitivelor medicale care se acordă pe o perioadă determinată se face de către casele de asigurări de sănătate, la nivelul sumei de închiriere valabilă în momentul emiterii deciziei de aprobare pentru închirierea dispozitivului medical, pe baza facturilor emise de furnizorii cu care au încheiat contracte de furnizare de dispozitive medicale.

(3) Furnizorul emite, în vederea decontării, factura însoţită de: copia certificatului de garanţie, declaraţia privind dispozitivele cu scopuri speciale pentru dispozitivele fabricate la comandă, după caz, conform prevederilor legale în vigoare, confirmarea primirii dispozitivului medical sub semnătura beneficiarului sau a aparţinătorului acestuia (membru al familiei – părinte, soţ/soţie, fiu, fiică, împuternicit legal), cu specificarea domiciliului, a actului de identitate şi a codului numeric personal - CNP sau a documentelor ce confirmă expedierea prin poştă, curierat, transport propriu sau închiriat şi primirea la domiciliu. Furnizorii de proteze auditive vor ataşa audiogramele efectuate atât înainte, cât şi după protezarea auditivă. Audiogramele conţin numele şi prenumele asiguratului, CNP-ul acestuia, data şi locul efectuării, dovada calibrării / etalonării anuale a audiometrelor utilizate. Furnizorii de dispozitive de protezare stomii, incontinenţă urinară,

fotolii rulante - care se acordă pe o perioadă determinată, şi de aparate pentru administrare continuă cu oxigen vor ataşa şi talonul lunar. În cazul închirierii unor dispozitive medicale care au fost utilizate, furnizorii de fotolii rulante şi aparate pentru administrare continuă cu oxigen vor ataşa la prima facturare, după închirierea dispozitivului medical, şi dovada verificării tehnice.

(4) Decontarea în cazul protezărilor pentru membrul superior şi/sau inferior se face după depunerea de către asigurat, unul din membrii familiei (părinte, soţ/soţie, fiu/fiică), o persoană împuternicită de acesta sau reprezentantul legal al asiguratului, a documentului prin care eficacitatea actului de protezare este validată (confirmată) de medicul de specialitate. În cazul în care asiguratul, unul din membrii familiei (părinte, soţ/soţie, fiu/fiică), o persoană împuternicită de acesta sau reprezentantul legal al asiguratului, nu se prezintă la casa de asigurări de sănătate cu acest document în termen de 15 zile lucrătoare de la ridicarea dispozitivului medical, casa de asigurări de sănătate va valida (va confirma) din oficiu protezarea respectivă.

(5) În cazul protezelor pentru membrul inferior, decontarea se face pentru acelaşi furnizor, cumulat pentru ambele etape de protezare, până la nivelul de 125% al preţului de referinţă al protezei. Pentru proteza provizorie valoarea decontată va fi până la nivelul preţului de referinţă valabil în momentul emiterii deciziei de procurare, iar valoarea decontată pentru proteza definitivă reprezintă valoarea rămasă până la nivelul de 125% al preţului de referinţă al protezei respective valabil în momentul emiterii deciziei de procurare a protezei definitive.

(6) Decontarea, în cazul protezelor auditive, se face după depunerea de către asigurat, unul din membrii familiei (părinte, soţ/soţie, fiu/fiică), o persoană împuternicită de acesta sau reprezentantul legal al asiguratului, a unui document de validare întocmit de către un medic de specialitate otorinolaringologie, pe baza raportului probei de protezare. Raportul probei de protezare cuprinde rezultatele testelor audiometriei protetice, realizate prin diferite metode (audiometrie tonală şi vocală în câmp liber etc.), efectuate înainte şi după protezare. În cazul în care asiguratul, unul din membrii familiei (părinte, soţ/soţie, fiu/fiică), o persoană împuternicită de acesta sau reprezentantul legal al asiguratului, nu se prezintă la casa de asigurări de sănătate cu acest document în termen de 15 zile lucrătoare de la ridicarea dispozitivului medical, casa de asigurări de sănătate va valida (va confirma) din oficiu protezarea respectivă.

ART. 7 Pe toată perioada de închiriere a dispozitivului medical, furnizorul, care rămâne proprietarul dispozitivului medical, va monitoriza utilizarea acestuia, având obligaţia ca în cazul recuperării dispozitivului după încetarea perioadei de închiriere la termen/înainte de termen să anunţe în termen de 15 zile lucrătoare casa de asigurări de sănătate cu care a încheiat contract.

ART. 8 (1) Certificatul de garanţie predat de către furnizor asiguratului trebuie să precizeze: elementele de identificare a dispozitivului medical (numele producătorului, numele reprezentantului autorizat al producătorului sau numele distribuitorului, după caz; tipul; numărul lotului precedat de cuvântul "lot" sau nr. de serie, după caz); data fabricaţiei şi, după caz, data expirării; termenul de garanţie.

(2) În cadrul termenului de garanţie asiguraţii pot sesiza furnizorul în legătură cu eventualele deficienţe ale dispozitivului medical care conduc la lipsa de conformitate a acestuia, dacă aceasta nu s-a produs din vina utilizatorului. În acest caz repararea sau înlocuirea dispozitivului medical cu altul corespunzător va fi asigurată şi suportată de către furnizor.

ANEXA 2

MODALITĂŢILE DE PLATĂ
în asistenţa medicală primară pentru furnizarea de servicii medicale prevăzute în pachetele de servicii medicale

ART. 1 (1) Modalităţile de plată în asistenţa medicală primară sunt: plata "per capita" prin tarif pe persoană asigurată, conform listei proprii de persoane înscrise asigurate şi plata prin tarif pe serviciu medical pentru unele servicii medicale prevăzute Anexa nr. 1 la ordin, precum şi pentru serviciile medicale acordate pacienţilor din statele membre ale Uniunii Europene/Spaţiului Economic European, titulari ai cardului european de asigurări sociale de sănătate, în perioada de valabilitate a cardului, respectiv beneficiari ai formularelor europene emise în baza Regulamentului CE nr. 883 al Parlamentului European şi al Consiliului din 29 aprilie 2004 privind coordonarea sistemelor de securitate socială, respectiv în baza Regulamentului CEE nr. 1408/1971 referitor la aplicarea regimurilor de securitate socială salariaţilor, lucrătorilor independenţi şi membrilor familiilor acestora care se deplasează în interiorul comunităţii, după caz precum şi din alte state cu care România a încheiat acorduri, înţelegeri, convenţii sau protocoale internaţionale cu prevederi în domeniul sănătăţii .

(2) Suma cuvenită prin plata "per capita" pentru serviciile menţionate la lit. e) se calculează prin înmulţirea numărului de puncte rezultat în raport cu numărul şi structura pe grupe de vârstă a persoanelor asigurate înscrise în lista medicului de familie, conform lit. a), b) sau c), ajustat în funcţie de condiţiile prevăzute la lit. d), cu valoarea stabilită pentru un punct.

a) Numărul de puncte acordat în raport cu numărul şi structura pe grupe de vârstă a persoanelor înscrise asigurate se stabileşte astfel:

1. numărul de puncte, acordat pe o persoană asigurată înscrisă în listă, în raport cu vârsta persoanei asigurate înscrise:

Grupa de vârstă	0 - 3 ani	4 - 59 ani	60 ani şi peste
Număr de puncte/ persoană/an	11,2	7,2	11,2

NOTA 1*): Încadrarea persoanei asigurate, respectiv trecerea dintr-o grupă de vârstă în alta, se realizează la împlinirea vârstei (ex: copil cu vârsta de 4 ani împliniţi se încadrează în grupa 4 - 59 ani).

NOTA 2*): În situaţia în care în lista medicului de familie sunt înscrise persoane instituţionalizate (copii încredinţaţi sau daţi în plasament unui serviciu public specializat ori unui organism privat autorizat, persoane din centre de îngrijire şi asistenţă) potrivit legii, numărul de puncte aferent acestora se majorează cu 5% faţă de punctajul acordat grupei de vârstă în care se încadrează.

În acest sens, medicii de familie ataşează la fişa medicală actele doveditoare care atestă calitatea de copil încredinţat sau dat în plasament şi de persoană instituţionalizată;

NOTA 3*): Pentru persoanele încadrate ca şi persoane pensionate pentru cazuri de invaliditate, numărul de puncte aferent acestora este cel corespunzător grupei de vârstă "60 ani şi peste".

2. La calculul numărului lunar de puncte "per capita", conform art. 1 alin. (2), se iau în considerare persoanele asigurate înscrise în lista medicului de familie, existente în ultima zi a lunii precedente; În situaţia contractelor nou încheiate, pentru prima lună de contract la calculul numărului de puncte per capita se iau în considerare persoanele asigurate înscrise în lista medicului de familie prezentată la contractare.

3. Numărul optim de persoane înscrise pe lista medicului de familie, din punct de vedere al asigurării unor servicii de calitate la nivelul asistenţei medicale primare, care se ia în calcul pentru stabilirea necesarului de medici pe unitate administrativ-teritorială/zonă, este de 1.800.

4. Numărul maxim de persoane asigurate înscrise pe lista medicului de familie pentru care se acorda punctaj per capita în vederea decontării prin tarif pe persoana asigurată este de 2.200.

Excepţie fac situaţiile în care medicul cu listă proprie desfăşoară activitate într-o localitate în care numărul de medici este mai mic decât cel stabilit de comisia constituită conform art. 23 alin. (3) din Contractul-cadru privind condiţiile acordării asistenţei medicale în cadrul sistemului de asigurări de sănătate pentru anii 2011 – 2012, aprobat prin H.G. nr.1389/2010, cu modificările şi completările ulterioare.

În situaţia în care numărul persoanelor înscrise pe lista proprie a medicului de familie este mai mare de 2.200, programul de 35 de ore pe săptămână se poate prelungi sau se poate modifica, în sensul schimbării raportului prevăzut la alin. (3) lit. b), cu asigurarea minimului de consultaţii la domiciliu necesare conform prevederilor cuprinse în nota 2 a lit. E din cap. III din Anexa nr. 1 la ordin.

În cazul prelungirii programului de lucru, pentru o listă cuprinsă între 2.200 şi 3.000 de persoane înscrise, programul se majorează cu 1 oră, iar pentru o listă de înscrişi mai mare de 3.000 programul se majorează cu 2 ore.

6. În situaţia în care numărul de persoane asigurate înscrise pe lista medicului de familie depăşeşte 2.200, plata per capita se realizează după cum urmează:

6.1 numărul total de puncte rezultat în raport cu numărul de persoane asigurate din listă şi structura pe grupe de vârstă se înmulţeşte cu raportul dintre 2.200 şi numărul de asiguraţi de pe listă, astfel:

$$\text{Nr. puncte de decontat} = \text{număr de puncte realizate} \times \frac{2.200}{\text{Număr persoane asigurate înscrise}}$$

6.2 pentru cabinetele medicale individuale care au angajat unul sau mai mulţi medici, în condiţiile în care totalul persoanelor asigurate înscrise pe listă este mai mic sau egal cu 4.000, numărul total de puncte se calculează după cum urmează:

$$\text{Nr. puncte de decontat} = \text{număr de puncte realizate} \times \frac{2.200}{\text{Număr persoane asigurate înscrise}}$$

la care se adaugă suplimentar un număr de puncte care se calculează astfel:

$$\text{Nr. puncte de decontat} = \text{număr de puncte realizate} \times \frac{(\text{număr înscrişi} - 2.200)}{\text{Număr persoane asigurate înscrise}} \times 0,5$$

6.3 pentru cabinetele medicale individuale care au angajat unul sau mai mulţi medici, în condiţiile în care totalul persoanelor asigurate înscrise pe listă depăşeşte 4.000, numărul total de puncte se calculează după cum urmează:

$$\text{Nr. puncte de decontat} = \text{număr de puncte realizate} \times \frac{2.200}{\text{Număr persoane asigurate înscrise}}$$

la care se adaugă suplimentar un număr de puncte care se calculează astfel:

$$\text{Nr. puncte de decontat} = \text{număr de puncte realizate} \times \frac{(4.000 - 2.200)}{\text{Număr persoane asigurate înscrise}} \times 0,5$$

6.4 În situaţia în care cabinetul medical se află într-o unitate administrativ-teritorială / zonă cu deficit din punct de vedere al prezenţei medicului de familie, stabilită de comisia

prevăzută la art. 23 alin. (3) din Contractul-cadru privind condiţiile acordării asistenţei medicale în cadrul sistemului de asigurări sociale de sănătate pentru anii 2011 - 2012 aprobat prin H.G. nr. 1389/2010, cu modificările şi completările ulterioare, numărul total de puncte se calculează după cum urmează:

$$\text{Nr. puncte de decontat} = \text{număr de puncte realizate} \times \frac{2.200}{\text{Număr persoane asigurate înscrise}}$$

la care se adaugă suplimentar un număr de puncte care se calculează astfel:

$$\text{Nr. puncte de decontat} = \text{număr de puncte realizate} \times \frac{(\text{număr înscriși} - 2.200)}{\text{Număr persoane asigurate înscrise}} \times 0,5$$

Pentru cabinetele medicale din mediul rural din aria Rezervaţiei biosferei Delta Dunării, se aplică un procent de majorare de 100%, indiferent de punctajul obţinut potrivit Ordinului nr. 163/93/2008.

Pentru cabinetele medicale care au punct/puncte de lucru şi un spor de zonă diferit pentru localitatea unde se află cabinetul şi pentru localitatea/localităţile unde se află punctul/punctele de lucru, numărul total de puncte rezultat potrivit lit. a), lit. b) sau lit. c) va fi împărţit proporţional cu programul de lucru - exprimat în ore desfăşurat la cabinet, respectiv la punctul/punctele de lucru, stabilit în conformitate cu prevederile art. 1 alin. b) suma pentru cheltuielile de administrare şi funcţionare a cabinetului medical, inclusiv pentru cheltuielile de personal aferente personalului angajat, cheltuielile cu medicamentele şi materialele sanitare pentru trusa de urgenţă, egală cu venitul medicului respectiv stabilit potrivit lit. a) înmulţit cu 1,5.

ART. 8 Pentru calculul trimestrial al valorii definitive a unui punct pe serviciu, fondul anual aferent asistenţei medicale primare se defalchează pe trimestre.

ART. 9 (1) Valoarea punctului "per capita", unică pe ţară, este în valoare de 3 lei, valabilă pentru luna iunie şi trimestrul III 2011. Pentru trimestrul IV 2011 valoarea punctului „per capita” va fi prevăzută în norme şi se calculează în funcţie de fondurile aprobate cu această destinaţie care să asigure valoarea punctului „per capita” din trimestrul III 2011.

(2) Valoarea minimă garantată a unui punct pentru plata pe serviciu medical este unică pe ţară, pentru luna iunie şi trimestrul III 2011 este în valoare de 1,8 lei; pentru trimestrul IV 2011, valoarea minimă garantată a unui punct pentru plata pe serviciu medical va fi prevăzută în norme şi se calculează în funcţie de fondurile aprobate cu această destinaţie care să asigure valoarea minimă garantată din trimestrul III 2011.

(3) Valoarea definitivă a unui punct pentru plata pe serviciu medical se stabileşte trimestrial, până la data de 25 a lunii următoare încheierii fiecărui trimestru, ca raport între fondul aferent trimestrului respectiv pentru plata pe serviciu a medicilor de familie şi numărul de puncte pe serviciu medical efectiv realizate cu respectarea condiţiilor prevăzute la art. 1 alin. (3), şi reprezintă valoarea definitivă a unui punct pe serviciu, unică pe ţară pentru trimestrul respectiv.

Valoarea definitivă a unui punct pentru plata pe serviciu nu poate fi mai mică decât valoarea minimă garantată a unui punct pentru plata pe serviciu.

(4) Fondul trimestrial luat în calcul la stabilirea valorii definitive a unui punct per serviciu medical se determină astfel:

Fondul aferent asistenţei medicale primare pentru trimestrul respectiv, din care se scade suma pentru plata per capita precum şi venitul cabinetelor medicale în care îşi desfăşoară activitatea medicii de familie nou-veniţi într-o localitate, pentru o perioadă de maximum 3 luni, perioadă pentru care medicul de familie are încheiată o convenţie de furnizare de servicii medicale cu casa de asigurări de sănătate.

ART. 10 (1) Suma cuvenită lunar medicilor de familie se calculează prin totalizarea sumelor rezultate ca urmare a înmulţirii numărului de puncte "per capita" efectiv realizate şi a numărului de puncte pe serviciu efectiv realizate cu valoarea pentru un punct "per capita", respectiv cu valoarea minimă garantată pentru un punct pe serviciu medical.

(2) Suma cuvenită medicilor de familie pentru un trimestru se calculează prin totalizarea sumelor rezultate prin înmulţirea numărului de puncte "per capita" şi a numărului de puncte pe serviciu medical efectiv realizate în trimestrul respectiv cu valoarea punctului "per capita", respectiv cu valoarea definitivă a punctului pe serviciu medical.

Nerespectarea termenului de raportare atrage după sine nedecontarea la termenele

stabilite a sumelor cuvenite pentru activitatea desfăşurată de medicul respectiv pentru perioada aferentă.

ART. 12 Persoanele înscrise care doresc să îşi schimbe medicul de familie vor adresa o cerere de transfer, al cărei model este prevăzut în Anexa nr. 2 A, medicului de familie la care doresc să se înscrie, precizând numele medicului de la care pleacă. Medicul de familie primitor are obligaţia să anunţe în scris (prin poştă), în maximum 15 zile lucrătoare, medicul de familie de la care a plecat persoana, precum şi casa de asigurări de sănătate. Medicul de familie de la care pleacă persoana are obligaţia să transmită fişa medicală (originalul), prin poştă, medicului primitor, în termen de 15 zile lucrătoare de la solicitare. (2) Erorile de calcul constatate după expirarea unui trimestru se corectează până la sfârşitul anului, astfel: suma corespunzătoare numărului de puncte plătit eronat, în plus sau în minus faţă de cel efectiv realizat, într-un trimestru anterior, se calculează în trimestrul în care s-a constatat eroarea, la valoarea punctului "per capita" şi la valoarea definitivă a punctului pe serviciu, stabilită pentru trimestrul în care s-a produs eroarea, sumele respective afectând fondul pentru calculul valorii definitive a punctului pentru trimestrul în care s-a constatat eroarea şi implicit valoarea definitivă a punctului pentru trimestrul respectiv. În situaţia în care după încheierea anului financiar precedent se constată erori de calcul aferente acestuia, sumele plătite în plus sau în minus se regularizează conform legii.

(3) Eventualele erori de validare se regularizează trimestrial la nivelul caselor de asigurări de sănătate.

ART. 14 Casele de asigurări de sănătate şi direcţiile de sănătate publică au obligaţia de a organiza trimestrial şi ori de câte ori este nevoie, întâlniri cu medicii de familie pentru a analiza aspecte privind calitatea furnizării serviciilor medicale în asistenţa medicală primară, precum şi respectarea prevederilor actelor normative în vigoare. Acestea vor informa asupra modificărilor apărute în actele normative şi vor stabili împreună cu medicii de familie măsurile ce se impun pentru îmbunătăţirea activităţii. Neparticiparea medicilor de familie la aceste întâlniri nu îi exonerează de răspunderea nerespectării hotărârilor luate cu acest prilej.

ART. 15 (1) În aplicarea art. 39 alin. (1) din Contractul-cadru privind condiţiile acordării asistenţei medicale în cadrul sistemului de asigurări sociale de sănătate pentru anii 2011 - 2012, aprobat prin Hotărârea Guvernului nr. 1389/2010, cu modificările şi completările ulterioare, prin nerespectarea programului de lucru stabilit se înţelege absenţa nemotivată de la programul de lucru afişat pentru activitatea desfăşurată în cabinetul medical.

(2) Absenţa motivată se ia în considerare pentru situaţiile prevăzute la art. 3 alin. (2), precum şi pentru următoarele situaţii: citaţii de la instanţele judecătoreşti sau alte organe care au dreptul, potrivit legii, de a solicita prezenţa la instituţiile respective, cu condiţia numirii unui înlocuitor pe bază de convenţie de reciprocitate sau convenţie de înlocuire, ale cărui număr de telefon şi adresă vor fi afişate la cabinetul medical, precum și în cazul participării la manifestări organizate pentru obținerea de credite EMC, în scopul realizării punctajului necesar acreditării de către CMR. Pentru aceste situaţii medicii de familie trebuie să depună la casa de asigurări de sănătate copia documentelor justificative. În cazul în care medicul titular al unui cabinet medical individual are angajat medic/medici de familie, pentru perioadele de absenţă prevăzute anterior poate fi înlocuit de medicul/medicii de familie angajat/angajaţi.

Numărul de investigaţii paraclinice contractat este orientativ, cu obligaţia încadrării în valoarea contractată.

Efectuarea serviciilor medicale paraclinice se desfăşoară în cadrul unui program suplimentar, stabilit în afara programului de lucru contractat pentru serviciile medicale din asistenţa medicală primară.

Art. 17 (1) Modificările ce pot interveni în activitatea unui cabinet medical din mediul urban, indiferent de forma de organizare a furnizorului, ca urmare a înfiinţării unui punct de lucru rezultat prin preluarea unui praxis nu pot face obiectul contractului încheiat cu casa de asigurări de sănătate.

Consultaţia medicală de specialitate se acordă pe baza biletului de trimitere de la medicul de familie sau de la alt medic de specialitate numai pentru cazurile în care asiguratul a avut biletul de trimitere iniţial eliberat de medicul de familie şi numai în condiţiile în care medicul trimiţător se află în relaţie contractuală (contract sau convenţie) cu casa de asigurări de sănătate. Fac excepţie de la prevederile anterioare cazurile de urgenţă medico-chirurgicală şi consultaţiile pentru afecţiunile confirmate prevăzute în anexa nr. 9 la ordin, respectiv cele din anexa nr. 39 A, serviciile de medicină dentară, precum şi serviciile de acupunctura, homeopatie, fitoterapie şi planificare familială care permit prezentarea direct la medicul de specialitate din ambulatoriu. Prezentarea pacientului la medicul de specialitate la solicitarea acestuia, pentru a doua şi a treia consultaţie în vederea stabilirii diagnosticului şi/sau tratamentului, se face direct, fără alt bilet de trimitere.

Biletul de trimitere este formular cu regim special, unic pe ţară, care se întocmeşte în trei exemplare. Un exemplar rămâne la medicul care a făcut trimiterea şi două exemplare sunt înmânate asiguratului, care le depune la furnizorul de servicii medicale clinice. Furnizorul de servicii medicale clinice păstrează un exemplar şi depune la casa de asigurări de sănătate celălalt exemplar cu ocazia raportării lunare a activităţii.

(2) Numărul total de puncte realizat în fiecare lună se majorează în raport cu:

a) condiţiile în care se desfăşoară activitatea - majorarea este cu până la 100%, pe baza criteriilor aprobate prin Ordin al ministrului sănătăţii publice şi al preşedintelui Casei Naţionale de Asigurări de Sănătate în vigoare.

Lista cuprinzând cabinetele medicale din asistenţa medicală ambulatorie de specialitate la care se aplică majorările de mai sus şi procentul de majorare corespunzător se stabilesc anual conform prevederilor Ordinului ministrului sănătăţii şi al preşedintelui Casei Naţionale de Asigurări de Sănătate mai sus menţionat;

b) gradul profesional, pentru care valoarea de referinţă a prestaţiei medicale este cea a medicului specialist. Pentru prestaţia medicului primar, numărul total de puncte se majorează cu 20%. Această majorare nu se aplică medicilor care lucrează exclusiv în: fitoterapie şi homeopatie, planificare familială, precum şi furnizorilor de servicii conexe actului medical. Recalcularea numărului total de puncte se face din luna următoare lunii în care s-a depus la casa de asigurări de sănătate dovada confirmării gradului profesional.

(3) Valoarea minimă garantată pentru un punct pe serviciu medical este unică pe ţară şi este în valoare de 1,2 lei.

(4) Valoarea unui punct pe serviciu medical se regularizează trimestrial, până la data de 25 a lunii următoare încheierii fiecărui trimestru, în funcţie de fondul aferent trimestrului respectiv destinat pentru plata medicilor de specialitate din specialităţile clinice pentru care plata se face prin tarif pe serviciu medical exprimat în puncte şi de numărul de puncte realizat în trimestrul respectiv, şi reprezintă valoarea definitivă a unui punct pe serviciu medical, unică pe ţară pentru trimestrul respectiv. Valoarea definitivă a unui punct pe serviciu medical nu poate fi mai mică decât valoarea minimă garantată a unui punct pe serviciu.

(5) Fondul aferent asistenţei medicale ambulatorii de specialitate pentru specialităţile clinice se defalchează pe trimestre.

ART. 5 (1) Erorile de calcul constatate în cadrul unui trimestru se corectează la sfârşitul trimestrului, odată cu recalcularea drepturilor băneşti cuvenite medicilor de specialitate din specialităţile clinice.

(2) Erorile de calcul constatate după expirarea unui trimestru, în cazul specialităţilor clinice, se corectează până la sfârşitul anului, astfel: suma corespunzătoare numărului de puncte plătit eronat în plus sau în minus faţă de cel efectiv realizat, într-un trimestru anterior, se calculează în trimestrul în care s-a constatat eroarea, la valoarea definitivă a punctului, stabilită pentru trimestrul în care s-a produs eroarea, sumele respective afectând fondul pentru calculul valorii definitive a punctului pentru trimestrul în care s-a constatat eroarea şi implicit valoarea definitivă a punctului pentru trimestrul respectiv.

(3) În situaţia în care după încheierea anului financiar precedent se constată erori de calcul aferente acestuia, sumele plătite în plus sau în minus se regularizează conform legii.

(4) Pentru asigurarea calităţii furnizării serviciilor medicale, pentru asiguraţii care prezintă unul sau mai multe diagnostice confirmate, prevăzute în anexa nr. 9 la ordin, controalele periodice vor fi decontate de casele de asigurări de sănătate, în condiţiile în care acestea vor fi efectuate, raportate şi validate conform reglementărilor legale în vigoare. Excepţie fac situaţiile în care asiguratul solicită în nume propriu şi în scris, efectuarea controalelor periodice la un alt furnizor.

ART. 6 (1) La stabilirea sumei contractate de către :

- un furnizor de servicii medicale paraclinice (de analize medicale de laborator, de investigaţii medicale paraclinice de radiologie-imagistică medicală, de investigaţii medicale paraclinice - explorări funcţionale),
- un furnizor de servicii medicale clinice (prin act adiţional la contractul de furnizare de servicii medicale clinice sau prin act adiţional la contractul de furnizare de servicii medicale spitaliceşti),
- medicii de familie (prin act adiţional la contractul de furnizare de servicii medicale în asistenţa medicală primară)
- un furnizor de servicii de medicină dentară (prin act adiţional la contractul de furnizare de servicii medicale de medicină dentară) cu casa de asigurări de sănătate,

se au în vedere:

a) numărul de investigaţii paraclinice;

b) tarifele negociate;

Numărul de investigaţii paraclinice negociat între furnizorii de investigaţii medicale paraclinice, furnizorii de servicii medicale clinice (numai pentru ecografii şi monitorizarea şi managementul hemodinamic prin metoda bioimpedanţei toracice), medicii de familie (numai pentru ecografie generală - abdomen şi pelvis), furnizorii de servicii de medicină dentară (numai pentru radiografia dentară retroalveolară şi panoramică) şi casele de asigurări de sănătate se stabileşte în limita numărului de investigaţii paraclinice necesar

pe total judeţ, determinat de comisia constituită conform art. 44 alin. (5) din Contractul-cadru pentru anii 2011 – 2012 aprobat prin H.G. nr. 1389/2010, cu modificările şi completările ulterioare, cu încadrarea în 90% din suma prevăzută cu această destinaţie.

La stabilirea sumelor contractate cu furnizorii de analize medicale de laborator, respectiv cu furnizorii de investigaţii medicale paraclinice de radiologie-imagistică medicală, casele de asigurări de sănătate vor avea în vedere criteriile prevăzute în anexa nr. 10, respectiv în anexa nr. 11 la ordin.

La stabilirea sumelor contractate cu furnizorii de servicii medicale paraclinice - explorări funcţionale, casele de asigurări de sănătate vor avea în vedere diversitatea serviciilor medicale paraclinice propuse pentru contractare reflectată în tipul de aparate aflate în dotare.

Sumele contractate de casele de asigurări de sănătate cu furnizorii de servicii medicale paraclinice se defalchează pe trimestre şi pe luni.

(2) Numărul investigaţiilor paraclinice negociat este orientativ, existând obligaţia încadrării în valoarea lunară a contractului/actului adiţional. Pentru situaţiile justificate ce pot apărea în derularea contractelor încheiate cu furnizorii de servicii medicale paraclinice, casele de asigurări de sănătate analizează aceste situaţii şi cu avizul Casei Naţionale de Asigurări de Sănătate, la solicitarea acestora, vor încheia cu furnizorii de servicii medicale paraclinice un act adiţional de suplimentare a valorii contractate, utilizând diferenţa de 10% din suma prevăzută pentru serviciile medicale paraclinice care nu a fost contractată, în limita fondului aprobat cu această destinaţie.

(3) Lunar, casele de asigurări de sănătate decontează furnizorilor de servicii medicale paraclinice serviciile furnizate cu obligaţia încadrării în limita valorii lunare de contract.

În situaţia în care la unii furnizori de servicii medicale paraclinice se înregistrează la sfârşitul unei luni sume neconsumate faţă de suma lunară prevăzută în contract/act adiţional, casele de asigurări de sănătate vor diminua printr-un act adiţional la contract/act adiţional valoarea lunară contractată iniţial aferentă lunii respective cu sumele neconsumate.

Sumele rezultate din economii vor fi contractate printr-un act adiţional cu furnizorii de servicii medicale paraclinice care în aceeaşi lună şi-au epuizat valoarea de contract.

Suma din actul adiţional se utilizează pentru decontarea serviciilor medicale paraclinice acordate asiguraţilor de la data semnării actului adiţional şi se repartizează proporţional în funcţie de consumul mediu lunar stabilit pentru fiecare furnizor de la începutul anului până la sfârşitul lunii pentru care se face regularizarea şi în raport cu valoarea de contract aferentă lunii în care se face regularizarea.

Sumele rezultate din economii de la investigaţiile medicale paraclinice - analize medicale de laborator, de la investigaţiile medicale paraclinice de radiologie şi imagistică medicală într-o lună şi de la investigaţiile medicale paraclinice - explorări funcţionale într-o lună - se redistribuie furnizorilor care în aceeaşi lună şi-au epuizat valoarea de contract.

(4) Furnizorii de servicii medicale paraclinice vor efectua direct toate tipurile de investigaţii paraclinice contractate cu casele de asigurări de sănătate şi nu vor încheia subcontracte cu alţi furnizori de servicii medicale paraclinice pentru efectuarea unor anumite tipuri de investigaţii paraclinice.

(5) Fondurile suplimentare aprobate pentru anul 2011 cu destinaţia servicii medicale paraclinice se contractează de casele de asigurări de sănătate prin încheiere de contracte, respectiv acte adiţionale la contractele/actele adiţionale iniţiale şi vor fi utilizate pentru decontarea serviciilor medicale paraclinice acordate asiguraţilor de la data semnării acestora. Valoarea contractului, respectiv a actului adiţional la contractul/actul adiţional iniţial se stabileşte avându-se în vedere criteriile de selecţie şi contractare prevăzute în norme, precum şi reevaluarea punctajului furnizorilor, în situaţia în care unul sau mai

multe elemente care au stat la baza stabilirii punctajului iniţial al acestora s-a/s-au modificat.

(6) În situaţii justificate furnizorii de servicii medicale paraclinice - analize medicale de laborator, investigaţii medicale paraclinice de radiologie şi imagistică medicală, precum şi servicii medicale paraclinice - explorări funcţionale - pot efectua servicii medicale paraclinice peste valoarea lunară de contract/act adiţional în limita a maxim 5%, cu condiţia ca această depăşire să influenţeze corespunzător, în sensul diminuării valorii de contract/act adiţional a lunii următoare, cu încadrarea în valoarea contractată pentru trimestrul respectiv.

(7) În situaţia în care unul sau mai multe elemente care au stat la baza stabilirii punctajului pentru fiecare furnizor de servicii medicale paraclinice, conform prevederilor din anexele nr. 10 şi 11 la ordin se modifică în sensul diminuării faţă de condiţiile iniţiale şi furnizorii aduc la cunoştinţa caselor de asigurări de sănătate aceste situaţii, în termen de maxim 15 zile lucrătoare de la data de la care survine modificarea, suma stabilită iniţial se diminuează corespunzător, prin încheierea unui act adiţional la contract. Sumele obţinute ca disponibil din aceste diminuări la nivelul caselor de asigurări de sănătate se vor folosi la reîntregirea sumelor alocate cu destinaţie iniţială.

Neanunţarea acestor situaţii şi constatarea ulterior producerii lor duc la aplicarea prevederilor privind nerespectarea obligaţiilor contractuale din contractul de furnizare de investigaţii paraclinice şi conduce la rezilierea contractului.

(8) În situaţia în care, în structura unui furnizor de servicii medicale paraclinice, există laborator/punct de lucru organizat ca urmare a procedurii de externalizare, casa de asigurări de sănătate încheie pentru acestea un act adiţional la contractul de furnizare de servicii paraclinice încheiat cu furnizorul respectiv. Actul adiţional se adaptează după modelul contractului de furnizare de servicii medicale paraclinice.

ART. 7 (1) Casele de asigurări de sănătate decontează furnizorilor de servicii medicale paraclinice cu care sunt în relaţii contractuale contravaloarea serviciilor medicale paraclinice prezentate în anexa nr. 7 la ordin. Tarifele decontate de casele de asigurări de sănătate sunt cele rezultate din reducerea tarifelor maximale cu procentul de diminuare cel mai mare ofertat de către furnizori şi nu pot fi mai mari decât tarifele maximale prevăzute în anexa nr. 7 la ordin.

Prezentarea, susţinerea şi negocierea ofertelor privind procentul de diminuare a tarifelor pentru investigaţii paraclinice se face în şedinţă deschisă, în prezenţa reprezentanţilor casei de asigurări de sănătate şi a tuturor reprezentanţilor legali ai furnizorilor care doresc să încheie contract de furnizare de servicii medicale paraclinice.

(2) Casele de asigurări de sănătate decontează ecografii furnizorilor de servicii medicale clinice inclusiv recuperare, medicină fizică şi balneologie, respectiv furnizorilor de servicii medicale clinice de cardiologie şi de medicină internă serviciul "monitorizarea şi managementul hemodinamic prin metoda bioimpedanţei toracice" cuprinse în anexa nr. 7 la ordin, în condiţiile prevăzute la Nota 1 şi Nota 3 de la finalul lit. C a capitolului I din anexa nr. 7 la ordin, la tarife negociate care nu pot fi mai mari decât tarifele maximale decontate de casele de asigurări de sănătate prevăzute în aceeaşi anexă.

Pentru ecografiile, respectiv monitorizările şi managementul hemodinamic prin metoda bioimpedanţei toracice, pentru care medicii cu specialităţi medicale clinice, respectiv medicii de specialitate cardiologie şi medicină internă încheie acte adiţionale la contractele de furnizare de servicii medicale clinice şi care sunt efectuate ca urmare a trimiterii de către alţi medici de specialitate, respectiv de către alţi medici de specialitate cardiologie şi medicină internă, programul de lucru se prelungeşte corespunzător.

ART. 8 (1) Biletul de trimitere pentru investigaţiile paraclinice este formular cu regim special, unic pe ţară, care se întocmeşte în trei exemplare şi are o valabilitate de maximum 30 de zile calendaristice de la data emiterii. Prin excepţie biletele de trimitere

pentru efectuarea de investigaţii paraclinice specifice pentru afecţiunile cuprinse în unele programe naţionale de sănătate: diabetul şi bolile de nutriţie precum şi cele pentru afecţiunile oncologice, au valabilitate de până la 90 de zile calendaristice, în condiţiile în care pentru afecţiunea respectivă şi medicaţia a fost prescrisă pentru acelaşi interval de timp. Pentru celelalte boli cronice, valabilitatea biletului de trimitere pentru investigatii paraclinice specifice este de pina la 60 zile.

Un exemplar al biletului de trimitere rămâne la medicul care a făcut trimiterea şi două exemplare sunt înmânate asiguratului. La momentul prezentării asiguratului în vederea efectuării investigaţiilor, furnizorul de servicii medicale paraclinice are obligaţia de a consemna pe versoul exemplarului de bilet de trimitere care se depune la casa de asigurari de sanatate :data prezentării, data programarii, precum si de a semna şi ştampila acest exemplar indiferent dacă investigaţiile recomandate sunt sau nu efectuate la momentul prezentării. În situaţia în care, din motive obiective, investigaţiile nu au putut fi efectuate la momentul prezentării, furnizorul de servicii medicale paraclinice are obligaţia de a-l programa iar daca asiguratul refuza programarea va restitui asiguratului ambele exemplare ale biletului de trimitere pentru ca acesta să se poată prezenta la alt furnizor de investigaţii medicale paraclinice. In primele 10 zile calendaristice de la emiterea biletului de trimitere pentru investigatii medicale paraclinice asiguratul are obligatia de a se programa si de a accepta programarea la unul dintre furnizori, în caz contrar biletul de trimitere isi pierde valabilitatea.

Furnizorul de servicii medicale paraclinice care efectuează investigaţiile paraclinice recomandate prin biletul de trimitere păstrează un exemplar al biletului şi depune la casa de asigurări de sănătate celălalt exemplar cu ocazia raportării lunare a activităţii.

Furnizorii de servicii medicale paraclinice au obligaţia să verifice biletele de trimitere în ceea ce priveşte datele obligatorii pe care acestea trebuie să le cuprindă potrivit prevederilor legale în vigoare.

(2) Daca in perioada de valabilitate a biletului de trimitere pentru investigatii medicale paraclinice un asigurat se interneaza in spital fara ca investigatiile recomandate sa fie efectuate in ambulatoriu anterior internarii, biletul de trimitere isi pierde valabilitatea, cu excepţia biletelor de trimitere pentru investigaţii medicale paraclinice de înaltă performanţă dacă acestea nu au fost efectuate în timpul spitalizării, cu reconfirmarea pe biletul de trimitere a necesităţii efectuării acestor investigaţii de către medicul care a făcut trimiterea. Investigatiile medicale paraclinice efectuate unui asigurat in ambulatoriu pe perioada in care acesta a fost internat precum si in perioada de la data externarii pana la data expirarii termenului de valabilitate a biletului de trimitere , nu se deconteaza de casa de asigurari de sanatate sau daca acestea au fost decontate se recupereaza de la furnizorul de investigatii medicale paraclinice, cu excepţia investigaţiilor medicale paraclinice de înaltă performanţă dacă acestea nu au fost efectuate în timpul spitalizării, cu reconfirmarea pe biletul de trimitere a necesităţii efectuării acestor investigaţii de către medicul care a făcut trimiterea.

(3) Este interzisă înlocuirea sau adăugarea altor investigaţii paraclinice pe biletul de trimitere prin completarea acestuia la nivelul laboratorului/punctului de lucru.

(4) Casele de asigurări de sănătate decontează furnizorilor de servicii medicale paraclinice cu care au încheiat contracte contravaloarea serviciilor medicale paraclinice acordate asiguraţilor, indiferent de casa de asigurări de sănătate la care este luat în evidenţă asiguratul, cu condiţia ca medicul care a eliberat biletul de trimitere să se afle în relaţie contractuală cu aceeaşi casă de asigurări de sănătate cu care se află în relaţie contractuală furnizorul de servicii medicale paraclinice.

(5) Fiecare casă de asigurări de sănătate îşi organizează modul de verificare a biletelor de trimitere pentru investigaţiile paraclinice, în acest sens stabilindu-şi evidenţe proprii.

În relaţiile cu furnizorii de servicii medicale în asistenţa medicală ambulatorie de specialitate, casele de asigurări de sănătate decontează contravaloarea investigaţiilor medicale paraclinice acordate numai în baza biletelor de trimitere utilizate în sistemul asigurărilor sociale de sănătate.

(6) Pentru pacienţii din statele membre ale Uniunii Europene/din Spaţiul Economic European, titulari ai cardului european de asigurări sociale de sănătate, în perioada de valabilitate a cardului, respectiv beneficiari ai formularelor europene emise în baza Regulamentului CE nr. 883 al Parlamentului European şi al Consiliului din 29 aprilie 2004 privind coordonarea sistemelor de securitate socială, respectiv în baza Regulamentului CEE nr. 1408/1971 referitor la aplicarea regimurilor de securitate socială salariaţilor, lucrătorilor independenţi şi membrilor familiilor acestora care se deplasează în interiorul comunităţii, după caz precum şi pacienţilor din alte state cu care România a încheiat acorduri, înţelegeri, convenţii sau protocoale internaţionale cu prevederi în domeniul sănătăţii, investigaţiile medicale paraclinice se acordă pe baza biletului de trimitere.

Biletul de trimitere pentru investigaţii medicale paraclinice este formular cu regim special, unic pe ţară.

ART. 10 Lista serviciilor medicale de medicină dentară preventive şi a tratamentelor de medicină dentară, tarifele pentru fiecare serviciu medical de medicină dentară, serviciile medicale de medicină dentară pentru care se încasează contribuţie personală din partea asiguratului şi condiţiile acordării acestora sunt prevăzute în anexa nr. 7 la ordin.

(3) Lunar casele de asigurări de sănătate decontează furnizorilor de servicii medicale de medicină dentară serviciile medicale de medicină dentară furnizate în limita valorii trimestriale de contract.

În situaţii justificate, furnizorii de servicii medicale de medicină dentară pot efectua servicii medicale peste valoarea trimestrială de contract în limita a maxim 5%, cu condiţia ca această depăşire să influenţeze corespunzător, în sensul diminuării valorii de contract a trimestrului următor, cu încadrarea în valoarea contractată pentru anul respectiv.

(4) În situaţia în care la unii furnizori de servicii medicale de medicină dentară se înregistrează la sfârşitul unui trimestru sume neconsumate, faţă de suma trimestrială

prevăzută în contract, casele de asigurări de sănătate vor diminua, printr-un act adiţional la contract, valoarea trimestrială contractată iniţial aferentă trimestrului respectiv cu sumele neconsumate.

ART. 12 În tarifele tratamentelor protetice sunt incluse şi cheltuielile aferente activităţilor de tehnică dentară. Plata acestora se face de către reprezentantul legal al cabinetului de medicină dentară direct către laboratorul de tehnică dentară autorizat conform legii.

ART. 13 Casele de asigurări de sănătate ţin evidenţa serviciilor de medicină dentară pe fiecare asigurat şi pe fiecare cod din formula dentară prevăzută în anexa nr. 7 la ordin.

ART. 14 (1) Unităţile ambulatorii de recuperare, medicină fizică şi balneologie din structura unor unităţi sanitare sau unităţile ambulatorii în care îşi desfăşoară activitatea medici angajaţi într-o unitate sanitară, cabinetele medicale de specialitate organizate conform Ordonanţei Guvernului nr. 124/1998 privind organizarea şi funcţionarea cabinetelor medicale, aprobată cu modificări şi completări prin Legea nr. 629/2001, republicată, cabinetele medicale de specialitate din structura unor unităţi sanitare aparţinând ministerelor şi instituţiilor publice centrale din sistemul de apărare, ordine publică, siguranţă naţională şi autoritate judecătorească încheie contracte de furnizare de servicii medicale de recuperare, medicină fizică şi balneologie în ambulatoriu cu casele de asigurări de sănătate, a căror plată se face prin tarif în lei pe servicii medicale-consultaţii/cazuri pentru serviciile medicale de recuperare, medicină fizică şi balneologie din pachetul de servicii medicale de bază prevăzut în anexa nr. 7 la ordin.

(2) La stabilirea sumei contractate de un furnizor de servicii medicale de recuperare, medicină fizică şi balneologie cu casa de asigurări de sănătate se au în vedere numărul de servicii medicale-consultaţii, respectiv tariful pe consultaţie de 14 lei şi numărul de servicii medicale-cazuri, respectiv tariful pe caz de 140 lei. Pentru prestaţia medicului primar, tariful consultatiei se majorează cu 20%. La stabilirea numarului de cazuri se are in vedere o durata medie de 10 zile de tratament pe caz si un numar mediu de 4 proceduri pe zi.

Suma contractată se stabileşte conform Anexei nr. 8 F şi se defalchează pe trimestre şi pe luni, ţinându-se cont şi de activitatea specifică sezonieră.

În situaţia în care unul sau mai multe elemente care au stat la baza stabilirii punctajului pentru fiecare furnizor de servicii medicale de recuperare, medicină fizică şi balneologie, conform prevederilor din Anexa nr. 8 F la ordin se modifică în sensul diminuării faţă de condiţiile iniţiale şi furnizorii aduc la cunoştinţa caselor de asigurări de sănătate aceste situaţii, în termen de maxim 15 zile lucrătoare de la data de la care survine modificarea, suma stabilită iniţial se diminuează corespunzător, prin încheierea unui act adiţional la contract. Sumele obţinute ca disponibil din aceste diminuări la nivelul caselor de asigurări de sănătate se vor folosi la reîntregirea sumelor alocate cu destinaţie iniţială.

Neanunţarea acestor situaţii şi constatarea ulterior producerii lor duc la aplicarea prevederilor privind nerespectarea obligaţiilor contractuale din contractul de furnizare de servicii medicale de recuperare, medicină fizică şi balneologie.

În situaţia în care la unii furnizori de servicii medicale de recuperare, medicină fizică şi balneologie se înregistrează la sfârşitul unui trimestru sume neconsumate, faţă de suma trimestrială prevăzută în contract, casele de asigurări de sănătate vor diminua, printr-un act adiţional la contract, valoarea trimestrială contractată iniţial aferentă trimestrului respectiv cu sumele neconsumate.

Sumele rezultate din economii vor fi contractate printr-un act adiţional la furnizorii de servicii medicale de recuperare, medicină fizică şi balneologie care în trimestrul respectiv şi-au epuizat valoarea de contract.

Suma din actul adiţional se utilizează pentru decontarea serviciilor medicale de recuperare, medicină fizică şi balneologie acordate de la data semnării actului adiţional.

Pentru încadrarea în suma defalcată trimestrial cabinetele de specialitate recuperare, medicină fizică şi balneologie a sănătăţii pot întocmi liste de prioritate pentru furnizarea serviciilor de recuperare-reabilitare a sănătăţii, dacă este cazul.

(3) În vederea contractării numărului de servicii medicale-consultaţii şi a numărului de cazuri de recuperare, medicină fizică şi balneologie se au în vedere următoarele:

a) numărul de servicii medicale-consultaţii de recuperare, medicină fizică şi balneologie acordate în cabinetul medical nu poate depăşi numărul de servicii medicale-consultaţii rezultat potrivit programului de lucru, luându-se în considerare că pentru o consultaţie medicală este necesară o durată de 15 minute în medie. Dacă programul de lucru este mai mic sau mai mare de 7 ore pe zi, numărul de consultaţii, poate scade sau creşte corespunzător;

b) serviciile medicale-cazuri care se acordă în bazele de tratament, se contractează şi raportează în vederea decontării pentru un numar mediu de 10 zile de tratament şi o medie de 4 proceduri/zi, dar nu mai mult de 2 cure pe an, după care bolnavul plăteşte integral serviciile medicale

(4) Tarifele au avut în vedere toate cheltuielile aferente serviciilor medicale-consultaţii şi numărului de cazuri de recuperare, medicină fizică şi balneologie; în situaţia în care baza de tratament nu se află în structura reţelei sanitare din subordinea Ministerului Sănătăţii sau aparţine unor ministere cu reţele sanitare proprii, casele de asigurări de sănătate contractează şi decontează contravaloarea serviciilor medicale-consultaţii şi numărului de cazuri de recuperare, medicină fizică şi balneologie la nivelul tarifelor diminuate cu contravaloarea cheltuielilor materiale necesare funcţionării şi administrării unităţilor, respectiv se acordă sumele reprezentând manopera, medicamentele şi materialele sanitare.

(5) Fondurile suplimentare aprobate pentru anul 2011 cu destinaţia de servicii medicale de recuperare, medicină fizică şi balneologie vor fi contractate de casele de asigurări de sănătate prin încheiere de contracte, respectiv de acte adiţionale la contractele iniţiale şi vor fi utilizate pentru decontarea serviciilor medicale-consultaţii şi numărului de cazuri de recuperare, medicină fizică şi balneologie, acordate asiguraţilor de la data semnării acestora.

(6) Decontarea serviciilor medicale de recuperare, medicină fizică şi balneologie în ambulatoriu se suportă din fondul aferent asistenţei medicale de recuperare-reabilitare a sănătăţii.

(7) Casele de asigurări de sănătate decontează serviciile medicale-consultaţii şi numărul de cazuri de recuperare, medicină fizică şi balneologie numai pe baza biletelor de trimitere eliberate de medicii de familie, medicii de specialitate din ambulatoriul de specialitate sau de medicii de specialitate din spital, aflaţi în relaţie contractuală cu casele de asigurări de sănătate.

(8) Biletele de trimitere pentru tratament în staţiunile balneoclimaterice se fac de către medicii de familie, de către medicii de specialitate din ambulatoriul de specialitate şi medicii din spital, aflaţi în relaţie contractuală cu casele de asigurări de sănătate, pentru perioade şi potrivit unui ritm stabilit de medicul de specialitate recuperare, medicină fizică şi balneologie.

(9) Decontarea lunară de către casele de asigurări de sănătate se face în funcţie de numărul de servicii medicale-consultaţii şi numărul de cazuri finalizate de recuperare, medicină fizică şi balneologie realizat atât în cabinetele medicale, cât şi în bazele de tratament, înmulţit cu tarifele din anexa nr. 7 la ordin, după caz, diminuate conform alin. (4), în limita sumelor contractate. Decontarea lunara a cazurilor finalizate se realizeaza la tariful contractat daca numarul mediu al zilelor de tratament este mai mare sau egal cu 8.5. Pentru un numar mediu al zilelor de tratament realizat intr-o luna mai mic de 8.5 decontarea se face conform formulei:Tarif contractat (140 lei) x numar total zile realizate / 10 (numar mediu zile de tratament contractat)

(10) În situaţia în care o cură de tratament se întrerupe, furnizorul are obligaţia de a anunţa casa de asigurări de sănătate despre întreruperea curei, motivul întreruperii şi numărul de zile efectuat faţă de cel recomandat. O cură de tratament întreruptă se consideră o cură finalizată.

ART. 15 (1) La stabilirea sumei contractate de un furnizor de servicii de acupunctură cu casa de asigurări de sănătate se au în vedere numărul de consultaţii de acupunctură, respectiv tariful pe consultaţie de 13 lei şi numărul de servicii medicale-caz, respectiv tariful pe caz de 140 lei. Suma contractată se defalchează pe trimestre şi pe luni.

(2) În vederea contractării numărului de consultaţii de acupunctură şi a numărului de servicii medicale-caz se au în vedere următoarele:

a) numărul de consultaţii de acupunctură acordate în cabinetul medical nu poate depăşi numărul de consultaţii de acupunctură rezultat potrivit programului de lucru, luându-se în considerare că pentru o consultaţie de acupunctură este necesară o durată de 15 minute în medie. Pentru fiecare caz casa de asigurări de sănătate decontează o singură consultaţie pentru o cură de tratament. Asiguraţii, au dreptul la maximum 2 cure pe an, după care asiguratul plăteşte integral serviciile medicale.

b) serviciile de acupunctură-caz, se contractează şi raportează în vederea decontării maximum 2 cure/an, o cură reprezentând în medie 10 zile de tratament, după care bolnavul plăteşte integral serviciile medicale;

(3) Contravaloarea servicii de acupunctură-consultaţii şi cure de tratament se suportă din fondul aferent asistenţei medicale de recuperare.

(4) Decontarea lunară a serviciilor medicale de acupunctură se face pe baza numărului de servicii medicale-caz finalizate şi a numărului de consultaţii de acupunctură şi a tarifelor pe cură respectiv pe consultaţie, în limita sumelor contractate, pe baza facturii şi a documentelor justificative depuse de furnizor la casa de asigurări de sănătate până la data prevăzută în contractul încheiat de furnizor cu casa de asigurări de sănătate.

Decontarea lunara a cazurilor finalizate se realizeaza la tariful contractat daca numarul mediu al zilelor de tratament este mai mare sau egal cu 8.5. Pentru un numar mediu al zilelor de tratament realizat intr-o luna mai mic de 8.5 decontarea se face conform formulei:Tarif contractat (140 lei) x numar total zile realizate / 10 (numar mediu zile de tratament contractat).

În situaţia în care o cură de tratament în acupunctură se întrerupe, furnizorul are obligaţia să anunţe casa de asigurări de sănătate despre întreruperea curei, motivul întreruperii şi numărul de zile efectuat faţă de cel recomandat. O cură de tratament în acupunctură întreruptă se consideră o cură finalizată.

(5) Tarifele au avut în vedere toate cheltuielile aferente serviciilor medicale-consultaţii de acupunctură şi cazurilor-cure de acupunctură.

(6) Reprezentantul legal al furnizorilor de servicii medicale clinice, de medicină dentară, de recuperare, medicină fizică şi balneologie şi paraclinice facturează caselor de asigurări de sănătate, lunar, şi depune la casa de asigurări de sănătate până la termenul prevăzut în contractul de furnizare de servicii medicale activitatea realizată în luna anterioară, conform contractului încheiat cu casa de asigurări de sănătate, care se verifică de către casele de asigurări de sănătate în vederea decontării şi se validează conform prezentelor norme.

Nerespectarea termenului de raportare atrage nedecontarea la termenele stabilite a serviciilor medicale prestate pentru perioada respectivă.

ART. 16 Contravaloarea serviciilor medicale de specialitate în specialităţile clinice inclusiv recuperare, medicină fizică şi balneologie, paraclinice, de medicină dentară care nu se regăsesc în anexa nr. 7 la ordin, precum şi a serviciilor medicale acordate la cererea asiguratului (fără recomandare medicală sau fără a îndeplini condiţiile care îi permit adresare directă) sau în situaţia în care asiguratul nu acceptă programare pe listele de prioritate se suportă de către asiguraţi la tarifele stabilite de furnizori şi afişate la cabinetul/laboratorul medical, pentru care se eliberează chitanţă fiscală, cu indicarea serviciului prestat. În aceste situaţii furnizorii de servicii medicale nu eliberează bilete de trimitere sau prescripţii medicale utilizate în sistemul de asigurări sociale de sănătate si decontate de casele de asigurări de sănătate.

ART. 17 (1) În cabinetele medicale/laboratoarele din ambulatoriul de specialitate, organizate conform Ordonanţei Guvernului nr. 124/1998, aprobată cu modificări şi completări prin Legea nr. 629/2001, republicată, pot fi angajaţi numai medici şi/sau dentişti, precum şi alte categorii de personal în conformitate cu dispoziţiile legale în vigoare, cu excepţia persoanelor care îşi desfăşoară activitatea în cabinete organizate conform Ordonanţei de urgenţă a Guvernului nr. 83/2000 privind organizarea şi funcţionarea cabinetelor de liberă practică pentru servicii publice conexe actului medical, aprobată şi modificată prin Legea nr. 598/2001. Medicii sau dentiştii angajaţi nu raportează activitate medicală proprie, activitatea acestora fiind raportată de către reprezentantul legal; medicii de specialitate din specialităţile clinice inclusiv recuperare, medicină fizică şi balneologie şi de medicină dentară pot prescrie medicamente cu sau fără contribuţie personală şi unele materiale sanitare în tratamentul ambulatoriu, folosind formularul de prescripţie medicală, care este formular cu regim special unic pe ţară, cu ştampila cabinetului şi parafa medicului angajat. Întreaga activitate a cabinetului se desfăşoară respectându-se contractul încheiat de reprezentantul legal al cabinetului medical cu casa de asigurări de sănătate.

(2) Pentru specialităţile clinice inclusiv recuperare, medicină fizică şi balneologie, cabinetele medicale individuale organizate conform reglementărilor în vigoare pot raporta în vederea decontării numai serviciile medicale din specialitatea medicului titular al cabinetului medical respectiv, precum şi servicii conexe actului medical, conform prevederilor art. 3 alin. (2).

ART. 18 Pentru unităţile sanitare care nu sunt organizate conform Ordonanţei Guvernului nr. 124/1998, aprobată cu modificări şi completări prin Legea nr. 629/2001, republicată, contractele/actele adiţionale de furnizare de servicii medicale se încheie de către reprezentantul legal al unităţii sanitare în structura căreia se află aceste unităţi şi casa de asigurări de sănătate.

ART. 19 (1) Casele de asigurări de sănătate decontează serviciile medicale clinice inclusiv de recuperare, medicină fizică şi balneologie numai pe baza biletului de trimitere pentru alte specialităţi, care este formular cu regim special, unic pe ţară, care se întocmeşte în trei exemplare. Un exemplar rămâne la medicul care a făcut trimiterea şi două exemplare sunt înmânate asiguratului, care le depune la furnizorul de servicii medicale clinice inclusiv de recuperare, medicină fizică şi balneologie. Furnizorul de

servicii medicale clinice, inclusiv de recuperare, medicină fizică şi balneologie păstrează un exemplar şi depune la casa de asigurări de sănătate celălalt exemplar cu ocazia raportării lunare a activităţii.

(2) Furnizorii de servicii medicale clinice, inclusiv de recuperare, medicină fizică şi balneologie au obligaţia să verifice biletele de trimitere în ceea ce priveşte datele obligatorii pe care acestea trebuie să le cuprindă potrivit prevederilor legale în vigoare.

(3) În relaţiile cu furnizorii de servicii medicale în asistenţa medicală ambulatorie de specialitate, casele de asigurări de sănătate decontează contravaloarea serviciilor medicale clinice, inclusiv a celor de recuperare, medicină fizică şi balneologie acordate numai în baza biletelor de trimitere utilizate în sistemul asigurărilor sociale de sănătate.

ART. 20 Casele de asigurări de sănătate şi direcţiile de sănătate publică au obligaţia de a organiza trimestrial sau ori de câte ori este nevoie întâlniri cu medicii de specialitate din ambulatoriul de specialitate pentru a analiza aspecte privind calitatea serviciilor medicale din asistenţa medicală ambulatorie de specialitate, precum şi respectarea prevederilor actelor normative în vigoare. Acestea vor informa asupra modificărilor apărute în actele normative şi vor stabili împreună cu medicii de specialitate din ambulatoriul de specialitate măsurile ce se impun pentru îmbunătăţirea activităţii. Neparticiparea medicilor la aceste întâlniri nu îi exonerează de răspunderea nerespectării hotărârilor luate cu acest prilej.

CRITERII
privind selecţia furnizorilor de servicii medicale de recuperare, medicină fizică şi balneologie şi repartizarea sumelor pentru furnizarea de servicii medicale de recuperare, medicină fizică şi balneologie în ambulatoriu

Cap. I. Criterii de selecţie a furnizorilor de servicii medicale de recuperare, medicină fizică şi balneologie în ambulatoriu

Pentru a intra în relaţii contractuale cu casele de asigurări de sănătate furnizorii trebuie să îndeplinească cumulativ următoarele criterii de selecţie:

1. Să fie autorizaţi şi evaluaţi potrivit dispoziţiilor legale în vigoare;
2. Să facă dovada capacităţii tehnice de a efectua serviciile medicale de recuperare, medicină fizică şi balneologie pentru a căror furnizare încheie contract cu casa de asigurări de sănătate.
3. Să facă dovada că toată durata programului de lucru declarat al cabinetului şi al bazei de tratament este acoperită prin prezenţa unui medic de specialitate de recuperare, medicină fizică şi balneologie

Cap. II. La stabilirea valorii contractelor de furnizare de servicii medicale de recuperare, medicină fizică şi balneologie se au în vedere următoarele criterii:

A. Evaluarea capacităţii resurselor tehnice

B.. Evaluarea salii de kinetoterapie
C. Evaluarea resurselor umane

A. Evaluarea capacităţii resurselor tehnice
a) Furnizorii de servicii medicale de recuperare, medicină fizică şi balneologie sunt obligaţi să facă dovada deţinerii legale a aparaturii prin documente conforme şi în termen de valabilitate.
b) Casele de asigurări de sănătate sunt obligate să verifice dacă seria şi numărul aparatului existent în cadrul cabinetului sunt aceleaşi cu seria şi numărul aparatului înscrise în cuprinsul documentelor care atestă existenţa şi deţinerea legală a acestora.
c) Furnizorii sunt obligaţi să prezinte documentele pentru aparatul/ aparatele deţinute din care să reiasă numărul de canale şi numărul de bolnavi care pot face terapie simultan cu aparatul/aparatele respective ~~şi~~ pentru care încheie contract de furnizare de servicii cu casa de asigurări de sănătate.
d) Nu sunt luate in calcul aparatele care nu au înscrise pe ele seria si numarul şi nici aparatele pentru care furnizorii nu pot prezenta fişele tehnice conforme şi în termen de valabilitate ale acestora.
e) Dacă doi sau mai mulţi furnizori prezintă aparate înregistrate cu aceeaşi serie şi număr înainte sau în perioada de contractare, acestea sunt excluse definitiv şi nu se mai iau în calcul la nici unul dintre furnizori.

Fac excepţie furnizorii de servicii medicale de recuperare, medicină fizică şi balneologie care îşi desfăşoară activitatea utilizând acelaşi spaţiu şi aceleaşi echipamente specifice deţinute şi/sau utilizate în comun în condiţiile legii, cu prezentarea documentelor justificative prevăzute de actele normative în vigoare şi numai în condiţiile în care personalul medical de specialitate al fiecărui furnizor îşi desfăşoară activitatea cu respectarea dispoziţiilor Contractului-cadru privind condiţiile acordării asistenţei medicale în cadrul sistemului de asigurări sociale de sănătate pentru anii 2011 – 2012 şi într-un program de lucru distinct.
f) Pentru a putea fi luate în considerare aparatele trebuie să fie în perfectă stare de funcţionare certificată cu documentele care atestă verificarea parametrilor funcţionali în termenul prevăzut de lege pentru fiecare tip de aparat.

Se acorda punctaj pentru fiecare aparat detinut, după cum urmează
- Aparate cu 1 canal si vechime 1-5 ani = 16 puncte/aparat
- Aparate cu 2 canale si vechime 1-5 ani = 24 puncte/aparat
- Aparate cu 3 canale si vechime 1-5 ani = 28 puncte/aparat
- Aparate cu 4 canale si vechime 1-5 ani = 32 puncte/aparat
- Combină de terapie fizicală şi vechime 1 – 5 ani = 20 puncte/combină
- Cada de hidroterapie– vechime 1-5 ani = 10 puncte/1 cada

Se scad din punctajul acordat pentru fiecare aparat, cate 2 puncte pentru fiecare an de vechime in plus al aparatului.

TOTAL PUNCTE: .....

Program de activitate saptamanal al bazei de tratament - 8 ore / zi:

- 5 zile /săptămână = 2 puncte
- Sub 5 zile/săptămână = 1 punct
- Pentru 2 x 8 ore 5 zile pe săptămână =5 puncte
- TOTAL puncte ……

Se stabileşte numărul total de puncte obţinut prin însumarea numărului de puncte obţinut de fiecare furnizor pentru toate criteriile.

Se calculează valoarea unui punct prin împărţirea sumei alocate cu destinaţia asistenţă medicală de recuperare, medicină fizică şi balneologie în ambulatoriu, din care se scade suma aferentă serviciilor de acupunctură la numărul total de puncte.

Valoarea unui punct obţinută mai sus se înmulţeşte cu numărul de puncte obţinut de un furnizor, rezultând sumele aferente fiecărui furnizor.

ANEXA 10

CRITERII

privind selecţia furnizorilor de servicii medicale paraclinice - laboratoare de analize medicale, repartizarea sumelor şi defalcarea numărului de investigaţii paraclinice - analize medicale de laborator pe furnizori de servicii medicale paraclinice - laboratoare de analize medicale

CAPITOLUL I Criterii de selecţie a furnizorilor de servicii medicale paraclinice - laboratoare de analize medicale

Pentru a intra în relaţii contractuale cu casele de asigurări de sănătate, furnizorii trebuie să îndeplinească cumulativ următoarele criterii de selecţie:

1. Să fie autorizaţi şi evaluaţi potrivit dispoziţiilor legale în vigoare;

2. a) Să facă dovada capacităţii tehnice a fiecărui laborator/punct de lucru de a efectua toate investigaţiile medicale paraclinice - analize medicale de laborator prevăzute la cap. II din anexa nr. 7 la ordin, cu excepţia examinărilor de anatomie patologică (histopatologice şi de citologie, inclusiv examenul Babeş Papanicolau).

b) Pentru examinările de anatomie patologică(histopatologice şi de citologie inclusiv examenul Babeş Papanicolau), furnizorul are obligaţia de a face dovada capacităţii tehnice numai în situaţia în care solicită contractarea acestora.

3. Furnizorul va prezenta un înscris cu menţiunea seriei, a anului de fabricaţie, a capacităţii de lucru şi a meniului de teste efectuate de fiecare aparat, vizat de producător/distribuitor/furnizor de service.

Pentru testele compuse din mai mulţi parametri nu se iau în calcul toţi parametrii – se consideră un singur test, cu excepţia categoriei microbiologie, unde diversele etape de lucru (examen microscopic, cultură cu identificare microbiană inclusiv antibiograma /fungigrama) constituie teste separate şi se iau în calcul separat.

4. Să facă dovada că toată durata programului de lucru declarat pentru fiecare laborator de analize medicale / laborator de analize medicale organizat ca punct de lucru din structura sa, este acoperită prin prezenţa unui medic de specialitate medicină de laborator sau biolog, chimist, biochimist – cu grad de specialist.

Să facă dovada , pentru fiecare laborator de analize medicale / laborator de analize medicale organizat ca punct de lucru din structura sa că în cadrul acestuia/acestora îşi desfăşoară activitatea medic / medici de laborator într-o formă legală de exercitare a profesiei care să acopere cel putin o norma/zi.

5. Să facă dovada îndeplinirii criteriului de calitate, atât pentru subcriteriul a) „Implementarea sistemului de management al calităţii” cât şi pentru subcriteriul b) „Participare la schemele de testare a competenţei pentru laboratoare de analize medicale pentru laboratoare de analize medicale notificate de Ministerul Sănătăţii” prevăzut de reglementările în vigoare pentru cel puţin 50% reprezentand minim 40 analize din numărul de analize cuprinse in lista investigaţiilor contractate, pentru fiecare dintre

laboratoarele / laboratoare organizate ca puncte de lucru ce urmează a fi cuprinse în contractul de furnizare de servicii medicale paraclinice - analize medicale de laborator pe toată perioada de derulare a contractului încheiat cu casa de asigurări de sănătate. Numărul total de analize cuprinse în lista investigaţiilor medicale paraclinice este de 79.

6. Sa faca dovada capacitatii tehnice pentru posibilitatea efectuării a cel putin 5% din numarul total de servicii medicale paraclinice necesare la nivelul fiecarei case de asigurari de sanatate, stabilit de comisia constituită conform art. 44 alin.(5) din Contractul-cadru, cu încadrarea în 90% din suma prevăzută cu această destinaţie.

NOTĂ: Pentru laboratoarele de anatomie patologică nu se aplică punctul 2.a) şi punctul 5.

CAPITOLUL II Criterii privind repartizarea sumelor şi defalcarea numărului de investigaţii paraclinice - analize medicale de laborator - stabilit pe total judeţ

1. Numărul de investigaţii paraclinice - analize de laborator se stabileşte la nivelul fiecărui judeţ de către comisia înfiinţată conform art. 44 alin. (5) din Contractul-cadru pentru anii 2011 – 2012 aprobat prin H.G. nr. 1389/2010, cu modificările şi completările ulterioare.

2. La stabilirea sumelor ce se contractează cu furnizorii de analize medicale de laborator se au în vedere următoarele criterii:

1. criteriul de evaluare a resurselor 45%
2. criteriul de calitate 50%
3. criteriul financiar 5%

1. Criteriul de evaluare a resurselor

Ponderea acestui criteriu este de 45%

Ca urmare a aplicării metodologiei de stabilire a punctajului, fiecare furnizor de servicii medicale paraclinice - analize medicale de laborator - obţine un punctaj corespunzător acestui criteriu.

Metodologia de stabilire a punctajului:

A. Evaluarea capacităţii resurselor tehnice

a) Furnizorii de servicii medicale paraclinice - analize medicale de laborator sunt obligaţi să facă dovada deţinerii legale a aparaturii prin documente conforme şi în termen de valabilitate.

b) Casele de asigurări de sănătate sunt obligate să verifice dacă seria şi numărul aparatului existent în cadrul laboratorului sunt conforme cu seria şi numărul aparatului înscrise în cuprinsul documentelor care atestă existenţa şi deţinerea legală a acestora.

c) Furnizorii sunt obligaţi să prezinte toate fişele tehnice corespunzătoare aparatelor deţinute şi pentru care încheie contract de furnizare de servicii cu casa de asigurări de sănătate.

d) Nu sunt luate în calcul aparatele care nu au înscrise pe ele seria şi numărul, şi nici aparatele pentru care furnizorii nu pot prezenta fişele tehnice conforme şi în termen de valabilitate ale acestora, având menţionate seriile echipamentelor.

e) Dacă doi sau mai mulţi furnizori prezintă aparate înregistrate cu aceeaşi serie şi număr înainte sau în perioada de contractare, acestea sunt excluse definitiv şi nu se mai iau în calcul la nici unul dintre furnizori.

În acest sens, casele de asigurări de sănătate verifică capacitatea tehnică a fiecărui furnizor şi transmit Casei Naţionale de Asigurări de Sănătate în termen de 10 zile calendaristice de la data încheierii perioadei de depunere a dosarelor de contractare situaţia centralizatoare cu privire la:

- tipul şi denumirea fiecărui aparat
- seria şi numărul fiecărui aparat
- tipul, numărul şi data documentului care dovedeşte deţinerea legală a fiecărui aparat.

Constatarea ulterior încheierii contractului, a existenţei unor aparate de acelaşi tip şi cu aceeaşi serie şi număr la doi furnizori sau în două laboratoare/puncte de lucru ale aceluiaşi furnizor, conduce la aplicarea măsurii de reziliere a contractului pentru furnizorii/furnizorul respectiv.

f) Pentru a putea fi luate în considerare, aparatele trebuie să fie în perfectă stare de funcţionare, certificată cu documentele care atestă verificarea parametrilor funcţionali în termenul prevăzut de lege pentru fiecare tip de aparat. Această prevedere reprezintă condiţie de eligibilitate pentru aparatul/aparatele respective, în vederea atribuirii punctajului conform metodologiei de mai jos, respectiv a menţinerii sumelor rezultate din aplicarea acestuia.

Furnizorii vor prezenta contract de service încheiat cu un furnizor avizat de Ministerul Sanatatii conform prevederilor legale in vigoare, pentru aparatele iesite din perioada de garantie si valabil pe perioada de derulare a contractului de furnizare de servicii medicale. Pentru aparatele care ies din garantie pe parcursul derularii contractului de furnizare de servicii medicale furnizorii sunt obligati sa prezinte contractul de service anterior expirarii perioadei de garantie.

g) Furnizorii au obligaţia să prezinte la contractare, respectiv pe parcursul derulării contractului de furnizare de servicii medicale: avizul de utilizare sau buletinul de verificare periodică, emise conform prevederilor legale în vigoare, pentru aparatura din dotare. Această prevedere reprezintă condiţie de eligibilitate pentru aparatul/aparatele respective, în vederea atribuirii punctajului conform metodologiei de mai jos, respectiv a menţinerii sumelor rezultate din aplicarea acestuia.

Se acordă punctaj pentru fiecare aparat deţinut care efectuează servicii medicale paraclinice ce fac obiectul contractului de furnizare de servicii încheiat cu casa de asigurări de sănătate, după cum urmează:

Pentru participarea la un numar mai mare de 4 ori pe an la schemele de testare a competentei punctajul se va multiplica astfel:
- pentru participarea la un numar de 6 ori pe an se acorda o crestere a punctajului de 10%
- pentru participarea la un numar de 12 ori pe an se acorda o creştere a punctajului de 15%.

Punctajul obţinut de fiecare furnizor prin aplicarea acestui criteriu se afişează pe pagina web a casei de asigurări de sănătate.

_____

Notă:
Pentru testele compuse din mai mulţi parametri nu se iau în calcul toţi parametrii – se consideră un singur test, cu excepţia categoriei microbiologie, unde diversele etape de lucru (examen microscopic, cultură cu identificare microbiană inclusiv antibiograma /fungigrama) constituie teste separate şi se iau în calcul separat.

3. Criteriul financiar

Ponderea acestui criteriu este de 5%

Criteriul financiar se referă la tarifele propuse de furnizorii de analize medicale de laborator, cu încadrarea obligatorie în tarifele maximale prevăzute în anexa nr. 7 la ordin.

Furnizorii de servicii medicale de laborator care prezintă tarife ce depăşesc tarifele maximale decontate de casele de asigurări de sănătate cuprinse în anexa nr. 7 la ordin sunt respinşi de la contractare.

a. Pentru încheierea contractului cu casa de asigurări de sănătate, furnizorii de analize medicale de laborator prezintă în ofertă procentul cu care propun diminuarea tarifelor maximale prevăzute în anexa nr. 7 la ordin; procentul de diminuare se propune distinct pentru fiecare categorie de analize (hematologie, biochimie, imunologie, microbiologie, anatomie patologică).

b. Procentul de diminuare propus pentru fiecare categorie de analize se aplică pentru toate analizele cuprinse în categoria respectivă şi nu poate depăşi 5% din tariful maximal.

c. Tarifele rezultate ca urmare a aplicării procentului de diminuare cel mai mare propus pentru fiecare categorie de analize medicale reprezintă tarifele care se contractează cu toţi furnizorii de analize medicale de laborator.

d. Acest criteriu este apreciat cu un punctaj de maximum 100. Punctajul 100 se acordă furnizorului care a ofertat procentul de diminuare cel mai mare pentru fiecare categorie de analize medicale. Pentru furnizorii care au propus procente de diminuare mai mici faţă de procentul de diminuare cel mai mare se acordă un punctaj proporţional în funcţie de primul clasat.

Pentru furnizorii de servicii medicale de laborator care participă cu mai multe laboratoare/puncte de lucru la contractare, punctajul se acordă o singură dată pentru toate analizele medicale, indiferent de numărul laboratoarelor/punctelor de lucru cu care furnizorul intră în contract.

Punctajul obţinut de fiecare furnizor prin aplicarea acestui criteriu se afişează pe pagina web a casei de asigurări de sănătate.

Sumele se stabilesc pentru fiecare furnizor astfel:

A. Fondul cu destinaţia de analize medicale de laborator se repartizează pentru fiecare criteriu în parte, astfel:

a) 45% pentru criteriul de evaluare resurse;

b) 50% pentru criteriul de calitate, din care 70% pentru subcriteriul "implementarea sistemului de management al calităţii" şi 30% pentru subcriteriul "participare la schemele de testare a competenţei pentru laboratoare de analize medicale";

c) 5% pentru criteriul financiar.

B. Pentru fiecare criteriu/subcriteriu se stabileşte numărul total de puncte obţinut prin însumarea numărului de puncte obţinut de fiecare furnizor, cu excepţia numărului total de puncte obţinut de furnizorii de servicii medicale spitaliceşti care efectuează investigaţii medicale paraclinice - analize medicale de laborator în regim ambulatoriu şi de laboratoarele de analize medicale / punctele de lucru ale acestora organizate ca urmare a procedurii de externalizare.

C. Se calculează valoarea unui punct pentru fiecare criteriu/subcriteriu prin împărţirea sumei rezultate ca urmare a aplicării procentelor prevăzute la lit. A la numărul de puncte corespunzător fiecărui criteriu/subcriteriu, număr stabilit conform lit. B.

D. Valoarea unui punct obţinută pentru fiecare dintre criteriile/subcriteriile prevăzute la lit. A se înmulţeşte cu numărul de puncte obţinut de un furnizor corespunzător fiecărui criteriu/subcriteriu, rezultând sumele aferente fiecărui criteriu/subcriteriu pentru fiecare furnizor.

E. Valoarea totală contractată de un furnizor cu casa de asigurări de sănătate se obţine prin însumarea sumelor stabilite conform lit. D.

F. Criteriile şi modalitatea de calcul se aplică în acelaşi mod şi pentru furnizorii de servicii medicale paraclinice pentru laboratoarele/punctele de lucru ale acestora organizate ca urmare a procedurii de externalizare şi care efectuează investigaţii medicale paraclinice - analize medicale de laborator în regim ambulatoriu, precum şi pentru furnizorii de servicii medicale spitaliceşti care efectuează investigaţii medicale paraclinice - analize medicale de laborator în regim ambulatoriu.

Valoarea unui punct obţinută pentru fiecare dintre criteriile/subcriteriile prevăzute la lit. A se înmulţeşte cu numărul de puncte obţinut de un furnizor corespunzător fiecărui criteriu/subcriteriu, rezultând sumele aferente fiecărui criteriu/subcriteriu pentru fiecare furnizor.

Sumele care rezultă pentru aceşti furnizori se contractează şi se decontează din fondul alocat pentru asistenţa medicală spitalicească.

NOTA 1: În funcţie de necesarul de investigaţii medicale paraclinice - analize medicale de laborator, pe tipuri, suma aferentă investigaţiilor medicale paraclinice - analize medicale de laborator - poate fi repartizată de casele de asigurări de sănătate pe tipuri de servicii medicale paraclinice de laborator, astfel:

- analize medicale de laborator;
- analize de anatomie patologică (histopatologice şi de citologie, inclusiv examenul Babeş Papanicolau)

G. Casele de asigurări de sănătate, ca urmare a stabilirii numărului necesar de investigaţii medicale paraclinice - analize medicale de laborator pe total judeţ - de către comisia constituită conform art. 44 alin. (5) din Contractul-cadru vor stabili suma ce se va contracta cu furnizorii de investigaţii medicale paraclinice de anatomie patologică din totalul fondului cu destinaţia de servicii medicale paraclinice - analize medicale de laborator.

Pentru furnizorii de investigaţii medicale paraclinice - laboratoare de anatomie patologică - criteriile specifice de selecţie se aplică în mod corespunzător (numai analizele, aparatele şi personalul specific).

1. Numărul de investigaţii de radiologie-imagistică medicală se stabileşte la nivelul fiecărui judeţ de către comisia înfiinţată conform art. 44 alin. (5) din Contractul-cadru aprobat pentru anii 2011 – 2012 aprobat prin H.G. nr. 1389/2010, cu modificările şi completările ulterioare.

2. La stabilirea numărului de investigaţii medicale paraclinice de radiologie-imagistică medicală şi a sumelor ce se contractează cu furnizorii de investigaţii medicale paraclinice de radiologie-imagistică medicală se au în vedere următoarele criterii:

1. criteriul de evaluare a resurselor	85%
2. criteriul financiar	5%
3. criteriul de disponibilitate	10%

1. Criteriul de evaluare a resurselor

Ponderea acestui criteriu este de 85%

Ca urmare a aplicării metodologiei de stabilire a punctajului, fiecare furnizor de investigaţii medicale paraclinice de radiologie-imagistică medicală obţine un punctaj corespunzător acestui criteriu.

Metodologia de stabilire a punctajului:

A. Evaluarea capacităţii resurselor tehnice

a) Furnizorii de servicii medicale paraclinice - radiologie şi imagistică medicală sunt obligaţi să facă dovada deţinerii legale a aparaturii prin documente conforme şi în termen de valabilitate.

b) Casele de asigurări de sănătate sunt obligate să verifice dacă seria şi numărul aparatului existent în cadrul laboratorului sunt conforme cu seria şi numărul aparatului înscrise în cuprinsul documentelor care atestă existenţa şi deţinerea legală a acestora.

c) Furnizorii sunt obligaţi să prezinte toate fişele tehnice corespunzătoare aparatelor deţinute şi pentru care încheie contract de furnizare de servicii cu casa de asigurări de sănătate.

d) Nu sunt luate în calcul aparatele care nu au înscrise pe ele seria şi numărul, şi nici aparatele pentru care furnizorii nu pot prezenta fişele tehnice conforme şi în termen de valabilitate ale acestora.

e) Dacă doi sau mai mulţi furnizori prezintă aparate înregistrate cu aceeaşi serie şi număr înainte sau în perioada de contractare, acestea sunt excluse definitiv şi nu se mai iau în calcul la nici unul dintre furnizori.

Fac excepţie furnizorii de servicii medicale paraclinice - radiologie şi imagistică care îşi desfăşoară activitatea utilizând acelaşi spaţiu şi aceleaşi echipamente specifice deţinute şi/sau utilizate în comun în condiţiile legii, cu prezentarea documentelor justificative prevăzute de actele normative în vigoare şi numai în condiţiile în care personalul medical de specialitate al fiecărui furnizor îşi desfăşoară activitatea cu respectarea dispoziţiilor

g) Pentru a putea fi luate în considerare, aparatele trebuie să fie în perfectă stare de funcţionare, certificată cu documentele care atestă verificarea parametrilor funcţionali în termenul prevăzut de lege pentru fiecare tip de aparat.

h) Furnizorii au obligaţia să prezinte la contractare, respectiv pe parcursul derulării contractului de furnizare de servicii medicale: avizul de utilizare sau buletinul de verificare periodică, emise conform prevederilor legale în vigoare, pentru aparatura din dotare. Această prevedere reprezintă condiţie de eligibilitate pentru aparatul/aparatele respective, în vederea atribuirii punctajului conform metodologiei de mai jos, respectiv a menţinerii sumelor rezultate din aplicarea acestuia.

Criteriul financiar se referă la tarifele propuse de furnizorii de investigaţii paraclinice de radiologie-imagistică, cu încadrarea obligatorie în tarifele maximale prevăzute în anexa nr. 7 la ordin.

Furnizorii de servicii medicale de radiologie-imagistică care prezintă tarife ce depăşesc tarifele maximale decontate de casele de asigurări de sănătate cuprinse în anexa nr. 7 la ordin sunt respinşi de la contractare.

a. Pentru încheierea contractului cu casa de asigurări de sănătate, furnizorii de investigaţii de radiologie-imagistică medicală prezintă în ofertă procentul cu care propun

diminuarea tarifelor maximale prevăzute în anexa nr. 7 la ordin, pentru fiecare tip de investigaţii, procent care nu poate depăşi 5% din tariful maximal.

b. Tarifele rezultate ca urmare a aplicării procentului de diminuare cel mai mare propus pentru fiecare tip de investigaţii reprezintă tarifele care se contractează cu toţi furnizorii de investigaţii de radiologie-imagistică medicală.

c. Acest criteriu este apreciat cu un punctaj de maximum 100. Punctajul 100 se acordă furnizorului care a ofertat procentul de diminuare cel mai mare pentru fiecare tip de investigaţii. Pentru furnizorii care au propus procente de diminuare mai mici faţă de procentul de diminuare cel mai mare se acordă un punctaj proporţional în funcţie de primul clasat.

d. Punctajul obţinut de fiecare furnizor prin aplicarea acestui criteriu se afişează pe pagina web a casei de asigurări de sănătate.

3. Criteriul de disponibilitate

Ponderea acestui criteriu este de 10%.

Punctajul se acordă astfel:

- pentru furnizorii care asigură un program prelungit de 12 ore zilnic, inclusiv sâmbătă, duminică şi sărbători legale se adaugă - 30 puncte
- pentru furnizorii care asigură un program zilnic de minimum 2 norme se adaugă - 100 puncte

Pentru furnizorii de servicii medicale de radiologie-imagistică medicală care participă cu mai multe laboratoare/puncte de lucru la contractare, punctajul se acordă pentru fiecare laborator/punct de lucru.

Punctajul obţinut de fiecare furnizor prin aplicarea acestui criteriu se afişează pe pagina web a casei de asigurări de sănătate.

Sumele se stabilesc pentru fiecare furnizor astfel:

A. Fondul cu destinaţie de investigaţii medicale paraclinice de radiologie-imagistică medicală se repartizează pentru fiecare criteriu în parte, astfel:

a) 85% pentru criteriul de evaluare;

b) 5% pentru criteriul financiar;

c) 10% criteriul de disponibilitate.

B. Pentru fiecare criteriu se stabileşte numărul total de puncte obţinut prin însumarea numărului de puncte obţinut de fiecare furnizor la cele trei criterii, cu excepţia numărului total de puncte obţinut de furnizorii de servicii medicale spitaliceşti care efectuează investigaţii de radiologie şi imagistică medicală în regim ambulatoriu şi de laboratoarele de radiologie şi imagistică medicală / punctele de lucru ale acestora organizate ca urmare a procedurii de externalizare.

C. Se calculează valoarea unui punct pentru fiecare criteriu prin împărţirea sumei rezultate ca urmare a aplicării procentelor prevăzute la lit. A la numărul total de puncte corespunzător fiecărui criteriu, număr stabilit conform lit. B.

D. Valoarea unui punct obţinută pentru fiecare dintre cele 3 criterii se înmulţeşte cu numărul de puncte obţinut de un furnizor pentru fiecare criteriu, rezultând sume aferente fiecărui criteriu pentru fiecare furnizor.

E. Valoarea totală contractată de un furnizor cu casa de asigurări de sănătate se obţine prin însumarea celor trei sume stabilite conform lit. D.

F. Criteriile şi modalitatea de calcul se aplică în acelaşi mod şi pentru furnizorii de servicii paraclinice de radiologie-imagistică pentru laboratoarele/punctele de lucru ale acestora organizate ca urmare a procedurii de externalizare şi care efectuează investigaţii paraclinice de radiologie-imagistică în regim ambulatoriu, precum şi pentru furnizorii de

servicii medicale spitaliceşti care efectuează investigaţii paraclinice de radiologie-imagistică în regim ambulatoriu.

Valoarea unui punct obţinută pentru fiecare dintre criteriile/subcriteriile prevăzute la lit. A se înmulţeşte cu numărul de puncte obţinut de un furnizor corespunzător fiecărui criteriu, rezultând sumele aferente fiecărui criteriu pentru fiecare furnizor.

Sumele care rezultă pentru aceşti furnizori se contractează şi se decontează din fondul alocat pentru asistenţa medicală spitalicească.

G. Casele de asigurări de sănătate, ca urmare a stabilirii numărului necesar de investigaţii paraclinice de radiologie-imagistică medicală pe total judeţ - de către comisia constituită conform art. 44 alin. (5) din Contractul-cadru pentru anii 2011 – 2012 aprobat prin H.G. nr. 1389/2010, cu modificările şi completările ulterioare, vor stabili suma ce se va contracta cu furnizorii de explorări funcţionale din totalul fondului cu destinaţia de servicii paraclinice de radiologie-imagistică medicală.

Pentru furnizorii de explorări funcţionale - criteriile specifice de selecţie se aplică în mod corespunzător (numai investigaţiile, aparatele şi personalul specific).

H. În situaţia în care niciunul dintre furnizori nu îndeplineşte criteriul de disponibilitate, suma corespunzătoare aplicării prevederilor lit. A lit. c) se repartizează proporţional la celelalte criterii prevăzute la lit. A lit. a) - b).

CAPITOLUL II Pachet minimal de servicii medicale în asistenţa medicală spitalicească

În situaţia în care pacientul nu poate dovedi achitarea la zi a contribuţiei datorate la fond, spitalul acordă serviciile medicale pentru situaţiile de urgenţă având obligaţia să

evalueze situaţia medicală a pacientului şi să îl externeze dacă serviciile medicale de urgenţă nu se mai justifică. La solicitarea pacientului se poate continua internarea cu suportarea cheltuielilor aferente serviciilor medicale spitaliceşti de către acesta.

Criteriile pe baza cărora se efectuează internarea pacienţilor beneficiari ai pachetului minimal de servicii medicale sunt:

- situaţiile de urgenţă medico-chirurgicală în care este pusă în pericol viaţa pacientului sau care au acest potenţial până la rezolvarea situaţiei de urgenţă;
- boli cu potenţial endemo-epidemic până la rezolvarea completă a cazului.

CAPITOLUL III Pachet de servicii medicale spitaliceşti pentru persoanele care se asigură facultativ pentru sănătate

- urgenţe medico-chirurgicale în care este pusă în pericol viaţa pacientului sau care au acest potenţial, până la rezolvarea situaţiei de urgenţă;
- boli cu potenţial endemo-epidemic până la rezolvarea completă a cazului.
- tratamentul bolnavilor psihic prevăzuţi la art. 105, 113 şi 114 din Codul penal şi în cazurile dispuse prin ordonanţă a procurorului pe timpul judecării sau urmăririi penale, care necesită izolare sau internare obligatorie;
- naşterea;
- diagnosticul şi tratamentul nu pot fi monitorizate în ambulatoriu.

ART. 1 Serviciile medicale spitaliceşti de care beneficiază asiguraţii sunt: servicii medicale spitaliceşti pentru patologie care necesită internare prin spitalizare continuă şi spitalizare de zi.

ART. 2 Serviciile medicale spitaliceşti se acordă sub formă de:

1. servicii medicale spitaliceşti acordate în regim de spitalizare continuă - forma de internare prin care se acordă asistenţă medicală preventivă, curativă, de recuperare şi paliativă pe toată durata necesară rezolvării complete a cazului respectiv;

2. servicii medicale spitaliceşti acordate în regim de spitalizare de zi - reprezintă o alternativă la spitalizarea continuă pentru pacienţii care nu necesită supraveghere medicală mai mare de 12 ore şi pot fi servicii medicale programabile sau neprogramabile.

ART. 3 Serviciile medicale spitaliceşti ce se pot acorda în regim de spitalizare de zi în unităţile sanitare care nu încheie contract de furnizare de servicii medicale spitaliceşti în spitalizare continuă, autorizate de Ministerul Sănătăţii, fac obiectul unui contract pentru furnizare de servicii medicale spitaliceşti acordate în regim de spitalizare de zi, Contractul se adaptează după modelul de contract de furnizare de servicii medicale spitaliceşti prevăzut în anexa nr. 20 la ordin.

Tarifele/servicii medicale se negociază pe baza propunerilor de oferte ale furnizorilor de servicii medicale, având în vedere documentele pentru fundamentarea tarifului, şi nu pot fi mai mari decât tarifele maximale decontate de casele de asigurări de sănătate, prevăzute în anexa nr. 16 la ordin.

Tariful/caz rezolvat se negociază de unităţile sanitare cu casele de asigurări de sănătate, având în vedere documentele pentru fundamentarea tarifului, şi nu poate fi mai mare de:

- 1/3 din tariful cel mai mic dintre: tariful pe caz rezolvat din sistemul DRG şi tariful mediu pe caz rezolvat, pentru serviciile medicale acordate în regim de spitalizare continuă, aferent spitalelor aflate în relaţie contractuală cu casa de asigurări de sănătate.

ART. 4 (1) Furnizarea de servicii medicale spitaliceşti se acordă în baza contractelor şi a actelor adiţionale încheiate de spitale cu casele de asigurări de sănătate, având în vedere următorii indicatori specifici spitalelor, după caz:

2. număr de paturi stabilit potrivit structurii organizatorice a spitalelor aprobată sau avizată, după caz, de Ministerul Sănătăţii, în condiţiile legii;

3. indicele mediu de utilizare a paturilor la nivel naţional şi în conformitate cu planul de paturi aprobat la nivel judeţean stabilit prin ordin al ministrului sănătăţii; indicele mediu de utilizare a paturilor la nivel naţional luată în calcul la stabilirea capacităţii maxime a spitalelor, în funcţie de clasificarea acestora este de 294,7 zile.

4. număr de zile de spitalizare, total şi pe secţii, stabilit pe baza ratei medii de utilizare a paturilor la nivel naţional pe tipuri de solicitare;

5. durată optimă de spitalizare / durata de spitalizare efectiv realizată / durată medie de spitalizare la nivel naţional în secţiile pentru afecţiuni acute, după caz;

6. număr de cazuri externate - spitalizare continuă, calculat la capacitatea maximă de funcţionare a spitalului, potrivit structurii organizatorice a spitalului aprobată sau avizată, după caz, de Ministerul Sănătăţii şi normativelor în vigoare, pe secţii şi compartimente;

7. indice de complexitate a cazurilor;

5. numărul de cazuri de urgenţă medico/chirurgicală prezentate în structurile de urgenţă (camere de gardă), din care numărul cazurilor internate;

6. gradul de realizare a indicatorilor de management contractaţi pentru anul 2010 , sau pentru perioada corespunzătoare, după caz.

(2) Spitalele vor prezenta caselor de asigurări de sănătate, în vederea contractării, nivelul indicatorilor de performanţă ai managementului spitalului public asumaţi prin contractul de management, cu excepţia spitalelor care au manager interimar.

(3) Spitalele vor prezenta, în vederea contractării, defalcarea cazurilor de spitalizare estimate pe fiecare secţie şi pe tip de bolnavi: urgenţa, acut, cronic. În vederea contractării serviciilor spitaliceşti efectuate prin spitalizare de zi spitalele prezintă distinct numărul serviciilor medicale (cazurilor) estimate a se efectua în camera de gardă şi în structurile de urgenţă din cadrul spitalelor, altele decât spitalele de urgenţă, pentru cazurile neinternate.

(4) Casele de asigurări de sănătate încheie cu spitalele contracte de furnizare de servicii medicale spitaliceşti luând în calcul numărul maxim de paturi, în condiţiile prevederilor Hotărârii de Guvern privind aprobarea Planului naţional de paturi pentru perioada 2011 – 2013

(5) Cazurile internate prin spitalizare continuă ca şi cazuri de urgenţă vor fi codificate la externare conform reperelor prevăzute la literele A şi B ale cap.I din anexa nr. 21 la ordin.

ART. 5 (1) Valoarea totală contractată de spitale cu casele de asigurări de sănătate se constituie din următoarele sume, după caz:

a) suma aferentă serviciilor medicale spitaliceşti ,pentru afecţiunile acute, a căror plată se face pe bază de tarif pe caz rezolvat (DRG) pentru spitalele finanţate în sistem DRG, respectiv tarif mediu pe caz rezolvat pentru spitalele non-DRG, se stabileşte astfel:

- număr de cazuri externate x indice case-mix Rovi DRG 2011 x tarif pe caz ponderat pentru anul 2011,

respectiv

- număr de cazuri externate x tarif mediu pe caz rezolvat pe specialităţi

La calculul acestei sume se vor avea în vedere:

a1) Suma maxima posibil de contractat (Sp) în funcţie de capacitatea maximă de funcţionare a fiecărui spital calculată în conformitate cu prevederile Ordinului comun al ministrului sănătăţii şi preşedintelui Casei Naţionale de Asigurări de Sănătate nr. 862/547/2011 privind stabilirea sumelor minime contractate de spitale cu casele de asigurări de sănătate pentru serviciile de spitalizare continuă pentru pacienţi acuţi, pe baza clasificării spitalelor în funcţie de competenţă .

La calcularea formulei prevăzute în alin.(1) al art. 3 din anexa la Ordinul 862/547/2011, numărul de paturi aprobate şi contractabile după aplicarea prevederilor Planului Naţional de Paturi se stabileşte, de către o comisie formată din reprezentanţi ai casei de asigurări de sănătate şi ai direcţiei de sănătate publică / direcţiile medicale sau de structurile similare din ministerele şi instituţiile centrale cu reţea sanitară proprie.

Pentru anul 2011, numărul de cazuri externate calculat conform formulei prevăzute în alin.(1) al art. 3 din anexa la Ordinul 862/547/2011 nu poate fi mai mare decât numărul mediu lunar de cazuri externate şi validate în anul precedent x 7 luni.

a2) Suma minimă contractată (Sm) de fiecare spital cu casa de asigurări de sănătate, pentru servicii de spitalizare continuă pentru afecţiuni acute, în funcţie de categoria în care este clasificat spitalul, calculată în conformitate cu prevederile Ordinului comun al ministrului sănătăţii şi preşedintelui Casei Naţionale de Asigurări de Sănătate nr. 862/547/2011 privind stabilirea sumelor minime contractate de spitale cu casele de asigurări de sănătate pentru serviciile de spitalizare continuă pentru pacienţi acuţi, pe baza clasificării spitalelor în funcţie de competenţă

Pentru spitalele non-DRG sau nou intrate in contractare în formulele de mai sus ICM-ul şi TCP-ul se înlocuiesc cu media ponderată calculată la tariful mediu pe caz rezolvat negociat pe specialităţi şi la numarul de cazuri externate pe fiecare specialitate ţinând cont de valoarea procentului de referinţă pentru categoria în care se clasifică spitalul, în conformitate cu prevederile Ordinului comun al ministrului sănătăţii şi preşedintelui Casei Naţionale de Asigurări de Sănătate nr. 862/547/2011 privind stabilirea sumelor minime contractate de spitale cu casele de asigurări de sănătate pentru serviciile de spitalizare continuă pentru pacienţi acuţi, pe baza clasificării spitalelor în funcţie de competenţă.

a3) Suma suplimentară (Ss) ce poate fi contractată peste cea minimă, la nivelul fiecărui spital, în limita fondurilor disponibile la nivelul casei de asigurări de sănătate, cu respectarea prevederilor art. 4 alin. (4) se stabileşte luând în calcul:

număr cazuri externate în anul 2010 (calculat ca număr mediu lunar de cazuri externate şi validate în anul 2010 x 7 luni) x (ICM x TCP, în anul 2011) pentru fiecare spital. Nu se reduc cazurile de urgenta estimate a se interna luând in calcul datele ultimilor 3 ani.

Pentru spitalele non-DRG în formula de mai sus ICM-ul şi TCP-ul se înlocuiesc cu media ponderată calculată la tariful mediu pe caz rezolvat negociat pe specialităţi şi la numarul de cazuri externate pe fiecare specialitate.

a4) Număr de cazuri externate ce poate fi contractat:

La negocierea numărului de cazuri externate pe spital şi pe secţie se vor avea în vedere:

a4.1- numărul de cazuri externate calculat la suma minimă = Sm / (ICMxTCP aferente fiecărui spital); rezultatul se rotunjeşte la număr întreg (în plus).

Pentru spitalele non-DRG în formula de mai sus ICM-ul şi TCP-ul se înlocuiesc cu media ponderată calculată la tariful mediu pe caz rezolvat negociat pe specialităţi şi la numarul de cazuri externate pe fiecare specialitate.

a4.2. Număr de cazuri externate suplimentar contractat / spital = (Suma suplimentară contractată / (ICM x TCP aferente spitalului şi prevăzute în Anexa 17A)); rezultatul se rotunjeşte la număr întreg (în plus).

Pentru spitalele non-DRG sau nou intrate în contracatare în formula de mai sus ICM-ul şi TCP-ul se înlocuiesc cu media ponderată calculată la tariful mediu pe caz rezolvat negociat pe specialităţi şi la numarul de cazuri externate pe fiecare specialitate ţinând cont de valoarea procentului de referinţă pentru categoria în care se clasifică spitalul, în conformitate cu prevederile Ordinului comun al ministrului sănătăţii şi preşedintelui Casei Naţionale de Asigurări de Sănătate nr. 862/547/2011 privind stabilirea sumelor minime contractate de spitale cu casele de asigurări de sănătate pentru serviciile de spitalizare continuă pentru pacienţi acuţi, pe baza clasificării spitalelor în funcţie de competenţă.

a4.3. Numărul anual de cazuri externate negociat şi contractat se defalcă pe trimestre. La stabilirea numărului de cazuri externate contractate pe spital se ţine seama şi de modul de realizare a indicatorilor calitativi din anul precedent; în acest scop, spitalele organizează şi raportează trimestrial evidenţa acestor indicatori, caselor de asigurări de sănătate şi direcţiilor de sănătate publică.

a5) Indicele de case-mix RoVi DRG 2011 se calculează pentru fiecare spital pe baza numărului şi a tipurilor de cazuri raportate în perioada 1 ianuarie 2011 - 30 aprilie 2011. Numărul de cazuri ponderate se obţine prin înmulţirea numărului negociat de cazuri externate cu indicele de case-mix.

Indicele de case-mix este prezentat în anexa nr. 17 A la ordin.

a6) Tariful pe caz ponderat pentru anul 2011 este prezentat în anexa nr. 17 A la ordin şi se stabileşte pentru fiecare spital.

Lista cuprinzând categoriile majore de diagnostice, tipurile de cazuri ce sunt decontate (grupele de diagnostice, valorile relative, durata medie de spitalizare la nivel naţional, limitele superioare şi inferioare ale intervalului de normalitate al duratei de spitalizare pentru fiecare grupă de diagnostic, mediana duratei de spitalizare in sectiile ATI - naţional, precum şi definirea termenilor utilizaţi) sunt prevăzute în anexa nr. 17 B la ordin.

În situaţia în care unul din spitalele prevăzute în anexa nr. 17 A la ordin are în structură secţii/compartimente de cronici, recuperare şi neonatologie - prematuri sau îngrijiri paliative, contractarea acestor servicii se efectuează conform prevederilor de la lit. b);

a7) Tarif mediu pe caz rezolvat pe specialităţi

Tariful mediu pe caz rezolvat se stabileşte prin negociere între furnizori şi casele de asigurări de sănătate având în vedere documentele pentru fundamentarea tarifului şi indicatorul cost mediu cu medicamentele pe caz externat pe anul 2010 şi sumele aprobate la nivelul casei de asigurări de sănătate cu destinaţia servicii medicale spitaliceşti. Tariful mediu pe caz rezolvat pe specialităţi negociat nu poate fi mai mare decât tariful maximal prevăzut în anexa nr. 17 C la ordin.

În situaţia în care unul din spitale are în structură secţii/compartimente de cronici, recuperare şi neonatologie - prematuri şi îngrijiri paliative, contractarea acestor servicii se efectuează conform prevederilor lit. b).

b) suma pentru spitalele de cronici şi de recuperare, precum şi pentru secţiile şi compartimentele de cronici, recuperare şi neonatologie - prematuri (prevăzute ca structuri distincte în structura spitalului aprobată/avizată de Ministerul Sănătăţii) din alte spitale, care se stabileşte astfel:

- număr de cazuri externate x durata optimă de spitalizare sau, după caz, durata efectiv realizată x tariful pe zi de spitalizare

1. Numărul de cazuri externate

Numărul de cazuri externate pe spitale/secţii/compartimente se negociază în funcţie de:

- media cazurilor externate în ultimii 5 ani la nivelul spitalului (ţinându-se cont de modificările de structură aprobate/avizate de Ministerul Sănătăţii, după caz) şi al judeţului;

- cazurile estimate a fi externate pe spital şi pe secţie în anul 2011, în funcţie de numărul de paturi aprobat, de rata medie de utilizare a paturilor la spitalul/secţia/compartimentul respectiv şi de durata optimă de spitalizare sau, după caz, durata de spitalizare efectiv realizată, pentru secţiile/compartimentele unde aceasta a fost mai mică decât cea optimă, dar nu mai mică de 75% faţă de aceasta, cu respectarea prevederilor art. 4 alin. (1) lit. a), după caz.

Numărul anual de cazuri externate negociat se defalcă pe trimestre. La stabilirea numărului de cazuri externate contractate pe spital/secţie/compartiment se ţine seama de modul de realizare a indicatorilor calitativi din anul precedent; în acest scop, spitalele vor ţine evidenţa acestor indicatori.

2. Durata optimă de spitalizare stabilită de către comisiile de specialitate ale Ministerului Sănătăţii pe secţii este valabilă pentru toate categoriile de spitale şi este prevăzută în anexa nr. 19 la ordin. Pentru secţiile/spitalele de psihiatrie cronici cu internări obligatorii pentru bolnavii psihici prevăzuţi la art. 105, 113 şi 114 din Codul penal şi cele dispuse prin ordonanţa procurorului pe timpul judecării sau urmăririi penale, precum şi pentru bolnavii care necesită asistenţă medicală spitalicească de lungă durată (ani) se ia în considerare durata medie de spitalizare efectiv realizată în anul precedent.

3. Tariful pe zi de spitalizare pe secţie/compartiment se negociază pe baza tarifului pe zi de spitalizare propus de fiecare spital pentru secţiile şi compartimentele din structura proprie, având în vedere documentele pentru fundamentarea tarifului, în funcţie de particularităţile aferente fiecărui tip de spital, cu încadrarea în sumele aprobate la nivelul casei de asigurări de sănătate cu destinaţie servicii medicale spitaliceşti. Tarifele pe zi de spitalizare negociate nu pot fi mai mari decât tarifele maximale prevăzute în anexa nr. 17 C la ordin.

4. Pentru secţiile medicale, numărul de cazuri externate, obţinut în condiţiile prevăzute mai sus, se poate diminua prin negociere între furnizori şi casele de asigurări de sănătate, cu numărul de internări corespunzătoare anului 2010 pentru care nu se justifică internarea.

Pentru situaţiile în care se constată reinternarea cazului externat, pentru patologie de acelaşi tip, în termen de 48 de ore de la externare, numărul de cazuri externate care pot fi contractate se diminuează corespunzător.

5. Casele de asigurări de sănătate contractează servicii medicale paliative în regim de spitalizare continuă dacă acestea nu pot fi efectuate în condiţiile asistenţei medicale la domiciliu.

Suma aferentă serviciilor medicale paliative se stabileşte astfel:

Număr de paturi x număr de zile calendaristice dintr-un an estimat a fi ocupat un pat x tariful pe zi de spitalizare negociat. Tariful pe zi de spitalizare negociat nu poate fi mai mare decât tariful maximal prevăzute în anexa nr. 17 C la ordin.

c) suma aferentă Programului naţional cu scop curativ pentru medicamente şi materiale sanitare specifice, finanţată din fondul alocat pentru programul naţional cu scop curativ, care face obiectul unui contract distinct, al cărui model este prevăzut în normele tehnice de realizare a programelor naţionale de sănătate, aprobate prin ordin al ministrului sănătăţii şi al preşedintelui Casei Naţionale de Asigurări de Sănătate;

d) suma pentru serviciile de supleere renală, inclusiv medicamente şi materiale sanitare specifice, transportul nemedicalizat al pacienţilor hemodializaţi de la şi la domiciliul pacienţilor, transportul lunar al medicamentelor şi al materialelor sanitare specifice dializei peritoneale la domiciliul pacienţilor, acordate în cadrul programului naţional de supleere a funcţiei renale la bolnavii cu insuficienţă renală cronică din cadrul Programului naţional cu scop curativ, care face obiectul unui contract distinct, al cărui model este prevăzut în

normele tehnice de realizare a programelor naţionale de sănătate, aprobate prin ordin al ministrului sănătăţii şi al preşedintelui Casei Naţionale de Asigurări de Sănătate;

e) suma pentru serviciile medicale efectuate în cabinete medicale de specialitate în: oncologie medicală, diabet zaharat, nutriţie şi boli metabolice în cabinete de planificare familială în care îşi desfăşoară activitatea medici cu specialitatea obstetrică-ginecologie şi în cabinete de boli infecţioase, care se află în structura spitalului ca unităţi fără personalitate juridică, precum şi în cabinete medicale de specialitate din ambulatoriul integrat al spitalului, finanţate din fondul alocat asistenţei medicale ambulatorii de specialitate pentru specialităţile clinice, conform anexei nr. 8 la ordin, respectiv din fondul alocat asistenţei medicale spitaliceşti pentru cabinetele prevăzute la art. 48 alin. (4) lit. b) din Contractul-cadru;

f) suma pentru investigaţii paraclinice efectuate în regim ambulatoriu, finanţată din fondul alocat asistenţei medicale spitaliceşti, stabilită conform prevederilor din anexa nr. 8 la ordin;

g) suma pentru serviciile medicale spitaliceşti efectuate în regim de spitalizare de zi pentru care plata se face prin tarif pe serviciu medical/caz rezolvat şi care se determină prin înmulţirea numărului negociat şi contractat de servicii medicale spitaliceşti pe tipuri/cazuri rezolvate cu tariful aferent acestora. Tariful pe serviciu medical se negociază între spitale şi casele de asigurări de sănătate şi nu poate fi mai mare decât tarifele maximale decontate de casele de asigurări de sănătate, prevăzute în anexa nr. 16 la ordin.

Pentru unităţile sanitare cu paturi care încheie contract de furnizare de servicii medicale spitaliceşti cu casa de asigurări de sănătate atât pentru spitalizare continuă cât şi pentru spitalizare de zi, tariful pe caz rezolvat se negociază între spitale şi casele de asigurări de sănătate şi nu poate fi mai mare de:

- 1/3 din tariful pe caz rezolvat pentru serviciile medicale acordate în regim de spitalizare continuă aferent spitalului respectiv - pentru spitalele finanţate în sistem DRG;

- 1/3 din tariful mediu pe caz rezolvat cel mai mic pentru serviciile medicale acordate în regim de spitalizare continuă aferent spitalului aflat în relaţie contractuală cu casa de asigurări de sănătate - pentru spitalele finanţate prin tarif mediu pe caz rezolvat pe specialităţi.

- 1/3 din tariful cel mai mic pe caz rezolvat dintre: tariful pe caz rezolvat din sistemul DRG şi tariful mediu pe caz rezolvat, pentru serviciile medicale acordate în regim de spitalizare continuă, de la nivelul fiecărei case de asigurări de sănătate - pentru spitalele de cronici şi de recuperare, precum şi pentru secţiile şi compartimentele de cronici, recuperare şi neonatologie - prematuri (prevăzute ca structuri distincte în structura spitalului aprobată/avizată de Ministerul Sănătăţii, după caz) din alte spitale.

Suma contractată de către spital pentru servicii de spitalizare de zi, nu poate depăşi 25% din suma contractată pentru servicii de spitalizare continuă, astfel:

- pentru spitalele care în anul 2010 au realizat valori ale indicatorilor contractaţi în regim de spitalizare de zi şi care au fost decontate de către casele de asigurări de sănătate, mai mari de 25% faţă de valoarea decontată pentru indicatorii realizaţi în regim de spitalizare continuă, casele de asigurări contractează indicatori pentru activitatea de spitalizare de zi pentru anul 2011, în limita a maxim 25%, cu excepţia unităţilor sanitare de monospecialitate, care derulează programe naţionale de sănătate.

- pentru spitalele care în anul 2010 au realizat valori ale indicatorilor contractaţi în regim de spitalizare de zi şi care au fost decontate de către casele de asigurări de sănătate, mai mici de 25% faţă de valoarea decontată pentru indicatorii realizaţi în regim de spitalizare continuă, casele de asigurări contractează indicatori pentru activitatea de spitalizare de zi pentru anul 2011, cu creştere de maxim 5% peste valoarea anului 2010, dar fără a depăşi 25% din valoarea totală contractată pentru spitalizare continuă.

(2) Sumele de la lit. c) şi d) ale alin. (1) sunt prevăzute în contracte distincte. Sumele de la lit. e) şi f) ale alin. (1) sunt prevăzute distinct în actele adiţionale la contractul de furnizare de servicii medicale spitaliceşti.

(3) Cheltuielile ocazionate de activităţile desfăşurate în camera de gardă şi în structurile de urgenţă din cadrul spitalelor, altele decât spitalele de urgenţă, pentru cazurile care sunt internate prin spitalizare continuă, sunt cuprinse în structura tarifului pe caz rezolvat.

Cazurile pentru care se acordă servicii medicale în aceste structuri din cadrul spitalelor, sunt considerate cazuri rezolvate în regim de spitalizare de zi numai pentru cazurile neinternate prin spitalizare continuă, şi sunt decontate prin tarif pe caz rezolvat. Numărul de cazuri şi tariful aferent acestora se negociază cu casele de asigurări de sănătate, fiind suportate din fondul aferent asistenţei medicale spitaliceşti. Sumele contractate pentru cazurile rezolvate în regim de spitalizare de zi în cadrul acestor structuri se evidenţiază distinct în contractul de furnizare de servicii medicale spitaliceşti încheiat cu casa de asigurări de sănătate.

ART. 6 (1) La contractarea serviciilor medicale spitaliceşti casele de asigurări de sănătate vor avea în vedere 94% din fondurile aprobate cu această destinaţie la nivelul casei de asigurări de sănătate după ce s-a dedus suma aferentă serviciilor medicale paraclinice ce se pot efectua în ambulatoriu de către unităţile sanitare cu paturi şi de către furnizorii de servicii medicale - investigaţii paraclinice în laboratoarele/punctele de lucru din structura acestora organizate ca urmare a procedurii de externalizare.

(2) Diferenţa de 6% din fondul cu destinaţie servicii medicale spitaliceşti ce nu a fost contractată iniţial se utilizează astfel:

a) 5% pentru:

- decontarea serviciilor prevăzute la art. 48 alin. (4) lit. b) din Contractul-cadru,
- decontarea cazurilor externate prevăzute la art. 75 din Contractul-cadru,
- decontarea sumelor reprezentând depăşirea valorii trimestriale de contract cu maximum 5% din valoarea acesteia pentru spitalele de urgenţă
- alte situaţii justificate ce pot apărea în derularea contractelor încheiate cu furnizorii de servicii medicale spitaliceşti, după caz.

b) 1% pentru complexitate suplimentară a cazurilor în ceea ce priveşte comorbiditatea şi numărul de zile de îngrijiri acordate în cadrul secţiilor / compartimentelor de terapie intensivă. Suma se alocă numai spitalelor care îndeplinesc cumulativ următoarele criterii:

- prezenţa permanentă a cel puţin unui medic în cadrul secţiei/compartimentului de terapie intensivă
- prezenţa permanentă a unui număr corespunzător de personal mediu sanitar, conform prevederilor legale în vigoare, în cadrul secţiei/compartimentului de terapie intensivă
- consum de medicamente de minimum 5% din totalul bugetului stabilit pentru secţia/compartimentul de terapie intensivă
- consum de materiale sanitare cu cel puţin 50% peste media consumului de materiale sanitare la nivelul spitalului

Suma alocată trimestrial fiecărui spital care îndeplineşte criteriile de mai sus, se stabileşte conform următoarei formule:

Total zile de spitalizare peste mediana fiecărei grupe DRG în sectia /compartimentul de terapie intensiva a spitalui / Total zile de spitalizare peste mediana fiecărei grupe DRG la nivel tuturor spitalelor aflate in contract cu o casa de asigurari de sanatate pentru sectiile/compartimentele de terapie intensiva x Suma reprezentând 1% pentru complexitatea suplimentară a cazurilor.

Zilele de spitalizare peste mediana fiecărei grupe DRG din sectiile/compartimentele de terapie intensiva pentru fiecare spital se pun la dispozitia caselor de asigurari de sanatate

trimestrial de catre de Şcoala Naţională de Sănătate Publică, Management şi Perfecţionare în Domeniul Sanitar Bucureşti.

Spitalele evaluează pacienţii atât la intrarea cât şi la ieşirea din compartimentele/secţiile TI, în conformitate cu sistemul de punctaj APACHE 2, astfel:

ART. 7 Fondurile suplimentare aprobate pentru anul 2011 cu destinaţia servicii medicale spitaliceşti, inclusiv sumele care nu au fost contractate iniţial, se contractează de către casele de asigurări de sănătate prin acte adiţionale la contractele iniţiale pentru anul 2011. Casele de asigurări de sănătate vor avea în vedere la repartizarea fondurilor suplimentare atât prevederile Ordinului comun al ministrului sănătăţii şi preşedintelui Casei Naţionale de Asigurări de Sănătate nr. 862/547/2011, cât şi indicatorii specifici fiecărei unităţi sanitare cu paturi, care au stat la baza stabilirii valorii iniţiale de

contract/actelor adiţionale, precum şi nivelul de realizare a indicatorilor specifici în limita celor contractaţi în perioada de la începutul anului şi până la sfârşitul lunii anterioare celei în care se semnează actul adiţional, dar fără a se depăşi suma ce poate fi contractată în funcţie de capacitatea maximă de funcţionare a fiecărui spital.

ART. 8 Sumele pentru serviciile medicale spitaliceşti acordate în regim de spitalizare de zi de unităţile sanitare autorizate de Ministerul Sănătăţii să efectueze aceste servicii şi care nu încheie contract de furnizare de servicii medicale spitaliceşti în spitalizare continuă, se determină prin înmulţirea numărului de servicii medicale spitaliceşti/cazuri rezolvate cu tarifele negociate aferente acestora. Tarifele sunt stabilite conform prevederilor art. 3.

ART. 9 (1) Decontarea de către casele de asigurări de sănătate a serviciilor medicale contractate cu spitalele se face după cum urmează:

a) pentru serviciile medicale spitaliceşti acordate în spitale a căror plată se face pe baza indicatorului tarif pe caz rezolvat (DRG), decontarea lunară şi regularizarea trimestrială se realizează astfel:

1. Decontarea lunară în limita sumei contractate se face în funcţie de:

- numărul de cazuri externate şi raportate de către spital, din care se scad cazurile nevalidate în luna anterioară (validarea şi invalidarea cazurilor externate raportate se fac de către Şcoala Naţională de Sănătate Publică, Management şi Perfecţionare în Domeniul Sanitar Bucureşti, conform regulilor de validare stabilite prin ordin al preşedintelui Casei Naţionale de Asigurări de Sănătate);
- indicele de case-mix prevăzut în anexa nr. 17 A la ordin;
- tariful pe caz ponderat stabilit pentru anul 2011.

2. Regularizarea trimestrială în limita sumei contractate se face în funcţie de:

- numărul total de cazuri externate, raportate şi validate pentru perioada de la începutul anului până la sfârşitul trimestrului respectiv. (Validarea şi invalidarea cazurilor externate raportate se fac de către Şcoala Naţională de Sănătate Publică, Management şi Perfecţionare în Domeniul Sanitar Bucureşti, conform regulilor de validare stabilite prin ordin al preşedintelui Casei Naţionale de Asigurări de Sănătate); numărul de cazuri astfel nu poate depăşi un număr maxim de cazuri calculat la capacitatea maximă de funcţionare a spitalului, raportată la prevederile art. 4 alin. (1) lit. a).
- indicele de case-mix realizat pentru perioada de la începutul anului până la sfârşitul trimestrului respectiv, dar nu mai mare decât cel stabilit pentru anul 2011, prin anexa nr.17 A la ordin.
- tariful pe caz ponderat stabilit pentru anul 2011;
- coeficientul k al cazurilor extreme (ca durată de spitalizare). Acest coeficient se calculează trimestrial de Şcoala Naţională de Sănătate Publică, Management şi Perfecţionare în Domeniul Sanitar Bucureşti, pe baza cazurilor externate raportate şi validate pentru perioada de la începutul anului până la sfârşitul trimestrului respectiv. Modalitatea de calcul al coeficientului k este prevăzută în anexa nr. 17 B la ordin.

În situaţia în care numărul de cazuri ponderate realizat, corespunzător patologiei care necesită internare în regim de spitalizare continuă, este mai mic decât cel contractat, iar numărul de cazuri rezolvate/servicii medicale efectuate în regim de spitalizare de zi a crescut, dar fără a depăşi 25% din valoarea contractată pentru servicii în regim de spitalizare continuă, numărul de cazuri rezolvate/servicii medicale efectuate în regim de spitalizare de zi ce depăşeşte numărul de cazuri ponderate contractat se decontează la tariful pe caz rezolvat/serviciu medical negociat, majorat cu 5%, cu încadrarea în valoarea de contract.

În situaţia în care atât numărul de cazuri ponderate realizat, corespunzător patologiei care necesită internare în regim de spitalizare continuă, cât şi cel corespunzător cazurilor

rezolvate/serviciilor medicale efectuate în regim de spitalizare de zi sunt mai mici decât numărul de cazuri ponderate, respectiv cazuri rezolvate/servicii medicale efectuate în regim de spitalizare de zi contractate, decontarea se face la nivelul realizat.

În situaţia în care atât numărul de cazuri ponderate realizat, corespunzător patologiei care necesită internare în regim de spitalizare continuă, cât şi cel corespunzător cazurilor rezolvate/serviciilor medicale efectuate în regim de spitalizare de zi sunt mai mari decât numărul de cazuri ponderate, respectiv cazuri rezolvate/servicii medicale efectuate în regim de spitalizare de zi contractat, se poate accepta la decontare o depăşire de maximum 5% atât a numărului de cazuri ponderate ce se vor deconta la un tarif care reprezintă 50% din tariful pe caz ponderat, cât şi a cazurilor rezolvate/serviciilor medicale efectuate în regim de spitalizare de zi. Casele de asigurări de sănătate pot accepta la decontare aceste depăşiri dacă spitalul/secţiile a/au luat decizia de creştere a numărului de internări, după epuizarea posibilităţii de înscriere pe listele de aşteptare a cazurilor programabile, şi dacă această creştere se regăseşte ca economii înregistrate la sumele care se decontează din fondul alocat asistenţei medicale spitaliceşti la alte spitale/secţii din judeţul respectiv, cu încadrarea în fondurile alocate asistenţei medicale spitaliceşti la nivelul caselor de asigurări de sănătate respective şi în condiţiile art. 5 alin. (1) lit. ~~h)~~ g);

b) serviciile medicale pentru care plata se face pe bază de tarif pe zi de spitalizare se decontează în limita sumei contractate în funcţie de:

- numărul de cazuri externate realizate şi validate (validarea şi invalidarea se fac de către Şcoala Naţională de Sănătate Publică, Management şi Perfecţionare în Domeniul Sanitar Bucureşti, conform regulilor de validare specifice stabilite prin ordin al preşedintelui Casei Naţionale de Asigurări de Sănătate);
- durata optimă de spitalizare pentru situaţiile la care este prevăzută durată optimă, astfel: durata optimă dacă durata efectiv realizată este mai mare decât durata optimă şi durata efectiv realizată dacă aceasta este mai mică decât durata optimă;
- durata efectiv realizată pentru situaţiile la care nu este prevăzută durată optimă;
- tariful pe zi de spitalizare negociat.

În cazul spitalelor/secţiilor de psihiatrie cronici, de psihiatrie cronici cu internări obligatorii pentru bolnavii psihici încadraţi la art. 105, 113 şi 114 din Codul penal şi internările dispuse prin ordonanţa procurorului pe timpul judecării sau urmăririi penale, precum şi pentru bolnavii care necesită asistenţă medicală spitalicească de lungă durată (ani), recuperare pediatrică - distrofici, neonatologie - prematuri mici şi foarte mici şi TBC, serviciile medicale spitaliceşti se decontează lunar de către casele de asigurări de sănătate în funcţie de numărul de zile de spitalizare efectiv realizat în luna pentru care se face decontarea, fără a se depăşi durata optimă pentru situaţiile la care este prevăzută durată optimă, şi de tarifele pe zi de spitalizare negociate.

Trimestrial se fac regularizări şi decontări în limita sumei contractate în funcţie de:

- numărul de cazuri externate realizate şi validate pentru perioada de la începutul anului până la sfârşitul trimestrului respectiv (validarea şi invalidarea cazurilor externate raportate se fac de către Şcoala Naţională de Sănătate Publică, Management şi Perfecţionare în Domeniul Sanitar Bucureşti, conform regulilor de validare stabilite prin ordin al preşedintelui Casei Naţionale de Asigurări de Sănătate);
- durata optimă de spitalizare pentru situaţiile la care este prevăzută durată optimă astfel: durata optimă dacă durata efectiv realizată este mai mare decât durata optimă şi durata efectiv realizată dacă aceasta este mai mică decât durata optimă;
- durata efectiv realizată pentru situaţiile la care nu este prevăzută durată optimă;
- tariful pe zi de spitalizare negociat.

În situaţia în care numărul de cazuri externate este mai mare decât numărul cazurilor contractate, casele de asigurări de sănătate pot accepta la decontare această depăşire dacă spitalul/secţiile a/au luat decizia de creştere a numărului de internări, după epuizarea

posibilităţii de înscriere pe listele de aşteptare a cazurilor programabile, şi dacă creşterea numărului de cazuri realizate se regăseşte în reducerea numărului de cazuri contractate din alte spitale/secţii din judeţul respectiv, iar această depăşire se încadrează în fondurile alocate asistenţei medicale spitaliceşti la nivelul caselor de asigurări de sănătate respective.

Serviciile medicale pentru care plata se face pe bază de tarif pe zi de spitalizare se decontează ţinându-se seama de durata optimă de spitalizare/durata efectiv realizată, după caz; în situaţia în care asiguratul este transferat în aceeaşi unitate sanitară, de la o secţie la alta de acelaşi profil, spitalul va raporta în vederea decontării un singur caz rezolvat, luându-se în calcul durata optimă de spitalizare pentru specialitatea respectivă. În cazul spitalelor/secţiilor de psihiatrie cronici pentru internările obligatorii pentru bolnavii psihici prevăzuţi la art. 105, 113 şi 114 din Codul penal şi cele dispuse prin ordonanţa procurorului pe timpul judecării sau urmăririi penale, precum şi pentru bolnavii care necesită asistenţă medicală spitalicească de lungă durată (ani), decontarea se face în funcţie de durata de spitalizare efectiv realizată.

Pentru monitorizarea eficienţei managementului de spital, a utilizării judicioase a fondurilor alocate, în cadrul regularizării trimestriale, casele de asigurări de sănătate au în vedere corelarea corespunzătoare a indicatorilor contractaţi şi realizaţi pentru perioada de la începutul anului până la sfârşitul trimestrului respectiv, cu rezultatele analizei trimestriale efectuată de către ordonatorul de credite ierarhic superior şi transmisă în acest scop caselor de asigurări.

Casele de asigurări de sănătate decontează serviciile medicale paliative în regim de spitalizare, în funcţie de numărul de zile de spitalizare realizat în limita numărului de zile de spitalizare contractat şi de tariful pe zi de spitalizare negociat între casele de asigurări de sănătate şi unităţile sanitare cu paturi;

c) serviciile medicale spitaliceşti, pentru care plata se face prin tarif mediu pe caz rezolvat, acordate pentru afecţiuni acute în spitale, altele decât cele prevăzute în anexa nr. 17 A la ordin, precum şi pentru servicii medicale spitaliceşti acordate în secţiile şi compartimentele de acuţi (aprobate/avizate de Ministerul Sănătăţii, după caz ca structuri distincte în structura spitalelor) din spitalele de cronici şi de recuperare, decontarea lunară şi regularizarea trimestrială se realizează astfel:

1. Decontarea lunară, în limita sumei contractate, se face în funcţie de:

- numărul de cazuri externate realizate şi validate (validarea şi invalidarea se fac de către Şcoala Naţională de Sănătate Publică, Management şi Perfecţionare în Domeniul Sanitar Bucureşti, conform regulilor de validare specifice stabilite prin ordin al preşedintelui Casei Naţionale de Asigurări de Sănătate);

- tariful mediu pe caz rezolvat pe specialităţi negociat, aferent serviciilor medicale spitaliceşti pentru patologie care necesită internare prin spitalizare continuă.

2. Regularizarea trimestrială, în limita sumei contractate, se face în funcţie de:

- numărul de externări realizate şi validate pentru perioada de la începutul anului până la sfârşitul trimestrului respectiv (validarea şi invalidarea cazurilor externate raportate se fac de către Şcoala Naţională de Sănătate Publică, Management şi Perfecţionare în Domeniul Sanitar Bucureşti, conform regulilor de validare stabilite prin ordin al preşedintelui Casei Naţionale de Asigurări de Sănătate);

- tariful mediu pe caz rezolvat pe specialităţi negociat,

În situaţia în care numărul de externări realizat, corespunzător patologiei care necesită internare în regim de spitalizare continuă, este mai mic decât cel contractat, iar numărul de cazuri rezolvate/servicii medicale efectuate în regim de spitalizare de zi a crescut, dar fără a depăşi 25% din valoarea contractată pentru servicii în regim de spitalizare continuă numărul de cazuri rezolvate/servicii medicale efectuate în regim de spitalizare de zi ce

depăşeşte numărul de cazuri externate contractate se decontează la tariful pe caz rezolvat/serviciu medical negociat, majorat cu 5%, cu încadrarea în valoarea de contract.

În situaţia în care atât numărul de externări realizat, corespunzător patologiei care necesită internare în regim de spitalizare continuă, cât şi cel corespunzător cazurilor rezolvate/serviciilor medicale efectuate în regim de spitalizare de zi sunt mai mici decât numărul de externări, respectiv cazuri rezolvate/servicii medicale efectuate în regim de spitalizare de zi, decontarea se face la nivelul realizat.

În situaţia în care atât numărul de externări realizat, corespunzător patologiei care necesită internare în regim de spitalizare continuă, cât şi cel corespunzător cazurilor rezolvate/serviciilor medicale efectuate în regim de spitalizare de zi sunt mai mari decât numărul de externări, respectiv cazuri rezolvate/servicii medicale efectuate în regim de spitalizare de zi contractat, se acceptă la decontare o depăşire de maximum 5% atât a numărului de externări ce se vor deconta la un tarif care reprezintă 50% din tariful negociat, cât şi a cazurilor rezolvate/serviciilor medicale efectuate în regim de spitalizare de zi. Casele de asigurări de sănătate pot accepta la decontare aceste depăşiri dacă spitalul/secţiile a/au luat decizia de creştere a numărului de internări, după epuizarea posibilităţii de înscriere pe listele de aşteptare a cazurilor programabile, şi dacă această creştere se regăseşte ca economii înregistrate la sumele care se decontează din fondul alocat asistenţei medicale spitaliceşti la alte spitale/secţii din judeţul respectiv, cu încadrarea în fondurile alocate asistenţei medicale spitaliceşti la nivelul caselor de asigurări de sănătate respective şi în condiţiile art. 5 alin. (1) lit. g);

d) suma aferentă Programului naţional cu scop curativ pentru medicamente şi materiale sanitare specifice se decontează la nivelul realizărilor în limita sumei prevăzute în program pentru medicamente şi materiale sanitare specifice;

e) suma pentru serviciile de supleere renală, inclusiv medicamente şi materiale sanitare specifice, transportul nemedicalizat al pacienţilor hemodializaţi de la şi la domiciliul pacienţilor, transportul lunar al medicamentelor şi al materialelor sanitare specifice dializei peritoneale la domiciliul pacienţilor, acordate în cadrul Programului naţional de supleere a funcţiei renale la bolnavii cu insuficienţă renală cronică din cadrul Programului naţional cu scop curativ, se decontează la nivelul realizărilor în limita sumelor contractate cu această destinaţie;

f) suma pentru serviciile medicale efectuate în cabinete medicale de specialitate în: oncologie medicală, diabet zaharat, nutriţie şi boli metabolice, cabinete de boli infecţioase şi în cabinete de planificare familială în care îşi desfăşoară activitatea medici cu specialitatea obstetrică-ginecologie, care se află în structura spitalului ca unităţi fără personalitate juridică, precum şi în cabinete medicale de specialitate din ambulatoriul integrat ale spitalului, decontată din fondul alocat asistenţei medicale ambulatorii de specialitate pentru specialităţile clinice, în condiţiile prevăzute în anexa nr. 8 la ordin, respectiv din fondul alocat asistenţei medicale spitaliceşti pentru cabinetele prevăzute la art. 48 alin. (4) lit. b) din Contractul-cadru;

g) suma pentru investigaţii paraclinice efectuate în regim ambulatoriu, decontată din fondul alocat asistenţei medicale spitaliceşti, stabilită conform prevederilor din anexa nr. 8 la ordin, în limita sumei contractate;

h) suma pentru serviciile medicale spitaliceşti efectuate în regim de spitalizare de zi pentru care plata se face prin tarif pe serviciu medical/caz rezolvat, în limita sumei contractate ~~şi~~ care se determină prin înmulţirea numărului negociat şi contractat de servicii medicale spitaliceşti pe tipuri/cazuri rezolvate cu tariful aferent acestora. Tariful pe serviciu medical se negociază între spitale şi casele de asigurări de sănătate şi nu poate fi mai mare decât tarifele maximale decontate de casele de asigurări de sănătate, prevăzute în anexa nr. 16 la ordin.

Pentru unităţile sanitare cu paturi care încheie contract de furnizare de servicii medicale spitaliceşti cu casa de asigurări de sănătate atât pentru spitalizare continuă cât şi pentru spitalizare de zi, tariful pe caz rezolvat se negociază între spitale şi casele de asigurări de sănătate şi nu poate fi mai mare de:

- 1/3 din tariful pe caz rezolvat pentru serviciile medicale acordate în regim de spitalizare continuă aferent spitalului respectiv (pentru spitalele finanţate în sistem DRG);
- 1/3 din tariful mediu pe caz rezolvat cel mai mic pentru serviciile medicale acordate în regim de spitalizare continuă aferent spitalului aflat în relaţie contractuală cu casa de asigurări de sănătate (pentru spitalele finanţate prin tarif mediu pe caz rezolvat pe specialităţi).
- 1/3 din tariful cel mai mic pe caz rezolvat dintre: tariful pe caz rezolvat din sistemul DRG şi tariful mediu pe caz rezolvat, pentru serviciile medicale acordate în regim de spitalizare continuă de la nivelul fiecărei case de asigurări de sănătate - pentru spitalele de cronici şi de recuperare, precum şi pentru secţiile şi compartimentele de cronici, recuperare şi neonatologie - prematuri (prevăzute ca structuri distincte în structura spitalului aprobată/avizată de Ministerul Sănătăţii, după caz) din alte spitale."

NOTĂ:

Numărul de cazuri rezolvate în camera de gardă şi în structurile de urgenţă din cadrul spitalelor, altele decât spitalele de urgenţă, si neinternate, pe care le decontează casele de asigurări de sănătate nu poate depăşi numărul de cazuri internate prin spitalizare continuă ca şi cazuri de urgenţă pentru care se face dovada unor intervenţii diagnostice şi terapeutice, necesare rezolvării cazurilor respective.

(2) Cazurile internate în regim de spitalizare continuă care nu au îndeplinit criteriile de internare nu se decontează de casele de asigurări de sănătate. Cazurile care fac obiectul internării prin spitalizare de zi şi au fost rezolvate prin spitalizare continuă la solicitarea asiguratului se decontează de casele de asigurări de sănătate la tariful pe serviciu medical/caz rezolvat aferent spitalizării de zi, diferenţa fiind suportată de asigurat.

(3) Decontarea cazurilor externate care se reinternează în aceeaşi unitate sanitară sau într-o altă unitate sanitară, pentru patologie de acelaşi tip, într-un interval de 48 de ore de la externare, se realizează în procent de 50% din tariful pe caz rezolvat (DRG), din tariful mediu pe caz rezolvat, cu excepţia situaţiilor în care comisia de analiză a cazurilor constituită la nivelul caselor de asigurări de sănătate constată că sunt acoperite peste 80% din îngrijirile corespunzătoare tipului de caz conform codificării.

(4) Decontarea cazurilor transferate într-o altă unitate sanitară, pentru patologie de acelaşi tip într-un interval de 48 de ore de la internare, se realizează în procent de 50% din tariful pe caz rezolvat (DRG), din tariful mediu pe caz rezolvat cu excepţia situaţiilor în care comisia de revalidare a cazurilor constituită la nivelul caselor de asigurări de sănătate constată că sunt acoperite peste 80% din îngrijirile corespunzătoare tipului de caz conform codificării.

(5) Casele de asigurări de sănătate decontează cazurile externate din unităţile sanitare cu personalitate juridică de medicina muncii - boli profesionale şi din secţiile de boli profesionale aflate în structura spitalelor, pentru care nu s-a confirmat caracterul de boală profesională în condiţiile respectării criteriilor de internare prevăzute la art. 61 alin. (4) din Contractul-cadru privind condiţiile acordării asistenţei medicale în cadrul sistemului de asigurări sociale de sănătate pentru anii 2011-2012, aprobat prin Hotărârea Guvernului nr. 1389/2010, cu modificările şi completările ulterioare şi în condiţiile în care cazurile externate sunt persoane asigurate în sistemul asigurărilor sociale de sănătate.

Casele de asigurări de sănătate nu decontează mai mult de 40% din cazurile externate din unităţile sanitare cu personalitate juridică de medicina muncii - boli profesionale şi din secţiile de boli profesionale aflate în structura spitalelor.

Art. 10 (1) Spitalele sunt obligate să suporte din sumele contractate cu casele de asigurări de sănătate:

a) cheltuielile privind investigaţiile paraclinice pentru bolnavii internaţi efectuate în alte unităţi spitaliceşti sau în unităţi ambulatorii de specialitate, în situaţiile în care spitalul respectiv nu deţine dotarea necesară sau aparatura existentă în dotarea acestuia nu este funcţională, cu încadrarea în bugetul de venituri şi cheltuieli aprobat, pe baza relaţiilor contractuale stabilite între unităţile sanitare respective; sumele astfel suportate de către spitale pentru investigaţii paraclinice pentru pacienţii internaţi, efectuate în alte unităţi spitaliceşti sau în unităţi ambulatorii de specialitate, se evidenţiază distinct şi se raportează lunar caselor de asigurări de sănătate, conform machetei din anexa nr. 16 B la ordin.

b) suma aferentă transportului interspitalicesc pentru asiguraţii internaţi care necesită condiţii suplimentare de stabilire a diagnosticului din punctul de vedere al consultaţiilor şi investigaţiilor paraclinice, cu excepţia transportului efectuat de serviciile publice de ambulanţă pentru pacienţii care nu se află în stare critică şi care se află în unităţile sau compartimentele de primiri urgenţe şi care necesită transport la o altă unitate sanitară sau la o altă clădire aparţinând unităţii sanitare respective, în vederea internării, investigării sau efectuării unui consult de specialitate, decontat de casa de asigurări de sănătate din fondul alocat asistenţei medicale de urgenţă şi transport sanitar; sumele plătite de către spitale pentru transportul interspitalicesc pentru asiguraţii internaţi care necesită condiţii suplimentare de stabilire a diagnosticului din punctul de vedere al consultaţiilor şi investigaţiilor paraclinice, se evidenţiază distinct şi se raportează lunar caselor de asigurări de sănătate, conform machetei din anexa nr. 16 B la ordin.

c) suma aferentă consultaţiilor interdisciplinare pentru pacienţii internaţi, efectuate în ambulatoriul/ambulatoriul integrat al spitalului respectiv sau al altei unităţi sanitare cu paturi, pe baza relaţiilor contractuale stabilite între unităţile sanitare respective; sumele astfel suportate de către spitale pentru consultaţiile interdisciplinare pentru pacienţii internaţi, efectuate în ambulatoriul/ambulatoriul integrat al spitalului respectiv sau al altei unităţi sanitare cu paturi, se evidenţiază distinct şi se raportează lunar caselor de asigurări de sănătate, conform machetei din anexa nr. 16 B la ordin.

ART 11 Spitalele, din sumele contractate cu casele de asigurări de sănătate, suportă suma aferentă serviciilor hoteliere standard (cazare standard şi masă la nivelul alocaţiei de hrană) pentru însoţitorii copiilor bolnavi în vârstă de până la 3 ani, precum şi pentru însoţitorii persoanelor cu handicap grav.

Asiguraţii suportă contravaloarea serviciilor hoteliere (cazare şi/sau masă) cu un grad ridicat de confort, peste confortul standard, acordate la cererea acestora. Prin confort standard, în ceea ce priveşte cazarea, se înţelege salon cu minimum 3 paturi, grup sanitar propriu, cu respectarea normelor igienico-sanitare şi fără dotări suplimentare (televizor, radio, telefon, frigider şi altele asemenea), iar în ceea ce priveşte masa, cea acordată la nivelul alocaţiei de hrană stabilite prin acte normative. Contribuţia personală a asiguraţilor reprezintă diferenţa dintre tarifele pentru serviciile hoteliere cu grad ridicat de confort stabilite de fiecare unitate furnizoare şi cele corespunzătoare confortului standard.

ART. 12 (1) Spitalele sunt obligate să suporte pentru asiguraţii internaţi în regim de spitalizare continuă şi în regim de spitalizare de zi toate cheltuielile necesare pentru rezolvarea cazurilor respective, inclusiv pentru medicamente, materiale sanitare şi investigaţii paraclinice.

(2) În situaţia în care asiguraţii, pe perioada internării în spital, în baza unor documente medicale întocmite de medicul curant din secţia în care aceştia sunt internaţi şi avizate de şeful de secţie şi managerul spitalului, suportă cheltuieli cu medicamente, materiale sanitare şi investigaţii paraclinice la care ar fi fost îndreptăţiţi fără contribuţie personală, în

condiţiile contractului-cadru şi prezentelor norme, spitalele rambursează contravaloarea acestor cheltuieli la cererea asiguraţilor.

(3) Rambursarea cheltuielilor prevăzute la alin. (2) reprezintă o obligaţie exclusivă a spitalelor şi se realizează numai din veniturile proprii ale acestora, pe baza unei metodologii proprii.

ART. 13 (1) Serviciile medicale de înaltă performanţă (CT, RMN, scintigrafie, angiografie) se acordă numai pe bază de recomandare medicală asiguraţilor conform fişelor de solicitare prevăzute în anexa nr.18 la ordin, numai în următoarele condiţii:

- urgenţe medico-chirurgicale majore nominalizate în anexa nr. 16 la ordin;
- afecţiuni în care au fost epuizate toate celelalte posibilităţi de explorare.

(2) Prevederile alin. (1) se aplică pacienţilor internaţi. Fişele de solicitare se întocmesc într-un singur exemplar dacă serviciile medicale de înaltă performanţă se efectuează de către spitalul în care este internat pacientul, fără a se întocmi bilet de trimitere pentru servicii medicale paraclinice.

(3) În situaţia în care spitalele nu deţin dotarea necesară sau aparatura existentă în dotarea acestora nu este funcţională, pentru pacienţii internaţi cărora li se recomandă servicii medicale de înaltă performanţă prevăzute la alin. (1) ce vor fi efectuate în alte unităţi spitaliceşti sau în unităţi ambulatorii de specialitate, spitalele întocmesc fişele de solicitare prevăzute în anexa nr. 18 la ordin care se completeaza în 2 exemplare, din care unul rămâne la furnizorul care a facut recomandarea si, un exemplar la furnizorul care a efectuat serviciul/serviciile de înaltă performanţă, La fisa de solicitare se ataşează, acolo unde este cazul, rezultatele celorlalte investigaţii efectuate anterior pentru stabilirea diagnosticului.

ART. 14 (1) Medicii care îşi desfăşoară activitatea în spital au obligaţia ca la externarea asiguratului să transmită medicului de familie sau medicului de specialitate din ambulatoriu, după caz, prin scrisoare medicală sau bilet de ieşire din spital cu obligaţia ca acesta să conţină explicit toate elementele prevăzute în scrisoarea medicală, evaluarea stării de sănătate a asiguratului la momentul externării şi indicaţiile de tratament şi supraveghere terapeutică pentru următoarea perioadă (determinată conform diagnosticului).

(2) Spitalele, odată cu raportarea lunară, vor transmise casei de asigurări de sănătate pentru nou-născuţii prematur, greutatea la naştere şi greutatea la externare; la o greutate a nou-născutului de peste 2.000 – 2.200 grame, nu se mai justifică menţinerea acestuia în secţia de neonatologie prematuri.

ART. 15 (1) Suma anuală prevăzută în bugetul de venituri şi cheltuieli şi, respectiv, suma prevăzută în contractul de furnizare de servicii medicale încheiat cu casele de asigurări de sănătate se defalcă de către spitale pe trimestre şi luni, cu acordul, ordonatorului de credite ierarhic superior în funcţie de subordonare, şi al caselor de asigurări de sănătate.

(2) Casa de asigurări de sănătate decontează, în primele 10 zile ale lunii următoare celei pentru care se face plata, contravaloarea serviciilor medicale acordate asiguraţilor în luna precedentă, pe baza facturii şi a documentelor justificative depuse până la data prevăzută în contractul de furnizare de servicii medicale spitaliceşti, cu încadrarea în sumele contractate. Pentru fiecare lună, casele de asigurări de sănătate pot efectua până la data de 20 decontarea lunii curente pentru perioada 1 - 15 a lunii, în baza indicatorilor specifici realizaţi şi în limita sumelor contractate, pe baza facturii şi a documentelor justificative depuse până la data prevăzută în contractul de furnizare de servicii medicale spitaliceşti.

Decontarea serviciilor medicale aferente lunii decembrie a anului în curs se poate efectua în luna decembrie pentru serviciile medicale efectuate şi facturate până la data prevăzută în documentele justificative depuse în vederea decontării, urmând ca diferenţa

reprezentând servicii medicale realizate să se deconteze în luna ianuarie a anului următor.

(3) Pentru încadrarea în sumele contractate cu casele de asigurări de sănătate, spitalele vor întocmi liste de prioritate pentru cazurile programabile, dacă este cazul, cu excepţia cazurilor de urgenţă medico-chirurgicală, a cazurilor care necesită internare în secţiile de obstetrică şi neonatologie şi a bolilor cu potenţial endemo-epidemic. În acest sens, odată cu raportarea ultimei luni a fiecărui trimestru, spitalele depun la casa de asigurări de sănătate pe fiecare secţie numărul cazurilor programate aferente trimestrului respectiv, după cum urmează: număr cazuri programate aflate în lista de prioritate la începutul trimestrului, număr cazuri programate intrate în lista de prioritate în cursul trimestrului, număr cazuri programate ieşite din lista de prioritate în cursul trimestrului şi număr cazuri programate aflate la sfârşitul trimestrului în lista de prioritate.

(4) Trimestrial, până la data de 5 a lunii următoare expirării unui trimestru, spitalele vor raporta realizarea indicatorilor trimestriali comparativ cu cei contractaţi şi, până pe data de 10 a lunii curente pentru luna precedentă, ordonatorului de credite ierarhic superior, în funcţie de subordonare, şi caselor de asigurări de sănătate execuţia bugetului de venituri şi cheltuieli. Regularizarea şi decontarea trimestrială se fac în primele 25 de zile ale lunii următoare trimestrului încheiat, cu excepţia trimestrului IV pentru care regularizarea se face până la data de 20 decembrie a anului în curs pentru serviciile medicale realizate şi raportate conform contractului de furnizare de servicii medicale până la aceasta dată, conform facturilor însoţite de documentele justificative, urmând ca regularizarea finală a trimestrului IV să se efectueze în luna ianuarie a anului următor.

ART. 16 Casele de asigurări de sănătate încheie convenţii cu unităţile medico-sociale, cu spitalele pentru medicii care îşi desfăşoară activitatea în dispensare TBC, laboratoare de sănătate mintală, respectiv centre de sănătate mintală şi staţionar de zi psihiatrie, cabinete de medicină dentară care nu se află în relaţie contractuală cu casa de asigurări de sănătate, care se află în structura spitalului ca unităţi fără personalitate juridică, precum şi cu cabinetele de medicina muncii organizate conform prevederilor legale în vigoare, în vederea recunoaşterii biletelor de internare eliberate de către medicii ce-şi desfăşoară activitatea în aceste unităţi.

Modelul de convenţie este cel prevăzut în anexa nr. 37 la ordin.

Serviciile medicale spitaliceşti pot fi acordate asiguraţilor şi pe baza biletelor de internare eliberate de medicii din centrele de dializă private aflate în relaţie contractuală cu Casa Naţională de Asigurări de Sănătate.

ART. 17 Contractele pentru furnizarea serviciilor medicale acordate în spitale se semnează din partea spitalelor de către membrii Comitetului director, care răspund, în condiţiile legii, de realitatea şi exactitatea datelor prezentate atât cu ocazia negocierii contractelor, cât şi cu ocazia raportării datelor în cursul execuţiei.

ART. 18 Refuzul semnării contractului de către unitatea publică furnizoare de servicii medicale spitaliceşti sau de către casa de asigurări de sănătate va fi adus la cunoştinţă Ministerului Sănătăţii sau celorlalte ministere, respectiv autorităţilor administraţiei publice locale, în funcţie de subordonare, şi Casei Naţionale de Asigurări de Sănătate. Pentru această situaţie, se constituie o comisie de mediere formată din reprezentanţi ai Ministerului Sănătăţii, ai ministerului de resort, ai autorităţilor administraţiei publice locale, după caz, precum şi ai Casei Naţionale de Asigurări de Sănătate, care, în termen de maximum 10 zile, soluţionează divergenţele.

ART. 19 Casele de asigurări de sănătate şi direcţiile de sănătate publică au obligaţia de a organiza trimestrial sau ori de câte ori este nevoie întâlniri cu medicii de specialitate din unităţile sanitare cu paturi pentru a analiza aspecte privind calitatea serviciilor medicale din asistenţa medicală spitalicească, precum şi respectarea prevederilor actelor normative în vigoare. Acestea vor informa asupra modificărilor apărute în actele normative şi vor stabili, împreună cu medicii de specialitate din unităţile sanitare cu paturi, măsurile ce se

impun pentru îmbunătăţirea activităţii. Neparticiparea medicilor la aceste întâlniri nu îi exonerează de răspunderea nerespectării hotărârilor luate cu acest prilej.

ART. 20 Furnizorii de servicii medicale spitaliceşti vor prezenta la contractare documentele necesare pentru fundamentarea tarifului mediu pe caz rezolvat, a tarifului pe zi de spitalizare şi a tarifului pe caz pentru serviciile acordate în regim de spitalizare de zi, documentele prevăzute în anexa nr. 16 A la ordin.

* ICM ROviDRG 2011 = ICM realizat obţinut prin clasificarea cazurilor raportate în perioada 01.01-30.04.2011 si validate, conform clasificării ROviDRG actualizate în decembrie 2010

Principii utilizate la calcularea TCP propuse pentru anul 2011

- Pentru spitalele a caror plata a fost in anul 2010 si primele 4 luni 2011 prin tarif pe caz rezolvat (DRG), s-a pornit de la tarifele publicate in Normele metodologice ale contractului cadru pentru anul 2010
- Pentru spitalele a caror plata in anul 2010 si primele 4 luni 2011 nu a fost prin tarif pe caz rezolvat (DRG), s-a considerat tarif "vechi" TCP mediu national din 2010, 1390 lei
- Numarul cazurilor ponderate a fost estimat la 12 luni plecând de la numărul de cazuri validate şi a ICM realizat de spitale în primele 4 luni ale anului 2011.

- S-a estimat bugetul global realizat de spitale la nivel national pe baza numarului de cazuri ponderate estimate la 12 luni si a TCP 2010 si s-a calculat TCP mediu national 2011=1433 lei
- Pentru spitalele al căror TCP 2010 a fost mai mare de 1433 s-a aplicat o reducere de 5%, acesta fiind noul tarif propus pentru 2011; pentru spitalele al căror TCP 2010 se situa sub 1433, acesta a fost crescut până la nivelul mediu naţional de 1433 propus pentru 2011.

NOTA:

"-" semnifica un numar insuficient de cazuri pentru calcularea indicatorului, sau, după caz, grupa de spitalizare de zi, pentru care nu se aplică limite ale duratelor de spitalizare

DMS si limitele duratei de spitalizare pentru fiecare grupa de diagnostice au fost calculate pe baza datelor raportate de spitale in perioada 01.01-30.04.2011.

Mediana duratei de spitalizare in sectiile ATI la nivel national, a fost calculata luand in considerare toate cazurile raportate si validate in perioada 01.01-30.04.2011 pentru o anumita grupa de diagnostice, pentru care s-a inregistrat minim un transfer intraspitalicesc in sectia Anestezie si terapie Intensiva – ATI.

M - categorie Medicala, C - categorie chirurgicala, A - Alte categorii

Definirea termenilor utilizaţi în sistemul DRG

Grupe de Diagnostice (Diagnostic Related Groups - DRG): o schemă de clasificare a pacienţilor externaţi (în funcţie de diagnostic), care asigură o modalitate de a asocia tipurile de pacienţi cu cheltuielile spitaliceşti efectuate

Categorii majore de diagnostice (CMD): o clasificare mai largă a pacienţilor doar pe baza diagnosticelor.

Valoare relativă (VR): Număr fără unitate care exprimă raportul dintre tariful unui DRG şi tariful mediu al tuturor DRG-urilor.

Coeficient atribuit în funcţie de cantitatea relativă de muncă, consumabile şi resursele de capital necesare pentru tratamentul complet al bolnavului cu afecţiunea/afecţiunile respective.

Grouper: aplicaţie computerizată (software) care permite alocarea automată a unui pacient într-un anumit DRG (pe baza datelor ce caracterizează fiecare caz externat)

Cazuri rezolvate (cazuri externate - CR): totalitatea cazurilor externate dintr-un spital, indiferent de tipul externării (externat, externat la cerere, transfer inter-spitalicesc, decedat)

Durata de spitalizare (DS): numărul de zile de spitalizare ale unui caz rezolvat, între momentul internării şi cel al externării din spital

Cazuri normale (CN): cazuri externate clasificate în acelaşi DRG cu durata de spitalizare asemănătoare din punct de vedere statistic

Cazuri extreme (ca durată de spitalizare) - "outliers": cazuri externate clasificate în acelaşi DRG cu durate de spitalizare foarte diferite faţă de cea a cazurilor normale

Cazuri extreme mici (ca durată de spitalizare) CEMC - "low outliers": cazuri externate clasificate în acelaşi DRG cu durate de spitalizare foarte mici faţă de cea a cazurilor normale

Cazuri extreme mari (ca durată de spitalizare) CEMR - "high outliers": cazuri externate clasificate în acelaşi DRG cu durate de spitalizare foarte mari faţă de cea a cazurilor normale

Interval de normalitate: un interval definit statistic care conţine un procent semnificativ de observaţii (de exemplu 95% din observaţii)

Intervalul de normalitate pentru durata de spitalizare: intervalul definit statistic care conţine un procent semnificativ (de exemplu 90%) de cazuri cu durate de spitalizare asemănătoare ale cazurilor externate

Limitele intervalului de normalitate pentru durata de spitalizare: valorile extreme (ale duratei de spitalizare) ce delimitează intervalul de normalitate, adică limita inferioară şi limita superioară a duratei de spitalizare

Limitele intervalului de normalitate se calculează pentru durata de spitalizare a fiecărei grupe de diagnostice, astfel încât se obţine o limită inferioară (LINF) şi o limită superioară (LSUP) pentru fiecare grupă de diagnostice (DRGi). Aceste valori ale limitelor sunt prezentate în anexa 17 a).
Indice de echivalenţă - e: o pondere asociată fiecărui caz rezolvat, în funcţie de durata de spitalizare a cazului şi limitele de normalitate ale duratei de spitalizare pentru respectivul tip de caz (DRG).
e = 1 pentru LINF <= DS <= LSUP
e = DS/LINF pentru DS < LINF
e = DS/LSUP pentru DS > LSUP, e maxim = 3
Exemplu pentru un pacient externat, clasificat în DRGi, cu DS de 2 zile:
LINF pentru DRGi este 3 zile
LSUP pentru DRGi este 18 zile
Se observă că acest caz este un caz extrem mic (DS < LINF), deci e = DS/LINF = 2/3
Cazuri echivalente (CE): cazurile externate într-o anumită perioadă, ajustate pe baza indicelui de echivalenţă

CE = Σ(CRi x ei)

Coeficientul K al cazurilor extreme (K) - un indicator ce reflectă impactul financiar al cazurilor extreme la nivelul unui spital

K = Σ (CEi x VRi) / Σ (CRi x VRi)

Cazuri ponderate (CP): pacienţi "virtuali" generaţi prin ajustarea cazurilor externate, în funcţie de resursele asociate cu fiecare tip de caz. Se pot calcula pentru cazurile externate şi pentru cazurile echivalente

Nr. CP = Σ (VRDRGi x CRDRGi)

Case-mix (Complexitatea cazurilor): Tipurile de pacienţi trataţi într-un spital, în funcţie de diagnostic şi gravitate
Indicele de case mix (Indicele de complexitate a cazurilor): Număr (fără unitate) care exprimă resursele necesare spitalului în concordanţă cu pacienţii trataţi
ICM pentru spitalul A = Total nr. cazuri ponderate (CP) / Total nr. cazuri rezolvate (CR) spital A
Costul pe caz ponderat (Rata de bază) - CCP(RB): Valoare de referinţă, ce reflectă costul unui caz ponderat. Poate fi calculat la nivel de spital, regional, naţional.
- pentru un spital:
CCPs = bugetul aferent cazurilor acute / nr. total cazuri ponderate
- la nivel naţional:
CCPN = bugetele aferente cazurilor acute la nivel naţional / nr. total cazuri ponderate
Tariful pe caz ponderat (TCP) - valoarea de rambursare a unui caz ponderat la nivel de spital
Tariful pe caz rezolvat (TCR) - valoarea de rambursare a unui caz rezolvat la nivel de spital
TCR = TCP x ICM
Tariful pe tip de caz (TC): valoarea de rambursare pentru fiecare tip de caz (DRG). Poate fi

calculat la nivel de spital, regional, naţional.
TCDRGi = TCP x VRDRGi
Abrevieri:
CMD = Categorii majore de diagnostice
DRG = Grupe de diagnostice
VR = Valoare Relativă
DS = Durată de spitalizare
CR = Cazuri rezolvate (externate)
CN = Cazuri normale
CEMC = Cazuri extreme mici
CEMR = Cazuri extreme mari
LINF = Limita inferioară a intervalului de normalitate
LSUP = Limita superioară a intervalului de normalitate
e = Indicele de echivalenţă
CE = Cazuri echivalente
K = Coeficientul cazurilor extreme
CP = Cazuri ponderate
ICM = Indice de case mix (indice de complexitate a cazurilor)
CCP = Costul pe caz ponderat
RB = Rata de bază
TCP = Tariful pe caz ponderat
TC = Tariful pe tip de caz

ART. 1 Serviciile medicale de urgenţă şi transport sanitar prevăzute în pachetul de servicii de bază, în pachetul minimal de servicii medicale şi în pachetul de servicii pentru persoanele care se asigură facultativ pentru sănătate cuprinse în anexa nr. 21 la ordin se asigură pe baza contractelor de furnizare de servicii medicale.

ART. 2 (1) Suma contractată de către casele de asigurări de sănătate cu unităţile medicale specializate publice autorizate şi evaluate reprezintă bugetul global şi se stabileşte prin înmulţirea numărului populaţiei deservite existent la data de 1 iulie 2010 conform datelor furnizate de Institutul Naţional de Statistică cu tarifele pe cap de locuitor aprobate prin ordin al ministrului sănătăţii şi cu coeficienţii de ajustare pentru acoperirea cheltuielilor aferente timpului de aşteptare, cu încadrarea în fondurile aprobate cu aceasta destinaţie. Coeficientul de ajustare luat în calcul la contractare este 1, iar pentru suma contractată de furnizorii care încheie contracte cu Casa de Asigurări de Sănătate Constanţa, coeficientul de ajustare este 1,017, cu Casa de Asigurări de Sănătate Prahova, coeficientul de ajustare este 1,011 şi cu Casa de Asigurări de Sănătate Tulcea, coeficientul de ajustare este 1,050.

(2) Suma contractată de casele de asigurări de sănătate cu unităţile specializate autorizate şi evaluate private pentru efectuarea activităţii de consultaţii de urgenţă la domiciliu şi a unor servicii de transport va avea în vedere 95% din fondurile alocate cu această destinaţie la nivelul casei de asigurări de sănătate şi se stabileşte astfel:

1. pentru solicitări pentru consultaţii de urgenţă la domiciliu, suma contractată este egală cu numărul de solicitări estimate înmulţit cu tariful pe solicitare negociat.

Tariful pe solicitare pentru consultaţiile de urgenţă la domiciliu se negociază între casele de asigurări de sănătate şi furnizori, avându-se în vedere toate cheltuielile necesare acordării serviciilor medicale, cu excepţia celor aferente mijlocului de transport (cheltuieli de personal pentru conducătorul mijlocului de transport, combustibil, cheltuieli pentru întreţinerea şi repararea mijlocului de transport) şi a cheltuielilor de personal aferente medicului, în situaţia în care consultaţia de urgenţă la domiciliu se acordă de către medicul din centrul de permanenţă şi nu poate fi mai mare decât tariful maximal prevăzut la art. 8 (1). Tariful minim negociat de către fiecare casă de asigurări de sănătate devine tariful la care se contractează consultaţiile de urgenţă la domiciliu cu toţi furnizorii privaţi.

2. pentru serviciile de transport cu autovehicule suma contractată este egală cu numărul de kilometri echivalenţi (dus-întors) pentru mediul urban şi numărul de kilometri efectiv realizaţi pentru mediul rural, estimaţi a fi parcurşi, înmulţit cu tariful pe kilometru parcurs negociat între furnizori şi casele de asigurări de sănătate. Acest tarif nu poate fi mai mare decât tariful maximal decontat de casele de asigurări de sănătate prevăzut la art. 8 (2), astfel încât la unităţile la care se înregistrează timpi de aşteptare mai ridicaţi, respectiv distanţe parcurse mai mici, să se acorde tarife pe kilometru spre limita maximă, pentru acoperirea cheltuielilor aferente timpului de aşteptare. Tariful minim negociat de către fiecare casă de asigurări de sănătate devine tariful la care se contractează serviciile de transport cu toţi furnizorii privaţi.
Tariful pe kilometru se poate renegocia trimestrial în raport cu evaluarea trimestrială a indicatorilor efectiv realizaţi, în limita sumelor aprobate cu această destinaţie, în aceleaşi condiţii ca mai sus;

3. pentru serviciile de transport pe apă, suma contractată se calculează pe baza numărului de mile marine estimat, înmulţit cu tariful negociat pe milă marină şi nu poate fi mai mare decât tariful maximal prevăzut la art. 8 (3). Tariful minim negociat de către fiecare casă de asigurări de sănătate devine tariful la care se contractează serviciile de transport cu toţi furnizorii privaţi.
Tariful pe milă marină se poate renegocia trimestrial în raport cu evaluarea trimestrială a indicatorilor efectiv realizaţi, în limita sumelor aprobate cu această destinaţie, în aceleaşi condiţii ca mai sus;

Diferenţa de 5% se utilizează pentru contractarea serviciilor medicale realizate în condiţiile prevăzute la art. 5 alin. (3) lit. b) şi/sau pentru contractarea serviciilor de urgenţă şi transport sanitar conform condiţiilor iniţiale de contractare.

a) pentru solicitări pentru consultaţii de urgenţă la domiciliu, suma contractată este egală cu numărul de solicitări estimate înmulţit cu tariful pe solicitare negociat.

Tariful pe solicitare pentru consultaţiile de urgenţă la domiciliu se negociază între casele de asigurări de sănătate şi furnizori, avându-se în vedere toate cheltuielile necesare acordării serviciilor medicale, cu excepţia celor aferente mijlocului de transport (cheltuieli de personal pentru conducătorul mijlocului de transport, combustibil, cheltuieli pentru întreţinerea şi repararea mijlocului de transport) şi a cheltuielilor de personal aferente medicului, în situaţia în care consultaţia de urgenţă la domiciliu se acordă de către medicul din centrul de permanenţă şi nu poate fi mai mare decât tariful maximal prevăzut la art. 8 (1) din anexa 22 la ordin. Tariful minim negociat devine tariful la care se contractează consultaţiile de urgenţă la domiciliu cu toţi furnizorii privaţi.

Tariful pe solicitare pentru consultaţii de urgenţă la domiciliu se poate renegocia trimestrial în raport cu evaluarea trimestrială a indicatorilor efectiv realizaţi, în limita sumelor aprobate cu această destinaţie, în aceleaşi condiţii ca mai sus;

b) pentru serviciile de transport cu autovehicule suma contractată este egală cu numărul de kilometri echivalenţi (dus-întors) pentru mediul urban şi numărul de kilometri efectiv realizaţi pentru mediul rural, estimaţi a fi parcurşi, înmulţit cu tariful pe kilometru parcurs negociat între furnizori şi casele de asigurări de sănătate. Acest tarif nu poate fi mai mare decât tariful maximal decontat de casele de asigurări de sănătate prevăzut la art. 8 (2) din anexa 22 la ordin, astfel încât la unităţile la care se înregistrează timpi de aşteptare mai ridicaţi, respectiv distanţe parcurse mai mici, să se acorde tarife pe kilometru spre limita maximă, pentru acoperirea cheltuielilor aferente timpului de aşteptare. Tariful minim negociat devine tariful la care se contractează serviciile de transport cu toţi furnizorii privaţi. Tariful pe kilometru se poate renegocia trimestrial în raport cu evaluarea trimestrială a indicatorilor efectiv realizaţi, în limita sumelor aprobate cu această destinaţie, în aceleaşi condiţii ca mai sus;

c) pentru serviciile de transport pe apă, suma contractată se calculează pe baza numărului de mile marine estimat, înmulţit cu tariful negociat pe milă marină şi nu poate fi mai mare decât tariful maximal prevăzut la art. 8 (3) din anexa 22 la ordin. Tariful minim negociat devine tariful la care se contractează serviciile de transport cu toţi furnizorii privaţi. Tariful pe milă marină se poate renegocia trimestrial în raport cu evaluarea trimestrială a indicatorilor efectiv realizaţi, în limita sumelor aprobate cu această destinaţie, în aceleaşi condiţii ca mai sus;

Diferenţa de 5% se utilizează pentru contractarea serviciilor medicale realizate în condiţiile prevăzute la alin. (4) lit,b).

(4) Decontarea activităţii de consultaţii de urgenţă la domiciliu şi a unor servicii de transport sanitar efectuate de unităţile specializate autorizate şi evaluate private:

a) lunar în raport cu numărul de kilometri echivalenţi parcurşi pentru mediul urban şi cu numărul de kilometri efectiv realizaţi pentru mediul rural, respectiv mile marine efectiv parcurse, şi tariful minim negociat, precum şi cu numărul de solicitări pentru consultaţii de

urgenţă la domiciliu realizate şi tariful minim negociat pe solicitare, în limita sumelor contractate.

b) trimestrial se face regularizarea pentru perioada de la începutul anului până la sfârşitul trimestrului respectiv, având în vedere încadrarea în sumele contractate.

În situaţia în care, la regularizarea trimestrială, numărul total al kilometrilor echivalenţi parcurşi pentru mediul urban, numărul de kilometri efectiv realizaţi pentru mediul rural, respectiv numărul total al milelor marine parcurse de la începutul anului până la sfârşitul trimestrului respectiv este mai mare decât numărul contractat, casele de asigurări de sănătate decontează nivelul realizat al acestora (dar nu mai mult de 21% faţă de cel contractat) numai dacă depăşirea este justificată, cu încadrarea în suma aferentă serviciilor medicale de urgenţă şi transport sanitar aprobată pentru această destinaţie la nivelul casei de asigurări de sănătate.

În situaţia în care la regularizarea trimestrială, numărul total al kilometrilor echivalenţi parcurşi pentru mediul urban, numărul de kilometri efectiv realizaţi pentru mediul rural, respectiv numărul total al milelor marine parcurse de la începutul anului până la sfârşitul trimestrului respectiv este mai mic decât numărul contractat, casele de asigurări de sănătate decontează nivelul realizat al acestora.

În situaţia în care la regularizarea trimestrială, numărul solicitări pentru consultaţii de urgenţă la domiciliu rezolvate de la începutul anului până la sfârşitul trimestrului respectiv este mai mare decât numărul solicitărilor contractate, casele de asigurări de sănătate pot deconta numărul solicitărilor rezolvate numai dacă depăşirea este justificată (dar nu mai mult de 21% faţă de solicitările contractate) cu încadrarea în suma aferentă serviciilor medicale de urgenţă şi de transport sanitar aprobată pentru această destinaţie la nivelul casei de asigurări de sănătate.

În situaţia în care la regularizarea trimestrială, numărul solicitărilor pentru consultaţii de urgenţă la domiciliu rezolvate de la începutul anului până la sfârşitul trimestrului respectiv este mai mic decât numărul solicitărilor contractate, casele de asigurări de sănătate decontează la nivelul numărului de solicitări rezolvate şi la tariful negociat.

c) Casele de asigurări de sănătate decontează unităţilor specializate autorizate şi evaluate private solicitările pentru consultaţii de urgenţă la domiciliu şi numărul de kilometri efectuaţi pentru tipul de transport prevăzut la litera D pct. II poziţia 16 şi pct. III din anexa nr. 21 la Ordinul ministrului sănătăţii şi al preşedintelui Casei Naţionale de Asigurări de Sănătate nr. ……..privind aprobarea normelor metodologice de aplicare a Contractului-cadru privind condiţiile acordării asistenţei medicale în cadrul sistemului de asigurări sociale de sănătate pentru anii 2011 – 2012 aprobat prin H.G. nr.1389/2010, cu modificările şi completările ulterioare, dacă acestea au fost efectuate pe baza apelurilor primite prin sistemul 112, dispecerizate de dispeceratul medical public sau cel integrat şi au avizul dispeceratului medical public sau cel integrat.

(2) Pentru fiecare lună, casele de asigurări de sănătate pot efectua, până la data de 20, decontarea lunii curente pentru perioada 1 - 15 a lunii, în baza indicatorilor specifici realizaţi şi în limita sumelor contractate, pe baza facturii şi a documentelor justificative ce se depun la casa de asigurări de sănătate până la data de .....

Decontarea serviciilor medicale aferente lunii decembrie a anului în curs se poate efectua în luna decembrie pentru serviciile medicale efectuate şi facturate până la data prevăzută în documentele justificative depuse în vederea decontării, în limita bugetului aprobat, urmând ca diferenţa reprezentând servicii medicale realizate şi nedecontate să se deconteze în luna ianuarie a anului următor.

(3) Trimestrial, până la data de ..... a lunii următoare încheierii trimestrului se fac regularizările şi decontările, ţinându-se seama de realizarea indicatorilor trimestriali comparativ cu cei contractaţi.

(4) Plata serviciilor medicale de urgenţă şi transport sanitar se face în contul nr. ....., deschis la Trezoreria Statului, sau în contul nr. ....., deschis la Banca ....., la data de .....

ART. 10 (1) Nerespectarea oricăreia dintre obligaţiile unităţilor medicale specializate prevăzute în prezentul contract încheiat cu casa de asigurări de sănătate atrage diminuarea valorii prezentului contract pentru luna în care s-au înregistrat aceste situaţii, după cum urmează:

a) la prima constatare, reţinerea unei sume calculată prin aplicarea unui procent de 1% la valoarea de contract aferentă lunii respective;

b) la a doua constatare, reţinerea unei sume calculată prin aplicarea unui procent de 3% la valoarea de contract aferentă lunii respective;

c) la a treia constatare şi la următoarele constatări după aceasta, reţinerea unei sume calculată prin aplicarea unui procent de 9% la valoarea de contract aferentă lunii respective.

(3) Recuperarea sumei conform prevederilor alin. (1) se face prin plata directă sau executare silită pentru furnizorii care nu mai sunt în relaţie contractuală cu casa de asigurări de sănătate.

(4) Sumele încasate la nivelul caselor de asigurări de sănătate în condiţiile alin. (1) se utilizează conform prevederilor legale în vigoare.

Dacă nu procedează la anunţarea în termenele prevăzute mai sus a începerii şi încetării cazului de forţă majoră, partea care îl invocă suportă toate daunele provocate celeilalte părţi prin neanunţarea în termen.

(3) În cazul în care împrejurările care obligă la suspendarea executării prezentului contract se prelungesc pe o perioadă mai mare de 6 luni, fiecare parte poate cere rezoluţiunea contractului.

ANEXA 25

CONDIŢIILE
acordării serviciilor de îngrijiri medicale la domiciliu şi îngrijiri paliative la domiciliu şi modalităţile de plată ale acestora

ART. 1 (1) Serviciile de îngrijiri medicale la domiciliu se acordă de către furnizorii de îngrijiri medicale la domiciliu, persoane fizice sau juridice autorizate şi evaluate în condiţiile legii pentru acordarea acestor tipuri de servicii, alţii decât medicii de familie, furnizori care încheie contracte cu casele de asigurări de sănătate pentru servicii de îngrijiri medicale la domiciliu. Serviciile de îngrijiri medicale la domiciliu se acordă pe bază de recomandare pentru îngrijiri medicale la domiciliu, ţinând seama de starea de sănătate a asiguratului şi de statusul de performanţă ECOG al acestuia.

(2) Recomandarea pentru efectuarea serviciilor de îngrijiri medicale la domiciliu se face de către medicii de specialitate din ambulatoriu, inclusiv medicii de familie şi de către medicii de specialitate din spitale la externarea asiguraţilor, medici aflaţi în relaţii contractuale cu casele de asigurări de sănătate, conform modelului prezentat în anexa nr. 27 C la ordin, în concordanţă cu diagnosticul stabilit şi în funcţie de patologia bolnavului şi statusul de performanţă ECOG al acestuia cu precizarea activităţilor zilnice pe care asiguratul nu le poate îndeplini. Medicii de specialitate din ambulatoriul de specialitate recomandă îngrijiri medicale la domiciliu pentru asiguraţii cu afecţiuni oncologice sau AVC, numai ca o consecinţă a consultaţiei medicale raportate şi validate de casa de asigurări de sănătate. În funcţie de statusul de performanţă ECOG, bolnavul poate fi:

a) incapabil să desfăşoare activităţi casnice, este imobilizat în fotoliu sau pat peste 50% din timpul zilei, necesită sprijin pentru îngrijirea de bază (igienă şi/sau alimentaţie şi/sau mobilizare) - statusul de performanţă ECOG 3.

b) complet imobilizat la pat, dependent total de altă persoană pentru îngrijirea de bază (igienă, alimentaţie, mobilizare) - statusul de performanţă ECOG 4

(3) Recomandarea pentru îngrijiri medicale la domiciliu se consemnează de catre medicul curant al pacientului in biletul de externare, la externarea acestuia, sau în registrul de consultaţii şi fişa de observaţie a pacientului, în ambulatoriu, asupra necesitatii efectuarii ingrijirilor medicale.

ART. 2 (1) Lista serviciilor de îngrijiri medicale la domiciliu este prevăzută în anexa nr. 24 la ordin.

(2) Tariful pe caz pentru un episod de îngrijire la domiciliu se obţine înmulţind numărul de zile de îngrijire corespunzător unui episod de îngrijire la domiciliu cu tariful pe o zi de îngrijire la domiciliu. Tariful pe o zi de îngrijire la domiciliu este 75 lei. În tariful pe o zi de îngrijire sunt incluse costurile materialelor sanitare pentru realizarea serviciului de îngrijire la domiciliu. Prin o zi de îngrijire se înţelege efectuarea de către furnizor a minimum 1 vizită la domiciliu cu monitorizarea parametrilor fiziologici, toaleta totală sau parţială a pacientului la pat, manevre terapeutice conform recomandării, după caz.

Tariful de 75 de lei/zi de îngrijire la domiciliu , este valabil pentru episoadele de îngrijire pentru care deciziile sunt emise începând cu 1 iunie 2011. Pentru zilele ce depăşesc 42 de zile tariful este de 50 de lei.

Aceste tarife se aplică dacă pentru fiecare caz sunt recomandate şi efectuate minim 8 servicii din lista prevăzută în anexa nr. 24 la ordin. În caz contrar, tarifele se reduc proporţional, în funcţie de numărul serviciilor recomandate, conform formulei:

Nr. servicii recomandate şi efectuate / nr. minim de servicii (8) x tariful pe zi de îngrijire corespunzător perioadei recomandate.

(3) Durata pentru care un asigurat poate beneficia de servicii de îngrijiri medicale la domiciliu se stabileşte de medicul care a făcut recomandarea, cu obligativitatea precizării

ritmicităţii/periodicităţii serviciilor, consemnate în formularul "Recomandare pentru îngrijiri medicale la domiciliu", dar nu mai mult de 90 zile de îngrijiri/în ultimele 11 luni în una sau mai multe etape (episoade de îngrijire). Fiecare episod nou de îngrijire se recomandă utilizând un nou formular de recomandare. În situaţia în care, conform recomandării pentru îngrijiri medicale la domiciliu, îngrijirile nu sunt acordate în zile consecutive, la calcularea celor 90 de zile/în ultimele 11 luni se iau în calcul numai zilele în care s-au acordat îngrijirile.

(4) Numărul maxim de servicii care pot fi raportate de către furnizorul de servicii de îngrijiri medicale la domiciliu are în vedere următoarele:

- timpul mediu/vizita la domiciliu pentru un pacient este de 1 oră;

(2) Tariful pe caz pentru un episod de îngrijire la domiciliu decontat de casa de asigurări de sănătate se stabileşte prin înmulţirea tarifului pe zi cu numărul de zile de îngrijire corespunzător unui episod de îngrijire la domiciliu.

Tariful pe o zi de îngrijire la domiciliu este 75 lei. În tariful pe o zi de îngrijire sunt incluse costurile materialelor sanitare pentru realizarea serviciului de îngrijire la domiciliu. Prin o zi de îngrijire se înţelege efectuarea de către furnizor a minimum 1 vizită la domiciliu cu monitorizarea parametrilor fiziologici, toaleta totală sau parţială a pacientului la pat, manevre terapeutice conform recomandării, după caz.

Tariful de 75 de lei/zi de îngrijire la domiciliu, este valabil pentru episoadele de îngrijire pentru care deciziile sunt emise începând cu 1 iunie 2011. Pentru zilele ce depăşesc 42 de zile tariful este de 50 de lei.

Durata pentru care un asigurat poate beneficia de servicii de îngrijiri medicale la domiciliu este de cel mult de 90 zile de îngrijiri/în ultimele 11 luni în una sau mai multe etape (episoade de îngrijire). ANEXA 28

CONDIŢIILE
acordării asistenţei medicale de recuperare, medicină fizică şi balneologie şi modalitatea de plată a acesteia

ART. 1 (1) Suma negociată şi contractată de sanatoriile/secţiile sanatoriale din spitale, pentru adulţi şi copii, inclusiv cele balneare, de furnizori constituiţi conform Legii nr. 31/1990, republicată, cu modificările şi completările ulterioare, care sunt avizaţi de Ministerul Sănătăţii ca sanatorii balneare sau au în structura avizată / aprobată de Ministerul Sănătăţii secţii sanatoriale balneare şi de preventoriile cu sau fără personalitate juridică, cu casele de asigurări de sănătate, se stabileşte pe baza următorilor indicatori specifici în funcţie de care se stabileşte capacitatea maximă de funcţionare:

a) număr de personal existent conform structurii sanatoriilor, inclusiv cele balneare, şi preventoriilor, având în vedere numărul de posturi aprobate potrivit legii;

b) număr de paturi stabilit conform structurii organizatorice aprobată sau avizată, după caz, de Ministerul Sănătăţii, în condiţiile legii;

c) rata medie de utilizare a paturilor la nivel naţional şi în conformitate cu planul de paturi la nivel judeţean, stabilite prin ordin al ministrului sănătăţii; rata medie de utilizare a paturilor la nivel naţional luată în calcul la stabilirea capacităţii maxime este de 250 de zile;

d) număr de zile de spitalizare, total şi pe secţii, stabilit pe baza ratei medii de utilizare a paturilor la nivel naţional;

e) durata optimă de spitalizare sau, după caz, durata de spitalizare efectiv realizată; pentru situaţiile la care este prevăzută durată optimă de spitalizare se va lua în calcul durata optimă dacă durata de spitalizare efectiv realizată este mai mare decât aceasta, respectiv durata de spitalizare efectiv realizată dacă aceasta este mai mică decât durata optimă de spitalizare.

f) tariful pe zi de spitalizare negociat ;

g) cost mediu cu medicamentele/bolnav externat pe anul 2010.

h) structura organizatorică aprobată sau avizată, după caz, de Ministerul Sănătăţii, în condiţiile legii, în vigoare la data încheierii contractului

(2) Suma prevăzută în contractul de furnizare de servicii medicale de recuperare, medicină fizică şi balneologie încheiat de casele de asigurări de sănătate cu sanatoriile, inclusiv cele balneare, şi preventoriile, precum şi suma contractată cu spitalele în baza contractului de furnizare servicii medicale spitaliceşti pentru secţiile sanatoriale se stabileşte prin negociere astfel:

Număr de zile de spitalizare x tarif pe zi de spitalizare negociat

a) numărul de zile de spitalizare, total şi pe secţii, stabilit pe baza ratei medii de utilizare a paturilor la nivel naţional.

b) tariful pe zi de spitalizare/sanatoriu/preventoriu se negociază şi nu poate fi mai mare decât tariful maximal.

		Tarif maximal pe zi de spitalizare (lei)
1.	Sanatorii balneare	135
2.	Sanatorii	116
3.	Preventorii	65

NOTĂ: Tariful contractat nu poate fi mai mare decât tariful contractat pentru anul 2010 + 15%. Pentru furnizorii care nu au fost în relaţie contractuală cu casele de asigurări de sănătate în anul 2010, tariful maximal se diminuează cu 20%.

Pentru sanatoriile balneare, suma contractată şi decontată de casele de asigurări de sănătate este suma negociată diminuată corespunzător cu contribuţia personală a asiguraţilor.

Contribuţia personală a asiguraţilor reprezintă 30 - 35% din tariful/zi de spitalizare negociat , în funcţie de tipul de asistenţă balneară şi de durata tratamentului:

Tipul de asistenţă balneară	Durata*)	Contribuţia asiguratului
1. Asistenţă balneară terapeutică (cu trimitere medicală)	18 - 21 de zile	35% din tariful/zi de spitalizare
2. Asistenţă balneară de recuperare medicală (cu trimitere medicală)	21 - 30 de zile	30% din tariful/zi de spitalizare

*) Serviciile medicale acordate pentru duratele de spitalizare mai mari de 21, respectiv 30 de zile, se suportă în întregime de către asiguraţi. Casele de asigurări de sănătate decontează serviciile medicale şi pentru durate mai mici de 18, respectiv 21 de zile, conform aceloraşi procente. Contribuţia asiguratului se încasează de către sanatorii, care eliberează bon fiscal sau, la cererea asiguratului, factură, pentru această contribuţie, şi reprezintă venit propriu al unităţii sanitare.

În sanatoriile balneare, pentru categoriile de persoane prevăzute în legi speciale, partea de contribuţie personală a asiguratului se suportă din fond.

Pentru serviciile medicale de recuperare, medicină fizică şi balneologie ~~de~~ acordate în alte sanatorii decât cele balneare şi în preventorii nu se percepe contribuţie din partea asiguraţilor.

ART. 2 (1) Decontarea serviciilor medicale de recuperare, medicină fizică şi balneologie efectuate în sanatorii/secţiile sanatoriale din spitale pentru adulţi şi copii, inclusiv cele balneare, precum şi în preventorii cu sau fără personalitate juridică se face de către casele de asigurări de sănătate în raport cu numărul de zile de spitalizare efectiv realizat şi cu tariful pe zi de spitalizare, cu încadrarea în valoarea contractului, diminuat în cazul sanatoriilor balneare cu contribuţia asiguratului conform prevederilor art. 1.

(2) Decontarea serviciilor medicale de recuperare, medicină fizică şi balneologie ~~de~~ efectuate în sanatorii/secţii sanatoriale din spitale pentru adulţi şi copii, inclusiv cele balneare, precum şi în preventorii cu sau fără personalitate juridică se face din fondul cu destinaţia servicii medicale de recuperare, medicină fizică şi balneologie ~~de~~ în unităţi sanitare cu paturi.

ART. 3 Asiguraţii suportă contravaloarea serviciilor hoteliere (cazare şi/sau masă) cu un grad ridicat de confort, peste confortul standard, acordate la cererea acestora. Prin confort standard, în ceea ce priveşte cazarea, se înţelege salon cu minimum 3 paturi, grup sanitar propriu, cu respectarea normelor igienico-sanitare şi fără dotări suplimentare (televizor, radio, telefon, frigider, aer condiţionat şi altele asemenea), iar în ceea ce priveşte masa, cea acordată la nivelul alocaţiei de hrană stabilită prin acte normative. Contribuţia personală a asiguraţilor reprezintă diferenţa dintre tarifele stabilite pentru serviciile hoteliere cu grad ridicat de confort, stabilite de fiecare unitate furnizoare, şi cele corespunzătoare confortului standard.

ART. 4 Sanatoriile şi preventoriile din sumele contractate cu casele de asigurări de sănătate suportă contravaloarea serviciilor hoteliere standard (cazare standard şi masă la nivelul alocaţiei de hrană) pentru însoţitorii copiilor bolnavi în vârstă de până la 3 ani, precum şi pentru însoţitorii persoanelor cu handicap grav, în condiţiile prevederilor legale în vigoare.

ART. 5 (1) Sanatoriile, inclusiv cele balneare şi preventoriile sunt obligate să suporte pentru asiguraţii internaţi toate cheltuielile necesare pentru rezolvarea cazurilor respective, inclusiv pentru medicamente, materiale sanitare şi investigaţii paraclinice.

(3) Rambursarea cheltuielilor prevăzute la alin. (2) reprezintă o obligaţie exclusivă a sanatoriilor, inclusiv cele balneare şi a preventoriilor şi se realizează numai din veniturile acestora, pe baza unei metodologii proprii.

ART. 6 (1) Suma anuală prevăzută în bugetul de venituri şi cheltuieli şi, respectiv, suma prevăzută în contractul de furnizare de servicii medicale încheiat cu casele de asigurări de sănătate se defalchează de către sanatorii şi preventorii pe trimestre şi luni, cu acordul ordonatorului de credite ierarhic superior, în funcţie de subordonare, şi al caselor de asigurări de sănătate.

Lunar, casele de asigurări de sănătate vor deconta în primele 10 zile ale lunii următoare celei pentru care se face plata sumele corespunzătoare serviciilor medicale realizate conform indicatorilor specifici, în limita sumelor contractate, în baza facturii şi a documentelor justificative ce se depun la casa de asigurări de sănătate până la data prevăzută în contractul de furnizare de servicii medicale. Pentru fiecare lună, casele de asigurări de sănătate pot efectua până la data de 20 decontarea lunii curente pentru perioada 1 - 15 a lunii, în baza indicatorilor specifici realizaţi şi în limita sumelor contractate, pe baza facturii şi a documentelor justificative ce se depun la casa de asigurări de sănătate până la data prevăzută în contractul de furnizare de servicii medicale.

Decontarea serviciilor medicale aferente lunii decembrie a anului în curs se poate efectua în luna decembrie pentru serviciile medicale efectuate şi facturate până la data prevăzută în documentele justificative depuse în vederea decontării, urmând ca diferenţa reprezentând servicii medicale realizate să se deconteze în luna ianuarie a anului următor.

Pentru încadrarea în sumele contractate cu casele de asigurări de sănătate, sanatoriile şi preventoriile vor întocmi liste de prioritate pentru cazurile programabile, dacă este cazul. În acest sens, odată cu raportarea ultimei luni a fiecărui trimestru, acestea depun la casa de asigurări de sănătate pe fiecare secţie numărul cazurilor programate aferente trimestrului respectiv, după cum urmează: număr cazuri programate aflate în lista de prioritate la începutul trimestrului, număr cazuri programate intrate în lista de prioritate în cursul trimestrului, număr cazuri programate ieşite din lista de prioritate în cursul trimestrului şi număr cazuri programate aflate la sfârşitul trimestrului în lista de prioritate.

(2) Activitatea realizată se verifică de către casele de asigurări de sănătate în vederea decontării şi se validează conform prezentelor norme.

Decontarea lunară şi regularizarea trimestrială se realizează astfel:

1. Decontarea lunară în limita sumei contractate se face în funcţie de:

- numărul de zile de spitalizare efectiv realizate
- tariful pe zi de spitalizare negociat, diminuat în cazul sanatoriilor balneare cu contribuţia asiguratului conform prevederilor art. 1.

2. Trimestrial, se fac regularizări şi decontări, în limita sumei contractate, în funcţie de:

- numărul de zile de spitalizare efectiv realizate de la începutul anului până la sfârşitul trimestrului respectiv,
- tariful pe zi de spitalizare negociat, diminuat în cazul sanatoriilor balneare cu contribuţia asiguratului conform prevederilor art. 1.

În situaţia în care numărul de zile efectiv realizate este mai mic decât numărul de zile contractate, decontarea se face la numărul realizat.

În situaţia în care numărul de zile efectiv realizate este mai mare decât numărul de zile contractate decontarea se va face la nivelul contractat.

(3) Regularizarea şi decontarea trimestrială se fac în primele 25 de zile ale lunii următoare trimestrului încheiat, cu excepţia trimestrului IV pentru care regularizarea se face până la data de 20 decembrie a anului în curs pentru serviciile medicale realizate şi raportate conform contractului de furnizare de servicii medicale până la aceasta dată, conform facturilor însoţite de documentele justificative, urmând ca regularizarea finală a trimestrului IV să se efectueze în luna ianuarie a anului următor.

ART. 7 Pentru spitalele de recuperare şi secţiile/compartimentele de recuperare din cadrul unor spitale, contractarea şi decontarea serviciilor medicale de recuperare, medicină fizică şi balneologie se fac în condiţiile stabilite în anexa nr. 17 la ordin, din fondul aferent asistenţei medicale spitaliceşti.

ART. 8 Medicii care îşi desfăşoară activitatea în sanatorii/preventorii au obligaţia ca la externarea asiguratului să transmită medicului de familie sau medicului de specialitate din ambulatoriu, după caz, prin scrisoare medicală sau bilet de ieşire din spital - cu obligaţia ca acesta să conţină explicit toate elementele prevăzute în scrisoarea medicală, evaluarea stării de sănătate a asiguratului la momentul externării şi indicaţiile de tratament şi supraveghere terapeutică pentru următoarea perioadă (determinată conform diagnosticului).

ART. 9 Casele de asigurări de sănătate şi direcţiile de sănătate publică au obligaţia de a organiza trimestrial (sau ori de câte ori este nevoie) întâlniri cu medicii de specialitate din unităţile sanitare de recuperare, medicină fizică şi balneologie pentru a analiza aspecte privind calitatea serviciilor medicale din asistenţa medicală de recuperare, medicină fizică şi balneologie a sănătăţii, precum şi respectarea prevederilor actelor normative în vigoare. Acestea vor informa asupra modificărilor apărute în actele normative şi vor stabili, împreună cu medicii de specialitate din unităţile sanitare de recuperare, medicină fizică şi balneologie, măsurile ce se impun pentru îmbunătăţirea activităţii. Neparticiparea medicilor la aceste întâlniri nu îi exonerează de răspunderea nerespectării hotărârilor luate cu acest prilej.

ART. 10 Furnizorii de servicii medicale de recuperare, medicină fizică şi balneologie (sanatorii, preventorii) vor prezenta la contractare documentele necesare pentru fundamentarea tarifului pe zi de spitalizare.

ART. 8 Prescripţiile cu destinaţie pediatrică se decontează numai pentru medicamentele de folosinţă pediatrică, conform indicaţiilor producătorului de medicamente, cu excepţia cazurilor justificate în care vârsta şi greutatea pacientului impun utilizarea unei alte forme farmaceutice adecvate sau a unui alt medicament adecvat, după caz.

Borderoul va conţine şi codul de parafă al medicului, precum şi codul numeric personal al asiguratului, respectiv al titularului de card european de asigurări sociale de sănătate. În borderouri vor fi evidenţiate distinct prescripţiile întocmite de medicii de familie pe baza scrisorii medicale de la medicii de medicina muncii.

(4) din Contractul-cadru pentru anii 2011 - 2012 aprobat prin H.G. nr. 1389/2010, cu modificările şi completările ulterioare, pentru care se completează prescripţii distincte.

Casele de asigurări de sănătate au obligaţia să ţină evidenţe distincte pentru sumele decontate reprezentând contravaloarea medicamentelor din prescripţiile eliberate de medicii de familie pe baza scrisorii medicale de la medicii de medicina muncii.

(2) Borderourile se întocmesc în 2 exemplare, specificându-se suma ce urmează să fie încasată de la casele de asigurări de sănătate. Pe baza borderourilor centralizatoare, farmaciile vor întocmi facturi cu sumele totale ce urmează să fie decontate de către casele de asigurări de sănătate după caz, cu evidenţierea distincte a sumei corespunzătoare procentului de 40% pentru prescripţiile de care beneficiază pensionarii cu venituri de până la 700 de lei/lună suportate din bugetul Ministerului Sănătăţii prin transfer către bugetul fondului.

ANEXA 33

MODALITATEA

de prescriere, procurare şi decontare a dispozitivelor medicale destinate recuperării unor deficienţe organice sau funcţionale în ambulatoriu

ART. 1 (1) Dispozitivele medicale destinate recuperării unor deficienţe organice sau funcţionale în ambulatoriu, se acordă pentru o perioadă determinată ori nedeterminată, în baza prescripţiei medicale eliberate de medicul de specialitate aflat în relaţie contractuală cu casa de asigurări de sănătate, direct sau prin reprezentantul legal, şi numai ca o consecinţă a actului medical raportat de medicul de specialitate care a făcut recomandarea şi validat de către casa de asigurări de sănătate în condiţiile prezentelor norme.

(2) Prescripţia medicală se eliberează în 3 exemplare, dintre care un exemplar rămâne la medic, un exemplar însoţeşte cererea şi se depune la casa de asigurări de sănătate şi un exemplar rămâne la asigurat, pe care îl predă furnizorului de dispozitive medicale împreună cu decizia de aprobare a dispozitivului medical eliberată de casa de asigurări de sănătate. Prescripţia medicală trebuie să conţină denumirea şi tipul dispozitivului medical din Lista dispozitivelor medicale din anexa nr.32 la ordin. Prescripţia medicală va conţine în mod obligatoriu numele casei de asigurări de sănătate cu care medicul care eliberează prescripţia medicală se află în relaţie contractuală şi numărul contractului.

Prescripţia medicală va fi întocmită în limita competenţei medicului prescriptor.

(3) Prescripţia medicală pentru protezarea auditivă trebuie să fie însoţită de audiograma tonală liminară şi audiograma vocală, eliberate de un furnizor autorizat şi evaluat care se află în relaţie contractuală cu casa de asigurări de sănătate. Pentru copii, la recomandarea medicului de specialitate, audiograma vocală se poate excepta. Audiogramele conţin numele şi prenumele asiguratului, CNP-ul acestuia, data şi locul efectuării, dovada calibrării / etalonării anuale a audiometrelor utilizate.

(4) Prescripţia medicală pentru protezarea vizuală - implant cu lentile intraoculare - trebuie să fie însoţită de biometria eliberată de un furnizor de servicii medicale autorizat şi evaluat, aflat în relaţie contractuală cu casa de asigurări de sănătate.

(5) În cazul protezării membrului inferior, după o intervenţie chirurgicală, un asigurat poate beneficia înaintea protezării definitive, de o proteză provizorie. În această situaţie medicul care face recomandarea va menţiona pe prescripţia medicală modul de protezare şi tipul protezei definitive. În situaţii speciale, pentru acelaşi segment anatomic medicul specialist poate prescrie o altă protezare care să cuprindă atât proteză provizorie cât şi proteză definitivă sau direct proteză definitivă.

(6) Pentru dispozitivele de protezare stomii, în cazul pacienţilor cu stome permanente, medicul va menţiona pe prescripţia medicală "stomă permanentă".

(7) Pentru dispozitivele de protezare stomii şi incontinenţă urinară recomandarea se poate face şi de către medicul de familie pe lista căruia se află înscris asiguratul, aflat în relaţie contractuală cu aceeaşi casă de asigurări de sănătate unde este în evidenţă şi asiguratul, în baza scrisorii medicale/bilet de ieşire din spital transmisă de către medicul de specialitate aflat în relaţie contractuală cu casele de asigurări de sănătate. Prescripţia medicală va conţine în mod obligatoriu în acest caz şi numele casei de asigurări de sănătate cu care medicul de specialitate, care a transmis scrisoarea medicală/ biletul de ieşire din spital, se află în relaţie contractuală şi numărul contractului încheiat de către acesta sau reprezentantul legal; biletul de ieşire din spital va conţine obligatoriu şi explicit toate elementele prevăzute în modelul de scrisoare medicală.

(8) În prescripţia medicală se va menţiona obligatoriu că deficienţa organică sau funcţională nu este ca urmare a unei boli profesionale sau a unui accident de muncă ori sportiv.

ART. 2 (1) Pentru obţinerea dispozitivului medical, asiguratul, unul din membrii de familie (părinte, soţ/soţie, fiu/fiică), o persoană împuternicită legal în acest sens de acesta sau reprezentantul legal al asiguratului depune o cerere la casa de asigurări de sănătate în evidenţele căreia se află asiguratul beneficiar al dispozitivului, însoţită de un document justificativ care atestă calitatea de asigurat, actul de identitate (în copie), codul numeric personal - CNP, prescripţia medicală pentru dispozitivul medical şi declaraţia pe propria răspundere din care să rezulte că deficienţa organică sau funcţională nu a apărut în urma unei boli profesionale, a unui accident de muncă sau sportiv. Pentru copiii în vârstă de până la 14 ani se ataşează prescripţia medicală pentru dispozitivul medical recomandat, cu specificarea domiciliului copilului, şi certificatul de naştere (în copie), cu codul numeric personal - CNP. Copiile se vizează de casa de asigurări de sănătate pe baza originalelor.

(2) Prescripţiile medicale îşi pierd valabilitatea dacă nu sunt depuse la casa de asigurări de sănătate în termen de 30 de zile de la data emiterii. Nu sunt acceptate prescripţiile medicale în care este nominalizat furnizorul de dispozitive medicale sau cele care sunt eliberate de medicii de specialitate aflaţi în relaţie contractuală cu casa de asigurări de sănătate şi care reprezintă interesele unui furnizor de dispozitive medicale evaluat (reprezentant legal, angajat, asociat, administrator).

(3) În situaţia pacienţilor cu stome permanente pentru obţinerea dispozitivelor de protezare stomii, prescripţia medicală pe care este completată menţiunea "stomă permanentă" se depune împreună cu prima cerere la casa de asigurări de sănătate o singură dată într-un an calendaristic.

ART. 3 (1) Casa de asigurări de sănătate, în termen de cel mult 3 zile lucrătoare de la data înregistrării cererii, este obligată să ia o hotărâre privind acceptarea sau respingerea cererii. Respingerea cererii de către casa de asigurări de sănătate se face în scris şi motivat, cu indicarea temeiului legal.

(2) În cazul acceptării, cererile sunt supuse aprobării şi, respectiv, emiterii unei decizii de aprobare pentru procurarea/închirierea dispozitivului medical în limita fondului aprobat cu această destinaţie. Decizia se ridica de la casa de asigurari de sanatate de catre beneficiar, apartinator sau imputernicit legal in acest sens sau se expediaza prin posta in maximum 2 zile de la emitere in cazul in care asiguratul solicita prin cerere. În situaţia în care cererile pentru dispozitive medicale conduc la depăşirea fondului lunar aprobat se întocmesc liste de prioritate pentru asiguraţi, pe categorii de dispozitive medicale. În acest caz decizia se emite în momentul în care fondul aprobat cu această destinaţie permite decontarea dispozitivului medical, în ordinea listei de prioritate, casa de asigurări de sănătate fiind obligată să transmită asiguratului prin adresă scrisă, expediată prin poştă, decizia în termen de 2 zile lucrătoare de la data emiterii acesteia sau necesitatea revizuirii prescripţiei medicale, dacă este cazul. Modelul unic de decizie pentru aprobarea acordării unui dispozitiv medical este prevăzut în anexa nr. 35 la ordinul ministrului sănătăţii şi al preşedintelui Casei Naţionale de Asigurări de Sănătate nr …….. pentru aprobarea normelor metodologice de aplicare a contractului-cadru privind condiţiile acordării asistenţei medicale în cadrul sistemului de asigurări de sănătate pentru anii 2011 – 2012, aprobat prin H.G. nr.1389/2010, cu modificările şi completările ulterioare.

(3) Criteriile de prioritate precum şi cele pentru soluţionarea listelor de prioritate ţin cont de data înregistrării cererilor la casa de asigurări de sănătate şi de nivelul de urgenţă stabilite de serviciul medical al casei de asigurări de sănătate, cu avizul Consiliului de administraţie şi se aprobă prin decizie de către preşedintele-director general şi se publică pe pagina web a acesteia, precum şi de ponderea fiecărei categorii de dispozitive medicale din totalul dispozitivelor medicale acordate asiguraţilor, în condiţiile art. 117 alin. (2) din Contractul-cadru privind condiţiile acordării asistenţei medicale în cadrul sistemului de asigurări sociale de sănătate pentru anii 2011-2012, aprobat prin H.G. nr. 1389/2010, cu modificările şi completările ulterioare.

(4) Fiecare decizie se emite pentru un singur dispozitiv medical şi se eliberează în două exemplare, dintre care un exemplar pentru asigurat, transmis de casa de asigurări de sănătate prin poştă, şi un exemplar rămâne la casa de asigurări de sănătate.

(5) Decizia de aprobare pentru procurarea dispozitivelor de protezare stomii şi incontinenţă urinară este valabilă pentru perioada prevăzută în prescripţia medicală, care nu poate fi mai mare de 90 de zile calendaristice. Decizia de aprobare pentru procurarea dispozitivelor de protezare stomii şi incontinenţă urinară este însoţită de o anexă cu 3 taloane lunare, corespunzător lunilor aferente perioadei prevăzute în prescripţia medicală, conform modelului prezentat în anexa nr. 35 A la ordin.

(6) În cazul protezelor pentru membrul inferior, casele de asigurări de sănătate pentru un singur dispozitiv medical emit decizii distincte pentru acelaşi tip de proteză pentru ambele etape de protezare (proteza provizorie şi proteza definitivă). Decizia pentru proteza definitivă, se emite, la solicitarea asiguratului, după minimum 3 luni de la data la care acesta a beneficiat de proteza provizorie.

(7) În cazul fotoliilor rulante, acestea se vor acorda asiguraţilor pe o perioadă nedeterminată sau determinată - prin închiriere iar aparatele pentru administrare continuă cu oxigen se vor acorda pe o perioadă determinată prin închiriere, pe baza deciziilor de aprobare pentru procurarea/închirierea dispozitivelor medicale. Perioada de închiriere nu poate depăşi data la care încetează valabilitatea contractelor de furnizare de dispozitive medicale încheiate între casa de asigurări de sănătate şi furnizori. La încheierea contractelor, pentru dispozitivele medicale ce se acordă pentru o perioadă determinată, furnizorii prezintă lista cuprinzând tipurile de dispozitive şi numărul acestora pe fiecare tip.

(8) Decizia de aprobare pentru închirierea fotoliilor rulante şi aparatelor pentru administrarea continuă cu oxigen este valabilă pentru perioada prevăzută în prescripţia medicală care nu poate fi mai mare de 90 de zile calendaristice. Decizia de aprobare pentru închirierea fotoliilor rulante şi aparatelor pentru administrarea continuă cu oxigen este însoţită de o anexă cu 3 taloane lunare, corespunzător lunilor aferente perioadei prevăzute în prescripţia medicală, conform modelului prezentat în anexa nr. 35 B la ordin.

(9) Termenul de valabilitate al deciziei de aprobare pentru procurarea dispozitivului medical este de 30 de zile calendaristice de la data emiterii acesteia de către casa de asigurări de sănătate, cu excepţia situaţiilor prevăzute la alin. (5) şi (8). În cazul dispozitivului efectuat la comandă, furnizorul de dispozitive medicale înştiinţează casa de asigurări de sănătate despre primirea deciziilor de aprobare a acestor dispozitive medicale, în termen de maximum 10 zile lucrătoare de la data primirii acestora.

ART. 4 (1) Pentru procurarea dispozitivului medical, asiguratul, în cazul dispozitivelor la comandă (inclusiv pentru protezele auditive), sau, în cazul dispozitivelor medicale care nu sunt la comandă, asiguratul sau unul dintre membrii familiei (părinte, soţ/soţie, fiu/fiică), o persoană împuternicită legal în acest sens de către asigurat sau reprezentantul legal al asiguratului se adresează, în perioada de valabilitate a deciziei, unuia dintre furnizorii din lista furnizorilor de dispozitive medicale evaluaţi, cu care casa de asigurări de sănătate a încheiat contract, cu următoarele documente: decizia emisă de casa de asigurări de sănătate şi prescripţia medicală.

Împuternicitul legal al asiguratului nu poate fi reprezentant legal, asociat, administrator, angajat sau persoană care îşi desfăşoară activitatea într-o formă legală de exercitare a profesiei la furnizorul de dispozitive medicale ori la furnizorul de servicii medicale la care îşi desfăşoară activitatea medicul prescriptor.

(2) Pentru pacienţii cu stome permanente care în cursul anului calendaristic, după expirarea termenului de valabilitate a unei decizii, doresc să se adreseze altui furnizor de dispozitive pentru protezare stomii decât cel la care au depus prescripţia medicală cu menţiunea "stomă permanentă", este necesară obţinerea unei alte prescripţii medicale cu

menţiunea "stomă permanentă" care să însoţească decizia emisă de casa de asigurări de sănătate.

(3) În cazul dispozitivelor de protezare stomii, incontinenţă urinară, fotolii rulante şi aparate pentru administrare continuă cu oxigen, decizia va fi însoţită de talonul aferent lunii respective, urmând ca lunar să predea aceluiaşi furnizor şi celelalte taloane.

ART. 5 Lista dispozitivelor medicale destinate recuperării deficienţelor organice sau funcţionale în ambulatoriu, prevăzută în anexa nr. 32 la ordin, conform pachetului de servicii de bază, cuprinde termenele de înlocuire ale dispozitivelor medicale. Termenul de înlocuire începe să curgă din momentul în care asiguratul a beneficiat de dispozitivul medical.

ART. 6 (1) Decontarea dispozitivelor medicale care se acordă pe o perioadă nedeterminată se face de către casele de asigurări de sănătate, la nivelul preţului de referinţă valabil în momentul emiterii deciziei de aprobare pentru procurarea dispozitivului medical, pe baza facturilor emise de furnizorii cu care au încheiat contracte de furnizare de dispozitive medicale.

(2) Decontarea dispozitivelor medicale care se acordă pe o perioadă determinată se face de către casele de asigurări de sănătate, la nivelul sumei de închiriere valabilă în momentul emiterii deciziei de aprobare pentru închirierea dispozitivului medical, pe baza facturilor emise de furnizorii cu care au încheiat contracte de furnizare de dispozitive medicale.

(3) Furnizorul emite, în vederea decontării, factura însoţită de: copia certificatului de garanţie, declaraţia privind dispozitivele cu scopuri speciale pentru dispozitivele fabricate la comandă, după caz, conform prevederilor legale în vigoare, confirmarea primirii dispozitivului medical sub semnătura beneficiarului sau a aparţinătorului acestuia (membru al familiei – părinte, soţ/soţie, fiu, fiică, împuternicit legal), cu specificarea domiciliului, a actului de identitate şi a codului numeric personal - CNP sau a documentelor ce confirmă expedierea prin poştă, curierat, transport propriu sau închiriat şi primirea la domiciliu. Furnizorii de proteze auditive vor ataşa audiogramele efectuate atât înainte, cât şi după protezarea auditivă. Audiogramele conţin numele şi prenumele asiguratului, CNP-ul acestuia, data şi locul efectuării, dovada calibrării / etalonării anuale a audiometrelor utilizate. Furnizorii de dispozitive de protezare stomii, incontinenţă urinară, fotolii rulante - care se acordă pe o perioadă determinată, şi de aparate pentru administrare continuă cu oxigen vor ataşa şi talonul lunar. În cazul închirierii unor dispozitive medicale care au fost utilizate, furnizorii de fotolii rulante şi aparate pentru administrare continuă cu oxigen vor ataşa la prima facturare, după închirierea dispozitivului medical, şi dovada verificării tehnice.

(4) Decontarea în cazul protezărilor pentru membrul superior şi/sau inferior se face după depunerea de către asigurat, unul din membrii familiei (părinte, soţ/soţie, fiu/fiică), o persoană împuternicită de acesta sau reprezentantul legal al asiguratului, a documentului prin care eficacitatea actului de protezare este validată (confirmată) de medicul de specialitate. În cazul în care asiguratul, unul din membrii familiei (părinte, soţ/soţie, fiu/fiică), o persoană împuternicită de acesta sau reprezentantul legal al asiguratului, nu se prezintă la casa de asigurări de sănătate cu acest document în termen de 15 zile lucrătoare de la ridicarea dispozitivului medical, casa de asigurări de sănătate va valida (va confirma) din oficiu protezarea respectivă.

(5) În cazul protezelor pentru membrul inferior, decontarea se face pentru acelaşi furnizor, cumulat pentru ambele etape de protezare, până la nivelul de 125% al preţului de referinţă al protezei. Pentru proteza provizorie valoarea decontată va fi până la nivelul preţului de referinţă valabil în momentul emiterii deciziei de procurare, iar valoarea decontată pentru proteza definitivă reprezintă valoarea rămasă până la nivelul de 125% al

preţului de referinţă al protezei respective valabil în momentul emiterii deciziei de procurare a protezei definitive.

(6) Decontarea, în cazul protezelor auditive, se face după depunerea de către asigurat, unul din membrii familiei (părinte, soţ/soţie, fiu/fiică), o persoană împuternicită de acesta sau reprezentantul legal al asiguratului, a unui document de validare întocmit de către un medic de specialitate otorinolaringologie, pe baza raportului probei de protezare. Raportul probei de protezare cuprinde rezultatele testelor audiometriei protetice, realizate prin diferite metode (audiometrie tonală şi vocală în câmp liber etc.), efectuate înainte şi după protezare. În cazul în care asiguratul, unul din membrii familiei (părinte, soţ/soţie, fiu/fiică), o persoană împuternicită de acesta sau reprezentantul legal al asiguratului, nu se prezintă la casa de asigurări de sănătate cu acest document în termen de 15 zile lucrătoare de la ridicarea dispozitivului medical, casa de asigurări de sănătate va valida (va confirma) din oficiu protezarea respectivă.

ART. 7 Pe toată perioada de închiriere a dispozitivului medical, furnizorul, care rămâne proprietarul dispozitivului medical, va monitoriza utilizarea acestuia, având obligaţia ca în cazul recuperării dispozitivului după încetarea perioadei de închiriere la termen/înainte de termen să anunţe în termen de 15 zile lucrătoare casa de asigurări de sănătate cu care a încheiat contract.

ART. 8 (1) Certificatul de garanţie predat de către furnizor asiguratului trebuie să precizeze: elementele de identificare a dispozitivului medical (numele producătorului, numele reprezentantului autorizat al producătorului sau numele distribuitorului, după caz; tipul; numărul lotului precedat de cuvântul "lot" sau nr. de serie, după caz); data fabricaţiei şi, după caz, data expirării; termenul de garanţie.

(2) În cadrul termenului de garanţie asiguraţii pot sesiza furnizorul în legătură cu eventualele deficienţe ale dispozitivului medical care conduc la lipsa de conformitate a acestuia, dacă aceasta nu s-a produs din vina utilizatorului. În acest caz repararea sau înlocuirea dispozitivului medical cu altul corespunzător va fi asigurată şi suportată de către furnizor.

Se constata cresterea cererii de analize de biochimie de la 39.740 la 52.190, analize de hematologie de la 10.479 la 11.143 si a analizelor de biologie moleculara de la 785 la 1308.

Cresterea cererii de analize, a determinat cresterea cererii de reactivi de laborator si implicit a cheltuielilor pentru achizitionarea acestora , inclusiv a reactivilor pentru controlul intern de calitate si calibratori.

2. Achizitia de reactivi si materiale de laborator, nu a fost totdeauna in

concordanta cu cererile formulate de laborator prin Referate de necesitate (unele nu au fost onorate sau onorate cu intarziere), astfel incat au fost perioade in care au fost sistate anumite analize.

3. Controlul extern de calitate (participare la programe de control interlaboratoare) a indicat concordanta pentru bacteriologie generala si coproparazitologie, iar pentru hematologie unii parametrii nu au fost in concordanta, deoarece reactivii de control intern nu au fost achizitionati de la producatorul analizorului Sysmex .

4. Acreditatea analizelor de laborator:

Data de 12 Aprilie 2014 propusa de RENAR, pentru vizita de evaluare a fost amanata pentru luna Septembrie 2014, deoarece nu sau indeplinit cerintele standardului 15.189:
